In order to bring to the attention of my colleagues and the American press and public in general this information on Cambodia, I ask unanimous consent that the interview with John Barron be published in its entirety in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

CAMBODIA: THE FACE OF EVIL

Q. Mr. Barron, you recently wrote a book with Anthony Paul called *Murder of a Gentle Land*, the basic theme of which is that the Communists in Cambodia have imposed one of the most barbarous regimes ever to exist in world history. How did you go about collecting your information?

A. Beginning in October 1975, Tony Paul, two experienced colleagues from the *Reader's Digest*, Ursula Naccache, an associate editor in our Paris office, and Cathryn Clark, a senior reporter in our Washington office, and I undertook to interview as many refugees from Cambodia as we could find.

Tony and I went into the refugee camps all along the Thai-Cambodian border and over a period of 13 months, the four of us spoke to more than 300 people who had escaped from Cambodia and who were eyewitnesses to events transpiring there.

The refugees interviewed, from different parts of the country, represented all the socio-economic strata of Cambodian society, the educated, the untutored, the poor, the well-to-do, the peasant, the student and university professor. They also included all age groups except the very young.

Comparatively few of the people we interviewed could fairly be classified as having been supporters of the pro-western Lon Nol government and some had been active opponents of it. I think most would be characterized as having been politically apathetic, but most had enthusiastically welcomed the Communist conquest, not so much because they favor communism but because they craved peace above all else, and thought that peace would bring restoration of pre-war tranquility.

We did not feel, however, that despite the varied composition of the refugee sources, that they were enough; so we additionally monitored, or studied, all broadcasts of Radio Phnom Penh, the Cambodian capital, as published by the Foreign Broadcast Information Service, and all statements that we could note made by the Cambodian leadership. With the assistance of our research department in New York and our foreign editions, we endeavored to read everything reported in the foreign press about Cambodia. We also sought in Asia, France and the United States the counsel and guidance of scholars specializing in Cambodian studies and, finally, we consulted intelligence agencies, both American and foreign, in an attempt to check our data with what they had gathered through their own means.

Q. What did they say about the takeover immediately after the war, and what did they tell you about the general nature of the regime?

A. The testimony was strikingly consistent, and it reflects a pattern of action that was applied by the Communist conquerors throughout the land. In essence, on the morning of April 17, 1975, when the first Communist troops entered the capital of Phnom Penh, they were greeted extravagantly and warmly by the populace who viewed them as heralds of peace, auguries of happier times.

Within two or three hours, the Communists, using loudspeakers and going from door to door, ordered everyone, every man, woman and child, to get out of the city. The first institutions evacuated, for reasons still inexplicable to me, were the hospitals—patients bedridden and crippled, some just emerging from surgery, some dying, all patients were tumbled out of the hospitals like so much garbage. Those who were too incapacitated to walk were pushed in beds by friends or relatives; the unfortunate who had no friends and relative tried to push their own beds, some times with sticks as if punting.

People who resisted the order to leave the city, or who were perceived as being recalcitrant, were simply shot. The sheer physical task of moving more than three million people out of the city required several days; the streets were packed so tightly with humanity that in many instances it was possible to advance only 100 yards or so an hour.

Driving was usually impossible in this crush of humanity and in any case a few miles outside the city the Communists began to confiscate the cars.

While the city of Phnom Penh, and a few days afterwards the other cities of Cambodia, were similarly being emptied, the Communists mounted an organized assault on the physical sinews and symbols of pre-existing Cambodian society.

They ransacked libraries, offices, archives, burning books by the hundreds of thousands, books of every sort, medical libraries, dictionaries, textbooks, books on technology, priceless manuscripts, the records of government, of business. Literally any printed or written material became a target for destruction.

They smashed hospital equipment, wrecked furniture and threw the contents of houses into the streets to ruin. They despoiled and sacked the temples and overturned and vandalized cars by the thousands, cars symbolizing modernity and foreign technology. They destroyed many objects that could have been of use to them because they represented the old society and things foreign, and they were going to purge all Cambodia of all vestiges of the past, and all influences from outside the land.

Simultaneously, the Communists commenced the killing of former military officers and civil servants of the Lon Nol government. Many thousands were slaughtered in organized massacres conducted in the vicinity of the cities and outlying fields. Personnel who had been induced to surrender en masse were taken usually by truck or bus to outlying fields under various guises where Communist troops waited for them in ambush. The actual methods of extermination varied; they included artillery fire, the explosion of land mines, hand grenades, machine gun and automatic rifle fire, bayoneting, stabbing, garroting, bludgeoning—virtually any means you can conceive to do away with human life were employed.

Officers and civil servants who disguised their identity were killed wherever unmasked, and in a number of cases recounted by eyewitnesses, their families, including children and infants, were slaughtered along with them.

Meanwhile, the great march for which we can find no precise historical parallel, continued. Some people brought along bicycles, or carts on which they carried enfeebled relatives and such belongings as they had been able to assemble at the time of their sudden eviction. But most of the millions proceeded toward the bush and jungle on foot. Along the lines of march, troops guarded and goaded them onward, and simply shot those who refused or were unable to keep the required pace, which was rather brisk.

The temperatures at mid-day on the main highways leading out of Phnom Penh in that late April rose to above 100 degrees, and the nights were very cold. The dry season now ending had parched the flatlands, evaporating rice paddies and ponds and leaving fetid pools that were increasingly befouled by bodies and excrement.

The very young and very old were the first to die. Adults and children alike tried to quench their thirst from these foul ponds and consequently contracted acute dysentery which produced dehydration and death.

A Cambodian physician, Dr. Vann Hay, who was driven along with his patients from his clinic on April 17, spent about a month on various roads and trails before he escaped

to Vietnam. He told us: "We must have passed the body of a child every 200 yards. Most of them died of gastro-intestinal afflictions which caused complete dehydration. I had some medication with me, but most children brought to me required massive dosages and lengthy rest. Neither was available. I decided to save the medicine for those who had some chance of life. It was a terrible decision to take, but I could think of no other under the circumstances.

"Thinking of all the bodies I saw, plus the sick who came to see me, between 20 and 30 every day, half of whom were not going to live, I figure that between 20,000 and 30,000 people must have died the first month, just in the area described." He means the route along which he walked to Vietnam. The other major causes of death were typhoid, cholera, and sheer fatigue. There were no provisions, or almost none, made to provide these millions of people with potable water, food, shelter, and so they had to subsist on whatever they could forage along the lines of march.

The countryside soon resembled a vast dump as the people gave up belongings that they could no longer bear to carry—sewing machines went first, then pots and pans and then bedding, then the countryside was littered with cars that had been pushed from the road and overturned in the fields by the Communists. The countryside also was increasingly littered with bodies.

Some of the exiles were fortunate in that they were consigned to new settlements or villages a relatively short distance from the cities and thus, for them, the ordeal of the march lasted only a few days. Hundreds of thousands, if not millions, however, marched for weeks, goaded ever onward toward a destination and a fate that was unknown to them.

There were terrible scenes. Families who, now weakened, could no longer bear the weight of children or relatives too old or sick to walk, had to make a choice between leaving the beloved by the roadside, or trying to struggle onward and risking being shot, by not being able to keep pace.

I was struck by a scene that illustrates some of the difficulties of this epic exodus.

Among the tens of thousands of families marching south from Phnom Penh on National Highway 2 was a slender, pretty Khmer airline stewardess named Lon. She and her husband took turns carrying their four-month-old daughter Vathana. The infant was accustomed to canned milk because Lon, needing to return to work after childbirth, had not breast-fed her. Now the canned milk brought from Phnom Penh was gone and the mother's body was incapable of producing milk. Though Lon, herself, was suffering the effects of malnutrition and dehydration, she struggled to match the pace required by the soldiers, hoping somewhere to find sustenance for the baby. Finally, however, she knew she was going to collapse and in tears she begged her husband to forsake her to try to save her daughter and himself.

The husband hesitated, then reached for the baby. As he cradled her in his arms the child smiled and laughed at him. He turned back and through his own tears said to his wife: "We stay together." Friends who observed this scene and who, themselves had to quickly move on, understood, as probably did the husband, that he was really saying, "We die together."

The march continued for some people up to six weeks and with few exceptions and for virtually all it ended at some roadblock or some crossroads where a Communist commander would, as if casting a net into the sea, gather up an indeterminate number of bypassers and have them marched off into the jungle or into the bush, toward a new settlement. There were thousands of these new settlements and typically, in the beginning, a new settlement consisted of nothing except a demarked area. The arrivals, many of whom were used to sedentary life in the city, unaccustomed to physical labor and devoid of physical skill, were made to first build huts for themselves and they had to do this very often without any tools, unless they happened to have brought a knife or some instrument along with them. They pulled down bamboo and gathered leaves and fashioned a hut. Next, they were put to work clearing the jungle to prepare for the planting of rice, digging irrigation ditches and building dikes. The food ration in the early summer of 1975 generally consisted of one Nestlé's milk can of rice.

Q. How many people do you estimate to have died in this carnage?

A. No one can know precisely. I very much doubt that the Communists themselves know. Certainly hundreds of thousands have perished. Based on all data available to us, and consultations with a number of governments, Tony Paul and I concluded at the end of our research last year that between April 17, 1975, and Dec. 31, 1976, at least 1.2 million died as a direct consequence of Communist actions. Personally, I thought this total was too low and so did some relief workers in constant touch with refugees escaping to Thailand. But we were trying to understate the case. After interviewing many more refugees who had escaped this year, Tony last month wrote me that he also now is convinced that our original computations were too low.

Q. How many were involved in this massive exodus?

A. One must bear in mind the data on the population of Cambodia are imprecise and no one is really in a position to say in a scholarly way that can be documented just what the population of the country was; so we're working with the most authoritative estimates and a consensus of them.

That consensus is, and the Communists themselves have used the same figures, although I suspect they've just picked them up from Western sources, that there were approximately seven million residents of Cambodia at the end of the war. Of these seven million, approximately three million are thought to have been in Phnom Penh.

Now the normal population of Phnom Penh was much less, but as the people fled the countryside to escape the fighting, to escape Communist rule, and to seek food that was available through American aid in the cities, the population increased enormously, particularly in the last week. So we think there were about three million people in Phnom Penh; we believe there were approximately a half-a-million in the other cities, which were evacuated, and then we think there were probably another half-million people in larger villages in territories controlled by the government at the end of the war, and these villages also were emptied of people in time.

So there were, according to the best calculations we can make, approximately 3.5 million people banished from the cities, plus another half-million from the villages. So you have four million people we are speaking of.

Q. Who were force-marched into the countryside.

A. Into the countryside, into the jungle.

Q. And these cities just no longer exist at all? Have a few people been left behind?

A. There appears to be some life in Phnom Penh now. Again, even Communist diplomats stationed in Phnom Penh have difficulty making observations because they live under virtual house arrest and they cannot estimate even what the population is.

Q. It's still a functional capital?

A. Well, in the most rudimentary way. During the first months, after the evacuation of Phnom Penh, it was literally a ghost land. Phnom Penh University, for example, was turned into a banana farm, and pigs rooted around in the classrooms.

There were probably for many months no more than 20,000 people in the capital and the majority consisted of troops stationed there to make sure no one returned. But we are seeing second-hand reports that suggest that perhaps now there are as many as 50,000 and I saw one report suggesting 200,000, which perhaps is high. It is kind of city and there's some evidence that a little bit of life has returned to Battambang, which is the nation's second largest city. But, in general, the cities have been abolished.

Q. What is the motivation and philosophy of these Communist rulers? Even for a Communist government, this seems a bit extreme.

A. Everything that has been done in Cambodia has been done in the name of "Angka Loeu," which literally translates into English as the "high organization," but probably a better translation is the "organization on high."

Now this organization on high is controlled and directed by probably no more than a dozen men and women, certainly no more than two dozen, who exercise all power. Of the principal leaders we know quite a bit, and they are remarkably similar in background, experience and outlook. Allowing for a few exceptions, I can quickly generalize about them as follows:

They all came from middle-class families; all were educated in the 1950s in France; they all became ardent Communists at a time when the French Communist party was very much under the influence of the Stalinist wing of the Soviet party. They were all educated as lawyers, economists or teachers. They were all, or most of them, wedded to theory. They were all, with one exception, very puritanical, ascetic in their lives, and really would appear very honest in their personal deportment.

All of them had spent most of their adult life outside of Cambodia, or in the jungles detached from the mainstream of their country's life. None of them has ever worked with his or her hands, yet they were to extol physical labor above all else. And all of them were determined that they were going to realize the ultimate nihilist dream, the ultimate revolutionary dream, of obliterating the existing order—totally—so as to create in the consequent vacuum a pure and perfect society.

And this is what they undertook to do without regard to human or material cost. And you see in the evacuation of the cities, they advanced more rapidly and more swiftly than have any other revolutionaries toward the total obliteration of all that existed, because in a matter of two or three weeks the past was eliminated.

There were no more classes, because on the roads, and in the jungles everyone was suddenly equal, equal before disease, equal and vulnerable to the guns of Angka Loeu. No one had any property. Everyone was working at the same task, more or less. There was no more printed word, no more communications, no money, no colors, no religion. Soon, very serious inroads were to be made into traditional family life.

Cambodians, I might say, always had a happy attitude toward sex which they viewed as just a lovely adornment of life. Well, courtship is, unless licensed by Angka Loeu, punishable by death, as are extra-marital affairs. Children, just as in George Orwell's *1984*, are trained to be venomous, vicious little spies and are rewarded for informing on their parents, and some of them derive a heady sense of power from knowing that they can bring the execution of the adult whom they report.

The knowledge by the adults that anything they may say may be reported to Angka Loeu inhibits conversation in family life. Parents are forbidden to punish their children. They

can ask them to do things, but the children are under no obligation to obey. So you have the assault on the family, the assault upon religion, upon all traditional ways of things.

Q. Is religion abolished or suppressed the way it is in most Communist countries?

A. In practice, it is. Most of the monks have been impressed into the work gangs and those who persist in retaining their vows are persecuted.

Q. What kind of a society do they have? Do they have schools for children, or for young men and women?

A. Not really. The best evidence we have is that they are beginning to teach children the most elementary rudiments of reading and writing. The rest of the educational effort is ideological, political in nature. There are no universities. No schools, as such.

Question. What sort of ideology are they taught? Is it just a Communist philosophy?

Answer. They are taught their god is Angka Loeu, that their whole life, their every thought, their being, must be consecrated to Angka Loeu, the organization on high, any faltering, any deviation, will cause the Wheel of History, which is an instrument of Angka Loeu, to grind them down. They are taught to hate fiercely all things foreign, and particularly anything American, to consider that their life must be dedicated to toiling in the fields and serving the will of Angka Loeu.

Question. Is it to some extent similar to Communist China under Mao, at least early Mao, and to Russia under Stalin? Many of the terror instruments used for keeping the people in line seem to be similar.

Answer. Yes, I think you could find certain antecedents in Soviet and Chinese history, but, as they themselves boast, they intend to build the only true communism. They sneer at the Russians and the Chinese as not really being serious about this. After all, in the harshest, most homicidal periods of Soviet and Chinese history, the Communists retained cities, money, books, automobiles . . .

Question. But in China and Russia there was also a tremendous repression of individuals, the family life seemed to be similar in the sense that the children were asked to inform on their parents. There was a massive burning of books under Mao and Stalin, too. Mao had his fling at sending everybody to the countryside, and he had this idea even though he didn't carry it to the extreme that these rulers in Cambodia are carrying it.

Answer. The collectivization programs of Stalin in the early 1930s resulted in the mass deportation and extermination of millions of peasants. At least, however, these people were transported in freight cars and not made to march. What has happened in Cambodia is simply carrying revolution to its logical extreme. The Marxists have always asserted the creation of a classless society, and the Cambodian Communists have, in my judgment, come closer than anyone else in history to creating such a classless society.

Question. Except for the ruling class.

Answer. Yes, there is the tyrannical ruling class composed of a tiny fraction of the population.

Question. Is it the Communist party which rules?

Answer. The rulers are Communist, and they were members of the Communist party, but they mute their communism and invoke the term "Angka Loeu" in referring to themselves.

Q. Is it basically a peasant society now?

A. Yes, it's basically a society of serfs.

Q. Their economy must be wretched at this point. Or non-existent.

A. There is a detailed account in the New York Times of May 2 of which on the basis of our prior research I believe to be utterly accurate. And it depicts an economy that is in utter shambles and degenerating by the month, and this is inevitable. Given the methods they have chosen to follow, you can project with almost mathematical precision the trajectory that this society is following and see where it's going to end. And it's going to end in the death of a large portion of the remaining population.

Eventually, I suppose, when enough people have died, they will reach a level where they can feed themselves. Cambodia is a very fertile land and used to produce rice surpluses.

Q. Now it does not produce surpluses?

A. The welter of evidence is that even famine levels are periodically reached throughout the country.

Q. Is Hanoi in any way responsible for having brought this type of communism to Cambodia?

A. Very much responsible. It isn't my purpose now, nor was it our purpose in the book to recite, much less debate, the baleful history of the travail in Indochina that preceded the Communist conquest, but the historical facts that are relevant to your question show that after the removal of Prince Sihanouk, the North Vietnamese, with elements of seven divisions, attacked Cambodia in March 1970. And they attacked not in the name of communism, but in the name of Prince Sihanouk with the professed aim of restoring the Prince to his rightful throne.

They rapidly occupied as much of the territory of Cambodia as they could and there followed from North Vietnam between 5,000-6,000 Communists composed of Cambodians who over the years had been imported to North Vietnam, trained and kept in reserve for just such a contingency.

Now as the North Vietnamese acquired control of territory, the in-country insurgents, who were to form the leadership of Angka Loeu, moved in behind them and began to administer the occupied territory. Additionally, the North Vietnamese, upon withdrawing from Cambodia, were the principal source of supply for the Cambodian Communists and their insurgent allies who were not necessarily Communist. The North Vietnamese, therefore, contributed greatly to the success of in-country Communists.

Now of course an argument is made that the United States bears responsibility for these developments. The arguments may be summarized as follows:

The U.S.-South Vietnamese invasion of Cambodia in 1970, which followed by about 30 days the North Vietnamese, and the B-52 bombings of Cambodia which accompanied this American/South Vietnamese invasion and which continued in support of the Cambodian populace that large numbers of them gravitated to the insurgent cause. And, the argument goes, our intervention molded the attitudes and the xenophobia, and the fanaticism of the Khmer Rouge, the Communists who now control the country.

I don't know whether the Nazi extermination of millions of Jews was the result of actions or lack of actions that Britain and France took in 1938 and 1939. All that I feel competent to talk about with any certitude is what we know has happened since April 17, 1975.

Q. What is happening in the new villages?

A. Well, the routine of the new villages into which most outcasts from the cities are driven is approximately as follows:

The people are organized into work groups usually consisting of 10 families and there is a very elaborate hierarchical organization pretty much patterned along military lines with supervisors, group supervisors and village chiefs.

A gong awakes the people at 5:00 a.m., and they have a little while to prepare themselves to go into the fields where they work until 1:30 or 12:00. They have a mid-day break and then resume work around 2:00 p.m. and continue until 5:00 or 6:00 p.m. And then on moonlit nights they frequently work another three hours. On nights when work isn't required, they undergo political indoctrination.

The people are segregated in the fields by sex and children are assigned to different work groups: conversation is discouraged if not prohibited. There are no holidays and work goes seven days a week.

Any sort of infraction, violation of the work rules of the ordained regimen of life evokes what is called a *kosang*, a Khmer word which literally translates as construction. And a *kosang* is an elaborate ritual wherein the offender is required to stand before the village and abase himself, or herself, confess his sins and repent.

A second infraction produces another *kosang*, and these *kosangs* are very, very serious because everyone knows there is no third one. A third offense means that the offender will disappear, or be sometimes publicly executed. And so when somebody gets a *kosang*, everyone quivers.

Now, the least deviation—sexual behavior, domestic behavior—can produce a *kosang*. For example, husbands and wives are forbidden to quarrel, and a quarrel is grounds for a *kosang*, and this again is a very powerful factor in disintegrating family life, because knowing that a quarrel can lead to death inhibits people from even talking. It's better to say nothing to your spouse than to risk death.

There is no gaiety or amusement, as previously known, no recreation. There's no leisure time, there's not enough food. A boy and girl may not court, or plan their lives together without prior permission from Angka. They have to go and say we'd like to do this. Then they sort of get on the list and periodically there are mass marriages, but if you don't follow the prescribed procedure, you can be shot. I must say that women and children are almost never shot unless they are trying to escape. They are most normally put to death by being struck on the back of the neck with a hoe, or having their throats slit.

Q. You are talking about women and children?

A. Yes. Sometimes they are just beaten to death.

Q. Is there any sort of resistance?

A. We tended to discount those reports. But we have seen so many reports since that I tend to attach some credence to them now. I think that some refugees have gone back from Thailand to fight. There are reports of bands of anti-Communist guerrillas interdicting transport and functioning in the mountains.

I think that, unquestionably, the classic ingredients for an insurgency do exist in Cambodia. The Communist insurgency forces probably never numbered more than 60,000 or 70,000 men. They are spread very, very thin. The population is obviously quite disaffected.

Tens of thousands of people have risked probable death to attempt to escape through the jungles, though the jungles themselves pose great hazards and the borders are sown with mines and heavily patrolled, yet people risk all these perils rather than face what they consider to be inevitable death within the country. So were there any sort of external encouragement and sustenance of an insurgency, I would think that one would develop rather rapidly. The problem is, though, that where would it end and, absent a policy by the sponsoring powers, I'm not sure that the final result would leave the people any better off than they are now.

Q. How do the other Communist nations feel about Cambodia? Are they friendly, neutral, or what?

A. I think the Communists the world over are appalled and embarrassed and would like to disassociate themselves from what has happened in Cambodia. The Cambodians do not maintain relations with the Soviet Union. Their relation with the Vietnamese are strained and even hostile. Parenthetically, it should be noted that historically

there is a great animus between the Cambodian and Vietnamese people that transcends communism. It's ancient, deep and venomous. There have been numerous armed clashes between Khmer Rouge and Vietnamese forces and relations are quite bad.

Q. Do they get any sustenance or help in terms of aid from the Communist bloc?

A. They receive aid from the Chinese. The Chinese, it would appear, are the only foreigners with whom they have any kind of significant relations. They're terribly xenophobic. And they are also, in their sort of schoolboy way, rather haughty in considering themselves to be the supreme Communists and they look patronizingly upon other Communists who haven't had the "vision" and the "courage" to do what they've done.

Q. In terms of human rights, who is really speaking out on this? I know obviously you have. Has Amnesty International? I see that Sen. Frank Church (D.-Idaho) finally put something in the Congressional Record the other day. But I haven't seen any sustained criticism of this. There has been nothing from our own government, which is now interested in human rights. What can be done?

A. Dr. Ernest Lefever has published in the current issue of *TV Guide* a fascinating thoroughly researched study of media coverage of the events in Cambodia, and particularly television coverage. And his data show there has been shockingly little attention paid to this by the television networks, and that at least in the first months much of the coverage connoted an apology, or skepticism about what was happening there. On the other hand, the New York *Times*, the *Wall Street Journal* and the *Christian Science Monitor* have eloquently, forcefully denounced what has happened in Cambodia. But there have been no outcries from the people or most of the politicians about what has happened. The Human Rights Subcommittee of the House International Relations Committee, headed by Rep. Donald Fraser (D.-Minn.), has taken my testimony on this.

Campuses all over the United States were thrown into great turmoil in 1970 by students who in moral indignation were protesting our dispatch of troops to fight these very people. I vividly remember when I was en route to the Cambodian border, in the autumn of 1975, the Champs Elyées in Paris had been virtually wrecked by thousands of protesters demonstrating against the execution of five Spanish terrorists who rightly or wrongly had been convicted of killing policemen. And there was the outcry following the disclosure of the Mylai massacre. If these incidents were worthy of protests, surely we've got our priorities and standards out of balance when we fail to say anything about the extermination and continuing extermination of hundreds of thousands of Cambodians.

Q. Do you know whether Allard Lowenstein, who deals with human rights at the United Nations for the Carter Administration, will bring this up? Do you know whether Amnesty International has made any sort of protest?

A. No, I don't. Whatever protests have been made have clearly not been sustained.

Q: What about the Indochina Resources Center, which has been a supporter of the Cambodian regime? Does it still support it?

A: I don't know if it's even in existence anymore. There were attempts by some people in the United States to rationalize and justify the evacuation of the cities on the grounds that it represented not a death march, but "a march away from death," echoing the Khmer Rouge propaganda disseminated for foreign consumption. And those who espouse this theory reasoned that it was impossible to feed the people in the overcrowded cities and that therefore the Communists humanely had chosen to disperse the urban population into the countryside where it was reasoned there were supplies of food and they could be fed. It was admitted that perhaps in the haste and chaos some people would die, but surely not so many as would have starved had the cities not been evacuated.

Of course, subsequent events have made it very difficult to hold to this argument and one doesn't hear it anymore. I should say that the principal stocks of rice in Cambodia, at the time of the Communist conquest, were American supplies and had been airlifted into Phnom Penh, and stocks that had been cached in government-held enclaves around the other cities. And our data suggest that most of the rice that was dispersed to the people in the first months after the evacuation of the cities came from the American stocks in Phnom Penh.

Thus, the rice had to be taken from the cities out into the countryside. In any case, the evidence is overwhelming that there were no prior provisions to feed the people once they were scattered.

SUN DEFENDS FBI

Mr. CANNON. Mr. President, last week I introduced for the edification of the Senate a series of three articles dealing with the issues involved in the Justice Department's decision to prosecute one of their special agents, John J. Kearney. I found the series has increased my understanding of the problems involved and I am sure they will be helpful to my fellow Senators in assessing the future of the FBI.

I ask unanimous consent that the concluding four installments of the series be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Las Vegas Sun, June 27, 1977]

(Sun Defends FBI—Part IV)

SECURITY THREAT

(By Bryn Armstrong and Brian Greenspun)

The unprecedented prosecution of former FBI special agent John J. Kearney and others, not only will have an adverse effect on the individual agents and their families, but, more importantly, such action could have a devastating effect on national security.

Kearney's indictment for various counts of mail and wire interceptions stemmed from a massive manhunt in 1970–72 to blunt the violent offensive of the Weathermen underground which included the indiscriminate bombing of many public buildings.

There is no question that Kearney's superiors in the FBI and even the Department of Justice knew of the counter-measures employed against these malicious groups bent on the destruction of our public institutions and the accompanying loss of life as a part of such criminal acts. The fact that no one in authority ordered these counter-intelligence techniques abandoned gave Kearney ample reason to believe he was acting in a lawful manner to prevent further violence.

We are now faced with a dangerous prospect.

The sheer reluctance of U.S. intelligence and counter-sabotage operatives today to take effective action against our enemies domestic and foreign presents a clear and present danger to our national security. The continued threat of Kearney-type prosecutions in the future, coupled with the tremendous financial burden incurred for a defense, forces many of our top agents to consider their actions in a light different from that which will promote effective, speedy completion of their missions.

If our government cannot forgive Kearney his transgressions, how can the agents in the field today be assured that at some later date, an assignment given to them won't lead to their own ruination, fiscally and professionally.

It is unconscionable for our government to assign the responsibility of protecting our citizens, domestic and foreign, to individuals dedicated to that goal and then turn on them with criminal prosecution for acts committed to further that end. To impose sanctions retroactively is the height of governmental callousness and irresponsibility under such circumstances.

Kearney and the others were led to believe they acted lawfully during the early 1970s in their massive hunt for the promiscuous bombers. Years later, a judicial decision and an ill-applied code of morality makes such techniques subject to criminal action.

In the future, should any agent fail to use every available technique to pursue bombers or others who threaten our national security and safety, we cannot blame him, even if such a failure resulted in disaster or worse. No longer can we expect such allegiance.

Loyalty is a two-way street and the vassal cannot carry out the commands of his liege with unquestioned loyalty if that lord has betrayed others in as foul a manner as Kearney has been treated.

Kearney's plight is especially unfortunate because nowhere in the record is there the slightest hint of criminal intent. There is not one iota of evidence to lead to any conclusion other than that Kearney acted with the highest ideals and in the finest tradition of intelligence service to this country.

There is not one person who will dispute the fact that these agents acted solely for the purpose of forestalling and ultimately, stopping the indiscriminate bombings which had claimed lives and destroyed property on a nationwide basis.

Not only had numerous large businesses been damaged or destroyed, but the terrorists made clear their intentions with the bombing of the U.S. Capitol and the Pentagon.

Far from attempting to infringe on any citizen's constitutional rights, the FBI agents were attempting to thwart terrorists. They acted at all times in good faith in the belief that what they were doing was authorized and lawful under the circumstances.

It may be that in light of the events which caused the indictments to issue, that the rules should be changed to set down proper guidelines for actions in the future. But it would be the height of recklessness and a gross inequity to apply those new rules to events which had occurred prior to their being promulgated.

This is especially true in light of the long history of intelligence and counter-intelligence operations which have used mail openings and wire surveillance as recognized, sanctioned and approved methods of intelligence gathering. Approval came in many instances from attorneys general and presidents themselves.

As noted previously, prosecution was denied by the Justice Department against former CIA Director Richard Helms for authorizing a surreptitious entry in Virginia in 1971 because it "would be impossible to prove he (Helms) had intent to violate anyone's civil rights."

If the Justice Department could find no criminal intent on the part of the man who authorized and directed surreptitious entries, how can it find the necessary intent by Kearney who was acting under lawful authority and in the interest of the security of the country. The answer rings loud and clear that prosecution of Kearney and other agents just will not wash with the American people.

FATAL BLOW

(By Bryn Armstrong and Brian Greenspun)

The Justice Department's decision to prosecute former agent John J. Kearney has dealt one of America's great institutions, the Federal Bureau of Investigation, a perhaps fatal blow.

Kearney was a special agent charged with the gathering of intelligence on the militant Weathermen organization during 1970–72. He opened mail addressed to others and wiretapped their telephones. He employed these methods in an effort to apprehend these terrorists who were fugitives from justice.

One of the reasons for the high morale of the FBI is the keen sense of belonging which has permeated this elite law enforcement organization.

Agents have fulfilled their missions in the belief that their work was vitally important to the protection of our people and the security of our country. They acted with the full assurance that the methods of investigation used and the techniques employed to complete the assignments were backed 100 per cent by their superiors up to and including the President of the United States.

This is no longer the case.

No more can an agent, in light of the government's decision to prosecute, carry out orders without hesitation because of the doubt cast by the Kearney case. Now an agent in the field must evaluate the validity and necessity of each and every order he receives. He must make subjective judgments where before he could respond immediately with the assurance that his actions were right and proper under the circumstances.

Carried to the extreme, it would not be unusual to see agents clearing all orders with their own private attorneys, seeking to determine whether carrying out these orders would be appropriate.

Imagine a direct, secret order from the President being questioned by an agent and reviewed by an attorney! Delaying such an order long enough for a legal opinion could cause chaos in the intelligence community, not to mention serious jeopardy to sensitive assignments.

When the day comes that an agent must consult a lawyer or a law book before carrying out a lawful order issued for the security of the United States, that day the FBI receives a mortal wound.

This is not to say that all criminal prosecutions of FBI and CIA agents should cease merely because it would create a morale problem. Certainly, agents know full well the laws of this country and the consequences should they be violated.

The situation in Kearney's case is different, however. He had operated under well-established practices and techniques in an effort to obtain vital intelligence about Weathermen terrorists who were threatening unrestrained acts of violence.

Even after they had knowledge of these techniques, Kearney's superiors at the FBI and the Justice Department failed to take any action to delineate and define which areas could not be pursued. By not acting to restrain the agents, the Justice Department gave tacit approval of the methods and manner of the intelligence gathering activities.

Former Atty. Gen. Edward H. Levi said that the actions by these agents, if wrong, were "in large part the fault of the government, and indeed the Department of Justice itself.

"What really stands indicted is the government as an institution," he concluded. That very same government should take the blame for those practices rather than pass it along to loyal servants who acted with high ideals and unquestionable motives. This country will no longer accept finger pointing for the sake of political expediency.

Perhaps even a greater blow to the sensitive morale of this great institution, is the incomprehensible refusal of the Justice Department to support these agents financially in their defense of these charges. Incomprehensible because the actions for which they are charged occurred solely and completely under the direction of the Justice Department and FBI.

Even U.S. Atty. Gen. Griffin Bell acknowledges the department's moral obligation to defend these agents, but says that Justice cannot legally do so. President Carter's human rights stand should demand that these agents be supported for acts done in service to their country.

FBI agents are salaried and have little opportunity to accumulate an estate other than retirement benefits. The legal costs alone involved in a defense of this kind are enough to financially ruin the average citizen and certainly are beyond the resources of an FBI agent.

The picture is an ignoble one, a blot on the annals of the department.

An institution like the FBI, which enjoys the overwhelming support of the American people, who look to it as the protector of their freedom and guardian of their security, deserves better treatment. And so do the agents who risk their lives daily protecting their fellow citizens.

RIGHTS 'HERRING'

(By Bryn Armstrong and Brian Greenspun)

Some government officials advocating the prosecution of former FBI agent John Kearney on charges of wire tapping and mail openings while trying to thwart the terrorist bombing activities of the Weathermen underground cite the "Nuremberg" thesis as grounds for such a stand.

They note Nazi leaders were prosecuted for acts done under orders of their superiors and therefore FBI agents in the U.S. cannot rely on the defense they were merely following orders. The further argument is advanced that the Nazis accused of war crimes should have refused to follow instructions, because they were flagrant violations of human rights.

The analogy then made is that in adopting techniques of mail opening and wiretapping, FBI agents were violating basic rights enjoyed by Americans, and they, likewise, should have refused to follow orders.

That thesis is spurious and ridiculous on its face.

The Nuremberg trials involved prosecution of Nazi leaders for the most heinous of crimes against nature and mankind in history—indeed the consummate acts of genocide. These prosecutions included persons who not only participated in the mass destruction of human beings but also were proven volunteers and active participants in the conception and carrying out of genocide plans.

It is beyond belief that anyone of sane mind could compare the prosecution of Nazi war criminals for the wholesale slaughter of human beings with the charges against an FBI agent for opening mail and intercepting telephone conversations in an effort to prevent the indiscriminate bombing of public buildings and people across this country.

The atttempts to capture members of the terrorist Weathermen organization—criminals for whom fugitive warrants were outstanding—hardly falls into the same class of activity as the murdering of over six million people.

Similarly, the "civil rights" red herring profferred by various spokesmen for the Carter administration is likewise flawed.

The theory in that instance is since President Carter has advocated the advancement of civil rights in all nations of the world, he can hardly ignore civil rights violations by FBI men in his own Department of Justice.

This stance betrays a crucial lack of understanding of the President's crusade for civil rights. He is profoundly concerned about the utter deprivation by other governments of fundamental human rights, and laudably so.

The obvious mistake, however, is to equate the treatment by the Kremlin and other Iron Curtain countries of people who wish only basic human rights with the actions by FBI agents who tried to prevent the destruction of innocent people and the waste of multi-millions of dollars.

Humans lives are cheap in those dictatorships and human dignity is an elusive phrase, indeed.

The methods used by agent Kearney and others were nothing more than long-used, approved techniques for intelligence gathering made necessary under the circumstances of terrorist bombings and destruction.

There was no intent to deprive anyone of civil rights or privileges but merely an attempt to hasten the capture of dangerous fugitives known to have participated in bombings and threatening the further destruction by bombing, the most vicious form of promiscuous and indiscriminate taking of human life.

The way is clear. Atty. Gen. Griffin Bell can remove this blot on our nation by dropping this unwarranted prosecution of former FBI special agent John Kearney. By doing so he will be acting in the highest tradition of fair play, common sense and elementary justice. He will also restore the faith of the American people in our cherished judicial process.

EPILOGUE

(By Bryn Armstrong and Brian Greenspun)

The highest responsibility of a newspaper is to the public it serves and to the Constitution which guarantees that service.

When the action of our government becomes so incredible, both in reasoning and response, that it affects each and every one of us, newspapers are charged with the duty to make such information public.

During the past seven days, the Las Vegas SUN has set forth a tragic set of circumstances involving, specifically, former FBI agent John J. Kearney, and more importantly, the entire FBI and intelligence gathering apparatus of our country.

It is incumbent upon all newspapers to cry out against hypocrisy at all levels of government, especially when it emanates from the Oval Office itself.

The prosecution of Kearney will have a detrimental and possibly fatal effect on the future of the FBI and the security of the United States. The SUN has detailed the many reasons why this prosecution is needless, unwarranted and extremely dangerous to our security. We have done so with full knowledge that our position might be unpopular with some people in positions of authority. We have also done so in the firm belief that we are right.

The time has now come for all of us to stand together to let our elected representatives know that we choose the freedom of these agents over the malicious, life-destroying bombings perpetrated by the terrorist Weathermen organization.

At the same time, we must resolve to insure that in the future agents of the FBI and CIA will have clear, established guidelines controlling their actions. That way they can act swiftly and assuredly with the knowledge that our government will stand squarely behind its loyal servants.

Agent Kearney, and others like him, face total ruin, financially and socially, as a result of this ill-conceived prosecution by the Justice Department. President Carter's human rights movement is laudable, indeed, in its effort to restore human dignity throughout the world.

It is a crime itself, when in the name of human rights, our government must destroy the very lives which have worked so hard to insure that dignity.

The SUN has demonstrated the problem, discussed the reasons why the prosecutions should be abandoned and set forth a course of future conduct to help prevent a recurrence of these events.

It is time for the people to act. Like Paul Revere of Independence days, the people of this country must respond to the call and protest this irrational action by the government. Hypocrisy is no longer a way of life in American politics. Your feelings and thoughts must be heard in Washington where the control of this prosecution rests.

Let the President know that prosecuting FBI agents for actions which were condoned and encouraged by our government in an effort to stop needless bloodshed and destruction is not the way to restore human rights and dignity around the world. It is only a way to destroy our dignity and security at home. Let him know that human dignity demands that we stand up for what we believe, even if that stand is unpopular in high circles.

Let Atty. Gen. Griffin Bell know that misguided, hypocritical prosecution of FBI agents, who acted in our interests and for our security with the sanction of our government, is not in the American tradition of fair play.

Only this way can we rest easier at night. And so can the thousands of FBI and other intelligence agents who risk their lives daily so that our system of government can endure. They will know full well the measure of support of the American people for their actions and, knowing that, the FBI will remain a bastion of internal security and the greatest law enforcement agency the world has known.

UNPREDICTABLE BENEFITS FROM SIGNING THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, if we cannot guarantee that certain benefits will result from the ratification of the Genocide Convention, neither can we anticipate the unforeseen benefits from ratification.

One cannot detail what will happen when the Senate ratifies the convention. It is impossible to be sure that all atrocities now being committed will stop. It is equally impossible to state with certainty that new instances of genocide will not develop.

Since we cannot predict the results from Senate ratification of the Genocide Convention, we should not rule out the possibility that there will be unforeseen benefits.

To get an impression of the sort of results which can be obtained when the United States takes a position in support of human rights, one might look at the influence that President Carter's remarks have had on certain Eastern European situations. To take just one example, Yugoslavia recently pardoned a number of prisoners as the East-West Conference on the Helsinki Agreement opened in Belgrade.

Mr. President, the benefits from the ratification of the Genocide Convention cannot be ascertained with complete certainty. Let us not use this as an excuse for failing to sign the convention.

Although the benefits to the rest of the world are matters for speculation, one result for the United States is clear: signing the Genocide Convention will place this Nation on record as an opponent of one of the worst crimes against humanity.

AMERICA'S CITIES: AN URGENT CHALLENGE TO THE NATION

Mr. McGOVERN. Mr. President, the recent massive rampage of looting and destruction which accompanied the electrical power failure in New York has reminded us again of the desperate conditions which exist in our major cities. Millions of Americans reside in urban areas marked by miserable housing, crime-ridden streets, joblessness, and a culture of drugs and alcoholism.

During the first half of this year I offered a course each Monday night at Columbia University which led me to drive from LaGuardia Airport across Harlem on 126th Street. Each week I saw the conditions of misery, despair, and insecurity that mark that area. It is unfortunately all too similar to conditions in large parts of Detroit, Newark, Los Angeles, St. Louis, and other major cities.

The truth is that we have become two nations—not "one nation indivisible with liberty and justice for all"—but one nation of affluence and freedom and another nation where millions live in misery under the tyranny of joblessness and poverty. For 30 years we have assumed that the major threat to our national security was from Moscow, or Peking, Vietnam, Korea, or Cuba. I believe that the major threat to our security for many years has been the gathering storm in our cities. If we do not now begin directing at least as much of our attention and resources to the needs of our cities as we have heretofore devoted to meeting the challenge posed by adversaries abroad, then American society will decline and perhaps collapse.

We need to move now to engage the jobless of our cities in rebuilding and revitalizing those vital centers of our commerce and our culture. No American in village or farm or suburb can rest easy so long as the urban cauldron continues to boil.

The best statement of the urban challenge that I have seen in recent days is the lead editorial in yesterday's New York Times. I ask unanimous consent that this superb, courageous editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, July 19, 1977]

WHAT NEW YORK CAN DO FOR MR. CARTER

With misleading solemnity and precision, President Carter made a place for himself in the news of the New York blackout by demanding a full report from the Federal Power Commission—in exactly two weeks' time. (Nine days remain to deadline.) But that was a press-agent President at work or, at best, a White House that takes too seriously its press clippings about the President's talent as an engineer.

What New York can finally do for Mr. Carter is to broaden his sense of the national defense and Presidential duty. A President does not worry about generator nuts and bolts when the social fabric of the nation's largest city is exposed as inflammable. A President cannot confine himself to tension in Korea or negotiation with Israel when life's losers are rampaging in the streets of America, spreading blight and the disease of racism. Nor does he need yet another commission to discover that half the black and Hispanic youths in his major cities are out of work and out of hope and out of mainstream America.

The President prides himself on his knowledge of poverty in the rural South. But he need no longer pretend, as in his campaign, that this equips him to understand the culture of desperation that makes urban centers unlivable. A President who knows what he does not know about urban America would seize on such dramatic opportunities as the New York looting to inform himself and to rouse a nation. He would meet with looters and their victims and find a way to convey their nightmares to the rest of the land. And he would find ways to lead the nation to take up the burdens that it has unintentionally dumped upon New York and Newark, Detroit, St. Louis and Los Angeles. He would seek ways to have the Federal Government assume responsibility for more of the poorhouse costs that weigh upon these cities. He would struggle urgently to create the proposed national youth service corps and also programs for massive neighborhood rehabilitation, vocational training and job-placement services. (And as James Weighart observed in yesterday's Daily News, a President seeking to keep in touch with the American people would do better one week after the blackout to visit Brooklyn than the home of a fertilizer manufacturer in Yazoo City, Miss.)

Understandably, this was the year in which President Carter intended to sacrifice almost everything else for the design and adoption of a sound national energy policy. When he heard about a power failure, it was his energy program that he thought of first. So much depends on it, that the program rightly claims his highest priority. But a President so shrewd at recognizing political opportunity, and so in need of a memorable social program as well, might also seize upon the New York experience to ask whether welfare reform must really wait four years more, to ask whether job-creation and city rebuilding must really remain in the category of primitive and experimental Federal programs.

A lack of money can be a pretext for inaction but not a reason. The causes that Americans embrace in common can be afforded and enacted, whether they are called national security or unemployment insurance. The need in our cities is for both defense of the society and insurance against the unemployable underclass. That is not a noble way of defining our most urgent human problem, but anything would do for a President who cares to learn and then sets out to teach us to care.

It has been estimated that a National Youth Service Corps to enlist the energies of the idle in social reconstruction and personal rehabilitation might cost $15 billion. The large-scale Federal assumption of more welfare costs might cost $5 billion. Call these figures conservative. Imagine an effort that might cost $30 billion. What price millions of our fellow citizens properly motivated, educated and relocated in jobs? What price conquest of a social disease? What price habitable cities, with hundreds of billions of dollars worth of housing and transit already in existence, that law abiding citizens can find fit places for raising children? The

last President's fear of the swine flu cost the Treasury a quarter of a billion dollars and produced damage claims close to a billion. Another recent President's payoff to a single lobby of milk producers cost consumers nearly one billion dollars. The direct cost of the damage done in one night in New York last week is estimated at a billion, and a billion more each year in lost commerce and opportunity and taxes is inevitable if the damage to morale and property is not soon repaired.

But the issue is not what Mr. Carter can do for New York. The crisis exposed so devastatingly in our home city is not a special product of New York mismanagement or fiscal legerdemain. It points up a national danger that threatens dozens of communities, millions of homes and livelihoods. It points to a people waiting to be led.

KINCHELOE AIR FORCE BASE CLOSING AND DEFENSE ECONOMIC DEVELOPMENT AND RECOVERY ACT

Mr. RIEGLE. Mr. President, I have long believed that the Federal Government has a clear moral responsibility to help the people who suffer severe social and economic dislocation caused by the closures of major military installations such as Kincheloe Air Force Base in my home State of Michigan. Senator GRIFFIN and I are today jointly introducing the Defense Economic Development and Recovery Act which is designed to assist communities that have lost major military bases. This bill was developed in consultation with the Office of Economic Adjustment and is designed to assist President Carter in his effort to strengthen the role of the Office of Economic Adjustment in assisting communities that have lost major military bases.

In short, this legislation would:

First. Set aside 10 percent of the estimated 10-year savings achieved by the closure of a major military installation for those communities directly impacted by the closures.

Second. Require that the money set aside be distributed in the form of grants upon the approval of community applications for projects that must provide productive jobs. In order to cut down on paperwork and administrative duplication, applications would be processed through existing agencies and departments in cooperation with the Secretary of Defense.

Third. Require annual reports on the expenditures of the grant moneys and call for updated comprehensive planning to insure local accountability.

If passed by the Congress and signed by the President this bill would implement the recommendation made by the President's Defense Manpower Commission April 1976 report:

> Economic adjustment funds should be identified as a percentage of the dollars projected for savings from base closures or other realignments, and used toward the restoration of the economic health of impacted communities.

This legislation is desperately needed to prevent the devastation that could result to Chippewa County, the area primarily affected by the closure of Kincheloe. The Department of the Air Force estimates the following impacts: The 3,811 servicemen and civilian employees at the base who will be leaving could bring about a 24-percent population loss in the impacted area; there will be a 21-percent loss of school age population; a 13-percent drop in retail sales is expected; payroll in the surrounding region will be cut by 22 percent; the housing market will experience depression levels, specifically a 14-percent vacancy rate; most staggering of all, the Air Force projects an overall unemployment rate of 43.4 percent in the impacted area.

As several of my colleagues know all too well, other communities around the country are undergoing similar, although less severe, devastation from base closings this year and the Defense Department is looking ahead to another round of base closures in the next few years.

While the Defense Department's Office of Economic Transition is well intentioned, it lacks the requisite resources and stature to make the kind of contribution needed in Chippewa County and other similarly affected areas around the country. However, this is not simply a matter of economics. If the Federal Government continues to coldly ignore the impact these base closing have on the respective communities, then the broad public support for other defense programs will diminish. None of us wish to see that happen.

Again, I believe it is the Government's responsibility to see that areas that have opened their communities to provide local support for military bases receive similar support from the Federal Government necessary to adjust to the dislocation which base closures can cause.

Mr. Chairman, I urge my colleagues to give this legislation prompt and careful consideration.

HOUSING AND URBAN DEVELOPMENT APPROPRIATIONS CONFERENCE REPORT

Mr. BENTSEN. Mr. President, I simply want to make some legislative history here with regard to amendment No. 20 of the conference report, entitled "Health and Ecological Effect Program." The distinguished chairman knows of my interest in this section, for I have corresponded with him about it and also talked to him personally. On the House floor, when the additional $10 million was added for this section, the dialog between Congressmen BROWN, ECKHARDT, KRUEGER, and GAMMAGE made it plain that it was the intent of Congress that some of the funds appropriated here would be expended on an air quality study of the Texas Gulf coast area, a project which is authorized presently in the Senate version of the EPA R. & D. authorization bill.

The Gulf coast study is vitally important to the people of my State, who are not at all convinced that the EPA strategy to get oxidant levels down is the proper course to pursue in that area. EPA has concentrated on hydrocarbon reduction, yet the figures indicate that problems may exist along the Gulf coast which make that approach financially and ecologically unsound. We believe we have special problems with liquid and solid aerosols, with topographic and climatological conditions, and with a heavy petrochemical complex. These may call for alternate strategies rather than the present inflexible EPA tradeoff policy. This study should have nationwide importance, for it is necessary that whatever we do to reduce oxidant levels proceed from a sound data base; if it does not, we will be spending hundreds of millions of dollars on faulty cleanup strategies.

It is my understanding that a portion of the funds provided in this section of this appropriation bill shall be used to start up the study of the gulf coast area. We have made it clear in previous floor dialog that we do not believe EPA should conduct that study alone, but that it should involve environmental experts at the National Institutes of Health and from outside organizations in the region which are presently working on the problem. One important participant will be the Houston Chamber of Commerce, which is already spending more than $1 million on its own exploration of the problem.

Is it the understanding of the distinguished chairman that the Texas gulf coast study should be one of the projects to share in the $6 million that was added to the Senate bill in the conference committee?

Mr. PROXMIRE. I have received correspondence from Senator BENTSEN on this matter and I am aware of the legislative history made on the House floor. I am in accord with his interpretation that the Texas gulf coast study should share in these additional funds. The entire question of oxidant control, particularly in his region of the country, tied up the Environment and Public Works Committee for several weeks. I believe EPA should address this issue promptly with a portion of the additional funds we have provided in amendment 20.

FIVE-POINT PLAN FOR TAX SIMPLIFICATION AND REFORM

Mr. PERCY. Mr. President, George E. Barnes, a senior partner of Wayne Hummer and Co. and formerly chairman of the Midwest Stock Exchange, has worked during most of his distinguished career for a sound and sensible Federal income tax system. His first of several successful proposals to Congress—to gear salary and wage withholdings closely to tax liability—was made in 1943. Today, he states that—

> It is now imperative that our income tax laws be simplified as well as made more productive as the principal revenue source of the country.

As part of his commitment to the fulfillment of that need he has presented a five-point tax reform proposal to President Carter and to the House Ways and Means Committee.

In summary, Mr. Barnes' proposal calls for:

First. Simplification of the tax code.

Second. Taxation of earned and unearned income on the same basis.

Third. A gradual elimination of the double taxation on dividends.

Fourth. Increase capital investment by improving incentives and plugging loopholes.

Fifth. Replacement of the estate tax on capital gains with a uniform tax for all capital transfers.

Mr. President, Mr. Barnes' recommendations are well worth the thoughtful consideration of all Members of the Senate and I commend them to the attention of my colleagues.

I ask unanimous consent that the full text of the recommendations be printed in the RECORD.

There being no objection, the recommendations were ordered to be printed in the RECORD, as follows:

TEXT OF RECOMMENDATIONS

To the Members of the House Ways and Means Committee: Submitted herewith, for your consideration, is a tax reform plan to accomplish the following:

1. Simplify the Federal Income Tax Code to enable taxpayers to prepare their own tax returns again, by shortening the tax tables and raising the personal exemption to eliminate miscellaneous deductions from income.

2. Tax unearned income on the same basis as earned income in all brackets to eliminate discrimination, as well as fully repeal World War II tax on excess incomes.

3. Reduce gradually the double taxation impact on corporate income and make preferred dividends paid by corporations deductible by them for tax purposes the same as interest.

4. Stimulate the economy, and increase government revenues substantially by adopting a realistic capital gains tax that will encourage capital investments, plug present tax loopholes and reverse the trend of creating giant industrial monopolies.

5. Repeal the burdensome provisions of the 1976 Tax Reform Act which unfairly discriminate against estates and beneficiaries on all forms of property other than marketable stocks and bonds.

Reform of our Federal Tax Code is mandatory as a realistic way to help stimulate our economy and encourage maximum employment. Prompt reforms that are proposed herein will increase government revenue, decrease the cost of tax administration, and hopefully begin to reduce the National Debt.

The 1976 Tax Reform Act did not simplify, but instead, it has highly complicated tax preparation of tax returns. Personally, I have been helping friends and neighbors prepare their income tax returns for more than 50 years. Now, I find myself in the position where I cannot even prepare my own return without securing professional counsel. This has alerted me to the fact that different professional counsel cannot agree on interpretation of many provisions of the 1976 Act. I have concern also because I know of instances where the very health of people has been adversely affected by the additional burdens and complexities of the Act.

The provisions of the 1976 code discriminate for the first time against all capital investments other than listed securities. Land, buildings, private corporations and other forms of property require different treatment of capital gains, upon subsequent sales by executors and beneficiaries. These complexities which now burden the taxpayer will increase an already overburdened IRS. Thousands of government agents will have to be hired to examine the new complexities, extensive records will have to be established, and more taxes levied to support a larger IRS personnel. It is hard to believe such complex, unfair, burdensome and expensive legislation would have been adopted by Congress. One might say the 1976 Tax Reform Act may prove to be a blessing in disguise by making the country realize that a comprehensive overhaul of our Taxing System is truly necessary.

Following is submitted a tax proposal to simplify, and make constructive changes in the Federal Tax System:

1. SIMPLIFICATION OF THE FEDERAL INCOME TAX CODE

It is highly important to simplify and shorten Form 1040 to enable taxpayers to prepare their own returns again. If small deductions, miscellaneous credits, preference items of income, and the capital loss deduction from ordinary income are eliminated, this can be accomplished and government administrative costs greatly reduced as well. As one small example of waste, instruction forms accompanying Form 1040 now use a half page for state gasoline tax tables for use of taxpayers who keep no records of this tax. The elimination of this item alone would save Uncle Sam tons of paper and ink. Also, it is needless to spend millions and millions year after year reprinting and mailing yearly dated tax forms to taxpayers, when they could be made available at local post offices. Taxpayers would merely fill in the tax year. In the following plan, changes to higher revenue needs would not require new forms and new tax tables, because taxpayers could compute their tax liability in the regular way, and simply add whatever percentage increase would be approved by Congress. Conversely, if taxes are to be cut, a similar computation would apply. Either way, errors and costly paperwork would be reduced to a minimum and savings to both government and taxpayers would be colossal.

To accomplish this simplification, without loss of revenue, it is proposed that the personal exemption be increased from $750 to $1000 and the complicated determinations of alternate tax credits on Form #1040 lines 17A and 17B should be eliminated as well as the additionally following miscellaneous deductions:

1. State and local gasoline taxes on use of pleasure cars.

2. Sales taxes on personal items.

3. Present 1% exclusion on drugs and medicine and 3% exclusion on other medical items.

Your committee is urged to have the Treasury Department make some early studies on further simplification as follows:

1. Adoption of two rate tables in place of four to reduce disparities.

2. Elimination of three pages of tables showing tax on income of less than $20,000.

There is no reason for a single person, widow or widower, without dependents to pay 32% more than a married person in the $8,000 income bracket, 27% more in the $20,000 income bracket, and 11% more in the $200,000 bracket. Rates should be uniform for all taxpayers with fixed allowances for marital status, dependents and so forth. It would be much simpler, for example, to give a married person a uniform percentage reduction in the total tax liability.

By eliminating the full page tables on pages 24, 25 and 26, it would be much simpler at the beginning of the standard table on page 27, to add two or three lines. These expanded tables for 1976 have already resulted in countless errors in taking the tax from the wrong column. Moreover, tons and tons of paper and ink would be saved by Uncle Sam in eliminating these lengthly tables as well as the other proposals suggested herein to shorten the form.

2. TAX UNEARNED INCOME ON THE SAME BASIS AS EARNED INCOME IN ALL BRACKETS AND FULLY REPEAL WORLD WAR II TAX ON EXCESS INCOMES

Our tax code presently discriminates against unearned income. The top bracket rate is 70% on unearned income compared to a top rate of 50% on earned resulting in a percentage increase of 40% in tax. When this high bracket rate is added to the rate of taxpayers home State tax, the result is "confiscation", not fair and equitable taxation.

It is proposed that we return again to the same rate structure on all classes of income, to remove this disparity by placing a 50% ceiling on all income and to gradually lower the top bracket rate 2% each year for the next 5 years to 40%. Please believe this proposal will actually increase government revenues, as well as stimulate our economy. Higher rates are not productive for the reason that taxpayers seek tax-free or tax-deferred sources when the penalty is too great. For example, it is simply not equitable to tax income considered unearned, such as rentals, dividends and interest in a bracket substantially higher than the top income of executives, doctors, stockbrokers and lawyers whose income is considered earned.

Furthermore, it is unrealistic to think that capital will go fully to work with a tax penalty on income as high as 70%. Everybody loses, including Uncle Sam. Such high bracket rates are a carryover from World War II taxes on excess incomes which have never been fully repealed, except for corporations. Taxpayers are willing to be subject to such confiscatory rates in time of War, but not in time of Peace.

3. REDUCE GRADUALLY THE DOUBLE TAXATION IMPACT ON CORPORATE INCOME

It is not generally realized that the first Revenue Act of 1864 recognized the principle of not double taxing corporate income. (See copy of 1867 Federal Income Tax Return attached on page 11). Please observe that individual taxpayers reported on line 9 any income of corporations not paid out in dividends, or undistributed. A few years ago, small corporations were permitted to reorganize under subchapter "S", so as to eliminate all corporate income taxes by disbursing 100% of earnings in dividends to shareholders. This is not the answer for large corporations, or small corporations either for that matter, since funds are not available for growth and replacement of plant and equipment. At present, I happen to be counselling a subchapter "S" corporation as to whether or not to go out of business, or make a substantial bank loan to replace plant equipment. As an example of the double tax on corporate earnings, today a sole owner of an incorporated business, earning $1,000,000, drawing a salary of $100,000 and receiving the balance of the income after taxes in dividends, has only 21% left over before any State income tax liability.

Moreover, Uncle Sam has recognized the principal of excluding 85% of the dividend income of corporations, since I have been preparing returns beginning with the year 1917. In fact, I recently prepared a corporate return for a family owned company with substantial corporate stockholdings which paid little or no tax for the year 1976, for the reason that the company's principal income comprised dividends which are as stated 85% nontaxable. Also, I have before me the 1976 annual report of a well-known nationwide insurance company which reported common and preferred stock investment holdings as of December 31, 1976 aggregating $85,000,000 on which the income is 85% nontaxable.

There is a discussion in high places of entirely eliminating double taxation on individual incomes of taxpayers. It should be obvious that this cannot be done in one step, because present government revenues received from corporations closely approximates that received from individual taxpayers. This would shift a very high tax burden from corporations to individuals on salaries and other forms of income.

Therefore, it is proposed that the double taxation impact be reduced by gradually lowering the corporate rate of 48% by 2% in each of the next four years to a rate of 40%.

This would also enable corporations to help keep down prices to consumers, and minimize inflated prices for goods and services.

Next, it is proposed that the present exclusion of $100 on dividends received be increased to $500 and then increased $200 each year for a period of 5 years to $1,500. This would be supplemented with an exclusion of 10% on common stock dividends received in the year 1978, 20% in 1979, 30% in 1980 and 40% in 1981. (No exclusion on preferred dividends).

Finally, it is proposed that preferred dividends paid by corporations be made deductible by them before tax figuration the same as interest. Far too many corporations are building up an unsound debt structure today, instead of increasing their capital for the reason that interest is deductible for tax purposes. These changes will be most helpful in enabling corporations to raise needed capital for sound growth and expansion of employment. The added incentive to both corporate and individual taxpayers will generate additional government revenues.

4. STIMULATE THE ECONOMY, AND INCREASE GOVERNMENT REVENUES SUBSTANTIALLY BY ADOPTING A REALISTIC CAPITAL GAINS TAX THAT WILL ENCOURAGE CAPITAL INVESTMENTS, PLUG PRESENT TAX LOOPHOLES AND REVERSE THE TREND OF CREATING GIANT INDUSTRIAL MONOPOLIES

Proposed below is a much more realistic tax on capital gains that would substantially increase government revenues, and eliminate present loopholes and complications. The present code discourages capital investment and expansion with tax rates that vary as high as 38½%. Such a high bracket rate is creating giant monoplies in all industries by making it so prohibitive to sell. As a consequence,, small companies make exchanges of shares with larger companies on a tax-free basis. Every time you pick up a newspaper, you read of small companies being absorbed through the exchange of shares with larger corporations, furthering the trend toward monoplies. On the other hand, the government is spending millions to break up monopolies that they have in many instances created. In other words, the present tax kills the goose that lays the golden egg. The law is self-defeating—taxpayers avoid large capital gain penalties by either making lifetime gifts of property, or electing to defer sales until death. In other words, the present law does not work to the advantage of the government or the taxpayer.

Therefore, to give capital the freedom to stimulate our economy, reverse the monopolistic trend, and simplify the code, these changes should be made:

A. Provide for a separate return on all capital gains and losses or calculate the tax liability itself on Schedule D and bring it forward to page 1 of Form 1040 as an addition to any tax due on ordinary income.

B. Eliminate the present distinction between long and short term holdings. Holding an asset for one day, or more than one year, does not make such an asset an ordinary income item. Dealers in securities and other forms of property would not be affected, since their income from capital gains is already considered ordinary income and subject to regular income tax rates.

C. Eliminate capital loss deductions from other income. Capital losses should never be allowed to reduce ordinary income, but only used and carried forward to apply against capital gains in future years or at death. The additional provisions under the 1976 Act to increase this item from $1,000 to $3,000 results in a tax savings of $2,100 to an individual in the top bracket, and only a nominal savings to one in the bottom bracket. This single change would provide the government with substantial additional revenues.

D. Adopt a uniform tax rate on Capital Gains (less losses) not to exceed 12½%, on all transfers of property whether by sale, gift[1] or death. This would eliminate the need of a December 31, 1976 stepped-up valuation and other complicated determinations depending upon the length of time held. Moreover, the 1976 Reform Act still allows inherited and lifetime gifts of property to escape capital gains taxes from generation to generation. Under this proposal, the capital gain tax liability is easily determined and reported on Form 1040 before totaling the tax due on income from all other sources. It is that simple. In other words, capital gain tax liabilities would be fully paid during the taxpayer's limetime or at death, with no escapement or complex carryover liability to beneficiaries.

To test this out, I took several income tax returns for prior years, applied the 12½% rate, and found, under supervised scrutiny, that government revenues were increased with few exceptions. This is understandable, because the average taxpayer establishes tax losses each year to offset any gains and defers until death any large capital gain tax on holdings with substantial gain. This plan could double or triple government revenues, and at the same time remove the present disadvantage for a taxpayer to establish gains while living. It is not generally realized that the present structure on capital gains causes the withholding of property from the market place. Adoption of this proposal will increase the flow and supply of capital, and thereby fuel the economy—without the artificial inflation of values occuring because investors refuse to sell during their lifetime to avoid present exorbitant capital gains taxes. Why not provide an annual exclusion of $1,000 to eliminate reporting of small gains and to bring the small investor back into the market place?

5. REPEAL THE UNFAIR AND BURDENSOME PROVISION OF THE 1976 TAX REFORM ACT WHICH DISCRIMINATE AGAINST ESTATES AND BENEFICIARIES

Outright repeal is proposed of the 1976 Reform Act provisions requiring valuations as of December 31, 1976 for estates and beneficiaries on all listed securities as well as the cockeyed provisions of taxing gains on an entirely different basis than other forms of property. This is discriminatory, most unfair, and possibly unconstitutional. It permits capital gains escapement from generation to generation, whereas, proposal (4) above, applies a capital gains tax at death and on lifetime gifts. As set forth previously under the December 31, 1976 valuations, taxpayers will be obliged to retain counsel for years to assist in the preparation of income and estate tax returns. The complexities are beyond description and lead to nothing but confusion and consternation even among professional counsel.

In the interest of simplification, it is proposed that the six month alternative date on Inheritance Tax valuations be abolished in order to greatly reduce the government and taxpayer administrative costs as well as speed up the settlement of estates. It is proposed that Inheritance Tax valuations be based on the last "closing price" on listed securities and "bid price" on unlisted securities, to avoid complicated determinations of "mean price" on all future valuations. It is proposed to change the "settlement date" in determining capital gains to the "sale date", the same as on capital losses. These changes alone would save both taxpayers and government millions of man hours each year with little or no loss of government revenues.

[1] Not including contributions to religions, political, charitable and educational organizations.

In conclusion, it should be stressed that the new Congress must bear the burden of bringing about true tax reform so that taxpayers can again prepare their own returns. This proposal will result in a savings in government costs and paperwork beyond imagination and offers more stimulus to our economy than a general tax reduction. It also paves a sound way for assistance in Debt Retirement and balancing of the Federal Budget.

The opportunity to meet with your Committee to discuss these proposals further would be very much appreciated. The record shows that there have been Congressional acceptance of my proposals in the past. It is my hope that I can be helpful again.

Respectfully submitted,

GEORGE E. BARNES,
Senior Partner, Wayne Hummer & Co.

MAY 17, 1977.

NEW YORK CITY—WILL THE BLACKOUT HELP US HEAR URBAN AMERICA'S CRY FOR HELP?

Mr. KENNEDY. Mr. President, the shock that all of us felt over the tragic circumstances of the blackout and the destruction that came in its wake last week in New York City is still with us. It is a shock that does not easily subside, because it lays open, in a way that none of us can ignore, the deep wounds and simmering violence that lie just beneath the surface of our major cities—not just New York City, but many other major cities in many different parts of the Nation.

I believe that the Federal Government has an obligation to do all within its power to alleviate the immediate tragedy and to ease the burden of the severe financial losses caused by the blackout and the serious wanton destruction of property that followed.

I am pleased, therefore, to know that our two distinguished Senators from New York, as well as the able members of the city's congressional delegation, are moving quickly and effectively to help mobilize the available Federal resources to meet the urgent need and to provide aid to the countless innocent victims of the crisis. I am confident that both Congress and the executive branch in Washington stand ready to do whatever may be necessary to make such assistance available as promptly as possible.

But we cannot wash our hands of the problems by returning to business as usual after the cleanup and the repair work have been completed. A bandaid is not enough. A short-run solution is not enough this time.

We also have to become much more concerned than we have been before about the long-term future of our cities. It is fair to say that if we have had a national urban policy in recent years, it has been imperceptible to those of us in Congress who care about the cities. For too long, we have followed a piecemeal approach that has been seriously inadequate at best and culpably negligent at worst.

The cities and their people need jobs. They need housing. They need transportation. They need better schools and decent health care. They need all the other things that can make a difference in this rich country between progress

and retreat, between hope and despair, between peace and war.

I believe that the Federal Government has a much more active role to play in developing and coordinating a comprehensive all-fronts approach to the long neglected needs of urban America. Our priorities are wrong if we think we can ignore the problem, or cut the corners of the budget in ways that harm the cities.

It is not enough to have an economic plan, a welfare plan, an energy plan, a tax plan, or a national health insurance plan. We need all these, but we also need an urban plan, a plan for the cities, a plan capable of answering in a realistic way the cry we heard last week from the heart of our Nation's largest city.

So I hope that both Congress and the administration will commit themselves to a much greater effort than we have been willing to make before to deal with our worsening urban crisis. The handwriting is on the wall, and we ignore it at our peril.

Mr. President, in recent days, few have written more eloquently about this problem and about our abdication of urban responsibility than Pete Hamill of the New York Daily News. I believe his comments will be of interest to all of us concerned about the cities and I ask unanimous consent that his columns of today and last Monday may be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Daily News, July 18, 1977]

FIVE SOLID WAYS THAT JIMMY CARTER CAN HELP OUR CITY

(By Pete Hamill)

There is nothing left now but rubble and hope. More than property was ruined on the battlegrounds of Bushwick and Flatbush, Jamaica, Bed-Stuy, Harlem and the Bronx. Some illusions were destroyed, too. One illusion was that you could forever have one million human beings on welfare, and another 250,000 unemployed, and expect them to remain docile. Another was that you could treat such human beings with a policy of benign neglect and never reap the whirlwind.

And so the whirlwind arrived, and only the extraordinary discipline of the New York Police Department prevented widespread killing. More than 300 cops were injured on the Night of the Great Darkness, but they made more than 3,700 arrests, and did not have to fill the graveyards to do it. If a similar outbreak of looting and violence had taken place in a city like Los Angeles, where the grim legions of Police Chief Ed Davis would have out to do battle, they would still be counting the corpses. In New York, life still takes precedence over property.

It was also clear to anyone who moved around the city on Wednesday night that this was a riot against property, not against people. White civilians moved freely among blacks and Latinos without being attacked. Black, white and Latino businessmen were equally victimized. And in some cases, whites joined the looting. If there was ever any doubt that it is class that divides us, not color, Wednesday night should have provided the proof. In almost all cases, the goals of the looters were the same: They were taking those material things that they could not buy, and they destroyed what they could not take.

For a decade—since the heady days of the War on Poverty that was declared, but never fought—poor people have seen these material things sold on television. The purpose of television commercials is to make people want things enough to buy them. They never suggest that the items are junk or that even having all of them at once is no guarantee of happiness. Television commercials do not include cautions about morality or justice. They are as single-minded as hookers: First they get you to want the goods, and then they get you to buy.

But in most cases, poor people cannot buy. Welfare provides bare necessities: food, shelter, clothing. There is no margin in a welfare budget for air conditioners, remote-control TV sets, dishwashers, or cars. But the barrage of commercials are still being worked on poor people who feel, think and desire. Their hopes and desires are precisely the same as those of the middle class, and they are subject to the same commercial manipulation. There should have been no surprise that people would pile into a store under cover of darkness to take those things they had been instructed for so long to want.

This is not to excuse the terrible things that happened last Wednesday night, but to attempt to explain them. Hopefully, Jimmy Carter has begun to understand that all of his concerns about weapons systems, all his declarations on behalf of human rights, all his pleas for national morality mean nothing if he does not deal with the poor of this country. Wednesday night cost New York more than $1 billion. If the federal government had invested $1 billion in the creation of factories, some of that looting might never have happened.

Through every report of the dark night, the word "jobs" ran like a counterpoint to the main story. In the ghettos, unemployment among young people stands officially at 40%, and unofficially at 65%. That is outrageous. No society can contain that many idle people without risking self-destruction. Carter can look the other way, dismiss Wednesday's outbreak as an aberration in a city that itself is an aberration. Or he can move swiftly and decisively. Obviously, New Yorkers hope he will move.

Among other things, Carter can:

Order the Army in from Fort Dix and other Eastern bases and put them to work cleaning up the rubble-strewn slums. If New York was in China or France or Mexico, the blackout disaster would be recognized as a real responsibility of the central government. America's huge standing Army is doing absolutely nothing these days, aside from marching around drill fields and shining shoes. Let them leave their weapons home and come to this city with shovels and bulldozers and paint brushes and tools. Let them clean away the rubble and paint the buildings, let them go into the backyards and clean out the rotting garbage. Put them to work fixing boilers, broken plaster, smashed windows. Since New York helps to pay the salaries of these soldiers, New York should have the benefit of their labor in this emergency.

Ask Congress for immediate authorization to create 200,000 goods-producing jobs to be located in New York. Not make-work jobs, shoveling sidewalks or cutting grass. The Army can do that work. But bulding factories that employ New Yorkers in the creation of material goods that can be sold to other people. The government can do this in partnership with private enterprise. Tax breaks can be provided to make those goods competitive in the market place; what is lost in business taxes would be gained many times over in individual incomes taxes from people who would leave welfare. People who work pay taxes; people on welfare do not.

Tell the governments of Japan, Hong Kong, Formosa and South Korea that the honeymoon is over. If they want to continue selling goods in New York and other American cities, then they will have to build plants in those cities. We cannot continue losing jobs to other countries, particularly countries that we subsidize. A leader's first responsibility is to his own people. Imagine how de Gaulle would have reacted if Wednesday night's disaster had occurred in Paris. Jimmy Carter must consider the people of the South Bronx, Bushwick, Bed-Stuy and Harlem before he considers the feelings of foreign governments. It will do him no good to have relations with Japan, if New York isn't there any more.

Retrieve the Defense Department budget and chop big holes in it. Carter's decision on the B–1 was fine. But the defense budget still eats up an inordinate amount of this nation's taxes. We are not currently at war with anyone. We have no wars down the road that could possibly justify the disgusting amounts now being spent on armaments. We all know there can be no war with the Russians in the immediate future, because we would only destroy each other. A hunk of that defense money could be used to create a social-industrial complex. Put missile designers to work designing subway systems. Get all those generals to work building factories, instead of planning new forms of destruction. In short, use a hunk of that defense money on the needs of people, not the needs of a military bureaucracy in the Pentagon.

Go on television and make a speech that reminds the rest of America that New York has given them many things for many years, and that now the country will have to start giving something back.

New York has given America money, uncountable billions of dollars in taxes, that built highway systems all over the West, created space centers in Texas and Florida, paid subsidies to farmers, financed wars and research for wars. But more than money, New York gave America literature and art. It provided music for millions. It staffed America's hospitals with doctors educated in our free City University. New York gave birth to the movies. It gave America its greatest comedians. It trained America's finest actors. It nurtured America's greatest playwrights. It allowed America's finest dancers to shine. New York financed and built much of America's railroad system. In the years when nobody cared about such things, New Yorkers built America's first museums and libraries, and constructed a great public school system, and in doing so, this city benefitted all of America.

Carter could tell America about New York again: Remind the Americans that every kid saved from polio in the past two decades was saved by the discoveries of a New Yorker named Jonas Salk, who was educated by New York tax dollars. Remind them that New York took in wave after wave of the poor of Europe, gave them places to live, gave them jobs, and gave their children the freedom to leave, to go out into all the states of the nation, with skills acquired in New York, to help build a nation.

And he should remind them that even now, New York is doing for America what many American states will not do for themselves. We are housing America's poor. Not all of them. But far more than our share, we have tried to absorb the poor of the American South, the poor of Puerto Rico: People displaced by automation or bigotry. New York did not make them poor. They arrived in New York poor, at the very moment when our factories were moving to the Sun Belt, the Far East or South America.

If he told America those things, Carter would then have to add that it is time for America to do something for New York. This city is hurting. Its ghettos are burning. Its

poor fill the jails. Its streets are packed with idle people. This is a city that is getting rid of cops, firemen and teachers in a time when they are needed more than ever. This is a city that needs help.

NO HANDOUT, JUST JUSTICE

But this city does not want a handout. All it wants is simple justice. For most of this century, we gave. Now we need. The country that we helped make prosperous must respond, or be exposed to the world as a nation whose basic emotion is selfish indifference. And effective attack on our core problems will not be simple, and Carter and the Congress cannot take halfway measures. It was the halfway measures of the War on Poverty—helping a few people, widening the gap with others—that has led us to the perilous edge.

"The fellowship of suffering," said poet W. H. Auden, "lasts only so long as none of the sufferers can escape. Open a door through which many but probably not all can escape one at a time, and the neighborly community may disintegrate . . ."

We can't do it a little at a time. We can't be conned by the gradualists. We have to do it all at once. Create 200,000 jobs in New York and you eliminate welfare entirely, because each job will take three or four people off the dole. Those people can clear the land, build the factories, and then work in factories they have built. They will thus become people who pay taxes. They will make things that bring in money. And they will then become people who buy things, instead of taking them. The neopessimists will tell you it cannot be done. I don't believe it. I think it can be done, if the will is there, and the time to start is now.

[From the New York Daily News, July 20, 1977]

A FIRE GROWS IN BROOKLYN

(By Pete Hamill)

Suddenly the whole world was burning.

The fire rose tentatively from the basement of the old knitting mill at Knickerbocker Ave. and Bleecker St. in Bushwick, Brooklyn, reaching out, licking at the walls and the rubbish and the mounds of soggy textiles.

Firemen started to arrive out on the street. Then the fire climbed out of the cellar, full of defiance and rage, eating wood, twisting beams, roaring up through five stories, and then the windows blew out, and the building across the street was on fire, and more firemen came.

Now the heat in the city had reached 100 degrees, and this fire seemed to be reaching for the sun; trying to connect, to make a great fire storm, to revive Dresden, and the smoke belched out like a signal of power, and then the buildings behind the factory on Menahan St. were on fire, and the buildings across Knickerbocker Ave. were on fire, and the buildings down Bleecker St. were on fire and still the firemen came.

They kept coming across the afternoon: three alarms, then five alarms, and then a full-borough alarm, which is the equivalent of 10 alarms. There were 60 pieces of equipment here before they were finished, and 300 men, and still the fire raged. The smoke rose in a wild black plume, scattering across the sky, visible for miles. The house next to the factory swelled up, and then burst, spilling out onto the street, burying a red Dodge. Walls of brick fell to Knickerbocker Ave., crushing a parked gypsy cab, crushing nine other cars. Sirens tore through the afternoon. Police sealed off the streets. Children screamed in fear or excitement, running through the rivers of water. The few men who had jobs came rushing down from the Myrtle Ave. subway to see what could be saved. Firemen fell in the baking heat, and others came behind them, doing a job nobody else in this city knows how to do.

"I was asleep in my bed, takin' a nap 'cause it was so hot," said a small, thin girl named Tiny Lopez, 17, who was staying with friends in the first floor left at 224 Bleecker St. "The smoke woke me up, and I jumped outta bed.

"I pulled on my clothes and ran out, and all the fire engines were starting to come and there was a lot of noise. Then the house over there, 220, it was empty, it jus' fell. It came out, all the wood broke, and it came out, and it hurt the firemen, right over there."

Tiny Lopez was talking from the stoop in front of 224. It was night now, and down at the corner, behind the barricades, there were two giant cherry pickers and the firemen were still pouring water into the knitting factory, and into Marion Manor, a large brick structure across the street, where the local branch of the Bund had held meetings in the '30s, and which now was used for dances and bingo. A bank of powerful searchlights played against the roofless factory and still the fire smoldered and smoked, alive down below street level, under the fallen roof.

"It's the junkies," Tiny Lopez was saying. "The junkies come and they light their spoon, you know, where they have the dope, and then they drop the matches, and the fires start."

"Some of them set them for fun," said her friend, Ruben Perez, 18, who was helping guard her belongings until relatives arrived with a car from New Jersey. "They run around, with nothin' to do, man, kids 13, 14 years old, and they think settin' fires is fun. Crazy kids. And all these empty buildings are everywhere, all over, and the city don't come around and knock them down. So these kids and the damned junkies, they do, and we end up with this."

Perez looked around this corner of the midnight city: The searchlights blazing, the water coming in a steady, powerful stream, a few firemen off to the side smoking cigarets, the men from Con Edison working their way into the tunnels beneath the street to shut off the electricity. In front of him were the belongings of Tiny Lopez and the people she was staying with: a bowl of plastic flowers, some Spanish magazines, knick-knacks, a boxed Sure Shot Hockey Game. On the sidewalk was a ruined mattress.

"No use livin' in Bleeker any more," Perez said. "It's like all over. Everything's burning out. The whole place. It's like the Sou' Bronx, man. No use livin' here any more."

I walked down to Wilson Ave. with a young man named Angel Santiago. People were out on the stoops looking at the fire, listening to radios, drinking soda and beer. It was after midnight now, kids were running in the wet streets, A guy sat with a girl on a stoop, picking at a guitar. But Wilson Ave. smelled of death. One side of the street had been burned out six months ago, its windows looking like a hundred blinded eyes.

"It's all goin', man," Santiago said. "This is bad tonight, but things are gonna get badder."

At the end of Menahan St. you could see the glow of the searchlights, and realized what this resembled: It was the Blitz again, and we were in London in 1940, except that there was no Luftwaffe, and Ed Murrow was not broadcasting from the roof of the BBC, and nobody in Washington was listening.

"We complained and complained around here, about these buildings and the fires," said Santiago. "But nothing happened. Nothing ever happens, man."

Nothing happens in Bushwick, except death. The President of the United States was off seeing farmers, and the United States senators were talking about statesmen and laetrile and a lot of other matters. But in Bushwick, 85% perrcent of the adults were unemployed, out of a total population of 225,000 (more than the entire city of Des Moines, Iowa.) More than 40% of the people in Bushwick were on welfare. There are 3,000 students in Bushwick High School, which was designed for 2,000, and they are dropping out at the rate of 400 a year. This is in a place that started out as a Dutch village in 1660, a place where the first black citizens worked on tobacco plantations, a place that grew into a gorgeous urban hamlet full of trees and churches, when New York was a great big beautiful town.

"FIRES STARTED THREE YEARS AGO"

"The fires started three years ago," said Santiago. "And they never stopped."

At the corner, in this neighborhood that loses one building a day to fires, people stood behind police barriers in front of the storefront headquarters of the Dover Sewing Machine Corp. Across the street, you could stare through the shattered windows of the Iglesia Metodista Unida, at the long black strips of fallen beams where the roof had collapsed in the heat. Signs in Spanish offered summer Bible classes. The street was covered with hot slate that had fallen from the peaked roof. The church smoldered, abandoned by God and man.

Across Knickerbocker Ave., Miguel Landin stood in the doorway of his store, a corner bodega called Johnny's Food Center. The building upstairs was completely destroyed. Landin had a rented panel truck pulled up on the sidewalk and he and his friends were carrying out those goods that were not destroyed in the fire: canned beans, cases of beer.

"I lost everything," he said, close to tears in the cloying, smoky heat. "I don't know what to do. I saved and saved and saved, and my family helped me, and we open the store eight months ago, and now it's gone. I don't know what is going to happen now. What is going to happen?"

RED CROSS HELPS

Through the night, the Red Cross helped relocate the homeless, and the Salvation Army fed coffee to the cops and firemen. But there seemed no way to answer the man's question. What was going to happen? Probably nothing good. We would just burn down. That's all. We would burn.

By morning, scavengers had already begun to move through the abandoned buildings, stealing copper pipes, plumbing fixtures, radiators, anything that could be sold. Eleven cars lay squashed under piles of Brockway brick. Young people helped empty the basement of the Methodist church, stacking religious books on top of chairs and desks. In the backyard of one of the burned-out houses, you could see the scorched frame of a child's swing, moving gently in the breeze.

On the corner of Bleecker and Knickerbocker, a cop stood under a One-Way sign whose white paint had been scorched yellow. Behind him, the entire building above the Ruth and Sam Book Shop had caved in, as if some ferocious giant had stomped through the neighborhood on his way to Manhattan. A blackened bathtub lay in the rubble. A stove was upside down, its white ceramic burned black.

WATER DRIPS FROM PIPES

A man from Brooklyn Union Gas chopped at the gutter with a jackhammer and, behind him, water dripped from the pipes of a third-floor bathroom, falling steadily into the rubble of what had once been the homes of human beings.

Across from the bookstore, there was a small triangular park. Behind its picket fence, a statue of a bareheaded enlisted man stood with a rifle. His helmet was beside him, cast forever in bronze. At the base of the statue were the following words

To the Memory
of the Bushwick-Ridgewood
Boys who Served in the
World War, 1917–1918

There were three floral wreaths beside the statue. The soldier, the tip of his bayonet

broken off, stared out at the ruins of the country he had fought for; a country called Bushwick, with church steeples among the trees, a place where you hoped you could live and marry and raise children and die, all in the proper time.

But that country, Little Old New York, the country where George M. Cohan wrote the war songs, was gone forever. The soldier stood in his little park, with everything before him reduced to rubble, the Salvation Army cups lying at his feet in the sour grass. If he had been given eyes, you could not have blamed him if he thought he had lost the war.

GEN. CASIMIR PULASKI

Mr. PERCY. Mr. President, it is a source of justifiable pride to American Polonia that two of the great men of American history, Casimir Pulaski and Thaddeus Kosciuszko, were of Polish birth. I am reminded of this by the fact that July 23 will mark the 200th anniversary of Casimir Pulaski's arrival in America. It is a date to be remembered not only by Polish Americans, but by all Americans who cherish their Nation's history.

Both Pulaski and Kosciuszko performed brilliantly in the American revolution and their memories have been much honored. As early as 1825, for example, General Lafayette laid the cornerstone for the Pulaski monument in Savannah. It was off Savannah on an American ship that General Pulaski lost his life during a gallant attack on British forces.

To insure that the bicentennial of Casimir Pulaski's arrival in America is appropriately celebrated, Aloysius Mazewski, President of the Polish American Congress designated a group of distinguished Americans to form a Casimir Pulaski Commemorative Committee, chaired by Dr. Edward C. Rozanski of Chicago.

Others on the committee include Henry Archacki, New York; Hilary Czaplicki, Philadelphia; Henry Dende, Scranton, Pa.; Jan Krawiec, Chicago; Maria Lorys, Chicago; Tadeusz Maliszewski, Hartford; J. K. Miska, Falls Church, Va.; Evelyn Pacyna, Detroit; Gen. Joseph Pieklik, McLean, Va.; Edward Pinkowski, Philadelphia; W. J. Pisarski, Dorchester, Mass.; Dr. Walter Sikora, Chicago, Reinhold Smyczek, Old Bridge, N.J.; Joseph Wiewiora, Chicago; and Henry Wyszynski, Philadelphia.

I am confident that this splendid committee will find a public eager to commemorate the anniversary of General Pulaski's arrival in this country, just as we do here in the United States Senate this week.

NORTH CAROLINA URGES WHITE HOUSE CONFERENCE ON AGING

Mr. CHURCH. Mr. President, on May 3 I introduced a joint resolution, Senate Joint Resolution 48, calling for a White House Conference on Aging in 1981. Representative CLAUDE PEPPER introduced companion legislation in the House on the same day.

At that time I said that much progress has been made since the 1971 White House Conference on Aging. But I also had to point out that:

First. At the end of this century there may be more than 35 million persons 65 years of age or older, as compared to 22 million today.

Second. At present nearly 3.3 million older Americans have incomes below the official poverty level and another 2 million or so are barely above.

Third. The pressing need to assure adequate income is compounded by the need to improve health care and make it more readily available, to expand housing opportunities, to improve social services, and to develop a national retirement policy responsive to the needs of older persons while taking new steps to overcome age discrimination in all areas of our society.

In short, a third White House Conference on Aging is needed to assure that the momentum generated by previous White House Conferences does not falter and die.

Recently I enjoyed participating in the North Carolina Governor's Conference on Aging in Raleigh. I learned then that the General Assembly of that State has ratified a joint resolution urging the Congress to enact legislation calling for a White House Conference on Aging. I welcome their action, and I ask unanimous consent to have the text of the ratified bill printed in the RECORD.

There being no objection, the ratified bill was ordered to be printed in the RECORD, as follows:

HOUSE JOINT RESOLUTION 1523

Whereas, in 1960 and again in 1971, there was held a White House Conference on aging at which substantial steps were made in assessing the needs of older people throughout the Nation and in meeting those needs;

Whereas, the fastest growing segment of the population is represented by the aging group (65 and older); and

Whereas, in order to do effective planning for their increasing numbers through the year 2000, we need a conference in 1980 or 1981 to build on the experiences of the previous two conferences so that the needs of this group will be recognized and planned for in advance; and

Whereas, North Carolina took an active role in both of the previous conferences which resulted in wide activity in the way of meetings statewide and smaller meetings throughout the State which helped to focus within the State on problems and needs of the over half million North Carolinians 65 and over; and

Whereas, it will benefit the State of North Carolina to have this national focus because it will mean an increased focus generally;

Now, therefore, be it resolved by the House of Representatives, the Senate concurring:

SECTION 1. That the General Assembly of North Carolina does hereby urge Congress to enact enabling legislation looking toward the planning and financing of a White House Conference on Aging in 1980 or 1981.

SEC. 2. That a certified copy of this resolution be sent by the Secretary of State to United States Senator Frank Church and United States Representative Claude Pepper.

SEC. 3. This resolution shall become effective upon ratification.

In the General Assembly read three times and ratified, this the 1st day of July, 1977.

CHALLENGING THE ASSUMPTIONS ABOUT SURFACE TRANSPORTATION REGULATION

Mr. PERCY. Mr. President, many of those opposing regulatory reform have repeatedly claimed that the consuming public would suffer inordinate costs, in both the price and the quality of goods and services, should certain types of Government regulation be relaxed. While there is a clear and compelling need for Government intervention in some areas, in others, regulation has either outlived its usefulness or strayed far from its original intent. Frequently, it has proved more of a burden than a benefit, to both producer and consumer.

These concerns have prompted myself, Majority Leader BYRD, Senator RIBICOFF, and 41 of our colleagues in the Senate to sponsor the Regulatory Reform Act of 1977. This measure evolves from the belief that we must identify those instances in which the costs of regulation have begun to outweigh the benefits and must move to make the legislative changes necessary to correct these imbalances. A unique feature of this bill is that it would require the President and Congress to clearly define and analyze our long-unexamined asumptions about the nature of and need for Federal regulation of industry and commerce. If enacted, it would compel the executive and legislative branches to subject the arguments in favor of continued regulation to painstaking critical scrutiny.

A brief but significant example of the type of analysis envisioned in this bill appeared in the May 16, 1977, edition of Business Week, in an article entitled "Regulation's Phantom Benefits—ICC Style." In this piece, the author, Seymour Zucker, casts a critical eye on a cost-benefit evaluation of surface transport regulation recently released by the Interstate Commerce Commission's Bureau of Economic Analysis.

Mr. Zucker finds the study to be riddled with examples of faulty economic reasoning, internal contradictions, and bias in the selection of evidence. The authors of the study, Mr. Zucker finds, turn the accepted pattern of economic analysis on its head by assuming away the very proposition they seek to prove—that total deregulation will lead to a rise in transportation costs. In fact, the body of the report, according to this article, indicates exactly the opposite: that ICC regulation has served only to inflate the costs of road, rail, and water transportation, with no offsetting benefit to consumers.

Mr. Zucker's cogent point-by-point rebuttal of the arguments presented by the ICC in defense of its continued existence constitutes exactly the sort of approach to regulatory reform that Congress and the President should exercise on a much broader scale. His essay is thoughtful and clearly written, and I recommend it to my colleagues.

Mr. President, there have been some encouraging signs recently from the ICC, just as there have been from CAB, that the Commissions themselves recognize the need to reform the regulatory process. I will continue to report on these trends from time to time. Mr. President, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REGULATION'S PHANTOM BENEFITS—ICC STYLE

The Interstate Commerce Commission relies on the 25 economists in its Bureau of Economic Analysis to provide economic evi-

dence for deciding major rate cases and setting transportation policy. But the quality of a recent cost-benefit study by the bureau—highlighted in ICC's Transport Economics, just out—raises serious questions about the adequacy of the economic advice that the ICC is getting. And by authorizing the study's release, the commission shows signs of being unable to distinguished between solid economic analysis and its tissue-thin imitations.

The study, entitled "A Cost and Benefit Evaluation of Surface Transport Regulation," is a response to the continuing assault by independent economists, who say that ICC regulation of the nation's trucks, railroads, pipelines, and waterways is costing the economy dearly in higher freight bills. Not so, say the bureau's economists, calculating that ICC regulation benefits the nation to the tune of $4.4 billion a year of which trucking regulation accounts for $4.1 billion.

Cost-benefit analysis is a technique that, in the hands of a skillful economist, can be a powerful, objective tool for determining whether a government program is in the best interests of the nation. It can subject the costs and benefits of government regulations and programs to the same kind of rigorous analysis that a business executive makes in deciding on a capital investment. But in the hands of the ICC bureau's economists, cost-benefit analysis turns into something quite different.

WRONG FROM THE PREFACE

The preface to the study states: "It was assumed that as a result of total deregulation of the surface transportation industry, rates would surely increase." Yet the call of private economists for substantial deregulation, especially in trucking, is based on their case that rates would be lower, as they already are in nonregulated agricultural trucking. The controversy over regulation hangs precisely on whether rates would fall or would rise. Instead of addressing this issue, the study, without offering any evidence, simply assumes that deregulation would mean higher freight rates.

Indeed, the body of the report indicates just the opposite. The first purported benefit under current regulation, amounting to $35 million a year, is the lower cost of capital financing that trucking companies now enjoy. The study claims that the industry would have to pay higher interest rates on debt capital and have to shift from equity financing to more expensive debt financing. But if deregulation were to raise freight rates and increase the degree of monopoly as the bureau assumes, just the opposite would happen. Monopolists command very favorable rates in financial markets.

Aside from this contradiction, the study errs in claiming that a shift from equity financing to debt financing would cost the trucking industry, and presumably the public, $23 million a year. The bureau estimates the cost of debt capital at 10%, which is approximately correct, but it commits a glaring error in taking the dividend payout rate of 5% as the cost of equity capital. By this reasoning, a company that pays no dividends should have a zero cost in selling new equity.

Says Harold Bierman, of Cornell University's Graduate School of Business and coauthor of The Capital Budgeting Decision: "In a regulated industry, the best measure of the cost of equity capital is the ratio of earnings to the market price of the stock. A student using the dividend rate would get an 'F' in my course." Using the price-earnings ratio rather than the dividend rate eliminates the bureau's alleged benefit entirely.

The bureau's economists, it seems, would receive an "F" not only in corporate finance but in Economics 101 as well. If regulation enables trucking companies to borrow at more favorable rates than they would under competitive conditions, capital resources are currently being misallocated. They are being diverted from other sectors to the trucking industry. This is not necessarily a benefit to the nation.

A DISAPPEARING GAIN

Another purported benefit cited in the study is a saving of $59 million a year by small shippers and businesses in rural areas on their costs of holding inventory. These shippers and businesses are paying rates below cost, so they are able to carry smaller inventories than they would under deregulation. Without regulation of trucking, the bureau contends, service to these users would decline or rates would rise, so they would have to hold larger inventories.

But if small shipments are moving below cost, then high-volume shippers must be making up the difference. No economist worth his supply-and-demand curves would claim that the inventory savings of small shippers and rural areas are a national benefit, because they are in effect offset by higher costs to users in high-volume urban areas.

"Regulation," says the study at another point, "has acted as a brake on carrier contribution to inflation. Measurements suggest that carrier rates have generally reflected a lesser inflation trend than the economy as a whole." From 1969 to 1975, the bureau finds, inflation as measured by the wholesale price index rose 64.2%, compared with a 41% increase in truck rates. If rates had risen as much as the WPI, the study says, the truck freight bill would have been $3.7 billion higher in 1975. The study then subtracts the $500 million excess of the rail index over the WPI in that period and claims a net benefit of $3.2 billion to the nation.

However, a critique by the Council on Wage & Price Stability (COWPS) points out that if the bureau had used other measures of inflation, such as the gross national product deflator or the consumer price index, its estimated benefit would have vanished. When either of those measures is applied, the benefit from truck regulation plummets to less than $800 million, and the added cost from the rail index rises to $2.1 billion, turning a $3.2 billion benefit into a $1.3 billion cost to the nation.

Why were other inflation barometers not used, or even discussed in the ICC bureau's analysis? "I don't know—we only tried this [the WPI]," says Ernest R. Olson, the bureau's director. However, the numbers for 1976—not available when the bureau did its study—produce a different result. According to the latest estimates, the rail index last year rose 10.2% and the truck rate index 6.4%, compared with a 4.6% increase in the WPI. Thus, according to the ICC's own method, transportation regulation last year was a net cost to the economy, not a benefit.

ROARING RATES OF RETURN

As COWPS notes, the issue is not the rate of change in carrier rates but whether the rates and profits are higher than they would be under competition. The evidence indicates that they indeed are. Rates of return in the regulated trucking industry have consistently run above those in most other industries. In 1976, the top 13 truckers earned a 22% rate of return, after taxes, compared with an average of 14% for all major companies.

Perhaps even more important, by comparing rises in common carrier rates with overall inflation, the bureau betrays a lack of knowledge of basic economics. Suppose regulators did not allow rates to rise at all, while prices in the rest of the economy were skyrocketing.

Seemingly, as the bureau's economists picture it, the difference between what the rates were and what they would have been constitutes an economic benefit—and a huge one at that. But if rates should have risen under the pressure of rising trucker costs and the forces of supply and demand, then holding rates down artificially through regulation would represent a serious misallocation of resources, according to basic economic law, and regulators would have done a disservice to the nation. The Federal Power Commission, for example, has cost the nation dearly by keeping natural gas rates below the level determined by market forces and thus encouraging overuse of gas heating in homes and factories.

A. Daniel O'Neal, the new ICC chairman, has said that he wants to streamline the encrusted 90-year-old agency and place more emphasis on economic studies. If the ICC's cost-benefit study is any guide, he should be skeptical of any economic advice he gets from the bureau.

NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

William B. Gray, of Vermont, to be U.S. attorney for the district of Vermont for the term of 4 years, vice George W. F. Cook.

Earle B. McLaughlin, of Vermont, to be U.S. marshal for the district of Vermont for the term of 4 years, vice Christian Hensen, Jr.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Wednesday, July 27, 1977, any representations or objections they may wish to present concerning the above nominations with a further statement whether it is their intention to appear at any hearing which may be scheduled.

HOUSE OF REPRESENTATIVES—*Wednesday, July 20, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

The Lord will give grace and glory; no good thing will he withhold from them that work uprightly.—Psalms 84: 11.

Eternal Father, whose love is everlasting and whose truth endures forever, lift our spirits above the clamor and confusion of the world into the calm of Thy presence. Here may we receive wisdom to make wise decisions, strength for daily duties, courage to overcome moods of discouragement, and faith to face forward fearlessly knowing Thou art with us and that we are laboring for the highest good of our beloved country.

To Thy goodness and guidance we commend our Nation. Bless the leaders of our land that by word and deed they may set good examples for our people to follow. Bless the citizens of our country that they, following sound leadership, may have faith sufficient for daily tasks and love to make them happy all their lives. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Is there objection to the approval of the Journal?

Mr. BAUMAN. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

The question is on the approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 386, nays 12, not voting 35, as follows:

[Roll No. 440]

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7556) entitled "An act making appropriations for the Departments of State, Justice, and Commerce, the judiciary, and related agencies for the fiscal year ending September 30, 1978, and for other purposes," and that the Senate agreed to the amendments of the House to the amendments of the Senate numbered 33 and 52 to the foregoing bill.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1019) entitled "An act to authorize appropriations for the fiscal year 1978 for certain maritime programs of the Department of Commerce, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. INOUYE, Mr. MAGNUSON, Mr. LONG, Mr. GRIFFIN, and Mr. STEVENS to be the conferees on the part of the Senate.

DESIGNATING MEMBERSHIP ON CERTAIN STANDING COMMITTEES OF THE HOUSE

Mr. FOLEY. Mr. Speaker, as chairman of the Democratic Caucus and by direction of the Democratic Caucus, I offer a privileged resolution (H. Res. 697) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 697

Resolved, That ROBERT A. YOUNG, of Missouri, be, and he is hereby, elected to the Committee on Science and Technology of the House of Representatives.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM FOR WEDNESDAY, JULY 20, 1977

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, a number of Members have inquired as to the schedule of today's business. I would like to take the opportunity of indicating that it is the intention of the leadership to call up four conference reports, as follows:

H.R. 4746, conference report on Water Resources Research and Saline Water Conversion Acts authorization, 1978;

H.R. 4975, conference report on Health Assistance Program Extension Act of 1977;

H.R. 6884, conference report on International Security Assistance Act of 1977;

H.R. 6714, conference report on International Development and Food Assistance Act of 1977.

It is my understanding that then the House will resume consideration of the Agricultural Act of 1977, H.R. 7171, at the conclusion of the conference reports or shortly after 3 o'clock, if the conference reports have not been concluded.

It is the intention of the Committee to move to rise from further consideration of the agriculture bill at 6:30 p.m. this evening.

The SPEAKER. Is it the understanding of the Chair that the Committee will be in general debate at that time?

Mr. FOLEY. The general debate has not yet been concluded. There are 2 hours of general debate. We shall begin that shortly after 3 o'clock, and then we shall proceed, following the general debate, with the reading of title I of the bill for amendment. If the conference reports are concluded earlier, we will move immediately into the consideration of the agriculture bill.

The SPEAKER. As Chairman of the Committee, the gentleman hopes to rise at 6:30?

Mr. FOLEY. Yes, Mr. Speaker.

Mr. ANDREWS of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from North Dakota.

Mr. ANDREWS of North Dakota. Does the gentleman propose to carry on the farm bill on Thursday and Friday, or on Thursday and then carry over until next week?

Mr. FOLEY. It will be the decision of the leadership that we proceed with the farm bill through Thursday and Friday.

Mr. ANDREWS of North Dakota. That decision has not been made as yet?

Mr. FOLEY. That decision has not been made.

Mr. ANDREWS of North Dakota. I thank the gentleman.

PERSONAL EXPLANATION

Mr. JACOBS. Mr. Speaker, on Monday, July 18, I was granted a special order to compliment the administration for nominating the Honorable Allard K. Lowenstein as Alternate U.S. Representative for Special Political Affairs to the United Nations.

During my remarks, I included in the RECORD a statement by Mr. BRADEMAS who was out of the city.

Mr. BRADEMAS' statement was printed during the special order as if he had actually delivered it.

Therefore, I would like the record to show that Mr. BRADEMAS' statement was inserted as part of my remarks, rather than delivered.

PERMISSION FOR SUBCOMMITTEE ON IMMIGRATION, CITIZENSHIP, AND INTERNATIONAL LAW OF THE COMMITTEE ON THE JUDICIARY TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. EILBERG. Mr. Speaker, I ask unanimous consent that the Subcommittee on Immigration, Citizenship, and International Law of the Committee on the Judiciary may be permitted to sit tomorrow during the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, there is a great problem about which many Members have expressed concern, and that is the difficulty, when there is major legislation on the floor, such as the Agriculture bill, of being shuttled back and forth between the House floor and important committee meetings. What is the necessity for meeting tomorrow? Why can we not just do it in the regular way of conducting business?

Mr. EILBERG. If the gentleman will yield, we are under some pressure to move along with legislation dealing with crimes by U.S. citizens abroad, crimes committed by the military. There is no U.S. jurisdiction over these people, and we have been asked by the Defense Department to get this moving. We would like to get to hearings on this.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, this will be for hearings only?

Mr. EILBERG. If the gentleman will yield, I expect so.

Mr. ROUSSELOT. Further reserving the right to object, the gentleman can assure us there will be no markup on any bill?

Mr. EILBERG. Yes.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 7589, MILITARY CONSTRUCTION APPROPRIATION ACT, 1978

Mr. McKAY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7589) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore (Mr. BOLAND). Is there objection to the request of the gentleman from Utah? The Chair hears none, and, without objection, appoints the following conferees: Messrs. McKAY, SIKES, MURTHA, STEED, LONG of Maryland, CHAPPELL, MAHON, McEWEN, REGULA, and CEDERBERG.

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 7932, LEGISLATIVE BRANCH APPROPRIATION ACT, 1978

Mr. SHIPLEY. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 7932) making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

CONFERENCE REPORT ON H.R. 4746, WATER RESOURCES RESEARCH AND SALINE WATER CONVERSION ACTS AUTHORIZATION, 1978

Mr. MEEDS. Mr. Speaker, I call up the conference report on the bill (H.R. 4746) to extend certain authorities of the Secretary of the Interior with respect to water resources research and saline water conversion programs, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of July 13, 1977.)

Mr. MEEDS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

Is there objection to the request of the gentleman from Washington?

There was no objection.

The SPEAKER pro tempore. The gentleman from Washington (Mr. MEEDS) will be recognized for 30 minutes, and the gentleman from New Mexico (Mr. LUJAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Washington (Mr. MEEDS).

Mr. MEEDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to explain to the Members the conference report on H.R. 4746 to extend certain authorities of the Secretary of the Interior with respect to water resources research and saline water conversion programs, and for other purposes. This measure passed the House on May 17, 1977, by an overwhelming rollcall vote. As passed, the measure authorized appropriation of funds for the saline water program in the amount of $11,950,000 and reinstated for 1-year an expired authorization in the amount of $10,000,000 for funding research grants under title II of the Water Resources Research Act. Thus the dollar cost of H.R. 4746, as passed by the House was $21,950,000.

The amendment of the Senate; adopted by that body on May 25, 1977, by voice vote; increased the appropriations authorization for the Water Resources Research Act above existing levels by the amount of $28,500,000 for each of the fiscal years 1978 and 1979 and authorized appropriations for saline water research and development in the amount of $35,000,000 for each of the fiscal years 1978 and 1979. Of this amount, the Senate earmarked $10 million per year for demonstration plants. The aggregate amount by which the amendment of the Senate increased existing appropriations authority totalled $63,500,000 for each of the 2 fiscal years, or an aggregate sum of $127,000,000.

The conference report, being presented today, holds the Water Resources Research Act and the saline water conversion authorizations at the level of the House version of the bill ($21,950,000). The conference report also includes the demonstration program added by the Senate amendment. The conferees agreed to provisions whereby $40,000,000 would be authorized to construct

not to exceed four demonstration plants to determine whether existing technology can be effectively and economically utilized in meeting critical water supply needs in actual operating utility circumstances.

The conferees also adopted language that requires the Secretary to present his plans to the legislative committees of the House and Senate before expenditures can be made for demonstration plants and also requires certain specified levels of cost-sharing with non-Federal interests.

Mr. Speaker, the demonstration plant program is a modest start in the direction of encouraging water utility planners to take advantage of the technology developed under the federally supported saline water conversion program. The experience to be gained through operation of these plants will be invaluable in guiding the Congress and the executive branch in orienting this program in the years ahead. We believe that saline water conversion technology can play an increasingly important role in meeting tomorrow's water supply problems, but we will not know this with certainty until we test it in the markeplace in the manner the conference report contemplates.

In summary, the conferees have brought to the House a bill which compromises the House version of $21,950,000 with the Senate version of $127,000,000 at the level of $61,950,000. We believe this is a fair and reasonable response to the differences in the two versions and recommend its adoption by the House.

SUMMARIZED COST INFORMATION ON H.R. 4746

	Amount authorized under existing law (annually on continuing basis)	House version (for fiscal year 1978)	Senate amendment (annually for fiscal year 1978 and 1979)	Conference report (for fiscal year 1978)
Payments to institutes	$13,500,000	0	$27,000,000	0
Matching grants to institutes	5,000,000	0	10,000,000	0
Title II grants	0	$10,000,000	10,000,000	$10,000,000
Saline water research and development	0	11,950,000	25,000,000	11,950,000
Demonstration plant program	0	0	10,000,000	[1] 40,000,000
Total	18,500,000	21,950,000	82,000,000 or 164,000,000	61,950,000
Adjustment to Senate amendment to account for authorizations now on the books that would be superseded by Senate amendment		[2]	18,500,000 or 37,000,000	
Comparison reflected in statement of managers		21,950,000	127,000,000	61,950,000

[1] No year.

[2] Minus.

Mr. LUJAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as one of the House managers of this conference, I want to point out that the seven managers on the part of the House and the three managers on the part of the Senate went into this conference in total agreement as to what we want to achieve in the saline water conversion program. Our differences centered only on dollar amounts and on the type of legislative vehicle that could best get the job done.

We were quite far apart in dollars. The House bill authorized a total of $21,950,000 in new authorizations. The Senate amendment called for $127,000,000. That is a difference of $105,050,000. The compromise we arrived at comes to $61,950,000. And $40 million of that is for hardware in the form of four demonstration plants. We held the line on all other authorizations exactly as had been previously approved in the House bill.

It is a good compromise and I fully support the conference report. But I want to emphasize that the major thrust of this legislation is to tell the administration, loudly and clearly, that both the House and the Senate are firmly determined to keep the saline water program going strong until we have brought the cost of desalting seawater and brackish ground water down to the point where it is economically viable for American users.

We have provided the administration with only 1-year funding authority for the saline water program—but that does not in any way indicate that we intend to limit the program to 1 year only. Quite the opposite.

This 1-year funding is intended to give the new administration time to crank up the saline water program, provide additional staffing and get the R. & D. moving again. We expect the administration to come back next year with a greatly expanded authorization request, because we know it is going to take money to achieve our goal of reasonably priced desalted water.

In our hearings, we heard from the presidents of two of the major companies engaged in desalting technology research and production. Both of them gave us firm assurances that price breakthroughs are possible. Arthur Goldstein, president of Ionics, Inc., which produces desalting plants based on electrodialysis, showed us the specific areas of R. & D. that can be advanced significantly within 2 years, given the national will and money to do so. With this bill, Congress is expressing the national will to get the job done. And we are providing a portion of the money required by industry to do the job. When they show us the results, we will not stint in providing whatever it takes to complete the job.

This Nation needs new sources of water. Desalting has proven itself as a major new source. This conference report is evidence that both the House and the Senate are firmly committed to tapping that new source and that we will not countenance any footdragging or delays in moving this program ahead at full speed.

I urge all my colleagues to give this conference report their unanimous support.

Mr. MEEDS. Mr. Speaker, I yield myself 2 additional minutes.

I might just say, in conclusion, that it was certainly the feeling of all of the conferees and I think of the majority of the members on the Committee on Interior and Insular Affairs and on the Committee on Environment and Public Works of the other body that we had not done nearly enough, particularly in the past 3 or 4 years, in the field of salt water conversion. We were prepared to authorize additional funds, but we were convinced that the administrative and technical infrastructure in the Department had been so badly eroded that it would not be able to properly spend the money.

We have communicated with them, and we want them to upgrade their staff and to get on with furthering good salt water conversion development programs.

Mr. Speaker, the fact is that we are going to be facing—we are indeed facing right now in this Nation—a very severe crisis in water. It may be the next major crisis that this Nation faces, even though we have as much water today as we had 1,000 years ago. It is different from fossil fuels. We still have as much water as we had 1,000 years ago, and we have as much right now as we will have 1,000 years from now.

What we have to do is to better manage how we utilize what water we have; and certainly, saline water conversion is one of the most promising ways in which to do that.

Mr. Speaker, I want to emphasize for the people downtown that we expect them to get going on this and to provide us with some good programs.

In fact, I will very shortly be announcing, for late September, a series of definitive oversight hearings in which the Subcommittee on Water and Power Resources will address every aspect of the water research program of the Department of the Interior. We will consider the law, the administrative set-up, the funding levels, and the research priorities. In short, we intend to make sense out of our water resources research effort.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 401, nays 1, not voting 31, as follows:

Mr. Ertel with Mr. Charles Wilson of Texas.

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4991, NATIONAL SCIENCE FOUNDATION AUTHORIZATION ACT, FISCAL YEAR 1978

Mr. FUQUA submitted the following conference report and statement on the bill (H.R. 4991) to authorize appropriations for activities of the National Science Foundation, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 504)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4991) to authorize appropriations for activities of the National Science Foundation, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "National Science Foundation Authorization Act, Fiscal Year 1978".

SEC. 2. (a) There is authorized to be appropriated to the National Science Foundation $879,350,000 for the fiscal year 1978.

(b) Funds authorized under subsection (a) shall be available for the following categories:

(1) Mathematical and Physical Sciences and Engineering, $246,500,000.

(2) Astronomical, Atmospheric, Earth, and Ocean Sciences, $210,500,000.

(3) United States Antarctic Research Program, $47,475,000.

(4) Biological, Behavioral, and Social Sciences, $142,500,000.

(5) Basic Research Stability Grants, $4,500,000, or 2 per centum of the funds available for categories (1), (2), and (4) of this subsection, whichever is less.

(6) Science Education Programs, $83,300,000.

(7) Research Applied to National Needs, $75,850,000.

(8) Scientific, Technological, and International Affairs, $20,900,000.

(9) Program Development and Management, $47,825,000.

SEC. 3. (a) Notwithstanding any other provision of this or any other Act, of the total amount authorized under section 2(b)(6)—

(1) $11,900,000 shall be available for Graduate Fellowships;

(2) $1,200,000 shall be available for the program "Continuing Education for Scientists and Engineers";

(3) $3,000,000 shall be available for the program "Resource Center for Science and Engineering";

(4) $2,500,000 shall be available for the program "Minorities, Women, and the Handicapped in Science";

(5) $1,800,000 shall be available for the program "Science for Citizens";

(6) $2,600,000 shall be available for the program "Public Understanding of Science";

(7) $1,400,000 shall be available for the program "Ethics and Values in Science and Technology";

(8) $500,000 shall be available for a comprehensive assessment of science education in two-year colleges;

(9) $14,500,000 shall be available for the program "Comprehensive Assistance to Undergraduate Science Education"; and

(10) $6,000,000 shall be available for the program "Pre-College Teacher Development".

(b) Notwithstanding any other provision of this or any other Act, $4,000,000 shall be available for the program "Policy Research

and Analysis" authorized under section 2(b)(8).

(c) Of the appropriations made pursuant to section 2(b)(7), not less than 25 per centum shall be available for "Applied Social Research" and for "Policy-related Scientific Research" directed toward increasing the cost-effectiveness of policies and programs dealing with urban and human service problems at the Federal, State, and local government levels, including use of such funds to identify, analyze, and contribute knowledge to improve productivity in the public sector, to identify, analyze, and evaluate more effective, efficient, and equitable ways of delivering human services, and to develop the data base and analytical techniques required for improving applied research on municipal systems and human service delivery.

SEC. 4. (a) From funds authorized under section 2(b)(1), (2), and (4) the National Science Foundation is authorized to increase support for cooperative research projects involving researchers from the industrial and academic sectors.

(b) Notwithstanding any other provision of this or any other Act, not less than 12.5 per centum of the amount provided under section 2(b)(7) shall be available for small business concerns.

(c) In the use of the funds made available pursuant to section 2(b)(8) for "International Cooperative Scientific Activities", emphasis shall be placed on bilateral and multilateral research and exchange programs, particularly programs involving Western Europe and neighboring countries in the Western Hemisphere. The Director of the National Science Foundation shall consult with the Director of the Office of Science and Technology Policy, the Secretary of State, and other appropriate officials to assure that the programs carried out under this subsection are consistent with the international scientific and foreign policy objectives of the United States.

SEC. 5. (a) From the funds authorized under the program "Science and Society", the National Science Foundation is authorized to provide support which is designed to—

(1) improve public understanding of public policy issues involving science and technology;

(2) facilitate the participation of qualified scientists and engineers and of undergraduate and graduate students in public activities aimed at the resolution of public policy issues having significant scientific and technical aspects; and

(3) assist nonprofit, citizens, and bona fide public interest groups to acquire necessary scientific and technical expertise in order to improve their comprehension of scientific and technical aspects of public policy issues.

(b) Awards made pursuant to this section shall, to the extent feasible, include support for—

(1) qualified scientists and engineers to work on public policy issues with significant scientific and technical components in conjunction with units to State and local government, nonprofit organizations, or bona fide public interest groups;

(2) internship programs for science and engineering undergraduate or graduate students to work on public policy issues with significant scientific and technical components in conjunction with units of State and local goverment, nonprofit organizations, or bona fide public interest groups as part of their academic training;

(3) forums, conferences, and workshops on public policy issues with significant scientific and technical components;

(4) training in the presentation of scientific and technical studies in a manner which (A) improves public understanding of the ways in which science and technology influence contemporary life, (B) improves public access to the results of scientific and technical research, (C) encourages and facilitates interaction between laypersons and scientists on public issues with important scientific and technological components, and (D) increases public knowledge and understanding of the ethical and value implications of scientific and technological developments;

(5) new and existing programs using radio or television to increase public understanding of public policy issues with significant scientific and technical components; and

(6) bona fide public interest groups to acquire necessary scientific and technical expertise relating to the scientific and technical aspects of public policy issues and to enable such groups to bring together in appropriate forums experts whose research has been directed to the resolution of such issues.

SEC. 6. (a) The National Science Foundation shall establish a Resource Center for Science and Engineering to be located at an educational institution which—

(1) enrolls substantial numbers of minority students, students from low-income families, or both;

(2) is geographically located near one or more population centers of low-income families or minority groups;

(3) demonstrates a commitment to encouraging and assisting minority students or students from low-income families, or both; and

(4) has an existing or developing capacity to offer doctoral programs in science and engineering.

(b) The Center established under this section shall—

(1) support basic research and the acquisition of necessary research facilities and equipment;

(2) serve as a regional resource in science and engineering for the community which the Center serves; and

(3) develop joint educational programs with nearby pre-college and undergraduate institutions which enroll a substantial number of minority students or students from low-income families.

SEC. 7. In addition to such sums as are authorized by section 2, not to exceed $4,900,000 is authorized to be appropriated for the fiscal year 1978 for expenses of the National Science Foundation incurred outside the United States to be paid for in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States.

SEC. 8. Appropriations made pursuant to this Act may be used, but not to exceed $5,000, for official consultation, representation, or other extraordinary expenses upon the approval or authority of the Director of the National Science Foundation, and his determination shall be final and conclusive upon the accounting officers of the Government.

SEC. 9. The National Science Foundation is directed to issue instructions to grantees for pre-college curriculum projects covering the protection of pre-college students and procedures for involving such students in pre-college education research and development, pilot-testing, evaluation, and revision of experimental and innovative pre-college curriculum projects funded by the Foundation. These instructions shall require such grantees to obtain written approval of the school board or comparable authority responsible for the schools prior to the involvement of such students.

SEC. 10. (a)(1) Each officer or employee of the National Science Foundation who performs a decisionmaking function in the handling of any application or proposal for a grant from or contract with the Foundation shall provide a written statement for the record identifying (in accordance with the standards promulgated under subsection (b)) any financial interest or other relevant interest he or she has in the person submitting the application or proposal and any academic affiliation he or she has with that person. If the application or proposal results in an award, the statement shall be made available to the public.

(2) The Director shall remove or take other appropriate disciplinary action against any employee who knowingly violates the requirements of this subsection.

(b)(1) Within 60 days after the date of the enactment of this Act, the Director of the National Science Foundation shall publish—

(A) proposed standards to implement the requirements of subsection (a), designed to minimize conflicts of interest and to assure that the appropriate files of the Foundation relating to any grant or contract referred to in such subsection contain a statement of any financial or other relevant interest which any of the officers and employees involved may have in the person or institution applying for or proposing the grant or contract as well as any academic affiliation which any of such officers and employees may have with such person or institution; and

(B) proposed standards appropriately requiring identification of any conflicts of interest by peer reviewers.

(2) Within 120 days after the date of the enactment of this Act, the Director shall promulgate the standards published under paragraph (1), with such modifications as the Director may deem appropriate; and such standards shall take effect upon their promulgation.

(c) The Director shall report annually to the Congress on the administration and enforcement of this section.

(d) If the President issues an Executive order that requires financial disclosure by officers and employees of Federal agencies generally, only so much of this section as relates to peer reviewers and to academic affiliations of officers and employees shall remain effective.

SEC. 11. Appropriations made pursuant to this Act shall remain available for obligation, for expenditure, or for obligation and expenditure, for such period or periods as may be specified in the Acts making such appropriations.

SEC. 12. No funds may be transferred from any particular category listed in section 2 to any other category or categories listed in such section if the total of the funds so transferred from that particular category would exceed 10 per centum thereof, and no funds may be transferred to any particular category listed in section 2 from any other category or categories listed in such section if the total of the funds so transferred to that particular category would exceed 10 per centum thereof, unless—

(1) a period of thirty legislative days has passed after the Director of the National Science Foundation or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate and to the Committee on Science and Technology of the House of Representatives and to the Committee on Human Resources of the Senate a written report containing a full and complete statement concerning the nature of the transfer and the reason therefor, or

(2) each such committee before the expiration of such period has transmitted to the Director written notice to the effect that such committee has no objection to the proposed action.

SEC. 13. Notwithstanding any other provision of this or any other Act, the Director of the National Science Foundation shall keep the Committee on Science and Technology of the House of Representatives and the Committee on Human Resources of the Senate fully and currently informed with respect to all of the activities of the National Science Foundation.

SEC. 14. (a) Section 3(e) of the National Science Foundation Act of 1950 (42 U.S.C. 1862(e)) is amended by striking out "one of

the objectives" and inserting in lieu thereof "an objective".

(b) Section 4 of such Act (42 U.S.C. 1863) is amended by adding at the end thereof the following new subsection:

"(j) The Board shall render an annual report to the President, for submission to the Congress on or before March 31 in each year. Such report shall deal essentially, though not necessarily exclusively, with policy issues or matters which affect the Foundation or with which the Board in its official role as the policymaking body of the Foundation is concerned.".

(c) Section 14(d) of such Act (42 U.S.C. 1873(d)) is amended to read as follows:

"(d) The members of the Board and the members of each special commission shall receive compensation for each day engaged in the business of the Foundation at a rate fixed by the Chairman but not exceeding the rate specified for the daily rate for GS–18 of the General Schedule under section 5332 of title 5, United States Code, and shall be allowed travel expenses as authorized by section 5703 of title 5, United States Code.".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4991) National Science Foundation Authorization Act, fiscal year 1978, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the actions agreed upon by the managers and recommended in the accompanying conference report:

The amendment of the Senate struck out all after the enacting clause in the House bill and substituted new language. The committee of conference agreed to accept the Senate amendment with certain amendments and stipulations proposed by the conferees.

The National Science Foundation requested authorization in the amount of $879,000,000 for Fiscal Year 1978, plus $6,000,000 in excess foreign currencies. The House authorized $863,100,000 and $4,900,000 in excess foreign currencies. The respective Senate figures were $894,000,000 and $6,000,000.

The committee of conference recommended $879,350,000, plus $4,900,000 in excess foreign currencies. This total amount of $884,250,000 is $16,250,000 more than authorized by the House and $15,750,000 less than authorized by the Senate for Fiscal Year 1978.

2-YEAR AUTHORIZATION

The Senate bill authorized $1,059,400,000 to be appropriated to the Foundation for Fiscal Year 1979. Funds were made available for nine program categories. Funding levels and set-asides for certain activities within those categories were specified. The House bill included no similar provisions.

The conferees agreed that a two-year authorization would be useful in establishing a framework for planning that could be of substantial assistance to the Foundation and to the scientific community in the development of programs and policies. They agreed that a two-year authorization could be helpful in assuring full consideration by the appropriations committees of the programs and policies included in the authorization—and that a two-year authorization might also be of assistance in enabling the authorizing committees to meet the requirements of the Congressional Budget Act, under which stringent reporting deadlines must be met and projections of budget levels must be submitted.

Nonetheless conferees adopted the view of the Managers on the part of the House that a 2-year authorization would not be acceptable to the House at this time. The major reasons given by House managers were: (1) no record of fiscal year 1970 funding for NSF has been made or attempted by appropriate House committees; (2) evidence of a carefully considered 1979 budget for NSF by the Foundation itself is not available; (3) there are disadvantages as well as advantages to be considered in adopting a 2-year budget cycle—and these have not yet been thoroughly explored.

SECTIONS 2 AND 3—FUNDS

1. For Mathematical and Physical Sciences and Engineering, the budget request of the National Science Foundation was $249,200,000. The House authorized $243,800,000 and the Senate authorized $249,200,000. The conferees agreed on $246,500,000.

2. For Astronomical, Atmospheric, Earth and Ocean Sciences, the budget request of the National Science Foundation was $213,400,000. The House authorized $207,600,000 and the Senate authorized $213,400,000. The conferees agreed on $210,500,000.

3. For the United States Antarctic Research Program, the House, the Senate, and the conferees approved the Foundation request for $47,475,000.

4. For Biological, Behavioral, and Social Sciences, the budget request of the National Science Foundation was $144,800,000. The House authorized $139,200,000, and the Senate authorized $145,800,000. The conferees agreed on $142,500,000, including an increase of $500,000 in the support of research on nitrogen fixation.

5. For Basic Research Stability Grants there was no request by the National Science Foundation. The House authorized no funds, and the Senate authorized $6,800,000 or 2 per centum of the funds available for categories (1), (2), and (4) above, whichever is less, for a new program. The conferees agreed on $4,500,000 or 2 per centum of the funds available for categories (1), (2), and (4) above, whichever is less, with the stipulation that the Basic Research Stability Grants program will replace the Research Initiation and Support program.

6. For Science Education Programs, the budget request of the National Science Foundation was $75,700,000. The House authorized $83,300,000 and the Senate authorized $83,900,000. The conferees agreed on $83,300,000.

This amount includes the following:

a. For Graduate Fellowships the budget request was $11,400,000. The House recommended $11,400,000 and the Senate authorized $12,500,000. The conferees agreed on $11,900,000.

b. For Continuing Education for Scientists and Engineers the budget request was $1,200,000. The House authorized not more than $600,000, and the Senate authorized $1,200,000. The conferees agreed on $1,200,000.

c. For a Resource Center for Science and Engineering the budget request was $1,000,000. The House authorized not more than $1,000,000, and the Senate authorized $6,000,000. The conferees agreed on $3,000,000.

d. For Minorities, Women, and the Handicapped in Science the budget request was $2,000,000. The House recommended $2,000,000, and the Senate authorized $3,000,000. The conferees agreed on $2,500,000.

e. For Science for Citizens the budget request was $1,200,000. The House authorized not more than $100,000 and the Senate authorized $5,000,000. The conferees agreed on $1,800,000.

f. For Public Understanding of Science the budget request was $2,600,000. The House recommended, the Senate authorized, and the conferees agreed on that amount.

g. For Ethics and Values in Science and Technology the budget request was $1,400,000. The House recommended, the Senate authorized, and the conferees agreed on that amount.

h. For a comprehensive assessment of science education in two-year colleges there was no request. The House authorized no funds, and the Senate authorized $1,000,000 for a new program. The conferees agreed on $500,000.

i. For Comprehensive Assistance to Undergraduate Science Education the budget request was $14,500,000. The House recommended $17,500,000, and the Senate authorized not more than $100,000. The conferees agreed on $14,500,000.

j. For Precollege Teacher Development the House recommended $4,000,000, and the Senate recommended $7,600,000. The conferees agreed on $6,000,000.

The Senate Bill included a provision directing the Foundation to use not less than 50 percent of funds available for the program Pre-college Teacher Development to provide science teachers with training in instructional methods which encourage stuscience and society. The Senate authorized $7.6 million for pre-college teacher develdents to explore the interaction between opment. The House authorized $4 million for pre-college teacher development, but the House Bill did not include a set aside provision.

The conferees agreed to authorize $6 million for pre-college teacher development and to urge the Foundation to use not less than 25 percent of the funds available to train teachers in methods to encourage students to explore the interaction between science and society.

7. For Research Applied to National Needs, the budget request of the National Science Foundation was $78,000,000. The House authorized $72,700,000, and the Senate authorized $79,000,000. The conferees agreed on $75,850,000, including an increase of $500,000 in the support of research on nitrogen fixation.

The House bill included a provision establishing a floor of $23,000,000 and policy direction for "Applied Social Research" and "Policy-related Scientific Research" in the program of Research Applied to National Needs. The Senate bill did not provide a floor or specific policy direction for these programs.

Recognizing the importance of these programs, the need to ensure balance in the overall RANN program, plus the uncertainties of appropriations from year to year, the conferees have included in the bill a requirement that not less than 25 percent of available RANN funds be earmarked for "Applied Social Research" and "Policy-related Scientific Research" in lieu of a specific amount.

8. For Scientific, Technological, and International Affairs, the budget request of the National Science Foundation was $22,600,000. The House authorized $21,200,000, and the Senate authorized $20,600,000. The conferees agreed on $20,900,000.

Of that amount, for Policy Research and Analysis the budget request was $4,000,000. The House authorized not less than $4,500,000, and the Senate authorized not more than $2,000,000. The conferees agreed on $4,000,000.

9. For Program Development and Management, the House, the Senate, and the conferees approved the Foundation request for $47,825,000.

SECTION 4

Section 4(a)—Academic and industrial participation in NSF-supported programs

The Senate bill included a provision to permit researchers in the industrial sector to compete for basic research support on an equal basis with researchers in the academic sector. The Senate bill also (1) authorized fellowships to enable academic researchers to spend up to two years in an industrial environment and to allow industrial researchers to spend up to two years in an academic environment, and (2) directed the Foundation to increase support for cooperative research projects involving researchers from the industrial and academic sectors. The House bill included no comparable provisions.

The conferees agreed to adopt the Senate provision with regard to cooperative research projects.

The conferees further agreed that fellowship exchange programs between universities and industries could improve the interaction between the two sectors to their mutual benefit and to the benefit of U.S. science and technology. The conferees therefore urge the Foundation to use funds authorized in the bill for Science Manpower Improvement to make such fellowships available.

With regard to competition for basic research support, N.S.F.'s Organic Act does not require the use of special criteria in evaluating industrially-based research proposals. Rather, the application of such criteria is the result of National Science Board policy.

The conferees noted that although the 1976 National Science Foundation Report "Research in Industry: Roles of the Government and the National Science Foundation" explicitly reaffirms the Board's policy with regard to industrial participation in basic research programs, it also acknowledges that there is "a range of opinion on this policy among members of the National Science Board as well as the staff of the National Science Foundation" and states that "the National Science Foundation will periodically review this policy to determine if it continues to be appropriate."

In reviewing this Report and the hearings record compiled by the House Committee on Science and Technology and the Senate Committee on Human Resources, the conferees agreed that the Foundation should proceed cautiously in making policy changes which might affect established funding patterns to any significant degree—particularly since those funding patterns have been well received by the Congress as a whole and by most of the scientific community throughout the Foundation's existence. At the same time, the proposals of industrially-based basic researchers should not be systematically excluded from consideration. Hence the conferees concur that industrial researchers should be made aware that their proposals are eligible for consideration and that the Foundation should advise them of the criteria under which they will be evaluated. The Foundation is requested to report annually to the House Committee on Science and Technology and the Senate Committee on Human Resources on the results of this effort, and on the result of the periodic review of present policy recommended by the National Science Board.

The conferees further believe that more information than has been compiled by the Foundation in the past should be acquired to help determine the degree of interest and technical expertise of the industrial community in basic research. Such data should make possible a more accurate assessment of the extent of the desire of industrial researchers to have their proposals considered on the same basis as those submitted by the university-based researchers.

The conferees therefore request the Foundation to compile appropriate information, with particular emphasis on the size of profit-seeking firms whose researchers might be expected to become eligible for support and, insofar as feasible, the contribution to the body of scientific knowledge which might result. The Foundation is requested to report its findings to the House Committee on Science and Technology and the Senate Committee on Human Resources by February 1, 1978.

Section 4(b)—RANN small business set-aside

The Senate bill provided that not less than 12.5 per centum of the amount available for Research Applied to National Needs should be expended to small business concerns. The House bill had no similar provision. The conferees agreed to adopt the Senate provision and express support for the small business innovation program.

Section 4(c)—International cooperative scientific activities

The Senate bill provided that emphasis in International Cooperative Scientific Activities should be placed on bilateral and multilateral research and exchange programs, particularly programs involving Western Europe and neighboring countries in the Western Hemisphere. The House bill had no similar provision. The conferees agreed to adopt the Senate provision with language added requiring coordination with the Office of Science and Technology Policy, the Secretary of State and other appropriate officials.

SECTION 5—SCIENCE AND SOCIETY

The Senate bill contained provisions emphasizing activities of the programs in the Office of Science and Society of the National Science Foundation. The House bill contained no similar provisions. The conferees agreed to adopt certain of the Senate provisions with modifications in some.

In addition, it is the intention of the conferees that in the implementation of its "Science and Society" program the Foundation should give due consideration to such planning grants as may facilitate:

(1) The design and use of registries of scientists and engineers to serve as a resource to local decisionmakers, community and public interest groups, including the study of past and present registries and their effectiveness;

(2) The establishment of at least one regional center to support projects involving public policy issues with significant scientific and technical components, which have been proposed by State and local organizations and institutions; and

(3) The establishment of a national clearinghouse with at least one regional branch to facilitate access by scientists, engineers and the general public to research and other information and material related to the scientific and technical components of public policy issues.

It is further the intention of the conferees that under the "Science for Citizens" part of the program, the Foundation shall follow the principles applied for purposes of Sec. 501 (c)(3) of the Internal Revenue Code in determining the categories of organized groups eligible for grants and awards. In addition, it is intended that no contract, grant or award under this part of the program shall be made to any person or group requesting support solely or principally for the purpose of intervention in any judicial or administrative proceeding by contesting any action or decision before any court of law or Federal, State or local executive agency or instrumentality.

SECTION 6—RESOURCE CENTER FOR SCIENCE AND ENGINEERING

This program has been funded during the 1977 fiscal year at an $800,000 level under the title of Minority Graduate Centers. While testimony provided some differences as to the value of the program as currently designed, both Senate and House indicated a sympathy for the goals sought and a willingness to support them. The Senate amended the concept by enlarging it to include low income groups as well as minorities and funding the program at a $6 million level for 3 centers. The House agreed to a requested increase over last year's budget of $200,000 to a total of $1 million.

In addition the House recommended that the program of Minority Institution Trainees be increased from the $1,000,000 request to $3,000,000 with the provision that not less than $1,500,000 of that amount be made available to Minority Graduate Scholars to continue their education in science or engineering at institutions of their choice.

Conferees agreed to earmark $3 million for a Resource Center program as designed in the Senate bill, and to recommend that NSF fund its Minority Traineeships at Graduate Institutions at a level of $1.5 million—which would allow an additional $500,000 to be used so far as feasible in accordance with the House proposal for developing a graduate scholarship program.

It was further agreed that the $3 million authorized for the Resource Center in its modified form is the amount realistically needed to develop a single center. If experience with such a center warrants its continuation and/or the establishment of other centers in geographically dispersed areas, consideration can and should be given to such expansion.

SECTION 7—SPECIAL FOREIGN CURRENCY AUTHORIZATION

The National Science Foundation requested authorization in the amount of $6,000,000 for expenses incurred outside the United States to be paid for in foreign currencies determined to be excess to the normal requirements to the United States. The House authorized $4,900,000, and the Senate authorized $6,000,000. The conferees agreed on $4,900,000.

SECTION 8—CONSULTATION AND EXTRAORDINARY EXPENSE LIMITATIONS

Section 8 is identical to section 4 of the House bill, and is identical in purpose to section 9 of the Senate bill.

SECTION 9—PRE-COLLEGE CURRICULA

The bill as passed the House contained a section directing NSF to issue instructions to its curriculum development grantees to provide special protection for students involved in precollege research, pilot-testing, evaluation and experimental curriculum projects. This section grew out of several controversial curriculum development programs sponsored by NSF in years past.

The Senate bill contained no such provision and the Managers on the part of the Senate opposed the language on grounds that NSF revised grant procedures in this area make it unnecessary, that such Federal intervention in the procedures of local school boards is undesirable and that the provision in the House bill was so broad as to preclude desirable curricula study and development.

Conferees agreed to retain in the bill the basic requirement for instructions to provide adequate protection for pre-college students in the designated areas. They agreed that detailed implementation of this provision, however, was not essential to the legislation itself.

In lieu of the latter, Conferees note that the intent of the section is that the Foundation shall require grantees (1) to provide school boards (or comparable authority) and other interested school officials, in advance of any such student involvement, information concerning the need for and the

purposes of the particular education project, the proposed content of the material to be used, and the expected benefits to be derived, and (2) to take such steps to protect students as may be requested or required by the local school board or comparable authority.

The conferees noted further that the Federal Interagency Committee on Education is reviewing the applicability to education research of guidelines on the protection of human subjects. It is the intent of this section that grantees will be required to comply fully with applicable guidelines as they may be promulgated by the Department of Health, Education and Welfare. It is expected that NSF shall also require grantees to provide information and materials required by school boards or comparable authority to carry out their own established procedures in regard to securing parental consent for involvement of students in such projects.

Special attention by NSF is directed to Section 13 of the bill in the foregoing matter.

SECTION 10—CONFLICT OF INTEREST

The House bill included a section establishing financial disclosure procedures to help guard against the possibility of conflicts of interest on the part of N.S.F. employees and peer reviewers. The Senate bill included no comparable provision.

The Conferees agreed on the importance of guarding against possible bias in the consideration of applications for Foundation support and have included the substance of the House provision of the bill. They have made several alterations in language, however, designed to give the provision improved accuracy and focus.

The changes are mainly technical. Substantively, only two changes were made. One eliminated, as unnecessary, a statutory requirement for the definition of certain terms. The other added a requirement that proposed standards developed by NSF in accordance with this section not only be published but, after a reasonable period for review, promulgated and put into effect.

SECTION 11—OBLIGATION LIMITATION

Section 11 is identical in purpose to section 3 of the House bill and section 10 of the Senate bill.

SECTION 12—TRANSFER LIMITATION

Section 12 is identical in purpose to section 11 of the Senate bill and section 6 of the House bill.

SECTION 13—INFORMATION REQUIREMENT

Section 13 is identical to section 10 of the House bill and section 12 of the Senate bill.

SECTION 14—AMENDMENTS TO THE NSF ACT OF 1950

Section 14(a).—The House bill included a section amending section 3(e) of the NSF Act of 1950 to emphasize that an objective of the Foundation in strengthening research and education in the sciences throughout the United States shall be to avoid undue concentration of those activities. The Senate bill included no comparable provision.

The conferees agreed to adopt the House provision.

Section 14(b).—The House bill included a section adding a new clause to the NSF Act of 1950 which requires an annual report of the National Science Board. The Senate bill included no comparable provision.

The conferees agreed to adopt the House provision.

Section 14(c).—The Senate bill included a section amending section 14(d) of the NSF Act of 1950 to permit the Chairman of the National Science Board to fix the rate of compensation for members of the Board and members of each special commission engaged in NSF business, provided this rate does not exceed the daily rate for GS–18 of the General Schedule. The House bill included no comparable provision.

The conferees agreed to adopt the Senate provision.

PROGRAM INSTRUCTIONS

Interdisciplinary studies

The Senate bill included a section authorizing and directing the Foundation to provide sustained support for projects which would encourage the establishment of interdisciplinary teams of researchers to address selected problems of national importance. The House bill included no comparable provision.

The conferees agreed that the application of research results to national needs would be enhanced through the award of sustained support to teams of researchers qualified to build links between science, government, industry and the public. Such sustained support should enable an independent interdisciplinary research capacity to be built and maintained.

The conferees therefore urge the Foundation to provide the sustained support authorized in section 5(b) of the Senate bill, although no statutory directive appears necessary.

Research instrumentation

The Senate bill provided that not less than 15% of the research funds available for instrumentation, facilities, and research resources was to be used for instrumentation, facilities, and research resources costing $25,000 or less. The House bill included no comparable provision.

The conferees agreed to urge the Foundation to make such support available and to disseminate to program managers and grantees information concerning eligibility for these funds.

2-Year college study

The comprehensive assessment of science education in 2-year colleges will provide the basis for an understanding of the unique roll of those colleges in science education and the problems they face. The results are to be used to assess the effectiveness of current NSF science education programs and to make those programs more relevant to the needs of 2-year colleges. With the assistance of an ad hoc advisory committee of representatives of 2-year colleges and science educators, it is expected that NSF will conduct a local needs assessment and a national needs assessment thereby giving both in-depth and national scope to the study.

In the local needs assessment a number of representative types of 2-year colleges should be selected to undertake a thorough study of their science education programs, students, and faculty; and of needs in transfer curricula, science and engineering technology programs, and general/community education programs. NSF may wish to select colleges for specific criteria, such as a high concentration of minority or part-time students, a strong emphasis on occupational or transfer curricula, and so on, so that various specific aspects will be thoroughly examined.

In the national needs assessment one or more grants should be awarded for comprehensive national surveys on selected topics designed to yield an understanding of the needs of 2-year colleges in science education. Relevant questions may include types and needs of students, types of programs, needs and characteristics of faculty, and measures of program effectiveness.

CONFERENCE REPORT ON H.R. 4975, HEALTH ASSISTANCE PROGRAM EXTENSION ACT OF 1977

Mr. STAGGERS. Mr. Speaker, I call up the conference report on the bill (H.R. 4975) to amend the Public Health Service Act to extend through the fical year ending September 30, 1978, the assistance programs for health services research; health statistics; comprehensive public health services; hypertension programs; migrant health; community health centers; medical libraries; cancer control programs; the National Cancer Institute; heart, blood vessel, lung, and blood disease prevention and control programs; the National Heart, Lung, and Blood Institute; National Research Service Awards; population research and voluntary family planning programs; sudden infant death syndrome; hemophilia; national health planning and development; and health resources development; to amend the Community Mental Health Centers Act to extend it through the fiscal year ending September 30, 1978; to extend assistance programs for home health services; and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of July 14, 1977.)

Mr. STAGGERS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The SPEAKER pro tempore. The gentleman from West Virginia (Mr. STAGGERS) is recognized for 30 minutes, and the gentleman from Kentucky (Mr. CARTER) is recognized for 30 minutes.

The Chair recognizes the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. Mr. Speaker, this is a bill that was passed in three parts by the House. In the first part it was passed by a voice vote. On the second part of the bill the vote was 385 to 4. On the third part, the vote was 376 to 4. When the Senate took up the bill, they took up one part and had hearings on it and joined all three bills together, so we brought it back. We went to conference

on all three bills as one and we bring it back as one.

Mr. Speaker, this conference report extends for 1 year several critical health programs crafted by the Congress over the years in order to contribute to the health needs of this country. Included are programs for community or neighborhood health centers, family planning, community mental health centers, migrant health centers, maternal and child health activities, health planning, heart and cancer research, and others.

I am happy to report a spirit of real cooperation during the conference—your conferees agreed generally to split the difference between the House and Senate measures with respect to authorizations. In addition, the conference report includes important technical revisions made by either or both measures to the existing health manpower, health planning and alcohol and drug abuse authorities to make the programs under those authorities more workable.

Mr. Speaker, this is a report that I can commend to my colleagues without reservation. It has been adopted by the other body by unanimous vote, and deserves similar action in this body.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, since this is a consolidation of three different bills, what is the new cost?

Mr. STAGGERS. Well, when it passed the House, all three bills carried a term of $3,080.187,450.

Mr. ROUSSELOT. $3,080 million?

Mr. STAGGERS. That is correct; when the Senate passed the three bills, they passed it as $3,329,714,200.

When the conference report came out it was $3,357,284,200.

Mr. Speaker, I might say to the gentleman that there are 39 programs that affect every household in America in this bill, 39 programs, and we are only extending this for 1 year with the understanding that we will consider all of these programs in this coming year, all 39 of them will be considered this coming year and reenacted into law. There will be some changes made in them at that time.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, of all the 39 programs which the gentleman mentions, there is only an authorization for 1 fiscal year; is that correct?

Mr. STAGGERS. That is correct.

Mr. ROUSSELOT. For all 39 programs?

Mr. STAGGERS. This is correct.

Mr. ROUSSELOT. But the gentleman wishes to inform us that the gentleman thinks there will be changes in many of these programs?

Mr. STAGGERS. I am not sure there will be. There will probably be new developments in each one. Then we will have to have hearings and go along with them. They go all the way from cancer to minimum health treatmen' and construction and family planning and what have you, just about anything on the board. I just cannot begin to name them. Just about anything the gentleman mentions is in the three bills. They are bills which just carry forward items that had been enacted before in piecemeal fashion. They are all connected together now, and they all have been considered by this House in previous years.

Mr. ROUSSELOT. I thank the gentleman for his explanation.

Mr. CARTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the conference report on H.R. 4975—which amends the Public Health Service Act to authorize appropriations for fiscal year 1978 for various health services, health planning, and biomedical research programs.

This legislation provides a 1-year extension of the following programs—

HEALTH SERVICES

Grants to States for comprehensive health services;
Hypertension;
Migrant health centers;
Community health centers;
Community mental health centers;
Family planning;
Sudden infant death syndrome;
Hemophilia treatment centers;
Home health services and training;
Blood separation centers;
Maternal and child health services.

BIOMEDICAL RESEARCH

Cancer control programs;
National Cancer Institute;
Heart, blood vessel, lung, and blood disease prevention control programs;
National Heart, Lung, and Blood Institute;
National research service awards; and
National Library of Medicine.
Health Planning and Resources Development (Public Law 93–641).
Health services research.
Health statistics programs.

Mr. Speaker, while the total authorization in this conference report is about $277 million above the House-passed legislation—these figures represent a compromise between the House and Senate authorizations. In most cases—we agreed to split the difference between the bills. Thus, Mr. Speaker, the grand total of authorizations in H.R. 4975 for all these health programs is $3,357,-284,200.

Also, Mr. Speaker, the intent of this bill is to provide a simple 1-year extension of these health authorities so that the committee and the administration will have time to examine these programs in depth next year. At that time we will consider what substantive changes are needed and how major improvements can be made. Therefore, in this conference report, we have tried to refrain from making major policy changes in these programs—although some minor substantive amendments were adopted which are described in the report. We also made a few changes to the health manpower law—Public Law 94–484—which the conferees felt were necessary.

Mr. Speaker, since this legislation extends the authorities for so many of our Nation's health programs—it would be difficult for me to discuss each and every one of them during our limited time period for consideration of this measure.

However, I want to emphasize that these programs are very important in contributing to health care for our citizens and I strongly urge continuation of these authorities for 1 year as provided in this legislation.

For example, H.R. 4975 includes funds for the support of community health centers, migrant health centers, family planning, and grants to the States to provide comprehensive health services.

Under the State-grant program funds are used to provide a wide range of health services at the community level, including communicable disease control, chronic disease control, and various screening programs.

I believe these public health activities are vital and need to be strengthened. We need to do more to encourage State and local health departments to provide preventive, as well as curative health services. As a step toward that goal, we have included a provision in the legislation directing the Secretary of HEW to establish model standards with respect to preventive health services in our Nation's communities.

In addition to the health delivery programs this legislation also extends the authority for the National Health Planning and Resources Development Act (Public Law 93–641).

As you know, Mr. Speaker, the objective of that legislation is to develop an effective nationwide planning network to assure rational planning for health services and resources development. Under this law—over 200 health systems agencies have been designated. The purposes of these planning agencies are to help improve the health of residents in the area, increase the accessibility and improve the quality of health services provided, and help restrain increases in the cost of providing health services through effective planning. These are difficult tasks indeed, but I believe they can be accomplished with active community involvement.

Moreover, I believe we need to encourage cooperative efforts between the health systems agencies, the professional standards review organizations, and the cost containment agencies of each area. Only through a cooperative commitment to effective health planning can the problems of our health care delivery system be solved.

Finally, this legislation extends various authorities for our Nation's biomedical research efforts. It includes funds for cancer research and research in heart, lung, and blood diseases. Mr. Speaker, these programs are vital to the future health of our people. These researchers are searching for the causes, cures, and treatments for many of our Nation's most dread diseases. I strongly support continuation of these biomedical authorities and I urge favorable consideration of the conference report on H.R. 4975.

Mr. Speaker, because the conference report inadvertently omits certain authorizations included in H.R. 4975, I am including the following chart for the RECORD:

HEALTH PROGRAMS EXTENSION ACT OF 1977

[In millions of dollars]

Section No.	Programs	House amendment	Senate amendment	Conference substitute
	PUBLIC HEALTH SERVICE ACT			
	Health Planning			
1516(c)	Grants to HSA's	125	125	125
1525(c)	Grants to States	35	35	35

[1] Existing law provides that 22 percent of the appropriation made under sec. 1613 shall be made available for grants for construction or modernization projects designed to eliminate or prevent imminent safety hazards as defined by Federal, State, or local fire, building, or life-safety codes or regulations, or avoid noncompliance with State or voluntary licensure or accreditation standards. The conference substitute authorizes appropriations of $67,500,000 in addition to the 22 percent earmark.

[2] Conference report is $277,000,000 over the House bill.

Mr. STAGGERS. Mr. Speaker, I yield such time as he may consume to the chairman of the subcommittee, the gentleman from Florida (Mr. ROGERS), who has done a magnificent job in preparing all these bills and getting them consolidated.

Before yielding, I do want to say that the staff has done an excellent job in keeping up with these bills.

Mr. ROGERS. Mr. Speaker, I thank the chairman for yielding to me. I appreciate his kind remarks, and also join with him in thanking the members of the subcommittee for their cooperation, the ranking minority member of the subcommittee, the gentleman from Kentucky (Mr. CARTER), and members of the staff who have done an outstanding job.

Mr. Speaker, I am pleased to join my distinguished chairman in urging adoption of the conference report on H.R. 4975. As the chairman stated, this report extends, through fiscal year 1978, important health research, health service, and health planning programs, and affects revisions in several ongoing programs, particularly the health manpower legislation adopted late last year.

Your conferees agreed to split the differences between the line item authorizations and committed themselves to a thorough review and revision of these critical programs, working with the new administration and the general public. This review, now ongoing, will result in introduction of new legislation later this year or early in the second session.

Mr. Speaker, the authorizations in the House measure, the Senate measure, and the conference report are as follows:

HEALTH PROGRAMS EXTENSION ACT OF 1977

[1] Existing law provides that 22 percent of the appropriation made under sec. 1613 shall be made available for grants for construction or modernization projects designed to eliminate or prevent imminent safety hazards as defined by Federal, State, or local fire, building, or life-safety codes or regulations, or avoid noncompliance with State or voluntary licensure or accreditation standards. The conference substitute authorizes appropriations of $67,500,000 in addition to the 22 percent earmark.

[2] No fiscal year limitation.

In addition, as I mentioned, the report includes several significant amendments to existing health programs. Two of these amendments—both of which affect health manpower legislation (Public Law 94-484) bear discussion.

First, the conference report makes revisions in the provisions of the Immigration and Nationality Act, as amended by Public Law 94-484, with respect to alien graduates of foreign medical schools who are desirous of entering this country in order to practice medicine. These amendments in effect postpone for 1 year the requirement that all alien physicians demonstrate their competence in the English language and pass an examination equivalent to parts I and II of the National Board of Medical Examiners examination. This is so because of the unreasonable delay of the Department of Health, Education, and Welfare in implementing this provision. In addition, the new provisions are made inapplicable to aliens residing in this country on January 10, 1977 who have demonstrated their competence by passing a State licensure examination and by holding a specialty board certificate. Finally, the provisions are made inapplicable to graduates of all medical schools accredited by a body approved for such purpose by the Office of Education, thus exempting graduates of Canadian medical schools from them.

I must point out that the managers are less than pleased with the implementation of this law by the Departments of State, Justice and Health, Education, and Welfare and directs the attention of those agencies to the views of the conferees as expressed in the report's statement of managers.

Second, Mr. Speaker, the conferees were concerned with respect to infighting within the Department of Health, Education, and Welfare over the proper role of regional offices in implementing the new provisions of Public Law 94-484. Section 707 of the Public Health Service Act, as added by Public Law 94-484, prohibits the Secretary of Health, Education, and Welfare from delegating his authority to review and prepare comments on the merits of grant and contract applications, and to make grants and enter into contracts under title VII of the Public Health Service Act to HEW regional offices.

Apparently, this provision is being interpreted by certain factions within the Department as leaving to the regional offices the authority to prepare and comment on grant and contract applications, to manage approved grants and contracts, and to approve modifications and renewals of existing grants and contracts. This tortured interpretation of the provision would, in effect, limit the Bureau of Health Manpower's authority to making or entering into the initial grant award or contract.

This interpretation of the provision was never our intent. It was our view, and intent, that the role of the regional offices in the implementation of health manpower authorities designed to respond to national needs is that of providing technical assistance to potential and existing grantees and contractors and to be sources of public information. It was not our intent that the regional offices remain the principal executors of Federal health manpower policy, employing hundreds of personnel at the expense of the personnel ceiling of the Bureau of Health Manpower which is charged with the responsibility for implementing this vitally important, and complex, program.

Therefore, the conference report contains a technical and clarifying amendment to section 707 which would make it clear that the regional offices are not charged with the responsibility for reviewing for merit grant and contract applications and any renewal or modification of such applications nor may they make or enter into renewals of modifications of such grants or contracts. The conferees intend that the provision, as amended, be fully implemented by October 1, 1977, the effective date of the provision and that the central office of the Bureau of Health Manpower be provided with the essential personnel resources needed to carry out its mandate to implement the law.

I would note, parenthetically, that identical language to existing section 707 appears in section 856 of the Public Health Service Act with respect to grants and contracts for nurse training. The Conferees are not aware that a similar problem exists with respect to implementation of section 856 and assume that that provision is being implemented in accordance with congressional intent. If this is not the case, the Subcommittee on Health and the Environment will seriously consider making the same changes to section 856 that we have made to section 707.

Mr. Speaker, this legislation extends programs providing vital health services to millions of Americans who otherwise would not receive them. It continues important research activities in cancer, heart, lung, and blood diseases and our ongoing effort to rationalize the distribution of health services. It is fiscally responsible and has the support of the administration. I urge the adoption of the conference report.

Mr. CARTER. Mr. Speaker, will the distinguished gentleman yield?

Mr. ROGERS. I yield.

Mr. CARTER. I want to compliment the distinguished gentleman from West Virginia, chairman of the full committee, and the subcommittee chairman, the gentleman from Florida (Mr. ROGERS) for his patience, which is really a rare quality. I do not see how they put up with all the irascible members of this subcommittee and full committee. I thank the distinguished gentleman for yielding to me.

Mr. ROGERS. I thank the gentleman.

Mr. STAGGERS. Mr. Speaker, I will just take one moment in order to say that the gentleman from Kentucky (Mr. CARTER)—he is a medical doctor—has given invaluable service to this committee and has helped to do so many things that are so great for this land. I want to compliment him and all the members of the subcommittee on the job they have done, and especially Mr. CARTER.

The SPEAKER pro tempore. The question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 401, nays 6, not voting 26, as follows:

Mr. Murphy of New York with Mr. Ertel.
Mr. Koch with Mr. Brown of California.

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AGRICULTURE ACT OF 1977

Mr. FOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7171) to establish more responsive programs for the benefit of farmers and consumers of farm products; to extend and improve the programs conducted under the Agricultural Trade Development and Assistance Act of 1954, as amended; and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 7171, with Mr. EVANS of Colorado in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday, July 19, 1977, the first reading of the bill had been dispensed with, the gentleman from Washington (Mr. FOLEY) had 1 hour of debate remaining and the gentleman from Virginia, (Mr. WAMPLER), had 1 hour of debate remaining.

The Chair recognizes the gentleman from Washington, Mr. FOLEY.

Mr. FOLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Committee on Agriculture brings to the Committee of the Whole House and to the House the bill H.R. 7171 which is the result of the extended efforts of the Committee on Agriculture over the period, with a few exceptions, since we have come into this session of the Congress. It is probably, together with the additional food stamp provisions that are made in order as part of this bill by the rule, one of the most complex and certainly one of the most important pieces of legislation that this House will consider in this session of the Congress and perhaps, with the exception of the energy package, the most complex legislation.

First, I would like to say a word of thanks not only to those distinguished subcommittee chairmen and members on the Democratic side of the committee who worked so very hard and long on this bill, but to the distinguished gentleman from Virginia (Mr. WAMPLER), the ranking minority member of the committee, and to all of the Republican members of the committee who have worked long and hard through many, many long, difficult sessions of hearings and markup on this legislation.

Mr. FOLEY. Mr. Chairman, I rise in support of H.R. 7171, a bill to establish more responsive programs for the benefit of farmers and consumers of farm products, and for other purposes.

The bill is a result of consideration by the Committee on Agriculture on a continuous basis during the spring of this year. It consists of 15 titles, each dealing with matters of important concern to agriculture and the national economy. It includes major revisions of commodity programs including dairy, wool and mohair, wheat, feed grains, cotton, rice, peanuts, and a number of miscellaneous provisions generally affecting farm commodities.

There will be included by amendment a title that provides a comprehensive reform of the food stamp program to simplify administration, encourage participation, and eliminate fraud.

Other titles to the bill relate to matters of immediate interest to rural America, with consequential benefits to persons throughout the United States, such as a major revision of the agricultural research extension and teaching program, a title dealing with rural development and conservation, and another amending the Agricultural Trade Development and Assistance Act of 1954, as well as a title that would provide a new thrust for agricultural solar energy projects.

I would like to discuss some of the details that relate to the various titles of the Agricultural Act of 1977.

Title I—payment limitation for wheat, feed grains and upland cotton. This title revises the payment limitation figures for wheat, feed grains, and upland cotton from the limit of $20,000 that has been in effect for the 1974 through 1977 crop. The committee has struck a compromise between the proposal of the administration for a limitation of $50,000 and those who believe it necessary to retain the limitation at current levels. It has decided on a limitation of $35,000 for the

1978 crop with annual adjustments of 10 percent thereafter to take account of inflation.

Title II—dairy and beekeeper programs. This title requires dairy price support at a minimum of 80 percent of parity for the 4-year period ending March 31, 1981, with semiannual adjustments after the beginning of the marketing year to reflect changes in the parity index; further quarterly adjustments would be left discretionary with the Secretary.

The title also contains provisions extending for 4 years the dairy and beekeeper indemnity programs, and extending also milk marketing order authorizations for class I and certain other base plans, and authority for transfers of milk to military and veterans hospitals.

Title III—wool and mohair. This title would amend and extend the National Wool Act of 1954, as amended, for 4 years—through December 31, 1981. It also increases the price support level for wool and mohair beginning with the 1977 crop year and clarifies the findings of Congress with regard to the act.

Wool is a small but important segment of our agricultural economy. It is an energy-efficient natural fiber which provides warmth and comfort to the American consumer. These attributes will become increasingly important in the years ahead.

Sheep and goat producers have been adversely affected in recent years by increases in the prices of the production items and services they must purchase.

As a result of increased production costs and large losses to predatory animals, the number of sheep in the United States has decreased from over 20 million head in 1970 to only about 12.7 million head at present. Wool production during the same period has decreased from about 160 million pounds to only about 110 million pounds at present. Goat numbers and mohair production have decreased to a similar extent during the same period. The increased payments authorized under H.R. 7171 are necessary to encourage the continued domestic production of wool at prices fair to producers and consumers.

Elimination in the findings of the 300 million pound production target recognizes the declining trend of U.S. production. Imports of wool from our friendly allies will continue to be required if a viable wool-using industry is to be maintained in the interest of U.S. growers, consumers, laborers, and the general national interest.

Titles IV and V—wheat and feed grains. Title IV provides a loan and target price program through the 1981 crop for wheat under which loans and purchases would be made available at not less than $2.25 per bushel for the 1977 crop and $2.35 per bushel for the 1978 through 1981 crops, nor more than parity. Target prices are set at $2.65 per bushel for the 1977 crop, $3 per bushel for the 1978 crop, and for the 1979 through 1981 crops at a price equal to the previous year's target price, adjusted to reflect changes in certain costs of production. These would include variable costs, machinery ownership costs and a portion of general farm overhead costs. Target prices would be used, as in current law, for computing deficiency and disaster payments.

Title V provides a similar loan and target price program through the 1981 crop for feed grains under which loans and purchases for corn are made available at not less than $1.75 per bushel for the 1977 crop and $2 per bushel for the 1978 through 1981 crops, nor more than parity, and for other feed grains at a level fair and reasonable in relation to corn. Target prices for corn are set at $1.85 per bushel for the 1977 crop, $2.10 per bushel for the 1978 crop, and for the 1979 through 1981 crops at a price equal to the previous year's target price adjusted to reflect certain changes in cost of production. The target prices for other feed grains are set in relation to the level for corn.

Current wheat and feed grains legislation expires with the 1977 crop. Unless action is taken now to enact new farm legislation, permanent legislation will come back into effect which has been suspended for almost a decade and which is out of phase with current needs. H.R. 7171 is an attempt to meet the challenge of present-day America.

On the one hand, wheat producers and to some extent the feed grains producers are faced with a severe financial crisis. During the last 3 crop years the farmers of the United States have produced near-record crops of wheat and feed grains. During the same period of time the other areas of the world have also produced bountiful crops of grain. As a result, America's wheat and feed grains producers have seen a slackening of demand for their production and prices have plummeted. In the case of wheat, 3 straight years of bumper crops have swelled the surplus carryover of wheat in the United States to in excess of 1.1 billion bushels with the carryover expected in May 1978 to be near 1.4 billion bushels. As a result of the large surplus of wheat in the United States and around the world, the market price for hard red winter wheat has dropped from an average of $5.52 per bushel in February of 1974 to less than $2 per bushel at the present time.

On the other hand, the Nation is faced with an unprecedented budget deficit projected at about $60 billion for 1978 and competing pressures for increased Government outlays from many sectors of the economy. The President has indicated his intention to have a balanced budget by 1981 and has alerted the Congress to the need for restraints in legislation which call for increased Government spending.

The target prices in the legislation are an attempt to strike a deliberate balance between these conflicting forces—to provide additional income to assist our hard pressed grain farmers and at the same time achieve legislation which is fiscally responsible and which will be acceptable to the Congress and to the President. It is the judgment of the committee that H.R. 7171 has accomplished these objectives.

H.R. 7171 also updates farm allotments for wheat and feed grains. Acreage allotments were originally devised as a mechanism for the distribution of farm program benefits and an equitable apportioning of the burdens of production control among all producers. To achieve this, farm allotments were initially assigned on the basis of historical cropping patterns. The 1959–60 period was used to establish bases for feed grains; the most recent wheat allotment was established during 1952–53.

The present allotments are antiquated, reflecting economic conditions of a bygone era. They do not adequately reflect either the actual cropping patterns or production practices adopted by today's farmers. Many producers have no allotment or have only a very small allotment relative to their current cropping practices.

Under the wheat and feed grains provisions of H.R. 7171, all historical allotments would be abolished and the programs would be administered based on the current year plantings, or in some cases, on previous year plantings. All producers would be eligible for program benefits.

The legislation also fulfills a need to revise the disaster payment provisions included in the 1973 act in the interest of a more equitable system. As previously stated, under current legislation only producers with historical allotments are entitled to disaster payments. Many producers who entered into production since the base period used in establishing allotments have been unable to qualify for relief. In addition, as little as one unit of production per acre can determine whether or not a farmer is entitled to a low yield payment. Producers are not eligible for disaster payments unless the low yield is less than two-thirds of their established yield, in which case payments are made for the entire deficiency in production below 100 percent of the established yield. Elimination of this "snap-back" provision is greatly needed.

Under the revised disaster program, benefits would be directed to those who need help the most—producers who have suffered the greatest losses.

Title VI—cotton. This title extends for 4 years with some amendments the current target price and loan program for upland cotton. The purpose of the cotton amendments is to keep United States cotton competitive in world markets with foreign produced cotton and to provide stable cotton prices so that cotton can continue to maintain its fair share of the fiber market in both the United States and abroad. At the same time, the program is designed to provide cotton producers a measure of income protection so they may be able to produce the cotton necessary to meet domestic and export needs.

The bill assures that U.S. produced cotton would remain competitive in world markets by establishing the loan rate at 85 percent of the 4-year weighted average price of SLM 1 1/16-inch cotton as quoted on the U.S. spot markets or 90 percent of the adjusted Liverpool A index quotation—the best known world cotton price index. To give producers adequate opportunity to make their plans for the next crop, the Secretary

must announce the loan rate by November 1 each year and not change the rate thereafter. Target prices would be set at 110 percent of the loan rate.

To avoid widespread price swings and price instability provisions are included which give producers the option to extend the CCC loan for up to 18 months, except when the spot market price for the preceding month exceeds a specified level. If cotton prices exceed this level, import quotas would be relaxed to allow an additional quantity of upland cotton to be imported during a 3-month period.

The provisions relating to extension of the loan period and to proclamation of the special quota become effective upon enactment even though the cotton may be of a crop prior to the 1978 crop so as to encourage speculators to become more careful about selling short in a sharply falling market or buying heavily into a rapidly rising market, thus permitting the market to reflect more closely the true supply-demand situation.

Title VII—rice. This title extends the current loan and target price rice program through the 1981 crop with the following changes:

It authorizes the Secretary to depart from the formula prescribed in the act and set loans at not less than $6.31 per hundredweight if necessary to avoid buildup of excessive stocks and loss of export markets.

It provides for adjustments in the target price beginning with 1978 to reflect changes in certain items of cost of production, the same as for computing target prices on wheat and feed grains.

It requires planting of rice in order to qualify for deficiency payments, with payments to be based on acreage planted within the allotment.

And it reduces the $55,000 payment limitation in effect for the 1976 and 1977 crops by 5 percent each year beginning with 1978 until it reaches the level of payment limitation for other crops.

Otherwise, H.R. 7171 continues the existing program providing for deficiency payments and disaster payments and loans to allotment holders based on a national allotment of 1.8 million acres with authority for a set-aside program. Marketing quotas would be suspended through the 1981 crop.

The purpose of the rice title is to establish for rice the producer-freedom and market-oriented policy which is provided for other farm commodities. This legislation offers an opportunity for the rice farmer to grow this staple commodity with a minimum of Government control and interference. The proposed program will make it possible for anyone to grow rice if he wishes and decide on the basis of market considerations how much rice should be grown.

If no legislation is enacted to extend or replace the Rice Production Act of 1975, program authority will revert to existing permanent legislation which provides for the minimum national acreage allotment of 1,652,596 acres, and for marketing quota penalties for those who produce in excess of their allotments—if marketing quotas are approved by two-thirds or more of rice producers.

Title VIII—peanuts. The Peanut Production Act of 1977 provides a sharp reduction in the cost of the peanut program to the Federal Government, assures U.S. consumers continued abundant supplies of high quality, high protein peanut products at reasonable prices, provides minimum—though reduced—income protection to the Nation's peanut farmers and, finally, gives growers new opportunities to produce U.S. peanuts for export or crushing at competitive world prices. The act is the culmination of a long inquiry into the need for changing the Federal peanut program.

The Peanut Production Act of 1977 would reduce the cost of the program for 1978–81 crops by reducing the quantity of peanuts eligible for support at the higher loan rate, the rate established for peanuts sold for primary use. This would be accomplished by placing each allotment holder on a minimum poundage quota which would decrease over the 4-year life of the bill. Second, the support level would be frozen at $420 per ton instead of escalating to a projected $556 per ton under the parity formula in existing law.

The Department of Agriculture projects that the Peanut Production Act of 1977 would reduce Government net outlays on the peanut program by $592 million during the 1978–81 period. The Congressional Budget Office also projects substantial savings under the provisions of this legislation.

The act would also allow greater flexibility for production of peanuts for export and crushing by providing for a lower support rate for peanuts produced in excess of the poundage quota but within allotted acres. The Secretary would have broad discretion under the Act in setting the support rate for additional peanuts.

With price support loans and related operations, the farmer has an effective means of obtaining the value of his peanuts in the primary food market. He also has a means for moving any production above food requirements into the secondary crushing and export market in an orderly manner.

The Peanut Production Act of 1977 represents a compromise between the various peanut producing areas and is a practical solution to the problems faced by the industry. The committee is of the view that it is a positive step in the right direction.

Title IX—miscellaneous commodity Provisions. This title contains a number of separate provisions dealing with various aspects of commodity legislation.

Among these, is provided an extended loan program on wheat and feed grains under which the borrower may extend a loan for a 12-month period without interest being charged and receive a storage payment of 1 cent per bushel per month. CCC sales of wheat and feed grains would be restricted to a level not less than 150 percent of the current loan level except where there is loss or waste or sales for disaster program purposes. These provisions would insulate existing stocks of grain from the market as much as possible.

Another provision amends the Commodity Credit Corporation Charter Act for the period October 1, 1977, through September 30, 1981, to provide a special storage facility loan program to farmers to encourage storage of dry and high moisture forage, silage, or grain on farms.

Loans for farm storage facilities were first authorized under the Commodity Credit Corporation Charter Act of 1949, with discretionary authority for the Secretary of Agriculture to determine provisions for carrying out this program. The storage facility provision was added to H.R. 7171 so that farmers can plan for storage needs in advance and not have to deal with frequently changing loan terms and provisions. Such fluctuations in the past have resulted in a great deal of farmer dissatisfaction with the program.

The bill provides for the loans not to exceed $50,000 for a period not to exceed 10 years, at an interest rate of 7 percent and would be in amounts not less than 75 percent of the total construction costs, including the cost of structural and equipment foundations, electrical systems, grain handling systems, drying equipment and site preparation. Loans could be made for remodeling costs as well. The size of the facility would be based on an estimate of 2 years production.

The title also requires the Secretary to set the loan level of a commodity at 100 percent of parity if the executive branch of the Federal Government should suspend or cause suspension of export sales of wheat, feed grains, soybeans, rice, flaxseed and cotton. This provision is intended to discourage embargoes or the suspension of export sales by the executive branch. It does not, of course, prevent such action where an overriding national interest exists.

Included in the title is a requirement for the Secretary to conduct an assessment of rural water supplies and report the result of the study to the Agriculture Committees of the Congress within 180 days of enactment of the Act together with recommendations for legislative and administrative action. The basic reason for this legislation is that information on rural water resources gathered under numerous programs by Federal, State, and local governments is not adequately coordinated for dissemination and effective use by farmers, rural Americans, governmental administrators and legislators.

Another provision authorizes the Secretary to provide a new critical lands resource conservation program in the Great Plains area, whereby owners and operators of land may enter into 2-year renewable contracts to divert cropland to a soil conserving cover crop. The Secretary may provide for diversion of up to 50 percent of the acreage planted in the 2 prior years in consideration for which he would make payments not in excess of $30 per acre.

The title also adds a new provision mandating the Secretary to establish a soybean loan and purchase program for producers, but it provides appropriate discretion for the Secretary to set the level of support in relation to competing commodities and foreign and domestic supply and demand factors. It does not

authorize the Secretary to make producer payments.

Under section 301 of the Agricultural Act of 1949, loans for soybeans and most other "nonbasic" agricultural commodities are discretionary with the Secretary of Agriculture.

In recent years, the Secretary has exercised this discretion to set the loan for soybeans at $2.25 to $2.50 per bushel with the exception of the 1975 crop when a price support program was not authorized at all. Even though the Department announced a $3.50 loan for the 1977 crop, during the hearings the soybean industry pointed to the suspension of support in 1975, when prices had fallen sharply, as justification for new legislation to mandate a price support program for soybeans.

The title also amends the Rural Development Act to authorize $20 million for each of the next 2 fiscal years for a revised and extended small farm research program and a small farm extension program.

Title XI—Public Law 480. This title extends the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480) for 2 years through December 31, 1979. It also amends the Act in several particulars. One amendment would require purchases under title I to be publicly advertised in the United States and made on the basis of bid offerings received and publicly opened in the United States. Commissions to selling agents would be prohibited and reporting of commissions to purchasing agents required.

An additional provision authorizes waivers to the restrictions on availability of commodities to cover urgent humanitarian needs.

Another amendment increases the authorization level for title II programs by $150 million in order to insure that adequate funding authority is available to meet programing requirements. The current projection for fiscal year 1978 programing is that approximately $570 million—just below the $600 million ceiling—will be necessary to fund 1.5 million tons of commodities. A slight increase in commodity prices, or other variable costs, would mean that current funding would not be available to meet this level of commodity programing. Such increased authority would provide adequate funding for title II programing of approximately 1.8 million tons at current prices in the event that additional programing requirements develop.

Title XII—food stamps. At the time title XII comes up for consideration, I will offer an amendment striking out the language now appearing in H.R. 7171 and inserting in lieu thereof the text of the bill, H.R. 7940, the Food Stamp Act of 1977, as reported by the committee.

The Food Stamp Act of 1977, as reported by the Committee on Agriculture, represents the culmination of 2½ years' work by the committee. Prompted by widespread public concern about the rapid growth and cost of the food stamp program during the winter of 1974 and 1975, the committee undertook a comprehensive study of the program beginning in the spring of 1975 to collect basic information about how the program actually operates, who participates, what the incomes of participants are, and to determine the nature and extent of administrative problems. Unfortunately, at that time that kind of information simply was not available to the committee or to anyone else.

The result of that effort by the committee was a published study of some 600 pages which provided information for the first time regarding these basic questions. In September of last year, the committee completed action on a food stamp reform bill, H.R. 13613. Because of the press of other business late in the session, a rule was never granted and the bill was never brought to the floor.

The new administration gave very high priority to food stamp reform, and early in this session the administration forwarded a proposed bill to the Congress. The Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition promptly held hearings and reported an improved bill to the full committee. The full committee has now completed action on the most comprehensive reform of the food stamp program since its inception as a pilot program in 1961.

The committee bill is a tightly interrelated package of provisions that accomplishes several major objectives:

First. To tighten program administration and reduce fraud and abuse.

Second. To eliminate the nonneedy from the program so that those who do not need food stamps do not get them.

Third. To facilitate the participation of the needy so that those who do need stamps do get them.

Fourth. To hold program costs close to current program levels.

Fifth. To simplify administration.

Sixth. To minimize the loss of benefits to current needy participants.

It is important to emphasize that legislation to accomplish those objectives in no way depends on subsequent welfare reform proposals. The food stamp program needs to be reformed, and it should be reformed regardless of the direction of welfare reform. The changes adopted by the committee are needed to improve the effectiveness of this program and to correct current deficiencies. The record clearly indicates that the path to welfare reform is, indeed, rocky and, if enacted, the administration has indicated that it will be several years before fully implemented. In the meantime, we must move ahead with food stamp reform. If welfare reform is enacted, appropriate modification to the food stamp program can be made in that context; if it does not come soon, the necessary changes in the food stamp program will be in effect.

First. Provisions to tighten program administration and reduce fraud and abuse—of major concern to the committee have been the persistent reports of fraud and abuse associated with this program. As a result, nothing in the bill received more attention than the efforts to strengthen program administration. Major provisions in this area include:

Strengthened work registration—recipients who can work must register for work, search for work, accept available work, and continue to work or lose food stamp eligibility.

Workfare—A pilot effort in one local area in each State is provided to test a mandatory work provision. In these pilot projects, work registrants who do not find private sector jobs within 30 days would be required to accept public service jobs at the minimum wage rate but paid in the form of their food stamp allotments.

Fraud penalties—in addition to civil and criminal penalties, individuals found guilty of fraud by the State will be disqualified from food stamp participation for 3 months. If found civilly or criminally fraudulent by a court, the disqualification will be at least 6 months, but not more than 24 months, in addition to the administrative 3-month disqualification.

State administration—States will receive stronger encouragement through both rewards and penalties to improve program administration. States will receive at least 75 percent—instead of the normal 50 percent—administrative matching for costs associated with the investigation and prosecution of fraud. They will be encouraged to reduce certification error rates by a provision which increases to 60 percent and 65 percent the administrative matching amounts if they reduce error rates below 10 percent and 5 percent respectively. On the other hand, States that fail to comply with Federal standards and requirements will have their administrative matching reduced as determined appropriate by the Secretary. In addition, the Department is required to establish State staffing patterns consistent with proper program administration.

Recipient reporting requirements—all certified households must receive a form at the time of certification and are required to report changes in income, assets, or other household circumstances that affect their eligibility or benefit level. That form must spell out clearly and in large print the criminal and civil penalties for fraud.

Transfer of assets—households that knowingly transfer assets in order to become eligible for food stamps will be ineligible to receive food stamps for up to 1 year.

Second. Provisions to eliminate the nonneedy from the program—under the committee bill, approximately 1.3 million people will be eliminated from the program and an additional 2.3 million will have their benefits reduced.

High gross income families—while the evidence indicates that the number of families with high gross incomes who have participated have been low, it nevertheless has been theoretically possible for families with high gross incomes to become eligible by claiming several of a long list of itemized deductions from income. The committee bill eliminates that possibility. First, the net income limits have been reduced to the official poverty guidelines. For a family of four, the eligibility level goes from $6,804 to $5,850 annually. For a family of eight, the ceiling would be lowered $2,550. In Alaska and Hawaii, the ceiling would be lowered as much as $4,764 and

$5,118, respectively. Second, on a monthly basis, deductions are limited to $60 per household, 20 percent of earned income, a dependent care deduction up to $75, and a shelter deduction of the shelter cost in excess of 50 percent of income up to $75—for benefit determination only. This means the annual gross income limits are $6,570 for a nonworking family, $8,212 for a working family, and $9,338 for a working family with dependent care.

Students—provisions in the bill eliminate all students except those who could not be claimed as tax dependents or those whose parents are eligible for food stamps if the students could be or were claimed as tax dependents and those who are either: First, working at least 20 hours per week; or second, registered for at least 20 hours' work; or third, the head of a household with at least one dependent; or fourth, otherwise exempt from work registration. Thus, the program is limited to needy students who are working at least half-time or are registered to work or are the heads of households with dependents.

Aliens—the committee gave extensive consideration to the question of alien eligibility for the food stamp program. In addition to excluding illegal aliens, the bill also effectively excludes aliens who enter under contracts with employers who guarantee jobs—but who subsequently become public charges—by imputing their employers' income and assets to them. The bill also excludes aliens who may be granted amnesty for illegal entry, but who have not, by act of Congress, been granted legal status. Fugitives from human rights oppression, and national disasters would be eligible for food stamps if they meet normal eligibility requirements.

Assets—the bill requires the Secretary to prescribe the types and allowable amounts of assets with limits of $1,500 for single-person households, $2,250 for households of two or more; and $3,000 for households of two or more containing one person over age 60. In addition to the limits contained in current regulations, the Secretary must count against the prescribed limits boats, snowmobiles, and airplanes used for recreational purposes, vacation homes and mobile homes used primarily for vacation purposes. Also to be counted against the prescribed limits is the value in excess of $4,500—fair market value—of any car used for household transportation and any other car used for employment, but not vehicles used to produce earned income. The Secretary is required to study the effectiveness of these requirements in limiting participation to needy households and report back to the Congress.

Third. Provisions to facilitate the participation of the needy—the committee bill will bring in approximately 2,084,000 people who are currently eligible but not participating and most of whom have incomes below the poverty line. The net addition will be substantially less because of the elimination of 1,344,000 nonneedy from the program.

Elimination of the purchase requirement—perhaps the most significant change adopted by the committee is the proposal to eliminate the requirement that families spend some of their income for food stamps. The committee believes the elimination of the purchase requirement will:

First, simplify administration;

Second, eliminate a major barrier to participation by the needy;

Third, reduce administrative cost; and

Fourth, reduce the potential for fraud in the handling of cash.

Eliminating the purchase requirement will significantly reduce the States' administrative burden. Eliminating the cash collection and depositing system will reduce reporting requirements, save staff time, and cut down on paperwork. Eliminating the purchase requirement will make the food stamp program available to families not able to afford the cash requirement at all or have only been able to participate irregularly. Not having a purchase requirement will reduce the number of food stamps printed, shipped, stored, issued, redeemed, reconciled, and destroyed each year by over $3 billion. Finally, the potential for vendor abuse in the selling of coupons and the handling of cash will be eliminated.

Accessible certification and issuance offices—the Secretary is authorized to set standards relating to the hours and locations of certification and issuance offices to provide an adequate opportunity for participation by needy families. Further, under certain circumstances, for example, elderly disabled, or persons with transportation difficulties, families can be certified by mail or through telephone contact. Similarly, recipients of supplemental security income may apply for food stamps in social security offices. Eligible families are assured of the receipt of benefits within 30 days of filing an application.

Indians—to encourage the participation of Indians, in a feeding program, authority is provided to allow tribal organizations to have both the food stamp and food distribution programs available on a given reservation so that individual Indian families could choose the one which best meets their needs.

Fourth. Provision to control program costs. The cost of the committee bill is estimated at $5,316 million, approximately $48 million below the committee's current services estimate and $38 million below the Congressional Budget Office's—CBO—current services estimate for the fiscal year 1978. While the cost estimates made by USDA, CBO, and the committee staff are reasonably close, the committee is very sensitive to the uncertainties associated with the cost impact of eliminating the purchase requirement. Therefore, the committee has directed the Secretary to provide special reports to the Congress on the affect on participation and cost of the program without the purchase requirement. The first report will be due 6 months after implementation, with subsequent reports due annually thereafter. Should costs begin a rapid escalation, the committee will be in position to move rapidly to take appropriate action.

Fifth. Provisions to simplify administration. The calculation of itemized deductions for each individual family has contributed substantially to the very complex administrative structure of the program and has been the source of numerous certification errors. The committee has replaced all but two of the long list of itemized deductions with a standard deduction of $60 per month plus 20 percent of earned income. This will simplify the certification process for both caseworkers and applicants and reduce error rates.

Sixth. Provisions to minimize loss of benefits to needy currently participating. Shelter deduction—under the current program of itemized deductions, approximately 69 percent of all families have shelter deductions because of higher shelter costs. In part, this has been brought about because of rapidly rising energy costs. Accordingly, a standard deduction applied equally to all would severely penalize millions of families who have shelter costs far above the amount provided for by the standard deduction. Therefore, to minimize the impact of the standard deduction and in recognition of the fact that shelter costs do vary from area to area, the committee adopted an excess shelter deduction. Families are permitted to deduct from their incomes shelter costs in excess of 50 percent of their net incomes up to a maximum of $75 per month. This deduction cannot be used in determining eligibility, but can only be used after eligibility has been determined in establishing the level of benefits. Thus, families cannot become eligible because they have high shelter costs; they can, however, increase their food stamp benefits once determined eligible.

Dependent care deduction—only about 3 percent of all households claim dependent care as a deduction under the current program. For this small group, however, the absence of a dependent care deduction would work a severe hardship and would provide a disincentive for food stamp recipients to continue employment. Therefore, the committee approved a dependent care deduction of actual expenses up to a maximum of $75 per month.

Title XIII—National Agricultural Research, Extension, and Teaching Policy Act of 1977. This title contains important initiatives in agricultural research and extension. And I would like to commend the ranking minority member of our committee, Mr. WAMPLER, for spearheading the committee's efforts in this area.

The committee found, after extensive hearings, that agriculture's share of the Federal research budget has shrunk alarmingly in the past 10 or 15 years and that this lack of emphasis has been accompanied by deterioration of the national agricultural research and extension efforts. We noted, first of all a disturbing lack of coordination of efforts, both among Federal agencies and, on a broader front, among the many Federal, State, and other entities working in this area. This bill makes the Department of Agriculture the lead agency of the Federal Government for this purpose and requires the Secretary to establish and submit to the Congress a 5-year national plan for research, extension, and teach-

ing in the food and agricultural sciences. To assist him in getting off the ground and in establishing priorities we have established two advisory committees, both to be chaired by the Assistant Secretary in charge of agricultural research and extension. One of these committees is composed of scientists and administrators; and the other is composed of direct users of the fruits of agricultural research. After the initial start-up period, the Secretary would have discretion as to whether to continue these committees in existence.

We found a number of fields of research which need emphasis right now, and this bill authorizes incentives in the form of grants for basic and applied agricultural research, as well as research into human nutrition, animal diseases, new crops, and the manufacture of industrial hydrocarbons from agricultural commodities. In addition, this bill would authorize grants to upgrade both graduate and undergraduate programs in the food and agricultural sciences and also grants for construction of research facilities and establishment or expansion of veterinary medical schools. In addition, the bill would authorize pre-doctoral and post-doctoral programs and an annual national agricultural research award.

This bill provides for the strengthening of the USDA extension program in a number of particulars and directs the Secretary to study the impact of the Federal and cooperative extension programs and report the results to the Congress by March of 1979. The bill also puts the so-called 1890, predominantly black, land-grant institutions on a par with the 1862 land-grant colleges and universities by providing specific authorizations for funding of agricultural research and extension at the 1890 schools. Finally, the bill authorizes appropriations both for existing research and extension programs and for the new initiatives contained in the bill. However, both the existing programs and new initiatives would have to be reauthorized after 5 years.

Title XIV—Agricultural Solar Energy Research, Development, and Demonstration Act of 1977. The agricultural solar energy research, development, and demonstration program is a comprehensive package of initiatives for the promotion of solar energy use on American farms. It would encourage present and future farmers to use renewable energy sources by providing for demonstration projects of practical solar energy applications and by providing loans to incorporate solar energy systems in farm homes and in farm operations. It would do this through established agencies within the Department of Agriculture and through the cooperation of the State departments of agricul'ure. It is a response by Congress to President Carter's expressed concern over the serious need for energy conservation, and a response to the concern of farmers all over America who have been experiencing drastic increases in food and fiber production costs due to energy price increases.

Title XV—Wheat and Wheat Foods Research and Nutrition Education Act. Title XV provides for a coordinated program of wheat research and nutrition education to be conducted by a Wheat Industry Council, financed through an annual assessment on end product manufacturers of wheat of not to exceed 5 cents per hundredweight of processed wheat purchased. The program is contingent on approval of end product manufacturers in a referendum. Any end product manufacturer, subject to the assessment, would have the right to obtain a refund of his assessment, upon request. An exemption is provided for end product manufacturers who do not purchase more than 2,000 hundredweight of processed wheat per year for use in the manufacture of end products. It is anticipated that as a result of this exemption, less than 20 percent of retail bakers would be covered by the assessment.

The program would be carried out by a Wheat Industry Council in whi:h wheat producers, processors, end product manufacturers, and consumers of wheat foods would be equally represented.

The program is designed to improve and enhance the quality and make the most efficient use of American wheat, and processed wheat and wheat end products, to help insure a better and more adequate diet for all Americans as well as foreign consumers. Specific objectives of the program are: First, to develop more efficient manufacturing processes; second, to develop new wheat and wheat food products and new uses for wheat byproducts; third, to develop higher protein wheat strains; and, fourth, to improve the competitive position of U.S. wheat in international markets through broadening of sales.

A final word concerning costs of H.R. 7171. The Congressional Budget Office estimates the average yearly cost of the commodity support portion of H.R. 7171 at $2.317 billion, and the total farm program covered by H.R. 7171 at $6.168 billion per year. The food stamp portion of H.R. 7171 is estimated to cost $5.316 billion for fiscal year 1978 and over the 4-year term of the bill an average of $5.49 billion per year. Thus, according to CBO, the average cost per year for all sections of H.R. 7171 is estimated at $11.658 billion.

The Department of Agriculture estimates that the farm program portion of the bill would be substantially less than CBO's estimate—more than $1 billion per year less. The committee finds sections of both CBO and USDA's estimates with which it disagrees. However, on the balance, we feel that the two estimates do provide a reasonable range for the cost of the bill and, our best guess is that the actual cost of the farm program portion of the bill will fall somewhere between the two estimates. In the case of the food stamp program, the committee is of the view that the program will cost approximately the amount estimated by the Congressional Budget Office.

Mr. Chairman, H.R. 7171 is a comprehensive bill covering most areas of interest involving food and agriculture. It is the result of great effort on the part of the committee. It is a balanced bill and deserves the support of the Members. I urge the Members to vote in favor of the bill.

Mr. SISK. Mr. Chairman, House Resolution 666 provides for the consideration of H.R. 7171, the Agriculture Act of 1977. This is a fairly complex rule, containing several waivers. While there are a number of waivers, they are, for the most part, technical in nature.

The rule provides for 2 hours of general debate with the time equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture. The bill is to be read for amendment by title rather than by section.

The rule provides for several waivers of the Budget Act in order for the bill to be considered. This is necessary because H.R. 7171 contains violations of sections 303(a)(4), 401(a), 401(b)(1), and 402 of the Budget Act. Most of these violations, however, are merely technical since the Committee on Agriculture has indicated that it will offer floor amendments to correct all of the problems with one exception.

The one provision of the bill which will not be amended in order to meet Budget Act requirements concerns support levels for crop years beyond 1977. Section 303(a)(4) of the Budget Act prohibits the consideration of new entitlements to become effective in a fiscal year prior to the adoption of the first budget resolution of that year. For example, a bill containing a new entitlement to become effective in fiscal year 1979 cannot be considered in the House until the first budget resolution for fiscal year 1979 has been adopted.

H.R. 7171 sets target prices for certain commodities at one level for the 1977 crop, a higher level for the 1978 crop, and a yet higher level for the 1979 crop. Since support payments for a given crop year are made the following fiscal year, this provision creates some entitlements first effective in fiscal year 1978 for the 1977 crop, some in fiscal year 1979 for the 1978 crop, and some in fiscal year 1980 for the 1979 crop. Applying the requirements of section 303(a)(4) of the Budget Act, the fiscal year 1979 and fiscal year 1980 entitlements cannot be considered until after the first budget resolution for the appropriate fiscal year has been agreed to.

However, full compliance with the Budget Act in this regard would preclude consideration of new price support measures for a given crop year until after the crops are planted. Clearly, compliance in this case would be inconsistent with any sound farm policy. Consequently, the Budget Committee recommended that a waiver of section 303(a)(4) be granted. The Committee on Rules concurred with this recommendation and the rule contains the waiver.

As I stated earlier, the Committee on Agriculture has agreed to offer amendments to cure the Budget Act violations under sections 401 and 402 of the Budget Act. However, waivers are required in order for the bill to be considered.

Section 1315 of H.R. 7171 provides contract authority which is not limited "to such extent or in such amounts as

are provided in Appropriations Acts," as required by section 401(a) of the Budget Act.

A number of provisions of the bill, including those relating to certain disaster payments, would violate section 401(b)(1) of the Budget Act because they would become effective upon enactment of the bill. Section 401(b)(1) provides that it shall not be in order to consider a bill containing new entitlement authority to become effective before the first day of the fiscal year which begins in the calendar year in which the bill is reported. Thus, the entitlement provisions in H.R. 7171 should not become effective before October 1, 1977—the first day of fiscal year 1978—since the bill was reported from committee in calendar year 1977.

Similarly, certain provisions of the bill contain authorizations that would become effective upon enactment of the bill. Since this could occur during fiscal year 1977, the provisions in question would violate section 402(a) of the Budget Act. This section provides that it shall not be in order to consider a bill authorizing the enactment of new budget authority for a fiscal year unless the bill has been reported by May 15 preceding the beginning of that fiscal year.

Mr. Speaker, this rule also waives points of order against the consideration of section 1334 of H.R. 7171 for failure to comply with the provisions of clause 5 of rule XXI which prohibits appropriations in a legislative measure. This is actually a technical violation since the language in question simply allows administrative funds to be used for transportation of non-Federal scientists to research meetings. The language appears on page 139, lines 22 to 25 of H.R. 7171.

The rule also makes in order the consideration of the text of H.R. 7940, the Food Stamp Act of 1977, in lieu of title XII of H.R. 7171. H.R. 7940 is to be considered as an original text for the purpose of amendment and it will be read for amendment by section. Two points of order are waived against the substitute. Clause 7 of rule XVI, the germaneness rule, is waived. This is necessary for two reasons: First. H.R. 7940 amends several laws which are not amended by the original bill, and second, H.R. 7940 is much broader than title XII of H.R. 7171. Clause 5 of rule XXI prohibiting an appropriation in a legislative bill is also waived. Again, this is a technical violation relating to the transfer of funds. The language in question appears on page 57 of H.R. 7940.

After passage of H.R. 7171, the rule makes in order the consideration of S. 275, the Senate Agriculture Act of 1977. A waiver of section 303(a) of the Budget Act is also granted for this bill because it, like the House bill, contains price supports for various commodities for fiscal year 1979 and fiscal year 1980.

Mr. Speaker, H.R. 7171 is a complex piece of legislation containing some 15 titles. It is the result of extensive consideration by the Committee on Agriculture. I do not plan to discuss at this point the various provisions of the bill as I am sure there will be ample opportunity for Members to discuss those provisions during consideration of the bill. I urge my colleagues to adopt House Resolution 666 so that we might proceed to consideration of H.R. 7171, a vital piece of legislation not only for the agricultural community in this country but for the Nation as a whole.

Mr. WAMPLER. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, just over a decade ago, this Nation's farm programs were on the verge of collapse. Surpluses piled up in warehouses, grain overflowed its bins, storage costs alone totaled more than $1 million a day, and farmers faced severe financial hardships.

A new approach to the problems of agriculture was needed—away from the programs which had caused the problems in the first place: High rigid price supports, production controls, and Government domination over the life of the farmer. A new approach was developed on a bipartisan basis—and the legislation we are now considering continues much of the past which is good. It also adds some new which I consider bad.

Without question, however, this legislation is important—perhaps the single most important measure this Congress will consider. It is important for a number of reasons:

First. It replaces farm programs which would otherwise expire this year. If this happens, most programs would revert to quarter-century-old laws which are no longer applicable. So we must act this session.

Second. Agriculture is this Nation's biggest and most important industry with assets totaling approximately $600 billion, and with about one out of every five jobs in the private sector involved in some way with it. We must assure a viable farm economy which, in turn, will help to assure a vigorous national economy.

Third. We can possibly survive without such life basics as clothing and shelter, if we must, but we can in no way survive without food. We must therefore enact programs which will assure adequate agricultural production to meet the ever-increasing need for food which will face this Nation in the years ahead.

Because this legislation is so vital to our country, I will put my every effort during its consideration into making it the best possible bill for agriculture specifically and for the country generally. As I indicated a moment ago, there are both good and bad features in this bill. Let me elaborate.

The 1970 Agricultural Act charted a new course for farm policy by abandoning to some extent the discredited farm policies of the 1960's. It not only moderated many of the Federal controls on crops, production, and stockpiles that had dogged farmers and producers for a decade, but it turned attention to expanding farm markets overseas.

The Agricultural and Consumer Protection Act of 1973 next emphasized market-oriented farm policies and programs. Target prices were established which were realistically set so as to stabilize prices without billions of dollars of cost to the taxpayers.

Loan levels were established which permitted farmers to hold inventories and to make basic decisions on when to sell, whether to feed or when to switch to other nonsurplus crops. Loan levels did not build up huge Government-held inventories which could "hang over" the market as a threat for dumping; instead they merely helped farmers finance their operations and gave them a greater voice in making supply and demand decisions.

Farm prosperity since 1973 attests to the success of the 1973 act—a "free market" approach to farm policies. This does not mean that the Federal Government is totally removed from farm programs. But it does mean that Federal paternalism—such as Federal control of prices through control of surpluses and export subsidies—is largely and rightly diminished.

Recently, with the advent of a new administration, there is concern among farmers over possible new directions for American agriculture. USDA initiatives into international cartels for wheat, subsidies for sugar processors and a legislative program—the farm bill we are now considering—call for what appears to be a return to the Federal farm policies of the sixties—and I might add—to many of the same old faces of the Freeman era.

Mr. Chairman, the programs presently on the books have worked. Let us build on their record of achievement.

One of the provisions of the committee's bill that could have the most beneficial impact on American agriculture is title XIII, the National Agricultural Research, Extension, and Teaching Policy Act of 1977. This initiative which was begun and which passed the House overwhelmingly in the last Congress has been expanded on in this legislation. The purpose of title XIII is to reestablish agricultural research, extension and teaching as a primary function of the U.S. Department of Agriculture—fields which have, to a large extent, been neglected and ignored by the executive branch and the Congress for over a decade.

The need to expand research, extension and teaching in the food and agricultural sciences is well documented. Despite current projections of surpluses in some crops this year, recent brushes with famine in some areas of the world and predictions of Malthusian population growth in others require this Nation to establish new policies and new priorities to insure that our farmers will have the capability to produce the food, fiber, and wood products to meet future needs both at home and abroad.

At the appropriate time, I shall speak at length on this title, as one of its prime authors.

I strongly endorse in the bill such provisions as that inserted by the gentleman from Kansas (Mr. SEBELIUS) and by the gentleman from Minnesota (Mr. HAGEDORN) which would permit extension of loans to farmers, which would provide for storage of commodities on farms and payment of minimum storage costs to producers.

I also applaud the facilities loan expansion initiative offered by the gentleman from Louisiana (Mr. MOORE). This expansion of credit for onfarm storage goes hand in hand with policies to leave commodity control decisions to the largest extent possible in the hands of farmers and producers.

H.R. 7171 makes legislative progress on some rural development and conservation programs. By increasing the limits on congressional approval of resource conservation and development project loans, this bill would decrease the time the States will have to wait to obtain loans. The gentleman from Illinois (Mr. MADIGAN) has also included an amendment calling for a rural water program assessment by USDA—so that Federal, State, and local governments may have such information when legislating on matters such as water disappearance, conservation, allocation, collection, and storage.

Let me also note that the gentleman from Colorado (Mr. JOHNSON) has inserted language in the bill to amend Public Law 480 by revising purchase procedures and publication of fees to agents, brokers, et cetera, by suppliers of commodities or ocean transportation. This provision should do much to correct the Korean-type scandals which have centered around Public Law 480, title I sales.

During the past several years, farmers and consumers alike have experienced instability at the marketplace with regard to milk. A giant step forward can be taken if Congress approves the dairy provisions increasing the support floor to 80 percent of parity for the life of the farm bill, with a semiannual updating. The stability of this provision will enable dairy farmers to plan better—which, in turn, will help to stabilize consumer prices for dairy products.

Other aspects of the dairy and beekeeper programs are basically simple extensions of the 1973 Consumer Protection Act. These portions have worked well and should be continued.

There's another section of H.R. 7171 which I call to your attention—because it addresses one of the most important problems facing this Nation: energy. In particular, energy for agriculture.

The entire food production and processing system has dramatically increased its use of energy over the past several decades. In 1910, two calories of input energy were required to produce one calorie of food. In 1970, nine calories of input energy were required to produce one calorie of food. In the face of rising energy expenses and uncertain supplies, the need for reliable, low-cost alternative sources of energy is becoming more and more critical for agriculture.

The potential of solar energy for agricultural application has hardly been tapped. Title XIV of this legislation encourages the development and use of solar energy through Farmers Home Administration loans, through additional USDA research and extension activities related to solar energy and through a new 4-year Federal/State cooperative program for solar energy demonstration farm projects.

This additional legislative authority for new USDA initiatives in the area of solar energy will complement and expand the Department's present efforts in this field.

Altogether, Mr. Chairman, I understand there will be over 40 amendments introduced during debate on H.R. 7171. I believe several of these amendments would substantially improve the bill—and I intend to support them wholeheartedly.

One of the most controversial sections of H.R. 7171 involves food stamps. Although I favor a strong food and nutrition program, the fact is that the inclusion of food stamps in this bill weakens it considerably, in my opinion. Nevertheless, I will work to improve the language in the bill—specifically, to delete the part which calls for elimination of the food stamp purchase requirement. If it remains in the bill, this section would move this program a long way toward straightout welfare. For one thing, it will make this program more costly, since more people will be added to food stamp rolls—with estimates ranging from an increase of $600 million to well over $2 billion more, depending upon the degree of participation. Since poor people will spend less for food under this new system—an estimated $1 billion a year less—it will reduce farmers' income by a proportionate amount. By substituting income supplements for a food supplement program, it will erode the one program designed to help improve the nutritional level of the poor people in this country.

I urge my colleagues to take a close look at title XII before going along with its provisions to eliminate the food stamp purchase requirement.

An amendment which will help to improve the food stamp section will be offered by the gentleman from Vermont (Mr. JEFFORDS). His amendment would give States the option of issuing cash in lieu of stamps to households where every member is over 65, blind or disabled. The food stamp program has an abysmal service record for this group. Only 25 percent of eligible elderly persons actually receive food stamps. Participation among the elderly is even lower in rural areas, to an extreme of 5 percent in Wisconsin, for instance. The reasons for lack of participation on the part of this group are primarily fear of welfare stigma and logistical inconveniences. All of the evidence indicates that participation among this group would vastly increase if they could use cash instead of stamps.

The gentleman from Vermont (Mr. JEFFORDS) will also offer an amendment to recover food stamp benefits received by households having an annual income over twice the poverty line. The recoupment proposal would greatly add to the integrity and equity of the food stamp program by insuring that benefits only go to truly needy households. It would utilize the efficiency of the Internal Revenue Service system to make recipients accountable for their income and benefits received, thus greatly reducing opportunities for fraud and abuse of the program. By best estimates, there are 400,000 recipient households in this income category annually—which means there would be some $283 million which could be recovered through this process.

Another amendment—this one by the gentleman from Georgia (Mr. MATHIS)—is important to protect the fiscal integrity of the program. It would place a cap on spending of 10 percent above what the committee staff has estimated the program would cost. In other words, the committee estimates the food stamp program would cost $5.3 billion in fiscal year 1978. The proposal would set the funding ceiling at $5.8 billion. This would not preclude additional expenditure if authorized by Congress in the event of a national emergency.

Mr. Chairman, an amendment which I consider highly useful will be introduced by my colleague from Illinois (Mr. FINDLEY) to improve on the "food for work" concept now embodied in the bill. This provision was earlier adopted in the Agriculture Committee by a vote of 43 to 2, I might add.

Specifically, it would establish one pilot project in each State under which certain able-bodied recipients would be required to perform some public service in exchange for food stamps. The amendment of the gentleman from Illinois (Mr. FINDLEY) will attempt to expand these pilot projects by providing for State and local option.

Mr. Speaker, I consider these amendments important to establishing the integrity of the food stamp program and to restoring the self-esteem of food stamp recipients.

A General Accounting Office report released just Monday indicates that because of errors, misrepresentation, and outright fraud, $12 in every $100 of food stamp benefits is overissued and only 12 cents of that sum is ever recovered. USDA does not bother to collect information as to what proportion of overissuances result from suspected fraud and misrepresentation, but GAO found in the project areas surveyed and based on office classification of individual overissuance claims cases, about 55 percent of the dollar value of all the claims they had established involved suspected recipient fraud.

This parallels a 1976 study by the Agriculture Committee, entitled "Survey of State Administrators on Illegal Activities Within the Food Stamp Program," which revealed a shocking rate of coupon overissuance—nearly 50 percent—through misrepresentation in some cases and outright fraud in others.

This is an absolute indictment of the whole food stamp complex in the Department and in the Congress. American workers and taxpayers continue to provide complete Federal funding of food stamp benefits, thus giving the States no stake in better program management. The Department continues to rely on the States to prosecute fraud, but at the same time it does not provide guidance and assistance in handling such cases. In addition, any benefit retrieved by the States is returned to the Federal Government, so why should the States take a more aggressive approach and spend their own money in collections that will be turned over to the Federal Govern-

ment. This is a cruel hoax on the needy deserving the benefits and the honest folks funding these misguided benefits.

Despite widespread media presentation of abuse and congressional inquiry into the matter, USDA has vigorously contended that the word "fraud" does not exist in the food stamp vocabulary—that abuse represents eight-hundredths of 1 percent, a miniscule amount. Worse, departmental officials and the hunger lobby—both outside and inside Government—when asked about these reports during congressional hearings, accuse concerned Members of "demagoguery." Every page of this GAO report represents severe indictment of a massive food stamp scandal and to deny it is irresponsible. Unfortunately the food stamp legislation coming before us as part of the farm bill does not correct the situation. Despite the food stamp lobby's contention that the EPR provision alone will take care of fraud, the fact is it will not. Assistant Secretary Foreman went on nationwide TV yesterday and proclaimed that EPR will eliminate fraud. She was wrong. EPR will address only the matter of vendor fraud, which represents peanuts in misspent funds. The big items of fraud in the certification process are still to be dealt with.

To help meet the deteriorating financial problems of wheat farmers in the Great Plains areas, I understand amendments will also be offered to increase the loan rate and target price on wheat above the levels contained in this bill. I urge each of you to listen to the arguments which will be presented during this debate and decide on that basis the merits of these amendments. I will only say that I sympathize completely with the concern of wheat farmers who were promised support levels in line with costs of production by Mr. Carter when he was campaigning for the Presidency.

Mr. Chairman, I hope when we have finished action on the Agricultural Act of 1977 that the Members of this body will be able to return to their districts proud of what has been achieved—for the future of American agriculture and the economic well-being of this great Nation rests largely on what we produce here over the next few days.

Mr. FOLEY. Mr. Chairman, I yield 5 minutes to the distinguished vice chairman of the Committee on Agriculture, the gentleman from Texas (Mr. POAGE), chairman of the Subcommittee on Livestock and Grains.

Mr. POAGE. Mr. Chairman, I want to first commend the chairman of our Agriculture Committee, Mr. FOLEY, for his efforts and leadership in bringing the Agricultural Act of 1977 to this floor. There have been and still are sharp differences of opinion among committee members. There will be similar sharp differences on the floor. Chairman FOLEY's task was a difficult one, but he has worked with understanding and patience and has brought out a bill which addresses itself both to the serious problems of the producers and to the welfare of the consumer. I do not know of any other Member of this House who could have achieved what Chairman FOLEY has done. I congratulate him.

This legislation could not have been presented at a time when it is more needed. As a result of the record crops here in the United States, coupled with a decreased demand for agricultural commodities abroad, the market price for wheat and feed grains in the United States is at a disastrously low level, and cotton and soybeans not doing much better. The result is a severe depression for our agricultural economy with a threat of economic catastrophe unless this or similar legislation becomes law in the near future. Surely, we must have legislation which will reduce the accumulation of surplus wheat beginning with next year's crop, and that means we must have legislation in the next few weeks. The planting of next year's winter wheat crop will begin the last week of August 1977.

The present economic crisis in American agriculture is real—not imaginary—and not simply something politicians talk about. It is real in that unless some legislation is forthcoming very soon, thousands of small American family farmers will go bankrupt within the next 2 years. It is real in that the entire economy of a number of Midwestern States is in a severe slump. A slump which must be reflected in and adversely effect other sections of the country. It is real in that many banks in our wheat-growing areas are on the verge of insolvency and probably cannot finance farmers to make any future crops without some assurance of price.

To illustrate how severe the problem is I ask my colleagues to consider the following. The USDA has estimated that in 1977 it cost an average of $3.15 to produce a bushel of wheat. Yet, today, wheat is selling in most parts of the United States for less than $2 a bushel. I personally know of wheat that sold for $1.85 a bushel when harvested last month. I am sure prices are less today. Thus, farmers are losing more than $1 a bushel on every bushel they produce. Those unlucky enough to have suffered a drought or a hard hail storm this year are losing even more. The Department of Agriculture has also estimated that this year it will cost $2.20 to produce a bushel of corn. Yet, at the present time, corn is selling for $2.15 a bushel and all feed grains are following the downward trend of corn. For many months cotton and soybeans enjoyed a somewhat better price structure but recently these prices have collapsed .

It is America's small family farmers who suffer the most as a result of the price situation. For example, the USDA estimated that in nine Midwestern States—Colorado, Kansas, Minnesota, Montana, Nebraska, North Dakota, South Dakota, Oklahoma, and Texas—over 59,000 farmers would be forced to refinance or dispose of a portion of their assets just to pay their debts this fall and in the same nine States about 14,000 farmers will be unable to pay and must go into bankruptcy. Those going broke are not the giant corporations, but hard-working families who are trying to make a living rather than go on the public dole.

Mr. Chairman, H.R. 7171 is not going to solve all our farm problems. It is not going to save all farmers from bankruptcy but in my opinion, it is a bill which will go a long way in solving the present crisis. At the same time, it will help the President attain his admirable goal of balancing the Federal budget by 1981. It is a bill which had been attacked by both sides. Naturally many of those on the verge of bankruptcy feel the bill should provide more help from the Government. The representatives of these distressed people often feel they must reflect their constituents' demand for greater Government help. I cannot condemn or criticize those who point out that this bill does not go far enough in that it will not restore prosperity to many of our farm people.

On the other hand there is much criticism of the bill because, in the judgment of many, possibly including the President, it goes too far. It commits the Federal Government to the expenditure of billions of dollars if necessary to maintain a very minimal farm income. But the farm income sections of this bill are very modest as compared with the social and welfare sections which involve expenditures for food stamps, et cetera. Here, it seems to me, the bill substantially exceeds the amount which can properly be spent without any contribution whatsoever by the beneficiaries. But this is another matter—one which I feel should be considered on its own merits.

The President has stated categorically that he could not approve expenditures as great as those approved by the other body. He has not even said that he would approve the expenditures called for in this bill, but our beloved former colleague and present Secretary of Agriculture feels this bill if passed by Congress as it now stands would become law. I think this bill will receive Presidential approval. At the same time I fear that any substantially more costly multiyear program would be vetoed. I cannot assure the committee that substantial increases for even 1 year will be approved but I feel that there is a reasonable probability that relief to this year's grain producers will be approved—for 1 year only—and I expect to support such a program.

I have been a Member of this House several years and I have never observed any benefits, other than political flowing from a vetoed bill. I do not believe that it is going to help any wheat farmer in Kansas, Ohio, or Texas to have his Representative tell him: "I voted against H.R. 7171. I want to get us a much more helpful program and I want to give it to you for the full life of this bill." Certainly, such a vote could be of no help to farmers who need help, if we can rely on the President's repeated statements. I do believe them and believing it seems clear to me that the greatest help we can extend to farm people is to pass this bill with amendments which we think can receive Presidential approval. Of course, there are a great many serious and well-meaning people in my district and in each of your districts who will say: "Farmers should receive something

better than this;" but I learned a long time ago it was better to take a part of something than it was to get all of nothing. I believe I can say that with all sincerity that if we insist on a continuing more expensive program, we are assuring farmers of all or nothing. If we can send this bill to the President as it stands or with reasonable amendments which add costs for this year only. I think that we will have given farmers a substantial part of something. We will have come a long way in stabilizing prices at a higher level. We will have protected our consumers from unreasonably high prices and we will have provided a very adequate reserve against any unforeseen adverse crop situations in the future. At the same time, we will be passing a bill which holds our governmental spending to realistic levels. We will be passing a bill which will enable American farmers to continue to move their crops into the export market and over the years we will be maintaining the ability of our consumers to buy domestically produced foods at a reasonable price. If, on the other hand, we let thousands of farmers go bankrupt, I am sure that every Member of this body recognizes that food production will decline and prices will very well reach unreasonable levels.

Mr. Chairman, this is a good bill. It is a balanced bill. It is not an extreme measure. It is one we can afford. Indeed, it is one we cannot afford to do without. I hope Members will recognize that we must pay a substantial price for an assured, adequate supply of food. On the other hand, we must recognize that it is not going to help our farmers to pass bills that are not going to become law. While I come from a city of more than 100,000 people and have more urban than rural constituents; I know that all of my people are best served when they can get their food at fair and stable prices. This bill clearly moves in that direction. I urge you not to distroy its balance by accepting amendments which go so far in either direction as to jeopardize the bill's very real benefits.

Mr. WAMPLER. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Kansas (Mr. SEBELIUS).

Mr. SEBELIUS. Mr. Chairman, I want to add my remarks to those of the chairman and the vice chairman, the ranking member. I think the chairman, the gentleman from Washington (Mr. FOLEY) has done a remarkable job, and the gentleman from Virginia (Mr. WAMPLER), on our side, has done an excellent job. There is no greater pleasure than serving as a ranking minority member with the gentleman from Texas (Mr. POAGE) chairman of the Subcommittee on Livestock and Grains. They have all done an outstanding job.

Mr. Chairman, I appreciate this opportunity to discuss in some detail H.R. 7171, the Agricultural Act of 1977. I would like to stress that I have the privilege of representing the Nation's leading wheat-producing district and 57 counties that are typical of rural and small-town America. This legislation directly affects the pocketbook and lives of my constituents. However, the point I would like to make is that this legislation is not parochial, but will affect the welfare of citizens throughout our Nation and throughout a troubled and hungry world as well.

Before we make the basic decisions that will determine the direction of farm policy over the next 4 years, I believe it would be helpful to reflect on where we have been.

We certainly did not achieve the millennium with the Farm Acts of 1970, and 1973, but what was achieved was unprecedented, and the farmer's response in terms of productivity has been nothing short of remarkable. We became optimistic about a farm policy that enabled us to play a vital and successful role in providing food for our nation, alleviate hunger and malnutrition, improve our balance of payments, pay for the imported oil we use, and,even play a significant role in achieving world peace.

We did this with a market-oriented farm policy. And, as we look at what has happened since the 1960's, I do not believe it is in our best interests to go back down the road to Government-controlled agriculture. The current policy is market oriented but with target price deficiency payments to protect the farmer from sudden declines in farm income. It is a policy of freedom for the individual to make his own planting decisions, rather than a policy of allotments and quotas

I believe we should add to and build upon this basic policy. It was this policy that led to record export sales and farm income levels that for the first time in decades enabled the farmer to receive a fair return from the marketplace. In fact, per capita income of farmers exceeded that of the nonfarm sector in 1973 for the first time in recent economic history.

However since that time we have seen serious deterioration in that market. Worldwide wheat stocks have been replenished by more than 50 percent within the last 18 months, exports have fallen off, and prices have plummeted by 44 percent within the past year to levels below the cost of production.

Today, throughout High Plains wheat producing country, we are experiencing a severe price, credit, and cash flow crisis. The value of hard red winter wheat in a 1-pound loaf of bread is now about 2.5 cents, less than the cost of wrapping it. Some time ago within the House Agriculture Committee, I made an effort to dramatize our plight by wearing a breadwrapper as an arm band in mourning for the wheat producer. His cost-price squeeze has become a virtual bear hug. Bureau of Labor statistics show the cost of food increased 2.5 percent while wages have increased 7.2 percent, energy 11.3 percent and transportation 14.1 percent. All of these items weigh heavily in the farmer's cost of production.

We have just harvested the third largest wheat crop on record in the United States and by the time cutting is finished in the Dakotas and Montana, we will have more than 3 billion bushels of wheat on hand. That is enough wheat to provide 944 loaves of bread for every man, woman, and child in this country. By the time anticipated domestic use and exports for the upcoming year are subtracted, we will have enough wheat on hand to bake 426 loaves of bread for every citizen of this Nation, triple the wheat surplus of 3 years ago and the largest carryover since 1961.

Let me stress that in wheat country the attitude of farmers, farm wives, farm organizations, and now our business interests and financial institutions has turned from concern to fear. A preliminary report from 309 Kansas banks show 45 percent of our farmers are in "serious trouble" and predicts 86 percent of our State's wheat producers will lose money this year due to the current farm price crisis.

The term "serious trouble" includes 8.7 percent of farm bank customers who cannot repay current debts and 36.2 percent of farm customers who have gone through major refinancing of their assets. Our rural banks are presently carrying debt loads of up to 80 percent. We are facing an agri-tragedy in wheat country and are in danger of losing a generation of young farmers.

The Kansas bank study only confirms the findings of a special USDA survey in April that revealed that 10 percent of farmers in Kansas were unable to pay their debts at that time and that 35 percent had to refinance or dispose of their assets. The figures were similar for a nine-State area.

The Kansas State University Farm Management Association records show that the average net income of its 2,500 association members has dropped 84 percent in the last 3 years. No business can take losses like that and still remain solvent. No one in our economy has taken losses like that, and yet, somehow, the farmer manages to tighten his belt and hang on.

Let me emphasize this situation is especially critical to our younger and more progressive farmers. They find themselves in a highly leveraged position and in danger of going under as a result of an increasingly burdensome debt service and negative cash flow. This is a generation of young farmers who found it economically possible to get into the business of family farming only to see their dreams shattered. Who will take their place? Who will produce the food and fiber for our Nation and a troubled and hungry world?

I think my colleagues can tell from this grim picture that we need at least some temporary repairs on our farm policy road or we shall very likely end up in the ditch. Let me stress that I agree in full with those who favor a long-term free market and export-oriented farm policy. I dare say there are few advocates of the old price support days of the 1960's. But, the point is that a market oriented agriculture policy must first have a market, and we do not. Somehow, the farmer has to get "there" from "here."

The farmer's immediate need is for cash flow. If he cannot earn at least the

cost of production, and goes out of business, a new farm bill and this entire debate and discussion will be academic and meaningless. Our financial situation in the High Plains is such that we must tell the farmer's banker that help is on the way and there is good reason to carry that farmer and keep him in business.

Mr. Chairman, the $2.65 target price for 1977 wheat contained within this bill does not represent adequate assistance. That level has been arrived at through the process of budget considerations along with food stamps, welfare, national health insurance, and other Federal programs. The assistance within this version of the farm bill may look good on the budget chart down at the Office of Management and Budget or over in the White House. But this deficiency payment needs to be measured by what is needed to enable our wheat producers to stay in business and keep producing.

Back in 1975, a sizable majority within this body approved a farm bill that would have pegged the target price for wheat today at $3.73. Since that time, three things have happened:

The wheat farmer's cost of production has escalated.

The price of wheat has dropped 44 percent and the farmer's annual income has dropped a shocking 57 percent.

And we have that surplus of wheat that represents 944 loaves of bread for every man, woman, and child in America.

After 2 years of inflation in the cost of production and 2 years of declining farm prices, our colleagues in the other body have passed legislation approving a target price for this year that is lower than the target price a majority approved in both Houses in 1975. As my colleague, the Honorable BOB DOLE, has pointed out, this is certainly not a bailout for farmers. It is not a raid on the Treasury. It is a bare minimum level of support that we should provide for farmers.

During consideration of amendments to this legislation, my colleague, the Honorable GLENN ENGLISH of Oklahoma, and I are offering an amendment to raise the wheat target price to the modest figure of $2.90; the level already passed by the Senate. I would greatly appreciate the support of my colleagues in behalf of this amendment.

I think it is important at this juncture to stress that establishing a target price level commensurate with the financial needs of wheat farmers does not represent a "cost" to the Federal Government but an "investment."

The average American family today still spends only 17 percent of its income dollar on food. The American farmer now feeds 56 people—43 American citizens and 13 citizens of foreign nations. We have a surplus on hand today, but with the growing world population, we must enable the farmer to continue this amazing record of productivity.

I realize most of my colleagues think of this legislation in terms of being a "farm bill." Let me point out that this legislation will also directly affect the economic well-being of our Nation. Last year, farmers spent almost $81 billion to produce crops and livestock. This went for equipment, machinery, seed, feed, fertilizer, petroleum, property taxes, and other items which generate economic activity, especially in small towns and rural communities.

Sales of crops and livestock introduced an additional $94.8 billion into our Nation's economy. Transportation, processing, packaging, manufacturing, wholesaling, and retailing all share in the economic activity generated by farming.

Farming and the industries which support it account for about one-fourth of our gross national product. In some areas of our country, the only economic activity is that generated by agriculture.

Agriculture is the Nation's biggest industry. It employs about 4.3 million workers, almost as many as the combined employment of transportation, the steel industry, and the automobile industry.

Estimates show that about one out of every five jobs in private employment is related to agriculture. About 2 million people have jobs providing the supplies farmers use for production. Eight to ten million people have jobs storing, transporting, processing, and merchandising the products of agriculture.

In 1975 purchases by farmers included: $5.4 billion for new farm tractors and other motor vehicles, machinery, and equipment; $5.6 billion for fuel, lubricants, and maintenance of machinery and motor vehicles; $15.1 billion for fertilizer and lime.

American farm productivity is an example to the Nation. Output per man-hour on farms is over three times higher than 20 years ago. In manufacturing industries, output per man-hour is only 1.7 times as great; thus output per man-hour on farms is increasing nearly twice as fast as in industry and is an unmatched record in efficiency.

Several months ago, a majority within this body approved a $50 rebate proposal with the intention of stimulating the economy. Let me again point out for every dollar invested in agriculture, many more dollars return to the economy.

According to the economics department at Kansas State University, every dollar that the farmer receives from hay production generates $1.50 of additional spending within the economy. The $1 the corn producer receives generates $1.70; the wheat farmer multiplies his $1 return to create $1.80 within the economy as do other grain producers. The dairy farmer generates $3.40 for every dollar he receives and the beef cattle producer returns $5 for every dollar he receives for his product. Hogs are truly beautiful for the American economy, generating $3.30 for every dollar received by the pork producer.

Without question, other representative industries throughout our economy also generate additional spending in this manner but there is one essential difference. The inflation buck stops with the farmer. He cannot pass on his costs. He receives only what the market dictates. I submit to my colleagues that every dollar of assistance provided in this bill will be returned many times over within our economy.

Mr. Chairman, there are many other provisions within this farm bill and we will be considering amendments next week. I would also like to state for the record that I support the payment limitation provision; the set-aside authority on summer fallow farms; the loan extension and reseal provisions for wheat and feed grains; the optional wheat grazing and hay provision; modernized and expanded farm storage facility loans; the provisions for expanded agricultural research, particularly in regard to utilizing grain alcohol or "gasohol" as an alternate fuel; and the wheat and wheat foods nutrition education title.

At the same time, I wish to indicate my opposition to sections of the food stamp program, especially the elimination of the purchase requirement, and authorizing food stamps for strikers and to certain college students.

This legislation is being called and will be publicized in news accounts as a "farm bill." Yet in terms of priorities, we see increased spending on food stamps at the expense of denying program assistance that farmers need to stay in business. I do not see how we can have a good food stamp program without the man whose job it is to produce food and fiber to stay in business. If the farmer cannot at least receive his cost of production and goes out of business, the food stamp program will be meaningless.

Mr. Chairman, in terms of the direction of this farm bill, I think we are headed down the right policy road and that we have the basic framework of a 4-year bill that will answer this country's food and fiber needs. However, in terms of dollar priorities, I question the administration's policy of putting program assistance to farmers secondary to other programs within this legislation.

I would prefer to summarize and put the entire picture, so far as my remarks are concerned, in perspective.

I would like to read a letter from one of my farmer constituents.

DEAR KEITH: We have finished harvest and everyone is wondering how much land to get ready for wheat this fall. Most farmers agreed that we should have a reduction of 20 percent of our present allotment base, foregoing using seeded acres in the 1977 wheat crop.

Also, push for the Senate's $2.90 target price. It is not only in the best interest of the wheat farmer, but also in the best interest of the entire economic picture of this country. Example: This is the year I should repaint my outbuildings, but I am not doing it. It takes 25 gallons of paint. My car has 92,000 miles, my pickup 71,000 miles. I should replace one of them but I am not going to be able to do it.

One tractor needs new tires, but I will not be changing them this year. I should replace one grain drill, but I can't do it this year. We are foregoing any vacation this year.

Now those statements are cold hard facts, which I have heard from over a hundred farmers in our small area within the last few weeks. So multiply that by several hundred times and it is easy to see a loan price of 43 percent of parity or a target price of anything less than 60 percent of parity is disastrous. You are aware of the cutback or shutdown of money for our short line machinery manufacturers in western Kansas,

plus the trouble the dealers are having including all the various stores.

If your urban colleagues can't get the picture then something is seriously wrong in Washington, if our President can't get the picture, then there is something drastically wrong in the White House among his economic advisers, plus the fact we still need greater support from the U.S. Department of Agriculture.

Sincerely,

JOHN V. MURRAY.

HOLYROOD, KANS.

Mr. Chairman, that kind of sums up the thoughts I have in mind today as we go to work on this farm bill.

I urge a $2.90 target for wheat for 1977.

I think that if 25 cents can be added, it will help wheat farmers hang on, it will help them to keep the faith, and it will help them to keep their fingers in their operations and keep going.

Therefore, I urge support for the bill and urge support of the English-Sebelius amendment that, if it is adopted, will make this a much more responsible bill.

Mr. Chairman, in closing, I would only like to say that this is the moment, the time has arrived, and we all should go to work here for the good, not only of the wheat farmers, but of all consumers of this Nation, because if we do not have solvent farmers around, we are not going to have individual farmers delivering the food as they have in the past. Therefore, we should all open our minds and try to understand the problem and try to solve it.

Mr. Chairman, I urge all my colleagues to support the English-Sebelius amendment and the bill.

Mr. FOLEY. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Chairman, the Ways and Means Committee and its Trade Subcommittee are concerned about the provisions in this bill relating to cotton import quotas.

As you know, we are now in our fourth year of multilateral trade negotiations known as the Tokyo round. At long last, it appears that we are beginning to obtain some movement in these negotiations which are so extraordinarily important to the agricultural sector. It is the goal of the American side to reduce foreign barriers to our agricultural exports, and I believe that we will make substantial gains in this area where America so clearly excels. Billions of dollars in potential additional exports are at stake. Therefore, we must be more careful than ever in any actions we take here in the Congress affecting international trade. Any unilateral action on our part restricting imports or eliminating import barriers can inadvertently cut the ground out from under our negotiators at the trade talks by giving away an important bargaining chip or by creating new trade tensions.

For these reasons, the Ways and Means Committee is concerned that jurisdiction over matters affecting import quotas be carefully observed and we hope that the gentleman will assure us that we will continue to be consulted in all such matters and that Ways and Means joint or original jurisdiction on import quota matters will be maintained.

Second, am I correct in understanding that the quota provision in title VI does not alter the existing law relating to the importation of cotton other than to allow additional imports in certain months when the price of cotton is substantially above average—and thus, this amendment is not a restrictive trade measure and is also not a permanent concession on the part of the United States?

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. VANIK. I am happy to yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, the gentleman is absolutely correct in his understanding.

I also want to assure him that the Committee on Agriculture recognizes the primary jurisdiction of the Committee on Ways and Means with respect to all such matters as quotas and import-related duties.

I want to say further that the Committee on Agriculture appreciates the cooperation of the Committee on Ways and Means, including that of the distinguished chairman of the committee, the gentleman from Oregon (Mr. ULLMAN), the gentleman from Ohio (Mr. VANIK), and the ranking minority member.

Furthermore, I give the gentleman from Ohio (Mr. VANIK) assurance that we will continue to recognize the primacy of the Committee on Ways and Means in this area and will keep him fully advised.

Mr. VANIK. I thank the distinguished chairman.

Mr. WAMPLER. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Chairman, yesterday the General Accounting Office ruled that the Administration's proposed sugar program is not authorized by law.

GAO ruled, as many of us who have examined this program carefully have always contended, that the Department of Agriculture may not do indirectly through sugar processors what they are banned from doing directly; that is, make cash payments to sugar growers.

Unfortunately for the American taxpayers and consumers, however, the rejoicing over the GAO report will be brief.

When the farm bill is debated this week, an amendment will be offered to mandate a 14 cents per pound sugar loan and purchase program.

This sugar lobby amendment has a lot of steam behind it right now and many Members may feel that since GAO has dealt a mortal blow to the administration's 2-cent subsidy plan, this is the appropriate way to get help to an ailing sugar industry.

I strongly disagree, and seriously question the wisdom of trying to write a complicated and controversial new sugar subsidy program on the floor of the House.

Why can we not have hearings on this matter? Why can we not establish for sugar the same type target-price programs as for other commodities.

Why can we not hear witnesses from the administration, from the sugar industry, from the corn industry, and from the public before launching a new subsidy system which starts out at a half cent higher than the administration's proposal and grants a total subsidy of 4 cents a pound, not just the 2-cent maximum proposed by the administration.

Clearly, this new plan will cost the consumer a bundle.

The Secretary of Agriculture, in a memorandum of February 26, 1976 to the economic policy group, stated—and I quote:

An increase of one cent a pound in the raw sugar price adds about $125 million to producer income and about $220 million to consumer costs.

Today's Wall Street Journal quotes raw cane sugar in New York at 9.95 cents a pound.

That means a 4-cent boost if the sugar lobby amendment is adopted.

It does not take a lot of brains to figure out that this amendment will "rescue" the consumer from a 10-cent price and "reward" him with a 14-cent price.

The cost of this sugar lobby generosity of course would, according to the Secretary's memo, approach $880 million.

On top of this consumer ripoff there will be a bonanza for the foreign sugar lobby.

Under present law the U.S. sugar quota is 7 million tons. Yet foreigners are only selling us about 4.8 million tons.

If we raise our price to 14 cents by Government fiat, it is obvious that at least another 2.2 million tons of foreign sugar will gush into the U.S. market in order to capitalize on our higher price.

How many foreign sugar barons and how many foreign sugar lobbyists will become instant millionaires under this neat little exercise?

The answer you will hear is that the President would invoke quotas. But will he? What does the administration say about this amendment?

Last Friday, July 15, 1977, the administration position was clear. It was opposed to a mandatory sugar support plan. Here's what James Webster, the Director of Congressional and Public Affairs of the U.S. Department of Agriculture, said:

The Secretary has directed me to assure you that he does not approve of such an amendment. In fact, the Administration is solidly opposed to any amendment to H.R. 7171 which would in any way constrict our existing authority to assist sugar producers or to negotiate an International Sugar Agreement.

Whether in the form of payment limitations or a mandatory price support program, any such amendment would seriously weaken the Administration's ability to conclude successfully the negotiations on an International Sugar Agreement.

Finally, one can ask, what will this amendment cost the taxpayer?

With the Department of Agriculture going into the sugar purchase and loan business we can assume it will be ex-

pensive. House Agricultural Committee staff estimates costs up to $350 million annually. So the price tag for this amendment will be over $1 billion a year.

Finally, let me say that as a member of the International Relations Committee I have learned that most of the sugar bonanza that goes to foreign nations goes to a very small segment of society.

The poor people in most tropical sugar-producing countries get very little out of high U.S. sugar prices.

Why then in the name of good sense should we embark on an unbudgeted, unappropriated, unprepared, unheard, unconsidered billion-dollar sugar ripoff?

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Louisiana.

Mr. MOORE. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I would ask the gentleman from Illinois (Mr. FINDLEY) that I am sure the gentleman does not have any question but that the sugar producers in this country are in difficut straits, does the gentleman?

Mr. FINDLEY. I have no doubt but what the effect of the sugar policies of the United States over the years have induced excessive production in this country, and that fact has contributed to the recent decline in prices, but just a short time ago the U.S. sugar producers were enjoying a bonanza when the sugar prices were skyhigh. If they are going to have a bonanza in good times, they they are going to have to take a loss at other times.

Mr. MOORE. The point is right now the gentleman does not argue that the raw price of sugar is less than what the domestic producers can produce it for, does the gentleman?

Mr. FINDLEY. I think that is an easily established fact, but I believe the best place to establish it is in committee hearings and not on the floor.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOLEY. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Tennessee (Mr. JONES) the chairman of the Subcommittee on Conservation and Credit of the Committee on Agriculture.

Mr. JONES of Tennessee. Mr. Chairman, the Agricultural Act of 1977 represents the most comprehensive farm legislation ever to come before this body. The House Agriculture Committee has been under tremendous pressure to finish consideration of this legislation and bring it to the floor in the allotted time period. The circumstances under which the committee has worked have been unfortunate indeed. We have had budget constraints and veto threats, along with strong messages from our farmer constituents regarding the grim financial situation American farmers are in today.

Fortunately, our distinguished chairman has the experience, foresight, and savvy to weave from these threads a bill which: First, will provide significant support for American farmers; second, protection for consumers; and third, a bill which I think the President will sign.

Chairman FOLEY's task has been next to impossible and I want to give my personal congratulations to him and I think this body owes him a great deal of gratitude.

However, we have had a very straightforward message from President Carter that a bill calling for significantly higher expenditures would be vetoed without hesitation. We must be careful in amending this bill in ways which would increase spending levels. If this bill is vetoed, we may have trouble putting it all together again. The sugar situation is a case in point. After that bill was vetoed several years ago, the momentum was lost and both producers and consumers have suffered from wildly fluctuating prices. For this reason, I think we should try to accept the farm act as near to its present form as possible.

Briefly, I will describe the sections of the bill which come under the purview of the Conservation and Credit Subcommittee which has done an excellent job in addressing some significant problems facing American farmers. Programs were adopted relating to conservation needs, overproduction, and the problems brought on by the drought. Significant improvements have been made in the farm storage facility loan programs. Soil conservation and overproduction are addressed through extending the setaside program and adopting a critical lands conservation program, our watershed projects and resource conservation loans would work more smoothly under changes in the approval procedure, and we have extended rural community fire protection programs and adopted a small farm research and extension program. One other provision which is aimed directly at the drought is a rural water assessment program which would give us better information on which to base administrative and policy actions regarding water problems.

Another section of interest is title XIV, the agriculture solar energy program which I think would put agriculture in the forefront of coming to grips with our energy situation and put us in a lead position in the development of solar energy.

I want to close by encouraging my colleagues to support this bill and to support Chairman FOLEY in his efforts to keep it intact.

Mr. WAMPLER. Mr. Chairman, I yield 5 minutes to the distinguished gentlemen from Nebraska (Mr. THONE).

Mr. THONE. Mr. Chairman, I rise in support of H.R. 7171, the Agricultural Act of 1977.

Before I proceed further I would like to express my thanks to Chairman FOLEY, the genial and able gentleman from the Pacific Northwest and ranking Republican Congressman BILL WAMPLER, "Mr. Ag. Resource," for their dedication in securing passage of this legislation by the House Agriculture Committee. Many hours were spent in hearings and mark-up in the formulation of this bill and our work could not have been completed without the cooperation of many, many witnesses who contributed their time to make their views known to the members of the committee. Chairman FOLEY has the patience of Job, is pretty much a legislative genius—a good chairman to be sure.

He is not 100 percent enlightened regarding the key and needed amendment to be offered by ENGLISH, SEBELIUS, HARKIN, and THONE, but a real credit to this body nonetheless. I would also like to salute the professional staff of the House Agriculture Committee—one of the best I have ever seen. And I have been in and out of the Hill halls for about 20 years.

AEI, in one of its legislative analyses, made some super points regarding farm policy proposals. First, they said "farm policy" is always an enticing subject. With this we can certainly agree. A most enticing subject. Even though farmers today constitute only a very small segment of the U.S. population, farming is still by far our largest industry. When the industries, firms, and people to whom farmers sell and from whom they buy are included, agriculture does indeed still touch nearly every segment of our society. Consequently, the economic well-being of farmers is of importance to all Americans. In addition, farmers of nearly all countries—the United States included—are considered to be the core around which a nation is formed, the fiber which connects its economic tissues.

Last year we exported $22 billion worth of our products and, we live in a world where international trade is becoming increasingly prominent and meaningful. Imports of cameras, television sets, automobiles, and a myriad of other products contribute ot our level of living. We enjoy them, we want to buy more in the future, and we would even like to visit some of the countries in which they are made. But exports are needed to pay for imports, and farmers are among our most prolific and competitive exporters. Hence, we want to make sure that our farm policy is sound, from both a domestic and an international viewpoint.

Over a decade ago our farm programs were on the verge of collapse. Surpluses were widespread, our grain bins were bursting, storage was costing the taxpayer a fortune, and farmers were in severe financial trouble. It was time for a change, and that change began to evolve on a bipartisan basis. Under a Democratic administration in the mid 1960s and under Republican administrations since then, U.S. farm policy has gradually shifted from unrealistic support levels, production controls, and intense Government involvement to a more flexible, market oriented approach. Exports have become a much more significant element of farm policy, which has become a part of U.S. foreign policy. A broad bipartisan consensus has developed, favoring the basic policies that have evolved in the past 10 to 12 years.

Nevertheless, there are many specific controversial issues regarding farm policy in 1977. Wheat farmers, in particular, are in difficulty. The price of feed grains is sliding, too, and cattlemen—

the customers of feed grain producers—have just endured their worst years ever. There is unrest in the farm sector, and concern on the part of consumers as to what this unrest will mean to them in the future. Reduced production and higher food prices are a possibility. Only time will tell, and perhaps the influence of this 1977 farm bill.

There are related issues. How high should target price levels be to provide adequate income protection for farmers? How high can loan levels be without pricing U.S. products out of the world market? The United States today supplies about 44 percent of world wheat exports, about 55 percent of the coarse grain exports, 75 percent of the soybean exports and a fourth of the world cotton exports. Should a U.S. program for food reserves be legislated? Should an international food reserve be negotiated? Although there are few differences between the wheat, feed grains, and cotton programs, rice is a bit different, and perhaps those differences should be narrowed; we will also hear about peanuts: and cane sugar and sugar beets.

This legislation is designed to be helpful, but it is not going to be the cure for all problems facing the farmer. Additional work also needs to be undertaken by the Congress in seeing that additional credit becomes available. Young farmers who have recently commenced farming are particularly hard hit in our country. The Federal crop insurance program needs to be revised to make it more responsive to the needs of farmers in disaster situations and broader in coverage. I feel certain that once this omnibus farm bill is passed and signed into law that these other matters will then be scheduled for consideration.

Also, as the chairman of the Senate Agricultural Committee, Senator TALMADGE said on May 23, 1977:

"I find it interesting that some Members of this body have shown such great concern over the cost of this bill which is designed to assure the economic health of agriculture and the continued employment of our farmers.

"The signing of the administration's economic stimulus program of $20 billion was recently carried out with great pride and fanfare. This bill included $2.6 billion for employment and training assistance, $6.8 billion for temporary employment assistance under the Comprehensive Employment and Training Act of 1973, and $4 billion for local public works.

"I am not questioning the merits of these programs, but it is somewhat puzzling to me that we seem willing to provide $12.4 billion for creating jobs while questioning a small incremental amount to assure continued agricultural employment and productivity.

"In my view, agriculture is a national resource which we must maintain at its full potential.

"The cost of the bill is a legitimate concern, but we need to keep some perspective."

The total cost in this bill is about the same.

This legislation which is patterned after the 1973 farm bill is still market oriented which is a real plus and is designed to assist the farmer in those years when supply far exceeds demand. Weather being as fickle as it is cannot be counted upon to always cooperate, and the past 2 years has seen bountiful crops throughout the world. In 1974 the world was faced with famine in many areas and who knows when this same situation will again prevail.

I am not in complete agreement with all facets of this legislation. For instance, I strongly urge support for the amendments which raise target prices on wheat and target prices and loans on feed grains. Although the target prices, as passed by the Senate, are minimally acceptable, they come much closer to actual costs of production as experienced by the farmer than do the target prices as set forth in the House bill. The key English, Sebelius, Harkin, and Thone amendment will raise wheat target to $2.90 and corn target and loan to $2.00. It merits solid support. I realize that the President has threatened a veto if the Senate target prices are accepted, but I would like to recall for the Members of this body the promises, made by both President Carter and Vice President Mondale while campaigning in the Midwest last fall, to the effect that support levels ought to be at least the cost of production. I cannot believe that the President is willing to cause additional untold suffering in our farm areas by a callous veto of this legislation.

Mr. POAGE rightly says that he would rather have part of something than all of nothing. How about all of something? And that is adoption of the English, Sebelius, Harkin, Thone price support increases. There will be no veto I urge. You wait and see. The 1975 bill passed this House by a vote of 259 to 162.

In that bill the target price for wheat was set at $3.10 and its loan price at $2.25. The corn target was $2.56 and its loan rate set at $1.87. With the escalator clause these targets would now be $3.73 for wheat and $2.77 for corn.

Teddy Roosevelt was the historical author of the saying "Talk softly and carry a big stick."

When it comes to farm programs, President Jimmy Carter says, "Talk loudly and carry a small carrot."

It is very obvious that President Carter and the White House are calling the shots on the bottom line of farm policy, and those shots are being called without regard to the interests of grain producers and without regard to the people in the States where the prosperity of the grain and livestock sector is paramount.

I say to my friends on the other side of the aisle that rubberstamps are now being manufactured in the White House for the overwelmingly Democratic Congress to use in the days ahead. I urge you to tell them no.

As a Republican, we here are somewhat more immune to that rubberstamped ink than many of you on the Democratic side, but I sincerely hope that you will resist the administration's insistence on having its own way with as much vigor as many of us in the Republican ranks did when President Ford vetoed what we felt was basically economic equity for our farmers.

In the meantime, I hope we can forget about both the loud talk and the little carrots being peddled by "Secretary" Carter.

Farm prices have dropped unbelievably fast in recent months while farming costs continued to skyrocket.

	June 15, 1976	June 15, 1977
Wheat	3.42	2.00
Corn	2.74	2.09
Cattle	36.40	34.10
Hogs	49.20	41.90

Comparison of prices paid by farmers, 1973 and 1977

Item	Price, 1973	Price, 1977
Combine, large, self-propelled	$22,200.00	$42,300.00
Wheel tractor, 90–99 h.p.	10,800.00	18,800.00
Pick-up truck, ¾-ton	3,300.00	5,650.00
Grain drill, 24-tube	2,860.00	5,210.00
Disk tiller, 12-foot	1,570.00	2,520.00
Tandem disk harrow, 16-foot	2,050.00	4,520.00
Baler twine, 40-lb. bale	8.96	15.20
Gasoline, farm delivered, gal.	.32.8	.57.2

These facts demonstrate the need for Congress to support levels which more fairly share with farmers the risk of producing in 1977 and the years ahead.

To do less would be to further expose farmers to severe economic hardship and cause many to quit farming; to weaken rural America and to risk shortages of food products for consumers and industries of the Nation.

Mr. RHODES. Mr. Chairman, the bill we consider today, H.R. 7171, is one of the most important measures we will consider in this Congress. It will have a profound effect on our great, productive agricultural industry and the American consumer.

Unfortunately, the measure as it has been sent to the floor is inadequate to bring economic justice to the American farmer. It also is unfair to the taxpayers in its unwise surplus subsidies and alteration of the food stamp program to eliminate financial participation by the beneficiaries.

Under the present farm program, which was enacted by the Majority, America's farmers are producing more, but enjoying it less. Current administration farm price policies have driven this month's parity figures down to the lowest level in many years. Prospects this year are for record grain crops. The logical solution is expansion of our export market, which I must point out reached profitable heights under the past administration. I feel it is much more sensible to sell our bounteous food and fiber surpluses than to establish an unnecessary, costly storage program and call it a reserve. In actuality it would overhang the market and could be used to depress farm prices through dumping.

The minority intends to exert every effort to focus this bill on farm exports, not reversion to the wasteful practices of the 1960s. We want farmers to grow

crops, not become depositors in a Federal soil bank. We have tried these old nostrums and found them wanting.

The alleged reforms to be applied to the food stamp program would open the door to dramatically increased costs. There would be opportunity to distort the plan so that its intended function of providing nutrition for the needy would be hampered by abuses. Diversion of the program from its emphasis on food supply to a form of income supplement will be costly. In the light of the President's often reiterated concern with a balanced budget, the proposals in this bill work at cross-purposes to this pledge to the American people, and we in the minority want to help Mr. Carter balance the budget all we can.

We cannot have true agricultural reform by exhuming the expensive errors of the past. There are some four dozen proposed amendments to this bill. It is my hope that during House consideration of H.R. 7171, we can inject some pragmatic elements of reform that will be fair to the farmers and affordable to our taxpayers and consumers.

Mr. FOLEY. I yield 4 minutes to the distinguished chairman of the Subcommittee on Department Investigations, Oversight, and Research, the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Chairman, I appreciate the distinguished chairman of the committee yielding. I want to join my colleagues who have mentioned the diligence and exhaustive research and work done by the Committee on Agriculture for this omnibus farm bill.

It was my privilege to participate in several of the subcommittee hearings as well as those in the whole committee. As I am sure Members have been told, the different subcommittees held hearings and markup sessions on matters within their jurisdiction so those matters could be included in the overall farm bill. I had the privilege of working on several of the sections and one in particular, which is the research part of this omnibus bill that will be explained by the gentleman from Virginia (Mr. WAMPLER) in detail, if the gentleman has not already explained it.

This is a very comprehensive and much needed segment of this omnibus farm bill wherein we bring the agricultural research to the forefront of agricultural programs that we have within the Department of Agriculture.

We not only had hearings in the committee but also we had studies from the institutions that would be involved in this research as well as visits to some of these institutions.

In looking at the situation presently we find the only time we have shown a favorable balance of payments in recent years has been because of the contribution made by the agricultural sector to our balance of payments.

Mr. Chairman, it is unfortunate that we would say this is a time when almost every segment of agriculture is suffering from either acts of God, drought, floods or suffering the variances of the marketplace that in many instances is not the law of supply and demand as we have heretofore known it; but, rather, all the complications we have in supply and demand as interjected by Government and, unfortunately, by governments, other than our own.

The American farmer has to suffer the variances of those markets due to actions of other countries. This happens, unfortunately. It is sad to remind ourselves, but nonetheless, it is very factual. In oil, we are at the mercy of an oil producing area that has formed an organization; in coffee, as we have just seen in the last several months, and in sugar, those are three areas where we do not have domestic supply anywhere near our consumption.

We are at the mercy of other nations and of cartels and many other types of organizations.

There will be an attempt made, or I will offer an amendment to try to assist in some small way the sugar producers in this country that are suffering very, very badly at this time, due to the fact that the cost of production is almost twice the world price. The sugar price today is 9.9 cents. The lowest cost of production for the farmer is about 15 cents.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. FOLEY. Mr. Chairman, I yield 2 additional minutes to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, therefore, I would offer an amendment to try to assist those farmers.

I might add that independent of this legislation, the House has already passed a comprehensive long-term program for soil conservation that will enhance our agricultural sector.

So with that, I think a comprehensive plan that, hopefully, will be molded in the next few days to assist our farmers in all the areas involved, I think that probably we will be doing the most important piece of legislation here with respect to the committees and with respect to other pieces of legislation that we have or will be considering. This will lay the groundwork, not only for the sustenance of the United States, but for our participation in the world markets which, in turn, will assist us to reach a favorable balance of payments for the future of the world, so that if any disaster faces the world and everyone looks to us and not necessarily at the dollars, but for the assistance we can give mainly from the agricultural sector.

With that, Mr. Chairman, I think the committee and the staff has done a good job. I think everyone has worked diligently. There are differences of opinion as, of course, there would be in any body or in any organization. I think those can be worked out. There are people who have different opinions, but usually I think those can be resolved and, hopefully, they will be resolved in favor of the farmer that is producing at this time, selling below the cost of his production, but nonetheless contributing to the economy of this great country of ours.

Mr. WAMPLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN. Mr. Chairman, few Members approach this debate today with as mixed emotions as mine. I am a sponsor of H.R. 7171, the basic farm bill, and am proud to have my name associated with this legislation. On the other hand, the procedure we will follow calls for the addition on the food stamp bill to H.R. 7171. Regrettably, I cannot support the so-called food-stamp reform bill, H.R. 7940.

The new farm legislation we are considering is a balanced extension of the agricultural legislation our Nation has been relying on for several years. The good parts of the old law are preserved and many weaknesses are greatly reduced and replaced with much improved legislative language. While this bill is not exactly as I would have written it, I do feel it is a reflection of the needs of farmers, ranchers, and consumers throughout the Nation.

As to the food-stamp program, the faults of the program have not been removed and in many cases weaknesses of the program have been exaggerated. The program has lost its nutrition dedication and has become another welfare program. I will support amendments to improve the program as we debate it here.

Mr. Chairman, at this time I would like to make a few specific observations about the farm bill as we reported it from the Agriculture Committee.

As the Agriculture Committee worked to establish national policy on agriculture, and to design specific farm programs, we failed to properly establish priorities as they regard agriculture's capacity to cope with the disasters naturally imposed by weather.

We have done little to properly review the problems farmers face that are caused by nature. Drought, flood, wind, hail, and other natural forces are not influenced by man. Yet, farmers are economically and socially destroyed each year by these forces.

In this bill we have said that even though a farmer is completely ruined by disaster, we should not respond with more than partial relief. These forces, beyond the control of man, are less likely to effect large numbers of farmers, but when they do occur, they are more likely to have a severe affect.

From my perspective, we should have recognized the disaster problem's magnitude and established a schedule for meeting its challenge. We should have planned a major review of disaster and crop insurance programs and created an interim disaster program to cope with this problem until a comprehensive overhaul was conducted.

A good, interim disaster program would have provided assistance to any farmer who suffered crop failure of more than 30 percent when the cause was beyond his control. In those cases, Government should have provided assistance to cover at least 70 percent of the target price—cost-of-production—so that the farmer could have remained in agri-

culture and attempted a crop in succeeding years.

The market should be the mechanism that, through competition, removes inefficient producers. Disasters strike too indiscriminately to be viewed as part of the mechanism for removing low-productivity farmers.

I am pleased that the committee partially recognized this problem and did make some much needed improvements to the program. Specifically, the program has been improved by expanding its coverage to all planted acres and by elimination of the so-called "snapback" provisions that overrewarded certain assistance in limited cases.

Mr. WAMPLER. Mr. Chairman, I yield 6 minutes to the distinguished gentleman from Idaho (Mr. SYMMS).

Mr. SYMMS. Mr. Chairman, H.R. 7171 is a conglomerate bill comprised of several farm programs and a food stamp program. A marriage ceremony was performed at the Rules Committee during the last days of June, whereby the farm bill (H.R. 7171) and the food stamp bill (H.R. 7940) were joined in an unholy, costly, and complicated single piece of legislation.

It brings together in one bill something for those who want to go back to Federal Big Brotherism in farm programs, and it offers free food stamps and an ever-increasing clientele and cost for the food stamp program.

Under provisions of the new food stamp bill, scheduled to be title XII of the farm bill, the elimination of the purchase requirement and the deletion of the nutritional thrust of the Food Stamp Act of 1964 make the new food stamp provisions basically welfare legislation.

I guess the only difference between this welfare legislation in the farm bill and the aid to families with dependent children, AFDC, legislation is that the free food stamps go to about 18 million people rather than 10 million for AFDC.

As to the farm aspects of this bill, in my opinion H.R. 7171 will bring to a close a chapter in the history of U.S. agriculture when farmers enjoyed a period of prosperity unprecedented in recent years. This period commenced in 1969 when a new administration attempted to reintroduce market-oriented policies into USDA farm programs.

The 1970 Agricultural Act ushered in an era of change wherein the emphasis of farm programs was on controlling over-production while expanding farm exports into existing and new foreign markets. It decreased, to some extent at least, Federal control and regulation of production, prices, and farm income and gave greater freedom to the farmers to make decisions in these areas.

The Agricultural and Consumer Protection Act of 1973 gave further market orientation to USDA farm programs. It introduced a new target price concept whereby farmers would receive deficiency payments to recover some element of production costs in the event of drastic declines in market prices.

The system was designed to relate production to market conditions with the farmer making the decisions. Thus, if prices in one basic commodity fell because of surpluses, the farmer could shift to crops in shorter supply. Since that bill has been in effect, target prices have offered some basic protection—but no deficiency payments have been necessary.

Under the 1973 act, loan levels were established and maintained at levels where huge inventories were not accumulated; and there was no Government "dumping" to depress farm prices when consumers complained about food prices.

The Carter administration obviously wants to get back into the business of Federal paternalism and control of farming operations. Its response to farm problems is to: First, explore international wheat cartels; second, initiate subsidies to sugar processors at a time when world sugar surpluses are exceedingly high and prices are continuing to decline; and, third, bring back the "farm supply managers" from Secretary Freeman's days to tell farmers what to grow, what amounts to grow, what acreage to set aside, what price they will get for their crops—by dumping Government stocks when consumers complain about prices—and when to shift from crop to crop.

This bill is quite simply a retreat to the 1960's when we suffered under burdensome surpluses, grain dumping, multibillion-dollar subsidies and low-farm income.

Rather than following the successful market-oriented path blazed by former Secretary Butz, this new legislation marches backward by adopting the concept that the Government should manipulate the prices and income of all our farmers.

The first manipulation lies in central control over millions of bushels of grain ostensibly held by the farmers. Of course, this grain will be in the farmers' hands, but more as custodians than as owners. When prices rise too much to suit the Washington economic wizards who already have brought our Nation to the brink of insolvency, the farmers' price will surely be destroyed again.

The next manipulation comes in Government handouts. In the early 1970's, our Government got away from income maintenance payments to farmers. This bill brings those payments back, but even so at only a fraction of what this same kind of payment will be for food stamp recipients.

The next manipulation comes in reviving supply management by idling acreage. This bill is designed to trigger a set-aside, the polite way to pay people for not producing.

A final manipulation comes in adopting a market dividing rather than a market competing policy toward agricultural imports and exports.

The concepts of cartelizing our grain exports through reserves and international agreements and protecting against foreign importation by non-tariff barriers—such as provided for filberts—are included in H.R. 7171.

The committee, despite its reversal of past policies which have spectacularly increased U.S. farm exports and dramatically improved farm income through the market, has come up with "peanuts" in subsidies for the farmers when compared to the billions being spent on welfare for food stamp recipients.

In summary, the American people and the American farmer in particular should be fully aware that the days of increased farm income and expanding markets will be over for 4 years if H.R. 7171 becomes law.

Turning next to the food stamp provisions of H.R. 7171, in reporting out this legislation the Committee on Agriculture abolished once and for all the food stamp program that has furnished assistance for the lower-income people in this country. In place of the food stamp program, we now have a free "income stamp" program.

It is important to remember that this transfer in concept from guarantee of a nutritionally adequate diet to a simple income transfer came at the hands of the Agriculture Committee, the committee vested with the concern for a nutritionally adequate diet and more adequate food supply for all Americans at a greater dollar return for the farmer. The committee failed in both responsibilities—the poor American in need of food assistance and the farmer in need of maintaining his farm income.

Committee members may have abolished food stamps for income stamps in the name of friendship to the poor; but they were, in fact, doing neither the poor nor the taxpayer any favors. As a matter of fact, this legislation is a cruel hoax to both the poor in need of assistance and the taxpayer paying for it.

According to CBO, considered alone, the simple elimination of the purchase requirement would serve to increase substantially program costs and, at the same time, cause a decline in food purchases of approximately $1 billion and an increase in non-food consumption of approximately $1.5 billion.

Worse than the increased dollar burden to the taxpayer which this bill would surely create, its most serious deficiency is the removal of the guarantee of a nutritionally adequate diet poor families have under the current food stamp program. The purchase price and the bonus allotment together, and only together, assure participating families a nutritionally adequate diet as defined by the thrifty food plan—costing $170 a month for a family of four.

Now that we have eliminated the purchase price, we no longer are able to provide members of poor families this assurance. In point of fact, Mr. Chairman, what we are doing with this approach is paving the way for a negative income tax, but we are doing so without ever addressing the issue frontally.

If we adopt EPR, it will be a very simple step to complete cash-out of the program, at which point the program will have no nutritional thrust as opposed to reduced nutritional thrust under EPR. Once we get to complete cash-out, we still will have poor people in this country in need of food assistance.

Will not our poverty lobbyists turn around and ask us to create a new food assistance program because we have destroyed this one?

Negative income tax certainly has some surface appeal, particularly from an administrative point of view; but if we are to have it, let us address the issue head on in its proper forum and build into the system strong work incentives and needs objectives. Otherwise, we will have even more welfare inequity than at present.

Again, Mr. Chairman, I repeat, the food stamp provisions in this bill do not represent reform, they represent "deform" at its worse. It does not maximize food aid to poor people; it decreases food aid to poor people. It does not increase farm income; it reduces farm income. It does not cut Government costs; it increases Government costs. In short, this measure affords no opportunity at all to provide better food and nutrition and farm benefits which are reasonable and acceptable to all Americans. I urge my colleagues to defeat this measure.

Mr. FOLEY. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia (Mr. MATHIS), the distinguished chairman of the Subcommittee on Oilseeds and Rice.

Mr. MATHIS. Mr. Chairman, title VII of H.R. 7171 extends to the 1978–81 crops of rice the market-oriented policy provided for the 1976 and 1977 crops of rice under the Rice Production Act of 1975. The provisions of the rice program extended by H.R. 7171 are as follows:

First. A 4-year rice program covering the 1978–81 crops.

Second. Continued suspension of marketing quotas and marketing quota penalties and removal of restrictions on production of rice by new producers.

Third. A national acreage allotment of 1.8 million acres as a base for determining the amount of loans and payments to be made to cooperators.

Fourth. The national allotment to be apportioned to farms and, in producer States and administrative areas, to producers on the basis of allotments established for the 1975 crop.

Fifth. Farm and producer allotments may be sold, leased or transferred to other farms or producers in the same administrative area.

Sixth. Deficiency payments, loans and purchases to be made available only to cooperators and only on rice produced within the alloted acreages. The 1977 act would allow deficiency payments to be made only on that portion of the allotment actually planted to rice.

Seventh. A continuation of the base rates for the target and loans and purchases, at $8 and $6 per hundredweight, respectively, adjusted yearly since 1976 by changes in the index of prices paid by farmers, but further adjusted for 1978–81 by the cost of production index and with limited authority by the Secretary to change the loan and purchase rate if such rate would otherwise discourage exports or result in excessive stocks of rice in the United States. However, the loan rate could not be reduced below $6.31 per hundredweight.

Eighth. A payment rate equal to the difference between the target price and the higher of the loan rate or rice market price during the period August–December of the marketing year.

Ninth. Disaster payments to cooperators who, as a result of a disaster or condition beyond their control, are prevented from planting the allotment of rice or other nonconserving crop or who are not able to harvest two-thirds of the allotment times the established farm yield.

Tenth. A set-aside program, discretionary with the Secretary, if it is estimated that the carryover for the marketing year will exceed 15 percent of the total supply for that year.

Eleventh. Cooperators to comply with a set-aside program to qualify for deficiency payments or to be eligible for loans on purchases on their crop.

Twelfth. A phased reduction in the $55,000 payment limitation applicable to the 1976 and 1977 crops by a formula that would result in a $46,585 payment limitation for the 1981 crop.

PEANUTS

Title VIII of H.R. 7171, the Peanut Production Act of 1977, represents the first major change in the peanut program in 35 years. The purpose of this legislation is to reduce the cost of the peanut program to the Government and to provide added opportunities for American growers to compete in the world market.

The Peanut Production Act of 1977 would reduce the cost of the program for 1978–81 crops by reducing the quantity of peanuts eligible for support at the higher loan rate, the rate established for peanuts sold for primary use. This would be accomplished by placing each allotment holder on a minimum percentage quota which would decrease over the 4-year life of the bill. Second, the support level would be frozen at $420 per ton instead of escalating to a projected $556 per ton under the parity formula in existing law.

The Department of Agriculture projects that the Peanut Production Act of 1977 would reduce Government net outlays on the peanut program by $592 million during the 1978–81 period. The Congressional Budget Office also projects substantial savings under the provisions of this legislation.

Another purpose of the Peanut Production Act of 1977 is to allow greater flexibility for the production of peanuts for the export and crushing markets. Peanuts produced in excess of the poundage quota, but within the allotted acreage, would be contracted in advance for the export and crushing markets at competitive market prices and could be expected to enhance the position of the United States as the leading exporter of peanuts, especially of edible grade nuts. The additional, or nonquota, peanuts could enter the domestic market for crushing purposes, but could enter the domestic edible market; that is, the market for peanuts for salting, peanut butter, and confectionary uses—only under limited circumstances. Ordinarily, only quota peanuts would enter the domestic edible market. The Secretary would have discretionary authority over the support rate for additional peanuts.

At the same time that the bill reduces the cost of the program it attempts to protect the interests of the basic peanut producing areas of the country—in the Texas and Oklahoma area, where primarily Spanish-type and to some extent runner-type peanuts are produced; the Virginia-Carolina area where Virginia-type peanuts are produced; and the Alabama, Georgia, and Florida area, where runner-type peanuts are produced. If a shortage should develop in a particular type of peanut for the domestic edible market, then buyers could obtain additional peanuts at not less than specified prices keyed to the loan rate for quota peanuts. Otherwise, all peanuts produced in excess of quota would be for crushing and export only.

Peanut producers need the continued assistance that would be provided under the Peanut Production Act of 1977 because of the unique nature of the commodity. Termination of a peanut support program would result in severe economic hardship to producers in all the peanut producing areas. Peanuts are produced typically by a small family farmer with an average allotment of only 25 acres.

Furthermore, the commercial trade does not provide warehouses and elevators where the individual farmer can store his peanuts and receive a warehouse receipt on which he can obtain a bank loan and against which he can subsequently sell a stated grade and quantity of peanuts. These services are not provided because of the nature of the commodity. Each lot of peanuts, when delivered by the farmer, is a mixture of quality factors. Grading is difficult. Peanuts cannot be carried satisfactorily from one crop year to another. They deteriorate in storage—in varying proportions from warehouse to warehouse, from one area to another and from one year to another. Before moving into food use they require milling and must be separated into various grades and qualities.

For peanuts, unlike cotton and the grains, the farmer needs assistance in obtaining inspection, storage, and financing until the peanuts can be sold in an orderly manner. This entails "mixing" or "pooling" of peanuts from many farms.

The farmer also needs assistance in the marketing of his peanuts as he generally cannot store and later obtain delivery of his peanuts for sale from the storage warehouse.

With price support loans and related operations, the farmer has an effective means of obtaining the value of his peanuts in the primary food market. He also has a means for moving any production above food requirements into the secondary crushing and export market in an orderly manner.

The Peanut Production Act of 1977 represents a compromise between the various peanut producing areas and is a practical solution to the problems faced by the industry. The committee is of the view that it is a positive step in the right direction.

SOYBEANS

Mr. Chairman, under existing law, the Secretary of Agriculture has the authority to declare a loan program for soybeans and to establish the rate of such loan. In recent years, he has exercised this discretion to set the loan for soybeans at $2.25–$2.50 per bushel with the exception of the 1975 crop when a loan program was not authorized. Notwithstanding the Department's announced $3.50 loan for the 1977 crop, producers point to the suspension of support in 1975, when prices had fallen sharply, as justification for new legislation to mandate a loan program for soybeans.

Section 906 of title IX would mandate such a program, but the amount of the loan would remain discretionary with the Secretary. Producers have asked simply for assurances that a loan will be available, and feel the Secretary needs the flexibility to determine the precise amount on the basis of world market conditions and the prices of competing commodities.

Mr. Chairman, historically soybean market prices have been higher than the loan and the program has not resulted in any losses to the Government. Because H.R. 7171 leaves the actual loan level discretionary with the Secretary, it is not anticipated that this provision will produce any net losses to the Commodity Credit Corporation.

Mr. FOLEY. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from California (Mr. McFALL).

Mr. McFALL. Mr. Chairman, I appreciate this opportunity to discuss the Agricultural Act of 1977 presently before the House. I wish to concentrate my comments on the emergency feed program. This program is presently assisting livestock producers in drought stricken States by providing a subsidy on feed purchases needed to insure the continued survival of their livestock.

I wish to emphasize, however, that this program is not without problems. Currently the emergency livestock feed program is the responsibility of the Federal Disaster Assistance Administration, FDAA. There appears to be a general consensus that this responsibility should be transferred to the Department of Agriculture, where emergency agriculture relief programs are concentrated.

On March 2, the Honorable Ed Jones of Tennessee introduced a bill, H.R. 4295, which I cosponsored, to provide for an emergency livestock feed program by the Department of Agriculture. On March 23, President Carter endorsed the transfer of the emergency livestock feed program from the FDAA to the Department of Agriculture. The President adopted this position as part of his drought assistance program.

On May 24, Senator Humphrey offered H.R. 4295 as an amendment to the Senate's farm bill, S. 275. This amendment was agreed to by the Senate, and so this subject of an emergency livestock feed program will be before the conference committee on the farm bill.

For the information of the Congress and the Department of Agriculture, I wish to emphasize the vital need for including honey bees as eligible livestock under any emergency livestock feed program.

Now some people may wonder if bees are livestock. I can assure them that they are. At the end of my comments I will include a copy of a February 1, 1954 letter from the Chief Counsel of the Internal Revenue Service to the Department of Agriculture that discusses the "bees as livestock" question in detail. It concludes that—

> Since bees are "sentient", domesticated (i.e., captured and kept in hives) and, in the instant situation, are kept by the claimants on farms as their stock in trade, for purposes of profit, it seems clear that there can be no valid objection to categorizing bees as "livestock".

If bees are livestock for taxation purposes, I certainly believe bees should be considered livestock under emergency disaster relief programs.

I do not believe that the public is generally aware of the extremely vital and essential role bees play in agriculture. In my own State of California, for example, more than 50 of the State's crops rely on the honeybee for pollination. These include 21 fruit and nut crops, 10 forage feed crops, and 20 vegetable crops. In the singular case of almonds, 350,000 California beehives are utilized annually to pollinate this crop.

Economically, the annual direct benefit to California agriculture attributed to honeybee pollination is currently projected at over $750 million. The total annual value of California's agricultural crop is estimated to be about $9 billion, and of this amount 50 percent is considered directly or indirectly attributable to honeybee pollination.

In 1976, there were 545,000 beehives in California, operated by 4,136 beekeepers. Numerically, the State's beekeepers are not, therefore, a large group. But without them, California's agriculture would be severely damaged.

The drought currently affecting California is having a terrible effect on the State's bee industry. Too much of the State's wild vegetation has died for lack of water. Additionally, commercial crops have not provided the normal level of demand for pollination. The result has been that bees do not have an adequate natural food source. Beekeepers have thereby been forced to provide supplemental feed—a mixture of sugar and pollen substitute—to their bees to avoid bee starvation.

The problem is that this is the second year of drought in California, and the second bad year for the bee industry. Consequently, many beekeepers have already exhausted their financial reserves on supplemental feed. Mr. Elliot Johnson, the manager of the Valley Honey Association in Stockton, Calif., estimates that not less than one-third of the State's bees will starve this year if beekeepers are unable to obtain financial assistance in meeting the costs of supplemental feed for their bees. Such a loss has the potential of seriously reducing the productivity of California's 1978 agricultural crops.

I consider it essential, therefore, that bees be eligible for assistance under any emergency livestock feed program. I ask that the members of the conference committee on the farm bill keep this carefully in mind when the committee considers the subject of an emergency livestock feed program to be operated by the Department of Agriculture. I also hope that the Secretary of Agriculture will take special note of the needs of the bee industry if his department is called upon to administer such a program. The failure to provide this assistance could result in serious damage to our Nation's agriculture.

I now include as part of my comments the copy of the IRS's Chief Counsel letter defining bees to be livestock.

U.S. Treasury Department,
Bureau of Internal Revenue,
Washington, D.C., February 1, 1954.

Mr. Lawrence Myers,
Director, Commodity Stabilization Service, Sugar Branch, U.S. Department of Agriculture, Washington, D.C.

Dear Mr. Myers: This will refer to your letter dated December 11, 1953, in which you state that the Department of Agriculture has been asked recently for a ruling as to whether sugar fed to bees is considered sugar used for livestock feed within the meaning of the Sugar Act of 1948. Your letter continues as follows: "It is our understanding that your office ruled on October 26, 1940, that for purposes of refunding the tax on manufactured sugar such use is considered livestock feeding. We further understand that this ruling was made after a series of memoranda were sent you by various persons in this Department." You desire to obtain a copy of this ruling and the dates and originating offices of the memoranda from your Department to this office.

As you correctly point out, the ruling from this office dated October 26, 1940, has not been made public. For various reasons, this office has always avoided sending out copies of unpublished rulings. And this rule usually applies to other Government agencies. However, in an effort to be of assistance to you, the main reasons set forth in the ruling can be disclosed and are as follows:

There is probably no dispute that as a general proposition bees are not considered embraced within the meaning of the term "livestock." It is perhaps equally true that the ordinary connotation is that found in Webster Unabridged Dictionary which defines stock as "domestic animals used or raised on a farm; especially cattle, sheep, hogs, etc., called more fully "livestock." It does not follow, however, that this fact, standing alone, disposes of the question nor conclusively supports a finding that bees are not or may not be considered "livestock." It becomes necessary, then, to carefully analyze the meaning of the term "livestock" and further to inquire into the intent of Congress in granting the exemption set forth in order to ascertain whether these claimants are rightfully entitled to the refund claimed.

In an effort to ascertain into what category bees should be placed, an opinion was requested from James I. Hambleton, In Charge of the Division of Bee Culture, Bureau of Entomology and Plant Quarantine, Department of Agriculture, with reference to the matter.

Mr. Hambleton, in a letter dated October 10, 1940 stated inter alia that:

"In this Bureau we have considered bees as livestock as they belong to the animal kingdom and are kept on farms and ranches for the production of agricultural commodities. A colony of bees is a living animal; it must be fed and cared for; it reproduces; and the agricultural commodities which it

produces are honey and beeswax which are in no wise different as agricultural commodities than are milk, eggs, or meat.

The opinion of Harold J. Clay, Associate Marketing Specialist, Agricultural Marketing Service, United States Department of Agriculture, was also requested. Mr. Clay answered the question as follows:

"Briefly, it is my belief that bees kept for producing honey are as much 'farm livestock' as cattle kept for producing milk or meat. They do not come under any other general category, and do fall within the group included in the definition in Webster's International Dictionary for 'livestock'—domestic animals used or raised on a farm, especially those kept for profit. The brief definition given for 'animal is that it' refers to sentient beings, as distinguished from plants or inanimate objects.

"Certainly bees are 'sentient,' and as raised by several hundred thousand beekeepers, are 'kept for a profit'."

It would appear from the foregoing quoted remarks that bees not only may be categorized as "livestock" but are, in fact, categorized as such by the Department of Agriculture.

The question then arises: is there anything contained in the Sugar Act of 1937 which either expressly or impliedly militates against this conclusion? An examination of that Act, together with an examination of the committee reports and the remarks of the Congress before the passage of the Act, discloses that the record is completely silent as to what was intended to be included within the term "livestock." That no support is to be obtained from the Act or committee reports is substantiated by a statement included in a letter from the Commissioner of Internal Revenue to the claimant, Oscar H. Schmidt, under date of June 21, 1940, to the effect that: "The general rule which has been laid down with reference to the meaning to be ascribed to a word, or term, used in an Act of Congress is that it shall have meaning usually and generally accepted, unless there is some contrary intention indicated either by the word being defined for the purpose of that Act, or because of a peculiar usage in the Act. In the instant case the term 'livestock' has not been defined by the Congress for the purposes of this Act, nor has it been used in such a manner as to indicate that it was intended that the term should have other than the usual and generally accepted meaning ascribed to it."

Conceding the correctness of the above statement, in view of the fact that no all-inclusive definition of the term has been found, it still becomes necessary to ascertain whether bees may properly come within the "usual and generally accepted meaning." With reference to this point the further statement was made in the Commissioner's letter of June 21, 1940, supra, to the effect that "A careful study has been made of this term as defined in the various authorities, as well as in the opinions of the courts. At no place has it been found where that term included bees."

In all fairness, however, it should also be pointed out that an examination of the various authorities and the opinions of the courts equally has failed to disclose that the term could not be deemed to include bees, a fact, it is submitted, which is all-important when it is remembered that no attempt has been made by any authority to create an all-embracing definition which would include all animals which could be considered as livestock to the necessary exclusion of all others not specifically mentioned.

At least two cases have been found which involves situations somewhat analogous to that at hand.

In *James* v. *Atlantic Coast Line R. Co.*, (N. Car. 1914) 82 S.E. 1026, 1027, the court was considering a statute which provided that "when any cattle or other livestock shall be killed * * * by the engines or cars running upon any railroad, it shall be prima facie evidence of negligence on the part of the company in any action for damages." The Supreme Court of North Carolina held, without however any amplification of its opinion, that (at page 1027):

"* * * this expression, 'any cattle or other livestock' cannot be construed as applicable to geese or other fowls."

Again in *Addison* v. *Norfolk Southern R. Co.*, (N. Car. 1925) 129 S.E. 156, in an action for negligent killing of livestock and turkeys by the railroad, the court, citing the Atlantic Coast Line R. Co. case, supra, held that the lower court's ruling to the effect that "any cattle or other livestock" did not apply to turkeys and other fowls, was proper.

It might be reasoned that if turkeys and other fowls do not come under the heading of livestock, a fortiorari bees would not come under such category. On the other hand, it should also be observed that there is no more incongruity attached to classifying bees with "turkeys and other fowls" than there is to classifying them with "pigs and horses", two of the accepted members of the livestock group. Consequently, in the last analysis, the cases cited supra offer little aid in solving the problem. Under such circumstances, in order to arrive at a correct solution, it seems only logical to rely on and be guided by the opinion of those who, by the nature and extent of their work in connection with bee culture, are well qualified to render an opinion on the subject.

Mr. Hambleton, whose opinion has already been stated, considers that bees are livestock. His opinion seems logical in view of the following undeniable facts:

1. Livestock or stock, it is generally agreed, may be defined as domestic animals used or raised on a farm, especially those kept for profit, such as cattle, sheep, hogs, etc.

2. Animals may be defined briefly as sentient beings as distinguished from plants or inanimate objects. Also classified as vertebrate or invertebrate.

3. Domestic (with reference to animals) is defined as tame, living with man; domesticate, to tame; reclaim from a wild life and render serviceable to man.

Since bees are "sentient", domesticated (i.e., captured and kept in hives) and, in the instant situation, are kept by the claimants on farms as their stock in trade, for purposes of profit, it seems clear that there can be no valid objection to categorizing bees as "livestock."

I trust that the above information will be of service to you and that it will help the Department of Agriculture in preparing its ruling with respect to whether sugar fed to bees is considered sugar used for livestock feed.

Very truly yours,

DANIEL A. TAYLOR,
Chief Counsel.

Mr. FOLEY. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, the omnibus farm bill, H.R. 7171, which is now before us, is an important piece of legislation which I urge my colleagues in the House to support both in spirit and with their votes.

I come before the House today to speak as a representative of both the farmer and the consumer, of the processor and the transporter, and indeed of virtually every link in the food chain—from soil to table—as they all are represented within the constituency of my district.

The objective of this omnibus farm bill is not to give the farmer a free handout, for that is something most farmers have never wanted. On the contrary, the goal of this bill is to reestablish a farm program that gives the farmer a fair chance to grow his crop and raise his livestock—eventually, the food which all of us need—while earning a decent amount in return for his hard work and substantial investment.

We are now amidst hard times for most American farmers. No matter how proficient and skilled, no matter how careful in his planning, no matter how deep his reverence for the land, there are a great many very industrious and capable farmers, and their families, who are in real financial trouble through no fault of their own.

In 1976, the U.S. farm population decreased by 6.9 percent, and 600,000 people no longer lived or worked on a farm. The farm population decrease since 1970 is even more alarming: almost 1.5 million human beings.

This decline in the number of family farmers is alarming. It is especially so when considered in light of the Department of Agriculture's estimate that between 200,000 to 400,000 such farms will be lost over the next 20 years. A USDA study forecasts a reduction from the current level of 2.8 million farms to 1 million units by the turn of the century.

I believe that it is imperative that this trend be reversed for two reasons.

First, the texture and equality of life which the family farmer has earned for himself and has contributed to the social and economic fabric of his country cannot be ignored or replaced. Our Nation owes American agriculture an enormous debt of gratitude.

And second, when the farmer and his family are forced off the land, there is often nowhere for them to go but into the embrace of an already disastrous welfare system. The family farmer does not relish this prospect. All he asks for is the opportunity to lead an independent, productive life with dignity. The forced abandonment of family farming operations must not be allowed to continue. The social and human costs are no longer tolerable.

American farmers are an extremely independent breed. They are justifiably proud of their heritage and their occupation and of the fact that every 25 people in this country relies on a single producer for their daily food supply. In fact, I can assure this Congress that few farmers actually want to use federal supports, which they almost universally regard as government interference, unless they have no other alternative to save their operations.

It is also important to note that while the family farmer cherishes his independence, he also accepts the responsibilities of his freedom. The American farmer is continually facing a set of factors over which he has no control—increasingly unstable and adverse weather conditions, and unprecedented increases in his costs of production: farm machinery, fertilizer, fuel, and the like. And, at the same time, he is not always free to sell his goods when and where he would

like to sell them. I submit that the current situation in American agriculture is not only far from ideal for producers, but it is also unfair in the extreme.

The complex bill before us today does not provide all the answers for the preservation of an agriculture that now provides the most plentiful, highest quality and least expensve food in the world. Nevertheless, in my judgment, it is a reasonable and necessary piece of legislation which deserves prompt enactment into law.

As we focus our attention on H.R. 7171, I ask my fellow Representatives to recognize the tight interdependence between food production and food consumption and to join with me in the task of balancing short and long term agricultural needs with the overall interest of the national policy.

There are no issues so basic, nor so important, as those issues addressed in H.R. 7171. This measure demands the most sensitive and responsible consideration.

We have entered an era when we can no longer afford to view legislation through the narrow perspective of a purely regional lens—whether urban, suburban or rural. We must set sectionalism and special interest aside and attempt to do what is best for the national interest.

I believe that H.R. 7171 meets this criteria, and I urge its passage by the House.

Mr. FOLEY. Mr. Chairman, I yield 6 minutes to the gentleman from Mississippi (Mr. BOWEN), the distinguished chairman of the Subcommittee on Cotton.

Mr. BOWEN. Mr. Chairman, I would like to congratulate and commend the distinguished chairman of our Committee on Agriculture, the ranking minority member, and all of the bipartisan effort that went into the production of this very important piece of legislation. I think it will prove to be one of the most impressive and successful pieces of farm legislation that we have passed in the history of this country.

I also want to congratulate the cotton industry in America for arriving at a unified position in support of a program which I think is very distinctly in the interest of the consuming public of this country. The industry is unified geographically, East and West. It is unified economically, in terms of different segments of the industry.

This legislation is very important because it governs an industry which is so vital to the lives of all Americans. This is an industry which not only speaks for a quarter of a million farmers who grow cotton, but also a million textile workers and about 1.3 million apparel workers. It is the largest single industry in the United States, the fiber-textile-apparel complex.

Mr. Chairman, we designed this year, with the cooperation of the industry itself, a cotton section for this bill which is intended to end the "boom-and-bust" pattern that we have so often seen in past years, one which attempts to moderate that trade cycle. On the lower end, we attempt to provide a floor by having a loan structure which is based upon 85 percent of a rolling 4-year average of the spot market prices in this country. This is designed to insure that we have a market-oriented cotton program.

As a further assurance that we will maintain our export market, since we do export about one-third of our crop and we are the largest exporter of cotton, we have a kind of fail-safe mechanism which says that the loan level cannot exceed 90 percent of the Northern European price of cotton. We have done this to insure that the Government of this country will not have to acquire large stocks of cotton, will not have to spend tax dollars to store this cotton, and will not have to spend money on export subsidies, but, rather, the market mechanism itself will handle the cotton production and sales of this Nation.

In turn we have also designed a target price structure which is intended to minimize exposure of the treasury and the cost to the taxpayers of this Nation. It is set at 110 percent of the loan level, so it goes up and down with the loan. There is no other device which I have seen that so effectively insures that the taxpayers of this country will be protected against any excess in deficiency payments that might be necessary because of falling prices. This would not be the case with target prices based upon cost of production, which could continue to climb without regard to market prices.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. BOWEN. I will be very happy to yield to the gentleman from Illinois.

Mr. FINDLEY. Mr. Chairman, I want to congratulate the gentleman from Mississippi (Mr. BOWEN) and the other members of the Subcommittee on Cotton for their work as expressed in this bill. To me it represents about the finest part of this bill, pointing toward a market economy and assuring that cotton will continue to sell worldwide at competitive prices and insuring a good income for the producers.

Mr. BOWEN. Mr. Chairman, I thank the gentleman for his kind observations.

To continue, I would like to point out that in addition to this loan and target structure which we have designed to keep cotton competitive and to keep it market-oriented, we have at the same time given the farmer the opportunity to have an extended loan. He may be given an extra 8 months over and above the traditional 10-month loan period by the Commodity Credit Corporation so that he can market his cotton in an orderly manner and so he can have access to more than one marketing year.

The extended loan, which is for the benefit of the producer, is in turn matched by a portion of this legislation which is intended to provide some ceiling on the top end of the price cycle. This is to insure that the price of cotton does not get so excessive that our mills will have to shift to synthetics because cotton cannot be obtained at a price they can pay. This feature is a very limited 21-day import window for cotton, and it takes effect when the price exceeds 130 percent of the preceding 36-month average.

So, Mr. Chairman, this formula is designed to end that sort of "boom and bust" to which I referred, and it is intended to provide stability for the industry and stability for the consumer.

I will at a later time during the deliberations on this bill offer an amendment which was prepared by our Subcommittee on Cotton after the time H.R. 7171 was reported from the full committee. The amendment had the unanimous consent of the committee, and I think it has very strong, if not unanimous, support throughout the industry in terms of modernizing and updating the old allotment program which we have had for cotton. I will have an opportunity to discuss that amendment at a later time.

Mr. Chairman, I will simply conclude my remarks by saying that we have labored diligently to produce a bill which we believe is consumer-oriented and a bill which is also producer-oriented. I believe we have had the kind of bipartisan support that we need to pass this legislation.

Mr. Chairman, I urge the House to support the cotton section and to support H.R. 7171.

Mr. FOLEY. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Texas (Mr. MAHON).

Mr. MAHON. Mr. Chairman, I thank the distinguished chairman of this great committee for yielding this time to me.

It is my intention to place in the RECORD certain views with regard to the cotton section and with regard to the bill generally.

I think, Mr. Chairman, that the Committee on Agriculture is entitled to praise for the fine work it has done in trying to work out an acceptable bill, and that, of course, has not been an easy task. I hope in the course of consideration of the measure by the House certain improvements can be made.

AMENDMENT OF THE COTTON IMPORT PROVISION

Mr. Chairman, during consideration of the cotton section of this bill, I will offer an amendment making a minor change in the so-called cotton import provision. The amendment I shall propose changes the provision calling for a special limited global import quota from one that operates automatically and is mandated by law to one left to the discretion of the President and the Secretary of Agriculture.

If my colleagues will turn to page 24 of H.R. 7171, they will see the language of the bill as it is now written with respect to cotton imports:

. . . *Provided further*, That whenever the Secretary determines that the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and

proclaim a special limited global import quota for upland cotton subject to the following conditions:

(1) This amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available; . . .

My amendment simply strikes the words "shall immediately" on line 16 and inserts in lieu thereof the word "may". This technical change simply makes the provision discretionary rather than mandatory. By making this authority for a limited import quota discretionary, we allow the Secretary of Agriculture an opportunity to evaluate the situation at the time the price reaches the specified trigger point and determine whether the relaxation of the import quota would be in the best interests of the domestic cotton producers and the American cotton industry generally.

My amendment does not change the other provisions of the cotton section. The only thing that this amendment does is allow the President and Secretary of Agriculture some flexibility with regard to the controversial matter of increased cotton imports whenever the specified market conditions exist. I have full confidence that the Secretary would act equitably and with caution and discretion in exercising this authority.

COTTON PRODUCERS CONCERNED

I propose this minor change because the cotton import section, as it is now written, greatly disturbs me. Many farmers in my area have contacted me about this import provision and have expressed strong opposition to it. The American Farm Bureau Federation and the National Farmers Union are concerned about it. These farm organizations have encouraged me to offer this amendment. They are concerned and I am concerned about what might happen if the measure were to become law as it is now written.

EFFECT OF COTTON IMPORT PROVISIONS AS NOW WRITTEN

I would direct my colleagues' attention to page 147 of the report which accompanies this bill. The report reads:

One of the questions raised concerned the special 90-day import quota that would be triggered when the domestic price reached 130 percent of the preceding 36-month average. The Department official present pointed out that the provisions would allow a 21-day domestic mill supply which he calculated to be a maximum of 550,000 bales. He pointed out that we are now in a situation where such an import quota would become effective. However, it was his opinion that little, if any, cotton would come in under such a quota—possibly no more than a few thousand bales because of a generally short supply situation.

An examination of the cotton price data for the last 6 years shows that prices reached a point where a special import quota would have been triggered three times (average monthly price exceeds 130 percent of the average price for the preceding 36 months). These special import quotas would have moderated the upward price movement.

The Department of Agriculture, therefore, calculates that as much as 550,000 bales of cotton could be allowed to enter this country whenever the trigger point is reached. How often would this importation of additional cotton be mandated? The report of the committee points out that, during the last 6 years, the provision would have been triggered on three separate occasions—once every other year. Indeed, Mr. Chairman, at the time this bill was being written by the committee, the price of cotton was such that the import proviso would have been triggered.

Of course, I realize that if the situation should arise where cotton prices reach 130 percent of the average price for the previous 36 months, there might not be cotton available in foreign countries to be imported. However, there is no way to be certain about the contract arrangements in foreign countries. There is no way to predict accurately what effect this provision would have on the market when it is triggered. Theoretically, this provision would have the effect of taking out the peaks and the valleys of cotton prices but, as the section is now written, it seems that it would take out the peaks but provide cotton producers with inadequate protection against the valleys of low cotton prices.

UNCERTAINTY OF MARKET DEMANDS FLEXIBILITY

As I mentioned before, when this section of the bill was written, cotton prices were relatively good. Since that time, however, the price of cotton has fallen precipitously. We have no way of knowing what the price structure will be at harvest time, or a year from now, or 2 years from now. Anyone who has been in the business of producing cotton for very long knows that you can't get overly enthusiastic about the price of cotton and expect it to always remain high. Three years ago, cotton prices were high, and people were saying that King Cotton had regained the throne and was entering a new Golden Age. The next year the energy crisis struck, and cotton prices again hit rock bottom.

For the cotton industry to become overly confident at this time and inject a provision in the farm bill mandating cotton imports would be, in my opinion, most unwise and very dangerous. There have always been periods of boom and bust in the cotton business, and I suspect there always will be, but what worries me about the cotton section as it is now written is that it could tend to take away the cotton producer's periods of boom and leave him vulnerable to the busts.

So, Mr. Chairman, I hope my colleagues will support the simple amendment which I will offer to the cotton section of this bill. The National Farmers Union and the American Farm Bureau Federation both support this minor change. It is in the best interest of our domestic cotton producers, and it leaves intact the complicated interaction of the various other provisions of the section which the Cotton Subcommittee, under the able and dedicated leadership of the gentleman from Mississippi (Mr. BOWEN) has so carefully and thoughtfully put together.

I believe the simple amendment I propose improves the package developed by the Cotton Subcommittee by allowing the President and the Secretary of Agriculture flexibility with regard to the special limited import quota in the event that unforeseen market conditions occur.

Mr. WAMPLER. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Colorado (Mr. JOHNSON).

Mr. JOHNSON of Colorado. Mr. Chairman, there are a lot of features about this bill that I suppose none of us will ever get around to addressing. There are many fine features relating to research and development, gasohol, solar energy, and a number of things which I believe merit the attention of the Members. Those of us on the committee tend to talk about only those specific problems with which we have been intimate for almost 6 months now.

Mr. Chairman, I would like to address my brief remarks to the problem of the sugar situation which the gentleman from Texas (Mr. DE LA GARZA) is going to address with his amendment, and the problem of the target price for wheat and corn.

The sugar situation is this, Mr. Chairman, that it costs from 13.4 to 18.1 cents to produce sugar in the United States. The low was 13.4 cents in Florida; the high was 18.1 cents in some of the sugar beet-growing areas.

Mr. Chairman, if we do not have a provision in the law similar to what the gentleman from Texas (Mr. DE LA GARZA) intends to offer, there will be no sugar industry in these United States. The problem many Members do not understand is that the combination of production and processing is one which prevents people from getting in and out of the sugar business. One does not plant sugar beets one year and then alfalfa the next year and then wheat or something else on that land because the farmer has to maintain that production of sugar beets since the requirement of the processor is such that he has to have that capital invested and working every year.

Therefore, Mr. Chairman, the partnership between the processors and the producers is such that it requires that people must be in business every year. A person cannot get in and out of the sugar business as he can in growing corn, wheat, and some of the other crops.

Mr. Chairman, the gentleman from Texas (Mr. DE LA GARZA) is going to offer an amendment which I think is valid, which is not expensive or excessive; and I think it deserves the support of the membership of the House.

I would just briefly like to discuss the situation with respect to wheat and corn target prices.

In 1973 when we passed those target prices, we did not have an acceleration clause as we should have in that 1973 act. Therefore, as the cost of production went up, the target prices did not go up accordingly and correspondingly.

This year when we met in the Subcommittee on Livestock and Grains, I had received figures from the Library of Congress as to what the actual cost of production would have been and what the 1973 act's figures accelerated to today

would be; and the 1973 figures brought up to date in 1977 would have been $2.90 for the target price for wheat and $2.18 for the target price for corn.

Mr. Chairman, those were the actual figures we passed out of the subcommittee, nothing more than an escalation of the 1973 figures. Those Members who voted for the 1973 figures can certainly vote for the figures that are going to be offered by the gentleman from Nebraska (Mr. THONE), the gentleman from Oklahoma (Mr. ENGLISH), the gentleman from Kansas (Mr. SEBELIUS), and the gentleman from Iowa (Mr. HARKIN), because they are nothing more than an extension of the 1973 figures for 1977.

Mr. Chairman, when we got to the full committee, the target price for wheat was knocked down to $2.65. The only reason it was knocked down, in my judgment, was because of the threat of a Presidential veto. There was no other reason.

The justification is there, my colleagues, for adopting the amendment that is going to be offered by the four gentlemen I named. It is not an excessive figure at all. The 1973 figures proved to be sound, and the costs have gone up correspondingly since then; and I believe that it is consistent with the market-oriented agriculture that we all believe in.

The CHAIRMAN. The time of the gentleman from Colorado (Mr. JOHNSON) has expired.

Mr. WAMPLER. Mr. Chairman, I yield 1 additional minute to the gentleman from Colorado (Mr. JOHNSON).

Mr. JOHNSON of Colorado. Mr. Chairman, I thank the gentleman.

Just to give some idea of the increased costs people are running into, a large, self-propelled combine in 1973 cost $22,000. Today it costs $42,000.

A tractor that cost $10,800 in 1973 now costs $18,800.

The same pickup truck that cost $3,300 in 1973 now costs $5,650.

A grain drill which cost $2,860 in 1973 now costs $5,210.

A disk tiller which cost $1,500 in 1973 now costs $2,500.

A harrow which cost $2,000 in 1973 now costs $4,520.

Therefore, Mr. Chairman, when the amendment is offered to raise the target price for wheat and for corn to correspond to the 1973 figures, I do not believe that there is anybody in this body who can say that this is exorbitant or too high or a boondoggle or a ripoff because it is nothing more than a reflection of the increased costs that those gentlemen who are making their living on the farms have had to pay.

Mr. POAGE. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. RICHMOND).

Mr. RICHMOND. Mr. Chairman, as a member of the Agriculture Committee, I have followed the progress of this legislation for many months, and have worked closely under the guidance of our distinguished chairman Mr. FOLEY on many details of this bill. My subcommittee moved quickly after the President's food stamp reform proposals were presented, to approve the most sweeping changes in this vital nutrition program since its creation in 1964.

As an urban member of the committee who has tried to bring the concerns of the consumer into the forefront of committee decisionmaking and one who has tried to listen to the concerns of the family farmer, I can say unequivocally that this is the most important and most comprehensive national food policy legislation ever considered by the Congress.

We stand at a watershed this year in our attempts to formulate a cohesive food policy. Will we return to the outdated boom and bust, feast or famine policies of old? Will we continue to stand by as consumers struggle with roller-coaster food prices and family farmers are driven off their land by corporate profiteers? Will we allow our own vital nutrition programs to be eroded away while ignoring world hunger around us?

In a year of grain gluts, farm foreclosures, drought, and inflation, we can no longer afford a policy that pits farmer against consumer, rural versus urban, poor against rich.

We must begin to devise a truly national food policy which benefits all Americans. I believe, Mr. Chairman, that this bill is a big step in that direction.

The price support provisions of this bill are good for farmers because they will help reduce losses and encourage farmers to stay in business. Price supports are as essential to farm income as minimum wages are to the urban laborer. Farm supports are good for consumers because they help insure a steady supply of wholesome food products.

The food stamp provisions of this bill are good for farmers because they generate $1.5 billion in farm business through increased food sales. These provisions are good for consumers because for the first time they make the program truly accessible to all in need and accountable to all who are concerned about its operation;

The food policy of our Nation must be geared to forging a coalition between the urban consumer and family farmer. Only be realizing our common interests can we form a fair food policy for all Americans. That is why I am urging my urban and rural colleagues to join with me in supporting this comprehensive bill.

Mr. WAMPLER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I first want to join with the other members in the committee in commending both the chairman of the committee, the gentleman from Washington (Mr. FOLEY), and the ranking Republican member, the gentleman from Virginia (Mr. WAMPLER), for their very fine and fair cooperation in handling the legislation and giving all of us a chance to participate meaningfully in the committee process.

I also want to commend the chairman of the Subcommittee on Dairy and Poultry, the gentleman from North Carolina (Mr. ROSE), who has given me tremendous cooperation, as I hope I have given him. I believe we have worked very well and closely together.

Mr. Chairman, today we have, in title II of H.R. 7171, an opportunity to be of real service to both the consuming public and the dairy producers of America. There are two significant improvements in the dairy price support program authorized by the Agricultural Act of 1977. The first is raising the price support floor from 75 to 80 percent of parity. The second change will require a semiannual adjustment by the Secretary of Agriculture of the parity level which he establishes at the beginning of each marketing year. This adjustment will allow our producers to keep pace with inflation while also stabilizing consumer prices at the marketplace.

During the past 3 years Congress has taken positive action on similar legislation several times. Those successful attempts carried a quarterly adjustment. I feel strongly that we should be presenting quarterly adjustments here today, however, I can understand some of the arguments against such a move. The semiannual adjustment is a definite step in the right direction. From June 1973, to June 1974, you will remember the tragic situation our farmers and consumers faced when the price support floor plummeted as a percent of parity, farmers left the business in great numbers and as supplies tightened the consumers' over-the-counter cost rocketed.

It has been estimated that erratic market situations not only cost America the loss of many top dairy farms but also cost our consumers an additional $3.2 billion over that which would have been experienced in a stable market. Today we are faced with that same potential hazard as we see the price support floor slipping once again. During the presidential campaign of 1976 in Wisconsin, candidate Carter indicated that 85 percent of parity was absolutely necesary.

On April 1, our new Secretary of Agriculture, Bob Berglund, and President Carter, both active farmers, recognized the plight of the American dairy farmer and took positive action by establishing the price support floor for the 1977 marketing year at 9.00 cwt. or approximately 83 percent of parity. The 9.00 figure has never really been achieved and as farmer's costs continue to rise, the facts show that the price support floor farmers are receiving today has dropped from the approximate 83 percent of April 1 to 78 percent as of last evening. With the proposed semiannual adjustment in H.R. 7171 the Secretary would adjust the support floor back to 83 percent on October 1. Without this adjustment, the percent of parity could well fall to the 70 percent area by next April 1 and this would be disastrous. When we look at the prices farmers are receiving for all commodities as a percent of parity we find that figure to be 67 percent of parity, the second lowest figure since the depression of the 1930's. Things are not good.

It should be noted that the administration opposed quarterly adjustments of

parity for dairy price supports and also setting the floor at 80 percent. Only reluctantly did they agree to semiannual adjustments. OMB was behind this move. At this time it might be appropriate to remind the administration of the commitment made by President Carter to the Wisconsin farmers, and I quote from the letter sent by Mr. Carter to Wisconsin farmers in October of 1976:

This month you are feeling the full impact of President Ford's vetoes of legislation increasing price supports to 85 percent of parity. Manufactured milk prices have taken their biggest nosedive in history.

The 53-cent drop per hundredweight in the Wisconsin-Minnesota series price this month even surpasses the price decline in the spring of 1974 which resulted from the increased import of dairy products.

If President Ford had not twice vetoed legislation raising price supports to 85 percent of parity; farmers would have had a floor price of $8.77 per hundredweight rather than the $8.26 floor which exists under the present 80 percent support level. Because of those vetoes, milk prices this month are 31 cents a hundredweight lower than they would have been under an 85 percent support level and are shading down toward $8.26.

That drop in milk prices is costing Wisconsin's dairy economy a quarter of a million dollars a day, and no one knows better than you how much it is costing farmers who are already hard-pressed because of the drought this summer.

A Carter-Mondale administration simply would not allow a situation like this to develop. We hope you remember that when you go to the polls November 2.

This bill will help but not insure that this commitment will be kept.

I urge my colleagues to once again show their support for the dairy legislation we have before us today.

Also, the bill before us today strengthens the dairy indemnity program. The purpose of the indemnity program has been to provide the American dairy farmer with some protection against catastrophic events beyond his control. This has not been a costly program in that the annual expenditure is somewhere between $150,000 and $200,000.

The strengthening provisions of this bill deal with protecting those farmers whose products are barred from the market due to radioactive fallout contamination. In the recent past several Pennsylvania dairymen experienced such fallout as a result of experimentation and testing done in China. These farmers had to shoulder this loss in total.

The beekeepers indemnity program is also continued in this legislation.

In the legislation also is the extension of the following authority:

First. The authority for Commodity Credit Corporation to transfer stocks of dairy products to military and veterans hospitals.

Second. The authority for base plans under Federal milk market orders including the Louisville plans, seasonal base plans and class I base plans.

Furthermore, title XI dealing with Public Law 480 carried a provision giving the Secretary more flexibility than previously experienced. Many times in the past CCC has had stocks of dairy products which, due to bookkeeping procedures and fact that dairy stocks must be valued at their purchase price, have not moved in the foreign aid program. This legislation allows such stocks to be valued at the export market price at the time the commodity is made available to the program.

Also, I was proud to offer along with my colleague, GEORGE BROWN of California, title XIV of H.R. 7171.

The keystone of this legislation is the establishment of demonstration solar farms, located in every State, to demonstrate practical solar alternative for farm use. This title will provide new funding for alternatives in the agricultural research service, and brings the results of the research to the grass roots level through the agricultural extension service.

This type of activity by the Government, I believe, is essential. Farmers are practical people, and they are not likely to invest in a solar milking parlor, for example, unless they can see one in actual operation, get good advice on how to run it and how to repair it when it breaks down and obtain solid data on how it will fit fiscally in their operation. The agricultural extension service is well equipped to carry out those important functions.

Food stamp reform efforts have been directed toward two primary goals this year. The Agriculture Committee has tried to draft a bill which would insure the fullest possible participation by those who are eligible, while streamlining the program in order to eliminate the nonneedy.

The committee chose not to streamline the program so strictly as to subvert the goal of equity. Therefore, we voted to retain certain features, such as income deductions for excess shelter costs, child care, and work expenses. We also voted to tie the standard income deduction to the Consumer Price Index, so that benefits continue to reflect the cost of feeding a household. Through an oversight, we neglected to index the excess shelter costs deduction. If the Committee of the Whole House fails ot correct this oversight, food stamp benefits will fail to keep pace with the drain on the disposable income of families who have heavy shelter expenses.

With respect to the first of the aforementioned goals, H.R. 7940 does not go far enough to achieve a decent level of participation among the elderly, blind, and disabled. The food stamp program has an abysmal service record for this group. Only 25 percent of eligible elderly persons actually receive food stamps, compared to over 50 percent of eligible nonelderly persons. The reasons for lack of participation on the part of this group are, primarily, fear of welfare stigma and logistical inconveniences.

Last year, the committee accepted, in a bipartisan effort, an amendment which would have allowed elderly, blind and disabled persons to receive cash in lieu of coupons. In addition to the obvious advantages of removing stigma problems and logistical problems associated with coupon collection, this approach has proven success in several States. This year, however, primarily due to fear of cost overruns and nervousness over endangering the elimination of the purchase requirement, the Committee unfortunately failed to mandate cash payments to the elderly, blind, and disabled.

A measure was approved, however, which gives the Secretary authority to issue cash to households in which every member is over 65, blind, or disabled, and mandates a pilot study of this approach. When the food stamp portion of the farm bill is considered by the House, I will offer an amendment to extend this discretion to the States. State governments are set up to work closely with their elderly population to determine the best policy for their particular area. With this approach, we in no way force an additional burden on State agencies, but rather allow them to take a positive initiative on behalf of their constituency.

As I have noted, the committee devoted a large part of its reform effort toward eliminating non-needy individuals from the program. Again, I don't believe the committee went far enough in attempting to restore integrity to the food stamp program.

The program is designed only to help those households at 1.5 times the poverty level or lower. Amazingly, for various reasons, statistics indicate that under the guidelines of this bill some 400,000 households would be getting stamps, even though their income exceeded twice the poverty level, or 33 percent above the intended level.

The committee narrowly rejected a proposal to recoup benefits from households earning more than twice the poverty guidelines. Had it passed, this amendment would have done much to eliminate benefits for the nonneedy, without jeopardizing or hassling those with legitimate need for food stamps. The concept is one agreed to by committee members of all philosophical outlooks toward the food stamp program.

To our knowledge, nobody has argued that the recoupment proposal would deny benefits to anybody with real need. The proposal acknowledges that a household with a relatively high income may have a temporary need. For such families, food stamp benefits would simply be considered as an interest-free loan, to be paid back in a painless manner through deduction from the family's income tax refund, or on an interest-free, penalty-free schedule, after the household is off food stamps.

In addition to restoring equity to the program on the basis of annual family income, by plugging the recoupment provision into the income reporting system for taxation, we will have an effective deterrent to fraud, and a greatly improved method of detecting fraud. The statistical information referred to above indicates that fraud in the food stamp program may be quite substantial. That is why it is impossible to accurately gauge the savings which would be gained by adoption of the recoupment proposal—the estimates range from $124 million to $283 million.

This proposal looks forward to what we are going to have to do in the future in order to establish some accountability in Federal assistance programs. We need

to do what we do in the income area with all of our businesses, which is to use our modern technologies to coordinate, monitor, and control our public assistance programs.

Mr. POAGE. Mr. Chairman, I yield such time as he may require to the gentleman from Oklahoma (Mr. ENGLISH).

Mr. ENGLISH. Mr. Chairman, I rise today to speak in behalf of America's grain producers, who are presently involved in an economic struggle so severe it could force many of them to declare bankruptcy and abandon their homes and farms by the end of this year.

Cash prices for wheat have hovered around the $2 level for the past 6 to 8 weeks, and in many cases dropped to as low as $1.80 at the peak of the 1977 harvest in the southwest. Even the most conservative economists do not suggest these prices are anywhere near sufficient to cover the farmer's cost of production. Further, the U.S. Department of Agriculture has conducted a survey which found that 72,000 grain producers in the nine-State midwest and southwest region are facing financial difficulty, and, the Department has predicted that at least one-third of these, some 24,000 farmers, will be bankrupt by the end of this year unless there is rapid improvement in the prices of wheat and feed grains.

I urge my colleagues to consider the critical nature of the financial condition of America's family farmer. Costs continue to increase, while prices for farm products, especially grains, continue to decline. Farmers have been operating at such a loss for the past several years that bankers and other lending institutions are no longer willing, or able to continue to extend credit. We can ill afford to let America's largest industry continue on this economic slide, which will, if not checked, result in a recession in rural America so severe that it could have detrimental effects on our entire economy. We have faced this situation before, and because a strong agricultural industry is so important to a strong America, the Congress has taken steps in the past designed to avert a disaster such as we are facing again today.

In fact, the 93d Congress enacted major farm legislation which was designed to assure the production of adequate supplies of food at reasonable prices to consumers by insuring producers against losses if their expanded production resulted in prices below target prices.

In 1975, because farmers were faced with spiralling production costs, the Congress deemed it necessary to once again consider legislation to assure an adequate price for farm products to help the farmer withstand an ever increasing cost price squeeze.

The House Committee on Agriculture conducted extensive hearings to determine what prices would be necessary to help the farmer meet his increasing costs of producing an abundant food supply, and on March 11, 1975, Chairman FOLEY issued the report of the committee to accompany H.R. 4296, a bill to provide "Emergency Price Supports for 1975 Crops."

I would like to quote briefly from the section of the report which outlined the need for enactment of "Emergency Price Support Legislation for 1975 Crops."

> In Secretary of Agriculture Earl Butz words, the purpose of the Agriculture and Consumer Protection Act of 1973 was to insure *"maximum production with protection"*—Farmers no longer have that protection. (in 1975) (Emphasis added.)

Continuing, the report said,

> Because of the tremendous increase in the cost of production of Agricultural commodities, the legislation inacted in 1973 no longer affords the protection to the producer that is necessary.

The report then goes on to discuss in detail the tremendous increases in the costs of fuel, fertilizer, machinery, land and labor, while pointing out that prices for farm commodities lagged behind.

Let me again emphasize that this report was issued by Chairman FOLEY on March 11, 1975. On that very same date, March 11, 1975, cash wheat in Kansas City was selling for $3.76 per bushel—on July 14, 1977, cash wheat in Kansas City was selling for $2.34 per bushel, and farmers are receiving just over $2 at most elevators in my State.

Mr. Chairman, the wheat target price in the bill reported by the Agriculture Committee on March 11, 1975, in support of which my colleague from Washington spoke so eloquently, was set at $3.10 per bushel, a level which was later adopted by the House of Representatives as the bare minimum necessary to assure this country of abundant food supplies in the future.

Today, production costs are even higher than those described by Mr. FOLEY and the committee in 1975, yet we are considering a bill which calls for a wheat target price of only $2.65 per bushel. I tried, during committee consideration of H.R. 7171, the Food and Agriculture Act of 1977, to increase this target price on wheat to a mere $2.90 per bushel, and unfortunately failed by a single vote. I could not understand why a target price of $3.10 was necessary in 1975 when cash prices were above $3.75 per bushel while a target price of only $2.65 was considered sufficient in 1977 when cash prices are $2 per bushel. Especially since, and on this there seems to be no disagreement, production costs continued to rise sharply in 1976 and again in 1977.

Mr. Chairman, I will offer today an amendment to H.R. 7171 which increases the target price on wheat to $2.90 per bushel for the 1977 crop. This, I feel, is a bare minimum necessary to enable many of our grain producers to survive under today's depressed market conditions—conditions created not by the farmer—but by their Government—which urged them to sow fence to fence and increase their production to meet growing world demand, and then, placed an embargo on grain exports which has resulted in glutted domestic markets and seriously low prices.

Mr. Chairman, I would like to again emphasize that the economic problems of the American grain farmer did not develop overnight, nor are they unique to the year 1977. In fact, the Secretary of Agriculture, the Honorable BOB BERGLAND, speaking as a member of the House Agriculture Committee in the report accompanying the 1975 farm bill, stated the problem very precisely when he said,

> Current law provides price protection at levels far below current production costs, and if grain markets continue to tumble, wholesale farm and agribusiness bankruptcies will follow.

Mr. Bergland did such an outstanding job of presenting the case for higher target prices in 1975 I feel every one of my colleagues should have an opportunity to read his remarks, and I ask unanimous consent that his statement appearing at page 31 of the committee report be printed in full at this point in the RECORD.

I submit, Mr. Chairman, that we are on the verge of that condition which now Secretary of Agriculture, Bob Bergland, was predicting when he made the above remarks in March of 1975. If my amendment to increase the target price for 1977 wheat crops is not adopted by this body, we will have "wholesale farm and agribusiness bankruptcies" as Secretary Bergland predicted, and, unfortunately, it will occur during his term as Secretary of Agriculture. I pray that this will not be the case, and I urge the adoption of my amendment to avert disaster and assure the continued strength of our largest industry, agriculture.

Mr. POAGE. Mr. Chairman, I yield one-half minute to the gentleman from Minnesota (Mr. NOLAN).

ADDITIONAL VIEWS OF HON. BOB BERGLAND

Why, you may ask, is your Committee on Agriculture reporting a bill to raise farm income guarantees at a time like that?

Some of the important facts are:

1. About 60 percent of our wheat, 40 percent of our soybeans and 20 percent of our feed grains were exported last year in a volatile world market subject to sharp price fluctuations.

2. Last year farm product exports earned $22 billion, an all-time high and were the major factor in our near-balanced trade position.

3. This year farmers have been asked by our Government to produce every pound, bushel and bale possible in order to meet our own consumer needs and to continue to meet commercial foreign demands placed upon us. There are no production controls on any of the commodities covered by the bill.

4. The markets for grains have broken sharply since last November because of the chaotic conditions in the commodity markets of the world over which American farmers have no control.

5. A major portion of farm production costs are petroleum based, i.e., fuel, fertilizers, pesticides and have tripled in cost during the past two years.

Current law provides price protection at levels far below current production costs and if grain markets continue to tumble, wholesale farm and agribusiness bankruptcies will follow.

The Committee bill is a compromise between those of us who would prefer much higher levels of protection and those who prefer no change. The grain guarantee levels recommended are about midway between present market prices and the protection af-

forded by present law. In no way will the grain sections increase food costs. To the contrary, ample food supplies can only be assured if there is some minimal protection against financial ruin and the resulting economic backlash.

In my state of Minnesota last year 3,200 farmers abandoned the production of milk because of the fierce cost-price squeeze. Nationally about 20,000 dairy farmers quit the business. I am convinced thousands more would have quit but for the fact that the proceeds of a sale would not have paid off the mortgage on the livestock.

The Committee bill would raise the price of manufactured milk products to levels comparable to prices received in February 1974 or to about $8.14 per hundred pounds of milk. I know from experience that unless dairy incomes are improved, the exodus of dairy farmers will continue; and if we are to depend on the dairy giants for our milk supplies—consumers beware.

The bill provides price protection for the 1975 crop only for the same reason your Committee moved quickly a few weeks ago to set aside the food stamp cost increases scheduled to go in place on March 1.

These actions will buy time during which the Committee can undertake a complete and comprehensive review of our food and fibre production and consumption policies, which in my judgment are in need of overhaul.

Mr. NOLAN. Mr. Chairman, H.R. 7171, the Agriculture Act of 1977, falls far short of being the "coherent, predictable, stable, coordinated food, and fiber policy" Jimmy Carter called for during his Presidential campaign. President Carter proved willing to settle for something far less than what he campaigned for and farmers in the Midwest and Plains States are extremely disappointed in the Carter administration's farm program and in the House Agriculture Committee's farm bill.

Although many Members of the House, including myself, will offer and support numerous amendments to H.R. 7171, we should recognize how limited our vision still remains. We have a long way to go before we will establish a national food policy which, in the words of the Democratic national platform:

Will be fair to both producer and consumer, and be based on the family farm agricultural system which has served the Nation and the world so well for so long.

Given the current attitudes of the administration and the House, when we complete our consideration of H.R. 7171 we will probably have no more than a bill that will keep the banker at bay, merely postponing the farm foreclosures which now loom on the horizon. Clearly, even if the price support levels in the Senate farm bill were the maximum that President Carter would abide, rural America would still face economic and social disaster. As Senator HUBERT HUMPHREY recently said:

It is important that we fully understand the gravity of this crisis. Statistics do not tell the full story. The farmers and rural entities that will go broke this year are really only the tip of the iceberg. Those that manage to hang on will be burdened with debts that will inhibit their viability for years to come. These producers will have no solace in thinking back to the Government policies that got them into this situation in the first place. I can only hope that it will be Government policy to assure their survival.

We must try, therefore, to improve the House farm bill as much as possible. We owe our family farmers a better deal.

It is also important for my colleagues from urban districts to realize that the Nation's economy will not revive substantially if agriculture remains the whipping boy for inflation. We must address ourselves to the crucial question of economic balance, without which there will be no sustained prosperity in either the rural or urban sectors of the economy. We need a decent price support program for farm commodities and a decent minimum wage as well.

Mr. POAGE. Mr. Chairman, I yield 1½ minutes to the gentleman from North Carolina (Mr. ROSE).

Mr. ROSE. I thank the distinguished chairman of the committee for yielding to me.

I want to start by thanking the gentleman from Vermont (Mr. JEFFORDS) for his kind remarks and the cooperation that he has given me in preparing the dairy section of this bill. We are basically extending existing authority under the dairy provisions of this bill. At this time I would like to yield for a question to the gentleman from New York (Mr. MCHUGH).

Mr. MCHUGH. I thank the gentleman for yielding.

As the gentleman knows, the dairy price support program is designed and intended to assure an adequate supply of pure and wholesome milk to meet current needs, to reflect changes in the cost of production, and to assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs.

Given adequate administration, the program has proven its ability to accomplish these purposes. In my view, the amendments proposed in this legislation would further strengthen the program and assist in achieving these stated goals.

However, there are two aspects of program administration that have, in the past, tended to undermine achievement of the purposes of the program.

The first of these relates to the policies of the Commodity Credit Corporation with regard to the management of Government stocks of dairy products acquired under the dairy price support program. While the statute provides that CCC may sell such products for unrestricted use at the higher of the market price or 105 percent of the purchase price, the practice generally employed for a number of years prior to April 1, 1976, had been to offer such stocks at the higher of the market price or 115 percent of the purchase price. This differential allowed normal market forces to work effectively and encouraged the carrying of normal inventory needs by both processors and users while still making Government stocks available as a market buffer during periods when prices might rise substantially.

Effective April 1, 1976, the resale price for dairy products owned by CCC was reduced to the statutory minimum. This was coupled with a move to rotate Government-owned stocks of nonfat dry milk by offering the product for unrestricted domestic use on a bid basis.

In pursuit of the latter policy, bids were accepted substantially below the then effective CCC purchase price for nonfat dry milk of 62.4 cents per pound. Offers as low as 58 cents per pound, 4.4 cents below the CCC purchase price, were accepted.

The effect of this practice was to demoralize the market, depress the price of nonfat dry milk and prices paid farmers for milk, and to impair the ability of the price-support program to deliver the announced level of price assurance to farmers for milk made into butter and nonfat dry milk. In addition, it also tended to increase CCC purchases by discouraging processors and users from carrying normal inventories.

Now, I would like to ask the distinguished chairman of the Dairy and Poultry Subcommittee if it is not his understanding that the management of inventories held by the Commodity Credit Corporation is to be undertaken in such a manner as to encourage normal trade practices, including inventory management, and to bolster farm prices as intended by the price-support program.

This has always been my understanding. The law does provide substantial flexibility to the Secretary of Agriculture, but it is not intended that this is to be used in a manner which can actually depress farm income or interfere with commercial market operations. We should commend Secretary Bergland for the actions he has taken to correct these problems in connection with the dairy price-support program for the 1977–78 marketing year. It is my understanding that the minimum resale price for CCC–owned dairy products has been established at the higher of the market price or 110 percent of the CCC purchase price. Further, the bid basis sales of nonfat dry milk for unrestricted use have been, at least for the time being, suspended. Both of these moves are in keeping with the basic intent of the price-support program.

Mr. MCHUGH. If the gentleman will yield further, it has always been the intent of Congress that the announced level of price assurance under the dairy price support program be available, on a national average, to all dairy farmers. During the 1973–74 and the 1976–77 marketing years, the Commodity Credit Corporation purchase prices for butter and nonfat dry milk were set at levels which, when market prices for these products were at such levels, denied dairy farmers whose market was a plant producing these products the opportunity to realize this price assurance.

To illustrate the situation, the price support level for manufacturing grade milk was set at $8.26 per hundredweight on October 1, 1976. The CCC purchase prices announced in connection with that price support level were such that the price of milk made into butter and nonfat dry milk was effectively supported at only $8.11 while milk manufactured into cheddar cheese in 40-pound blocks was supported at $8.41.

Does not such action, in the view of the distinguished chairman of the Dairy and Poultry Subcommittee, tend to deny

many dairy farmers the price assurance intended under the price support program?

Mr. ROSE. Such a policy does effectively deny dairy farmers whose market is a plant producing butter and nonfat dry milk the same price assurance afforded those able to sell their production to a cheese plant. In the administration of the program, care must be taken to assure that the announced level of price support is available to farmers, on a national average, on a nondiscriminatory basis.

Again, I must point out that Secretary Bergland has acted to remove this "tilt" from the price support program. This is an action for which he is to be commended.

Mr. WAMPLER. Mr. Chairman, I yield 4 minutes to the distinguished gentlewoman from Massachusetts (Mrs. HECKLER).

Mrs. HECKLER. Mr. Chairman, a great philosopher once said:

Those who ignore history are doomed to repeat its failures.

As we begin formal consideration of the Agricultural Act of 1977, I urge my colleagues to observe the lessons of history—to reject the narrow view, so common in the past, that agricultural legislation is "farmer" legislation pure and simple—and to recognize that the well-being of the farmer is directly tied to the well-being of the consumer.

America's agricultural system is so efficient that the United States keeps setting new world records year after year in per capita production of food and farm exports. For the most part, this is because the role of Government has been educational. Government has passed out knowledge, not orders; and farmers have based production decisions on market demand rather than Government-planned incentives. Since consumers comprise the marketplace, market demand is just another way of referring to consumer needs.

The omnibus farm bill serves to strengthen America's farmer-to-consumer system in some respects. For example, the research title will enhance the ability of American universities and colleges to unlock new doors to improved agricultural production practices which will improve food quality and reduce costs.

I also am pleased with the provision which ties cotton price support levels directly to market prices and, thereby, to consumers. However, the legislation before us is in need of improvement in a number of important respects.

I am most concerned about the high price support level now in the bill for peanuts. At $420 per ton, the recommended level is 47 percent above the estimated cost of producing peanuts and is totally out of proportion with the manner in which other commodities are treated in the bill. This amounts to a Government-guaranteed profit which puts the American people in a "no win" position in two of their capacities. As taxpayers they will pay $243 million during the next 4 years to underwrite the extravagance. As consumers, they will continue to pay inflated prices for peanuts and peanut products in the grocery store, because Government price supports create a floor under market prices.

The administration originally proposed a peanut reform that would have reduced the price support gradually to $345 a ton. This would offer adequate protection to the peanut industry and would make possible lower consumer prices. At the appropriate time, I will offer an amendment to place this proposal in the bill.

I also am concerned about the focus of Government price support assistance under the Agricultural Act of 1977. According to the Congressional Budget Office, about half of all payments will go to 4 percent of the farms—those whose sales exceed $100,000. The bill also liberalizes—in fact, doubles—the current $20,000 limitation on payments to individual wheat, feed grain and upland cotton producers, and it contains no limit at all on payments made under the Department of Agriculture's new sugar program. According to the Congressional Research Service, one giant sugar company alone could get in excess of $14 million.

It clearly is not in the taxpayers' or the consumers' interest for Government to subsidize the corporate giants of American agriculture. I will support efforts to stop this abuse of the Nation's farm programs.

Above all, however, I urge my colleagues to consider the various elements of the Agricultural Act of 1977 from this perspective: the fate of the farmer and the fate of the consumer are tied together. The needs of both must be considered. And the needs of both must be met for our efforts to succeed.

Mr. POAGE. Mr. Speaker, I yield 1½ minutes to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Chairman, H.R. 7171, the Agricultural Act of 1977, makes no provision for the establishment of a national grain reserve. Given the desperate nature of the current farm situation, in which price depressing surpluses have forced farm returns far below the actual cost of production, it is essential that the farm bill be amended to include effective reserve provisions.

I will offer together with Congressman SMITH of Iowa a domestic grain reserve amendment on the floor when H.R. 7171 is read for amendment.

This amendment establishes a program of extended Commodity Credit Corporation loans and storage agreements allowing farmers to hold from 25 to 35 million tons of wheat and feed grains on farm until prices rise steeply. The program protects farmers from severe economic setbacks when temporary oversupply drives prices down. It will protect consumers from sharp price inflation by allowing grain to come out of reserve at times of need as determined by price rises. It provides interest free loans and storage payments to farmers for all stocks in the program. Absolutely all of the grain in the reserve is held by farmers with no Government ownership of reserve stocks.

WHY IT IS NEEDED

To moderate the extreme fluctuations in grain prices and supply that have been damaging to, first, producers in that they have left them with temporary price depressing surpluses denying them a fair return on their production, and aggravated their debt problems causing many to go bankrupt—also damaging to rural communities that are dependent on farmer income; second, damaging to producers and consumers in that occasional very high prices are immediately costly to consumers and subsequently have an extremely inflationary effect that hurts all sectors of the economy including farmers; and third, damaging to the developing nations in that when supplies are extremely short there is not enough Public Law 480 food assistance available precisely when it is needed most, and when there are surpluses the developing nations are hurt by too much U.S. food being disposed on their markets. This acts as a disincentive to their own farmers to continue to produce.

BENEFITS TO THE UNITED STATES

First. It would allow farmers to hold their grain until market prices assure them a fair return for their production.

Second. It would assure consumers a sufficient supply of food at reasonable prices.

Third. It would assure our foreign grain customers that we have the inventory to supply our sales commitments and lessen the threat of embargoes and export restrictions.

Fourth. It would have a strong anti-inflationary impact on the economy by protecting the United States against skyrocketing grain prices.

Fifth. It would help provide an added degree of world food security against the unpredictability of weather and other natural and manmade disasters.

Sixth. It would assure the developing nations a dependable supply of both food aid and commercial purchases to meet their pressing nutritional and developmental needs and also assure that periods of oversupply will not lead to depressed U.S. prices or excessive food aid and thus depress food prices abroad and discourage the growth of food production in the developing nations.

Seventh. It would assure U.S. livestock feeders and food processors a dependable supply of grain at reasonable prices.

Eighth. It would set the stage for other nations to join with the United States in negotiating an international grain reserve agreement as advocated by the Carter administration and the World Food Council.

HOW THE RESERVE WOULD OPERATE

Stocks are owned and held by the participating farmers, under established Commodity Credit Corporation loan and storage contract procedures. Storage contracts will be made on a 3- to 5-year basis, with the Government paying storage costs and interest charges whenever the market price for the given commodity is less than 140 percent of the loan rate. Above that price level, stor-

age payments cease, encouraging farmers to remove their holdings from the reserve and return them to the market. If the market price for a commodity reaches the higher of 165 percent of the loan rate or 130 percent of the 3-year average market price, the Secretary of Agriculture is authorized to require the repayment of commodity loans made under this reserve. Reserve stocks are only accumulated when there is a surplus on the U.S. market, and provision is made for rotation of stocks to prevent spoilage.

WHY SUCH A LARGE RESERVE

First. It is in U.S. producers' interest. They are stuck with surpluses that are bringing them financial ruin. Putting their grain in this reserve would mean the U.S. Government would pay the storage rather than them. It would allow the farmers to sell that grain at a higher price later on, rather than at disastrously depressed prices now.

Second. A reserve of this size is necessary to provide sufficient price stability to help both producers and consumers.

Third. It is about the level that most economists feel the United States should carry as its share of any internationally coordinated system. All authorities say the size of a coordinated international reserve would have to be between 60 to 80 million tons if it is to provide sufficient stability, thus the U.S. share would be in the 25 to 35 million ton range based on its share of world production and international trade in grain.

COSTS OF THE RESERVE

USDA figures project that the cost to the U.S. Treasury could be less—I repeat less—than H.R. 7171 as it stands now. This reserve amendment would save money. USDA reports indicate the reserve would save many millions of dollars over the lifetime of the bill with most savings in nonrecoverable expenditures; for example, income deficiency payments; although savings would also occur in the recoverable "Loan and Inventory Costs" category. The savings would result for increased farmer earnings in the commercial market and the proportionate reduction of dependency upon Government income supports. A combination of factors related to the reserve reduced Government income support payments by $1.5 billion in one study and by $351 million in a later version. While caution should be exercised in evaluating the conclusions of these USDA studies, nonetheless the data strongly supports the view that the reserve would lower overall costs of the House farm bill. It is clear that acquisition of reserve stocks would significantly raise farm prices.

We have huge reserves of grain now. The issue is, "How do we manage them?" This amendment provides a grain reserve management program, voluntary to our farmers, and of benefit to our consumers.

This reserve management program will reduce costs to the U.S. Treasury, realize a higher return to our farmers, and aid our balance of payments by obtaining a higher price for our grain sold overseas.

The reserve amendment, dealing with the 3- to 5-year loan reseal provisions, will be offered as a substitute to section 902 of H.R. 7171.

The Carter administration has indicated a desire to have a free hand in the design and management of a U.S. domestic reserve system, because of a stated desire to retain unrestricted flexibility in future international negotiations. The following addresses that concern and suggests why the House should join the Senate in mandating a domestic reserve in the farm bill presently under consideration.

First. To delay the establishment of a U.S. domestic reserve until an international system is agreed upon is not in our own self-interest nor in the interest of world food security. The Carter administration has announced plans to make a reserve proposal at the International Wheat Council—IWC—in September with negotiations to begin sometime after that. The administration anticipates June 1978 to be the earliest an international agreement might be worked out—an optimistic schedule given the complexity of the task. Even with this timetable, no guarantee exists that by the time agreement is completed there will still be sufficient surpluses in the world in order to stock the reserve. For example, while there is presently a 50 million ton surplus of wheat in the world, it should be remembered that this surplus is the result of two exceptionally good harvests worldwide—a situation unlikely to occur often given the unpredictibility of whether, and other environmental, political, and economic disruptions. Should there be shortfalls in Russia, as occured several years ago, or a combination of shortfalls as routinely occurs in India and Bangladesh, or an extended drought in major grain producing areas of the United States, as has threatened to occur in each of the past 2 years, those sizable reserves would rapidly be depleted. The time to establish a domestic reserve is now while the supplies are available.

Second. Establishment of an effective domestic reserve would enhance the climate for an international agreement, rather than impede it. Past negotiations have been blocked primarily by the United States unwillingness to commit itself to reserves of any kind—either domestic or internationally coordinated. The United States, under the Ford administration, did propose a 30 million ton internationally coordinated system of nationally held reserves at the International Wheat Council in November 1975. While it had the support of the U.S. State Department, it lacked the support of USDA and the Treasury Department—thus it was never aggressively pushed. Its chances for success were further frustrated by U.S. determination to stand alone in advocating the triggering mechanism for such reserves—the criteria for accumulation and release of the grain from the reserve—to be based on quantity, while all the other nations were in favor of a trigger related to market price.

The Weaver grain reserve proposal uses price as the triggering mechanism—complementing the Carter administration's announced preference for price as the trigger. Should the reserve become operative, the United States would no longer be in conflict with the other nations of the world on the triggering mechanism. And by implementing a U.S. reserve program that defines quantities and operational mechanisms, the United States would be demonstrating its commitment to reserves to the rest of the world. Negotiations on an international agreement should become easier than in the past.

The Weaver reserve proposal allows the administration substantial operational discretion so U.S. hands are not tied in subsequent international negotiations. The administration can define the quantities to be held in reserve—any amount between 25 to 35 million tons of wheat and feed grains—and can choose to call loans at any level above the higher of 165 percent of the loan rate or 130 percent of the 3-year average market price.

Third. Establishment of the Weaver grain reserve now would offer significant immediate relief to grain producers. The Weaver bill proposes quantities of grain to be held in reserve—25 to 35 million tons of wheat and feed grains—that meet the requirements of our own producers who are presently being hurt by limited export markets and price-depressing surpluses. The levels are also realistic in terms of the quantities the United States might be expected to carry in any subsequent international agreement. For example, all serious U.S. and international studies suggest the minimum quantities of grain needed in an international reserve system to bring sufficient food security and price stabilization is 60 to 80 million tons. Given the U.S. role in production and international trade in grain, the amounts suggested under the Weaver proposal for a domestic reserve would be appropriate as the U.S. portion of any subsequent international agreement.

Fourth. To establish a sizable U.S. reserve does not mean that the United States is paying the costs of holding the reserve for the world. By putting our surpluses into the type of reserve proposed by Representative WEAVER, we are holding them until market prices reach a higher level. Then they are sold at market prices to both domestic and foreign buyers. The profits from higher prices are realized by U.S. farmers, and the cash loans that allow farmers to hold their surplus grain are repaid to the U.S. Government. Thus, the reserve serves our own economic interest.

Mr. GRASSLEY. Mr. Chairman, in traveling around my district over the July 4 recess, one message came through loud and clear. Farmers are tired of seeing their allotments based on plantings from the late fifties and early sixties. There is little justification for basing the farmer's only real protection against overproduction or poor foreign markets or natural disaster on what was planted on his farm nearly two decades ago. Thus, I think the farm legislation we are considering today makes a major stride forward, by basing deficiency payments on current plantings for harvest. The fear that this kind of mechanism could

encourage overproduction is certainly groundless, because farmers will continue to plant for profit, not Government support.

I might add, in addition, that this kind of market-oriented program can only work where no provision is made for the establishment of a national grain reserve. A grain reserve, always subject to political manipulation, would clearly have a psychological impact on farm prices; such a reserve could clearly lead to planting for the Government, and not planting for the marketplace. In such an instance, both the farmer, the consumer, and the taxpayer would lose. For those concerned about the prospects of continued hunger in less-developed nations, I would refer you to two GAO reports: "Disincentives to Agricultural Production in Developing Countries" notes how many developing nations have policies which discourage the full production of food, and "Restrictions on Using More Fertilizer for Food Crops in Developing Countries," released on July 5, notes how restrictions on the use of fertilizer in developing nations is resulting in far less food production than is actually possible.

These reports, as well as the fact that Americans pay far less for their food as a proportion of income than any other citizens anywhere, makes clear one basic point about agriculture in the United States—the free market system, in which farmers make their own decisions, take advantage of whatever technology is available, and use those production techniques most appropriate for their particular situations, is a guarantor of more than ample food supplies for Americans, as well as substantial surpluses for foreign nations in need of supplements to domestic production. The hindrance of this free market approach could result in only higher consumer prices, the destruction of the family farm, and more hunger in nations unable or unwilling to meet their domestic needs.

Mr. POAGE. Mr. Chairman, I yield 1½ minutes to the gentleman from California (Mr. KREBS).

Mr. KREBS. Mr. Chairman, it is always very difficult to comment about a bill of the size of this omnibus farm bill with all its complexities in a minute and a half.

Let me, therefore, merely take this opportunity then to express my deep appreciation to the chairman of the committee, the honorable gentleman from Washington, Mr. TOM FOLEY, for the patience and leadership he has shown in making it possible for us to bring this bill to the House.

Let me also commend the chairman of the Cotton Subcommittee, the honorable gentleman from Mississippi, Mr. DAVID BOWEN, as well as the chairman of the committee that considered the food stamp program, the gentleman from New York, Mr. FRED RICHMOND.

I think in both of these areas much progress is reflected in this bill. For the first time in recent history we have gotten away from the archaic rules that dominated the cotton program. A word of thanks should go to the cotton industry, both in the Southwest and Southeast, for the leadership they have shown in resolving regional differences.

Last, but not least, I believe the food stamp program that the subcommittee chaired by the gentleman from New York (Mr. RICHMOND) voted out, and which was amended only relatively little by the full committee, represents a substantial step forward in an area where much reform was needed.

We have thus come a long way in meeting some of the very valid concerns of the American people over the food stamp program.

Mr. WAMPLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Montana (Mr. MARLENEE).

Mr. MARLENEE. Mr. Chairman, I commend the vice chairman and the chairman of the Committee on Agriculture for their fairness in our work, but I do disagree with their approach to target prices.

Mr. Chairman, the time has come today to decide whether this Congress is interested in the wheat growing States like Montana, Kansas, Texas, and Oklahoma, or if it is going to make the American wheat farmer the sacrificial lamb to balance the budget, to bail out the Nation's deficit of payments, and to promote the objectives of foreign policy.

Granted, all of these are worthy goals, but I object to the administration liquidating our assets to do it. Unless, we keep our farmers on the farms we will lose this advantage and in the process compound the problems.

What some Members of Congress seem to expect of the American wheat farmer is more than he can shoulder this year. Next year, many of these proud men will not be around to put their shoulders to the wheel unless we declare our support here today.

The operating costs per bushel, which are supposed to be reflected by the target price, are the costs paid by the farmer, the payment of these costs flow through the veins of trade and are reflected in the economic well being of America by creating good employment and good jobs and business stimulus. It is the greatest make jobs program in the world.

Cut those veins and this economy will wither. And cutting these veins—cutting that flow of economic well being is what the House Agriculture Committee did by offering a target price of $2.65 per bushel for wheat—far less than the cost of production.

WHEAT TARGET PRICE REMARKS

The target prices for wheat in H.R. 7171 which have been recommended by the House Agriculture Committee do not provide our wheat farmers with target prices anywhere near those for cotton and rice. In fact, if we accept the committee's recommendation in this, it will be 1980 before a $3.11 target price is reached. The Senate passed bill calls for a target price of $3.10 in 1978. Our wheat producers need financial assistance this year, or they may not be in business by 1980. As it is, the price of wheat has dropped over 35 percent since last year, and if immediate action on the part of Congress is not forthcoming, many wheat farmers may not be farming in 1978 or 1979.

The administration has made wheat the straw that will break the camel's back. Never mind that target prices for rice and cotton are at a much higher percentage of parity. President Carter has taken a shortsighted attitude based on budgetary convenience and as a result the Agriculture Committee set wheat target prices at 44 percent of parity for 1977, even though the Subcommittee on Livestock and Grains voted 10 to 1 to approve the levels which we propose today.

The biggest single obstacle to approval of this amendment is President Carter's dogged insistence that he will veto the bill if target prices for wheat in 1977 exceed those recommended in H.R. 7171. It must be a heavy-handed argument, for it apparently has caused the chairman of the Agriculture Committee and the vice chairman to reverse their position of 2 years ago. At that time they joined Bob Bergland, now Secretary of Agriculture, and substantially the same majority that reported and passed a farm bill in 1975 calling for a wheat target price of $3.10 and a loan rate of $2.50. Inflation alone certainly would justify more instead of less as the bill offers.

During his campaign in the Midwest last fall President Carter said he would agree to target prices at the cost of production for wheat and corn. The Agriculture Committees in the House and Senate would have probably approved more favorable target prices for wheat and corn if the President had not threatened to veto the bill. It appears that President Carter, who was the champion of wheat and corn producers last year, has now deserted them and left a cloud of impending economic disaster hanging over the wheat-producing region.

Wheat farmers are suffering from the greatest economic crisis since the Great Depression 40 years ago. Although it has proven to be the greatest income source of the United States from international markets for 3 of the last 4 years and has offset our huge reliance on oil imports, it has received the least attention of any commodity covered in this bill.

According to a USDA report, 32 percent of farm borrowers are in serious trouble today. Out of a total of 226,100 farm borrowers who were surveyed by USDA, 13,900 will be unable to repay their loans and 53,300 will have to refinance, if possible, or liquidate their assets to offset their liabilities. Many rural banks are already carrying debt loads up to 80 percent of their limits and are experiencing liquidity problems. Some banks have already closed. We must provide higher target prices for this year's crop. Our action can show the financial institutions and farmers that help is on the way, and there was a good reason to loan to a wheat farmer and keep him in business, or it can show him that the worst is yet to come. The alternative is to allow our family farms to go to agribusiness combines or foreign investors.

By their own estimates, USDA officials predict the price of wheat could drop to $1.60 per bushel. There is not much in-

centive for a man to work long hours when he stands to lose 50 percent on his investment. If this section of the bill is not amended as proposed, it will signal cruel and unusual punishment for wheat producers. We are currently losing 40,000 farms per year. If they were animals, I would recommend that wheat farmers be put on the endangered species list, but they are human beings—proud people who need our help. Let us not turn our backs on people in need and people we need. I urge your support of the English/Sebelius amendment.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the distinguished gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, I thank the chairman for yielding to me. As a freshman, I respect the chairman's ability to perform the task, the unbelievable task, which he had.

I come before the Members on a parochial issue. It is a parochial issue because I represent the largest wheat-producing State in the country, and it is a parochial issue to all the Members because they eat the product we produce. Therefore, we need to continue the kind of cooperation between us that we have had. I have put out in the Speaker's lobby here a bushel of wheat. I notice that Members have been coming by and putting some of it in their mouths and eating it, and perhaps taking it for granted that this is the staff of our lives.

This country, above all others, is blessed with an incredible land climate for agriculture, and particularly for producing wheat. My State is the center of that production. I ask the Members to support the English amendment which will be offered later today, to help continue our ability to produce wheat.

Let me talk about the issue of priorities for just a minute. As most Members are aware, the entire agricultural component of the budget is less than 3 percent. When we take the food stamp section out, it is less than 1½ percent. Yet, this week we voted on two conference reports in which we spent nearly $300 million more in those conference reports than we did when we voted on the matter in the first place. One of those conference reports, which provided funds for operations of a department, was for $130 million over what the President asked for, in the State, Justice, Commerce Department conference report. Where are our priorities? Where was the voice of our Budget Committee and others to urge us to hold down spending in those instances? We need to consider that the agricultural component of the budget deserves the same equitable treatment that other segments of our national budget constantly receive.

Mr. WAMPLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Chairman, this bill, as presently written, is a gratuitous slap in the face of the American farmer. It is totally inadequate for the economy of America's most basic and vital industry—one economy that provides the food and fiber for this Nation and a good share of the world.

This bill completely ignores the important fact that if we shoot down the economic stability of our agricultural producers, we destroy one of our Nation's most powerful bargaining chips in international affairs. Agricultural produce, sold abroad, keeps our balance of payments in the black. Our agricultural exports have purchased the oil of OPEC nations which, in turn, has helped keep the price of gas and fuel oil at least within sight for the American consumer. And the continuing ability of our farmers to produce the food and fiber that sustains the people of foreign countries, is essential to our quest for a lasting peace.

This one-sided piece of legislation before us, says, in effect, that although the farmer can be counted on to help the Nation through every emergency, the Nation will not support the farmer when the shoe is on the other foot.

Following the gigantic farm export year of 1973, the Government urged farmers to plant fence-row to fence-row to replenish America's storehouse. And they did. Meanwhile, good crop years in some of the other wheat-producing countries left our Nation with a commodity surplus—and prices disastrously below the farmer's cost of production.

Farmers are hard-working human beings—not miracle men. They simply cannot fight the prices and other factors that are beyond their human control—and, right now, thousands upon thousands of them are on the brink of bankruptcy.

If anybody wants to question that statement, all he needs to do is look at the record. In the Ninth Federal Reserve District alone, one-third of the farms, this year, face the grave need of possible refinancing—if they can get it.

But, it should not take a loan book study to convince this Congress that our farmers need their help desperately. All of us live every day with the realities of inflation on the family pocketbook and we keep making adjustments to help every outstretched hand. Well, here are a few basic economic farm facts:

In 1949, 28 years ago, wheat was $1.90 a bushel. Last month—in Goodwin, Kans., wheat fell to $1.64. In terms of inflated dollars, that means the farmer is getting about half of the 1949 price and less than one-third of the current parity price which would be $5.03 a bushel.

Meanwhile, of course, the price of food, itself, has gone out of sight. In 1949, flour cost 9.5 cents a pound, today it sells for 27.2 cents. A loaf of bread today is 36 cents—in 1949 it was 14 cents.

How could any so-called farm bill ignore the fact that the basic producer is the only one in America's inflated food chain whose price has not only not been adjusted to the inflation, but in fact, is going rapidly backwards?

Is this bill before us the only answer the farmers are going to get from this Congress for their record achievement in helping to feed the world?

In 1949, one farmer produced enough food and fiber to feed 15 people and in 1976 he produced for 56 people. No agricultural nation, and certainly no segment of industry can match that productive increase.

At the same time the farmers' costs have skyrocketed to the point that today they are losing money at the present prices, in spite of that efficiency.

Are we here to punish him for a productivity the Government demanded of him in the first place? When I look at this bill, I wonder if its authors and sponsors think the farmer, himself, is immune to inflation—although I suspect that most people know that farmers rate as "consumers" too.

But what about his business costs as a businessman? As in all industries it is true that his machines and equipment are more efficient than they were 28 years ago—but certainly nowhere near making up the difference in cost. In 1949 a combine cost $4,700—today it is $18,885 with only a moderately increased capacity. A grain drill was less than $100 a foot—today, $556 a foot. A 1949 tractor cost about $1,200; its mate, today, goes for $8,120. In 1954 a self-propelled 14-foot windrower or grain swather went for $1,550, today it sells for $8,250.

I am not here to sell you any of these exotic rural machines. I am just giving you some down-to-earth facts, from personal experience. The point is, that from planting to harvest—from calving to stockyard—every business activity of the farmer is burdened with a heavy, inflated price tag.

In my Seventh District of Minnesota this year, 1,070 in our farm business management program, realized an average return of 4 percent on their real property investment for raising Hard Red Spring wheat—and that does not include interest on land investment which would reduce the return even more. I would not sight the cost-yield price breakdown here. But I have those figures if anybody wants to review them. The question is: How many investors would invest in a proposition that is subject to the whims and the whiles of nature? And would net them, at the long end of the line, a mere return of 4 percent?

Is it the business of this Congress, then, to pass a "farm bill" that will make farming so unprofitable that the farmer will refuse to invest in the crops that sustain this Nation and part of the world? As a responsible body of our National Government, we must not let that happen.

Not only are the target and the loan prices provided by this bill inadequate, further insult is added by the proposed storage program in which farmers will be paid one-half to two-thirds less than the commercial grain storage rates. It is essential that we correct this provision, and provide the farmer with the same storage rates as the commercial warehouses.

He bears the liability both for the quality and the shrinkage of the grain. Why should we penalize him further, with a totally inadequate storage rate?

The threat has been made—openly—that if the potential liability target and

loan payments in the bill we pass here exceed $2½ billion, the President will veto it.

It is inconceivable to me that the administration would threaten us with a veto beyond that $2.5 billion which is so patently inadequate. It is a threat that singles out the farmers as a potential "budget buster"—while expressing absolutely no concern for the food stamp portion of the administration's own bill that calls for $5.7 billion from the National Treasury—which could go 2 billion higher in the next 2 years.

Are the farmers expected to believe that their continued productivity and economic welfare have the lowest priority in this age of American "democracy?"

I submit, that is a misplaced sense of priorities. The only new wealth America can count on to meet the increasing demand for product and service comes from the mineral sources within the ground and the agricultural production from the land. To squeeze out the economic life of the farm industry is to choke off the source of supply that feeds, clothes, and enriches America and all her people.

That is not just farmland rhetoric. On the July 4 break and since, I have been spending most of my time at county fairs—visiting with farmers, small businessmen, and farm implement dealers. All of them tell the same story. Farm families no longer flock into town on rainy summer days—they cannot afford it. So the merchants and other small businessmen are suffering. The farm implement dealers say that their business is way off, and getting worse.

With projected worldwide wheat yields for this year again on at near record amounts the situation will get worse before it gets better.

But their alarm is one that every Member of this body should share. It does not take very long for the domino impact of economic depression in our small towns and cities to reach the big industrial centers—Moline, Chicago, Detroit, Akron, Pittsburgh—through the industrial corridor of New Jersey and straight to the financial center of New York. We must not overlook the larger reality of a healthy agricultural economy. For farm families and rural small town businessmen, under normal conditions, are prime prospects for all American goods, products, services, and industrial equipment that, in turn, make the difference in the state of our national economy.

Members of this House with urban labor constituencies might well consider that the economic losses in our Nation's heartland will soon be felt in your own districts as well.

We must have an adequate farm bill—one that will maintain and create real, productive jobs all across the spectrum of this Nation's interdependent industrial complex.

An inadequate one will result in more of the same problems that already plague America—worse unemployment and the need to create more Government-assisted jobs to take up the slack in yet another cycle of unemployment. It is an unemployment cycle which this Congress has in its power, right now, to stop before it spreads any further.

It is our responsibility, as representatives of all Americans, to see to it, here, that the target and loan prices of the bill we send to the White House are adequate to the real needs of the farmer and the Nation's farm economy. The $2.5 billion proposed in the bill as presently written is totally and unreasonably short of that great need.

I urge you to consider and support the amendments that will be offered to assure the American people that the farm economy, so vital to America's well-being, will recover from its present danger level and, thereafter, remain in a reasonable state of health.

Mr. WAMPLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN of Illinois. Mr. Chairman, earlier I voted against the rule governing the debate and floor consideration of this legislation. The farm bill and the food stamp bill should not be married as one bill. However since my position did not prevail, Mr. Chairman, I rise to express my misgivings about the wisdom of the food stamp portion of the legislation now under consideration. Once again we see legislation that proposes to reform, but actually just conceals a problem whose roots remain untouched. H.R. 7940 which will be considered as an amendment in the nature of a substitute to title VII of the Agricultural Act of 1977 (H.R. 7171) continues down the path away from the original intent of the Food Stamp Act of 1964, and can only help to further erode public confidence in the program. The challenge for meaningful reform is a difficult one, but difficult challenges demand to be confronted forthrightly, and not in a fractional, piecemeal manner.

As originally planned, food stamps would help to guarantee a nutritionally adequate diet for the Nation's truly needy. In addition, the program would bolster the agricultural sector of our economy. Today, however, we find virtually no gross income ceiling determining eligibility. We find a host of exemptions and deductions allowing recipients extensive ownership of valuable assets. We find college students—many, children of wealthy parents, and strikers eligible. We find a situation today where 1 out of every 4 Americans are potentially eligible. We live in a nation whose standard of living is unsurpassed in the history of the world. This is undeniable, and we can be proud of that fact. Yet current legislation would seemingly indicate that one-fourth of our population may somehow be unavoidably undernourished!

How have we come to this point? Though spoken concerning a different matter, I believe the recent words of President Carter are most pertinent here.

There are many things in life that are not fair.

He is quoted as recently stating,

But I don't believe that the federal government should take action to try to make these opportunities exactly equal.

I believe that the Government is responsible for insuring the climate in which the individual may freely pursue his or her own welfare. It is not the Government's responsibility to eliminate all the hardships and inequities of life.

Does H.R. 7940 reform? This legislation allows households with incomes of more than 150 percent of the poverty level to qualify. This legislation sets no limit to the value of a recipient's home and lot, furniture and appliances, and for all practical purposes—automobiles. Approximately 300,000 individuals with incomes above the poverty line are expected to add to the burgeoning list of recipients. To the question, "Does H.R. 7940 reform?", a reasonable man would have to declare emphatically, "No."

Since 1969 food stamp costs have increased by 2,300 percent. Does H.R. 7940 even begin to stem this unwarranted escalation? No. Elimination of the purchase requirement will guarantee substantial increases in cost outlays. Assuming that the participation rate increases by only 10 to 20 percent over a 4-year period, costs will increase by at least $600 million—fiscal year 1978. Somewhat more realistically, should the participation rate increase to that of the AFDC program, that is, 93 percent, cost increases will total around $2 billion.

In addition, the elimination of the purchase requirement could cause a drop in farm income by as much as $1.4 billion. This represents a further departure from the original intent of food stamp legislation and is indicative of the piecemeal approach; an approach which takes a fractured view of its actions, unmindful of the full effects of its proposals.

Of further concern to me are cost increases due to fraud. H.R. 7940 leaves glaring gaps in this regard; a glare sure to catch the eye of those who so willingly will take advantage of this new opportunity.

Specifically, I am concerned about certification procedures and the basis by which eligibility and benefits are computed.

The major source of fraud in the food stamp program is, I believe, the misuse of certification procedures. H.R. 7940 will only add to the problem because its certification procedures are so complex as to make them ripe for abuse. On the other hand such complexities perhaps serve a useful function—they help to conceal significant liberalizations. For example, section 11(d)(2) of the bill seemingly allows the entire process to be conducted by mail or phone; while section 11(d)(7) allows any recipient or applicant to be represented by proxy during certification, issuance and redemption. This will serve only to breed a whole new host of phantom recipients.

Another area which has led to the intolerable error rate of 48 percent in the food stamp program has been the income accounting system used to determine eligibility and benefit levels. Under this system a recipient "guesstimates" what his future income will be—an open door for conjecture that can be purposefully fraudulent. H.R. 7940 does nothing to correct this. That currently 28 per-

cent of the money distributed—over $1 billion—is done so in error, stands as marked testimony to the injudicious nature of this approach.

As bold and forthright reform, reform that restores integrity and a measure of public confidence in the program, H.R. 7940 cannot be so classified. Rather, like a sand dune, this legislation has been shaped more by influences than purposes. Mr. Chairman, I urge opposition to this measure and support for legislation which will reduce fraud and institute true reform of the program.

Mr. WAMPLER. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Chairman, I am a cosponsor of this general farm bill. I congratulate the chairman of the full committee, the gentleman from Washington (Mr. FOLEY); and the ranking minority member, the gentleman from Virginia (Mr. WAMPLER), for putting together the best bill possible under the circumstances.

There are three titles of the bill, which I had the pleasure of working on, and which I would like to discuss, as well as two amendments.

First is title VI on cotton. I served as the ranking minority member on that subcommittee. I want to compliment the chairman of the subcommittee, the gentleman from Mississippi (Mr. BOWEN) for coming forth with this title to this bill which brings all facets of the industry together in agreement, from the producer to the user. It is now a farm program that is based completely on the market. That is really the way all commodities ought to be, and I think this serves as an excellent guide, hopefully, for the future of all agricultural commodities.

Second, I would like to comment on title VII, the rice provision. I was privileged to author that provision of this bill. We feel that this is the best we can possibly do with rice. It continues the program in effect now, which is a significant change from the old Rice Act, for 4 more years. It adjusts the payment limitation and the formula for target price and loan rate increases to be like other commodities. It goes as far as can be done to bring rice in line with other commodities. It is a program everybody can live with for years to come.

Third, I point to section 905 of title IX, which I was privileged to co-author with the gentleman from Tennessee (Mr. JONES). This section of this bill goes a long way to bringing about a grain storage program for the Nation. For the first time it now makes it possible for farmers to know exactly what terms they are going to be able to get from the Federal Government for loan assistance to build storage facilities. We extend the program for the first time to wet storage which will save energy. In addition, we actually extend it for the first time to the remodeling of existing storage facilities. This section is a very meaningful contribution to helping farmers survive the boom-bust market cycles and makes possible an on-the-farm grain storage for a national reserve.

I would also like to mention two amendments, both of which I cosponsor. The first is an amendment to be sponsored by the gentleman from Mississippi (Mr. BOWEN) which I cosponsored in subcommittee and will on the floor. It provides for a new allotment program for cotton. It should be supported by all Members. It makes the allotment for cotton based on actual plantings and not an artificial configuration determined in Washington. It also brings cotton allotments in line with the other commodities.

The second amendment I also cosponsor is the de la Garza amendment on sugar. This amendment must be passed to save the sugar industry, which extends over many, many States in the form of beet production and sugar production. If something is not done in this bill, nothing will be done in time to help sugar producers in this Nation. With 45 percent of our sugar coming in from overseas, we cannot afford to have that grow any greater, or we will surely see our consumers paying greater prices for sugar, and we will surely see a valuable segment of farm production in this country go out of existence. I strongly urge support of those amendments.

Mr. FOLEY. Mr. Chairman, I yield 1 minute and a half to the gentleman from New York (Mr. MCHUGH).

Mr. MCHUGH. Mr. Chairman, I would first like to commend the distinguished chairman of the Agriculture Committee, Mr. FOLEY, on the fine work that he has done in guiding these bills through our committee. As with most legislation, the omnibus farm and food stamp bills represent attempts to balance a number of conflicting interests. Many of the issues involved are both complex and controversial. However, with the cooperation of the distinguished ranking minority member, Mr. WAMPLER, and the other members of the committee, Chairman FOLEY was able to produce bills that represent a reasonable compromise among divergent points of view. On the whole, I believe that the legislation is constructive and worthy of support by the entire House.

This legislation would substantially reform the food stamp program. Although allegations of fraud have often been grossly overstated, the current program is nonetheless in need of revision. Like many Federal programs, it is much too complex and inefficient in its administration. Excessive redtape has inevitably led to high error rates, with benefits sometimes being paid to people who are not eligible. By the same token, complexity and the purchase requirement have often restricted access to the program for those very people in our communities who are most in need.

On balance, the committee bill addresses these problems in a responsible fashion and therefore merits our support. The bill would streamline the program by substituting a standard deduction for most of the itemized deductions now available under the current program. It is the computation of those deductions that result in substantial errors.

At the same time, the bill would retain a few itemized deductions to assure equity and encourage employment. The deductions retained include one to cover work related expenses, a child-care deduction and an excess shelter deduction.

The committee bill also seeks to improve access to the program for the neediest of our people by eliminating the purchase requirement. This would be a fundamental change in the program, and one which the administration considers the centerpiece of its reform proposal. The testimony before our committee established beyond doubt that many people with incomes well below the poverty line cannot participate in this program because they do not have the cash to purchase their stamps. It is a symptom of their poverty. By eliminating the purchase requirement, our bill strives to open up the program to the people, while restricting benefits to those who are less in need.

And let there be no doubt that this bill is restrictive in many ways. Some will argue that it is too restrictive. The committee staff has estimated that 1.5 million people who are presently receiving food stamps would be rendered ineligible if the bill becomes law. In addition, over 1 million households would have their benefits reduced by more than $6 per month.

The bill would lower the maximum net income possible for eligibility from the current level of $6,804 for a family of four to the poverty line figure of $5,850. All households with net income above the poverty line would be eliminated.

The bill would set the gross income limit for a nonworking family of four at $6,570, and for a working family of four at $8,212. If the household claims the maximum child-care deduction, the upper limit of income allowable would be $9,112.

The bill would eliminate automatic eligibility under the program for those receiving public assistance or supplemental security income benefits.

The bill would tighten the work registration provisions by requiring active job seeking, and it would impose penalties on those who voluntarily leave employment.

The bill would restrict student participation by requiring students to register for and accept employment. The current requirement that they receive more than half of their support from their parents—who must also meet the eligibility standards—is continued.

The bill would tighten the fraud provisions by requiring disqualification from the program after a finding of fraud. The disqualification must be at least 3 months if the fraud is administratively determined, and from 6 months to 2 years if determined by a court of law.

The bill would tighten the assets test, counting as an asset, for example, the value of any automobile to the extent that its market value exceeds $4,500.

In short, the committee has produced a bill which would substantially restrict the program. It is in many ways a conservative bill. In my view, however, it represents a fair balance between com-

peting interests. It would simplify a cumbersome program; it would afford more access to those most in need; and it would restrict or eliminate benefits to those who have less need or have been the subject of legitimate criticism.

There is, however, one major deficiency in the food stamp provisions which must be corrected to maintain equity in the program. It relates to the excess shelter deduction which the committee has proposed, and, more specifically, to the fact that the cap on this deduction is not indexed to the cost of living.

Under this bill, every household applying for benefits may subtract from gross income a standard deduction of $60 per month. As previously mentioned, a household may under certain conditions also take a work related deduction, a child care deduction, and an excess shelter deduction. The excess shelter deduction can be claimed only if a household's actual costs exceed 50 percent of its income after deduction of the child care, work related, and standard deduction. In no event may the shelter deduction exceed $75 per month.

Under this bill the excess shelter deduction is considerably more limited than under the current program. At the present time, a household may deduct all of its shelter costs which exceed 30 percent of its net income. Under the current program there is no cap on the deduction. All actual costs for shelter over 30 percent of net income may be deducted.

It is the $75 cap on the shelter deduction that is a serious problem. While the new $75 cap for the first year may be a reasonable restriction, this cap should be adjusted thereafter to keep pace with actual increases in shelter costs. If this is not done, and shelter costs increase as they have in the recent past, recipients entitled to the shelter deduction will find their benefits eroded. The committee staff estimates the loss of benefits at approximately $60 million over the 4-year life of the program.

The committee bill does provide for indexing the standard deduction. This was done to preserve equity, and the same justification can be made for indexing the cap on shelter. The shelter deduction is clearly the most important deduction under the existing program, with 72 percent of all participants now claiming some shelter costs.

In order to avoid a significant loss of benefits to those claiming shelter costs under the new program, I will offer an amendment (on behalf of myself, Mr. JEFFORDS, and others) to tie the cap on the shelter deduction to actual increases that may occur in the shelter, fuel and utilities components of the Consumer Price Index. This would cost nothing during the first year of the program, and its cost over the life of the program would represent no increase over the original administration proposal. I hope that you will support this amendment.

The farm bill provisions, like those on food stamps, are generally well reasoned and balanced. There are, however, two matters which I would like to address briefly.

The first relates to title 13 which deals with agricultural research. There is a need for additional funding for agricultural research, and this need is appropriately addressed in title 13. I strongly support this title in its fundamental purpose. However, I disagree with section 1320, which would establish a new program of grants-in-aid for construction and expansion of schools of veterinary medicine.

This section is opposed by the Secretary of Agriculture, the Secretary of Health, Education, and Welfare, and the Office of Management and Budget. They maintain, quite properly, that authority for financing of such construction is currently assigned to HEW, not Agriculture, under the health manpower provisions of the Public Health Service Act.

Moreover, jurisdiction in the House has always been exercised by the Interstate and Foreign Commerce Committee. The chairman of that committee, Mr. Staggers, has properly complained that section 1320 is an infringement on his committee's jurisdiction and a duplication of his committee's work.

I believe these objections are valid. The Agriculture Committee has authority over agricultural research programs, which is the fundamental thrust of title 13. The construction or expansion of veterinary schools, however, is an entirely different matter. It is not now, and never has been, within the purview of this committee.

With regard to the merits of section 1320, there was no factual information presented to the Agriculture Committee, or any of its subcommittees, to support new funding for veterinary schools. In fact, representatives testifying on behalf of both the Association of American Veterinary Colleges and the American Veterinary Medical Association opposed new funding at this time. As they pointed out, the data on manpower needs is not now very complete and a study is being undertaken by the latter association to determine these needs more accurately. Both groups believe it would be premature to fund new construction or expansion until that study is completed.

The hard fact is that some States do not now have a school of veterinary medicine. They would like to have one. This may be understandable from their point of view, patricularly if the Federal Government will help them pay for it, but it is no justification for Congress to provide the funds without a clear showing that new construction will meet the need. No such showing has been made.

Mr. Chairman, I will therefore be offering an amendment to strike section 1320. If and when a showing can be made that there is need for additional money for construction, I will be happy to support it.

Finally, Mr. Chairman, I would like to comment on the need to create an International Emergency Food Reserve.

This is a matter the committee did not consider, but which is dealt with in the Senate bill. I had intended to offer an amendment on the House floor to incorporate the Senate provisions, but I understand it would be subject to a point of order. I am hopeful, therefore, that the House conferees will accept the Senate provisions when the legislation goes to conference.

There are several reasons why the United States should act now to establish an international emergency food reserve. First, maintaining such reserves would assure our capacity to respond speedily to disasters and other food emergency situations. Relatively small grain reserves could be sufficient for meeting food emergency needs resulting from droughts, floods, earthquakes, and other natural disasters, as well as helping to cover unusually large food production shortfalls in the developing countries. All or most of the food drawn to meet these pressing needs could be distributed through existing Public Law 480 channels so that the only real additional costs of such a reserve would be the costs of storing modest amounts of food.

Second, even small reserves could be of significant help in providing adequate supplies for the humanitarian and developmental purposes of Public Law 480 in times of relatively tight supplies. In 1974, for example, U.S. food aid to the famine stricken Sahel region was actually held up until revised U.S. crop forecasts became available. Yet, such aid, mostly in the form of title I concessional sales, represented only a small fraction of American commercial exports for dollars that year. This would not have happened if an emergency food reserve had been in place, and much suffering could have been avoided. Surely our Nation, which enjoys such abundance, can commit itself to setting aside minimal amounts of food for meeting urgent human needs.

Third, it is important that the United States act now to create a reserve for emergencies because food stocks are readily available at very moderate prices. Costs to the Government could be minimized by acquiring stocks now, both through defaults on nonrecourse commodity loans and through market purchases if necessary. Timely purchases of several million tons of wheat, for example, could also have a mild but beneficial effect on the prices received by producers.

As I previously mentioned, the Senate has approved a reserve plan which includes a provision for an international emergency food reserve. This provision authorizes the President to enter into negotiations with other countries with a view toward establishing an international emergency food reserve. The Secretary of Agriculture would be given authority to acquire reserves of at least 2 million tons of food as an indication of our commitment to the establishment of an international system of nationally held food reserves. Pursuant to the completion of an international agreement, this reserve could be released only to meet emergency needs or to alleviate severe crop shortfalls in developing countries.

I sincerely hope that our conferees will readily agree to the Senate provisions in this area of vital importance.

In conclusion, Mr. Chairman, I would again like to express my appreciation to Mr. FOLEY and the other members of the

Agriculture Committee for putting together a piece of legislation which, on balance, is constructive. With the addition of the amendments I have referred to, I believe that this bill is worthy of the strong support of this House.

Mr. WAMPLER. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, I thank the gentleman.

Mr. Chairman, there are many important aspects of this piece of legislation that we have before us, but the thing that concerns me is the food stamp program, particularly that decision that has eliminated all references to the nutritional content of food that people buy under the food stamp program.

I just want to make mention of the fact that at the appropriate time I intend to raise this nutritional issue in the form of an amendment to require that all food stamp purchases from now on be of only nutritional food. It seems to me it is important that we center on this original concept of the food stamp program to insure that the food stamp customer is purchasing items constituting a nutritional diet.

By wiping out language referring to nutrition in this bill I think we have failed to recognize one of the reasons for developing this program in the past, and we should now go back to the original concept of providing nutrition. That is what my amendment would do.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Chairman, as a freshman Member I wish to thank the chairman of the committee, the gentleman from Washington (Mr. FOLEY), and the members of the committee for their patience and understanding of my many questions during the hearings and the markup on this legislation.

As a nonfarmer, I feel that it has been one of the best educational processes that I have participated in. Where before I had very little knowledge and understanding of many of the intricacies and details of the farm program, I have now a greater knowledge and understanding.

Although the farm bill, including the food stamp portion, is not perfect and does not contain some of the details and ideas that I would like to see included and although it does contain details that I do not agree with, overall it is a better law for the agricultural producer and the consumer than we have at present.

This bill was hammered out under the able leadership of our astute committee chairman, with meaningful and constructive input from all members, including the minority, with whom on occasion I agreed.

There is no question in my mind that each member consistently worked and persevered in the ideas he or she believed to be in the best interests of the people and the agricultural producers.

Again, Mr. Chairman, I wish to commend the chairman of the committee, the gentleman from Washington (Mr. FOLEY), the gentleman from Texas (Mr. POAGE), the ranking minority member, the gentleman from Virginia (Mr. WAMPLER), and the committee staff for their patience and understanding. The education I received was better than anything I have gotten from any university course.

Mr. WAMPLER. Mr. Chairman, I yield my remaining time to the distinguished gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Chairman, let me say that in my opinion this bill is totally inadequate for the agricultural producers of this country. I say that in all sincerity when I look at what we are doing in the wheat section of this bill.

There is nothing in the wheat section of this bill to help those wheat producers to control or curb their production and to get this surplus from which we are presently suffering in a manageable situation, except to set a price that guarantees that if they continue to produce wheat, they are going to go broke. I say that this Congress can do better than that.

We are in a surplus situation in wheat because in 1974 we had no reserves of wheat in this country. Our American farm producers were asked to produce greater quantities of wheat. For what purpose? To insure that our consumers would have an adequate source of product and to insure that our foreign buyers, when they come to us for purchases, would be certain that we would be a constant source of supply.

Our American farmers rose to that occasion, and ultimately after that time we found that Russia and Canada, two of the largest wheat-growing nations in the world, also had their largest wheat crops on record.

So we find ourselves with a surplus of wheat on hand, and we are offering our American farmers a loss position, a guarantee that if they continue to produce wheat, they are going to go broke. That is the answer that the Government of this country and the taxpayers of this country are giving to the American farmer.

Let me say as well that there are other inadequacies in this bill. It is extremely essential for the sugar industry of this country to be included in this piece of legislation, and I would hope that amendments are offered and adopted to make sure they are included.

Let me say that is essential because unless something is done, our domestic sugar industry, and particularly the beet sugar industry, is going to go down the tube, and when it does, those who are concerned about the price to the American consumer are going to find that we will be totally reliant on foreign production.

Mr. Chairman, it is strange that when we try to sell in the foreign market, we sell at less than the cost of production; but when we go back and buy, we pay at their price. If we allow ourselves and our consumers to be subjected to having to purchase in the foreign market, we are going to find those consumers paying dearly for commodities such as sugar, just as we find that we are paying dearly for a commodity like oil from the OPEC nations.

Before we are through with this bill in our discussion of these amendments, Mr. Chairman, I think we can come up with something a whole lot better so as to assure our American farmers, our agricultural producers, that the Congress of this country and the consumers of this country stand behind them in the agricultural endeavor.

Mr. FOLEY. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. AMMERMAN).

Mr. AMMERMAN. Mr. Chairman, I rise in support of H.R. 7171, the Agricultural Act of 1977, of which I am a cosponsor. I am not in favor of every provision of this bill. With so large and complex a piece of legislation, developed over many arduous weeks, it is unlikely that any of us on the Committee on Agriculture is in favor of every provision of H.R. 7171. It does, however, provide for a wide variety of the needs of both farmer and consumer, as well as agricultural researchers, extension agents, and other participants in the complex process that is American agriculture. Moreover, this bill seeks to attain a delicate balance among a number of agricultural needs and interests which are inevitably conflicting.

Nowhere was that balance more difficult to reach, and the conflicts among competing interests and needs more obvious, than in the process of determining the appropriate price support levels for the various farm commodity programs. I am sure all of us on the committee would have liked to have been able to provide American farmers more in the way of income protection. But we must establish clearly that the farm program is not welfare. We cannot set target prices and loan rates simply on the basis of what would provide maximum income protection to the farmer. In my judgment, that is not what American farmers want—it certainly is not what the farmers in my home State of Pennsylvania have told me they want. And, furthermore, such an approach is not in the larger, long-term interest of American agriculture.

If farmers need greater income protection to survive—and there is certainly a good case that many of them do—let us not attempt to provide it in the form of target prices and loan rates so high that they guarantee a continuation of the boom and bust cycle of overproduction that is once again rising up to haunt us while at the same time undermining our ability to make the agricultural exports, which are our principal hope, apart from set-asides, of avoiding those surpluses. Such a course would greatly compound the difficulties of American agriculture in three respects.

It is clear that target prices can be an important determinant of farmers' decisions on levels of production. This will be even more true under H.R. 7171 than in the past, with farm allotments being set in accordance with recent production experience rather than historical cropping

patterns. I am concerned that higher target prices and loan rates than those established in H.R. 7171 could stimulate overproduction and contribute even greater surpluses to our already large and growing carryovers of wheat and feed grains.

Excessive support prices would, moreover, reduce our ability to dispose of crop surpluses at the same time they were contributing to those surpluses. With grain relatively plentiful on the world market, and grain exports currently well below the record levels of a few years ago, we simply cannot afford to push our prices above levels which will be competitive in international trade.

Furthermore, the combination of overproduction and depressed exports would very likely create a third condition which has increasingly become anathema to many American farmers. That is the specter of large and growing Government-held surpluses. I do not believe either farmers or consumers want a return to the situation prevalent in the 1950's and 1960's when big Government commodity holdings not only required large outlays but also acted as a depressant on agricultural product markets.

I would emphasize that, while H.R. 7171 will not provide all of the income assistance to the American farmer that most of us would prefer, the amount of income protection it does contain is nevertheless substantial. The Congressional Budget Office has estimated that, as compared with current policy set under the Agriculture and Consumer Protection Act of 1973, H.R. 7171 would add an annual average of $1 billion more to the incomes of grain and cotton producers. In this respect, as with the price supports themselves, our bill strikes a prudent balance between the administration's proposal, which would add only $300 million per year to farm income, and S. 275, which would add some $1.9 billion annually to farmers' income over that provided in the 1973 statute.

As we look at the differences between the House and Senate versions of this legislation, moreover, it is interesting to note that the wheat farmer would receive almost as much assistance under H.R. 7171 as he would under S. 275. The big increase in support payments under the Senate bill would essentially all go to producers of feed grains, not the wheat growers. In fact, the Congressional Budget Office estimates that while total Commodity Credit Corporation outlays for deficiency and disaster payments and net loans to wheat producers would be somewhat higher over the fiscal year 1978–1982 period under the Senate version—$6.9 billion against $6.5 billion, direct deficiency and disaster payments to wheat farmers would actually be higher under H.R. 7171—$5.1 billion against $4.8 billion. In striking contrast, S. 275 would provide almost $5 billion more of both total outlays and direct payments over this same period to feed grain producers than would H.R. 7171.

Thus I would suggest that my colleagues from wheat producing States examine the issue carefully before assuming that their areas are better served by the Senate bill. That is so, not only on this count but also on the basis that the higher feed grain prices will push up costs to the livestock producers who are also a key element of the agricultural community in many wheat areas.

Some of these same dilemmas, including the effects or rising feed grain prices, can be seen in an agricultural sector that is of particular interest to both my district and the State of Pennsylvania as a whole. That is the dairy industry. Many of the farmers I have spoken to in Pennsylvania have expressed concern not only that higher feed grain prices would drive up the cost of dairy operations but also that too large an increase in the dairy price support level will stimulate too much milk production and cause a glut on the market.

As you know, H.R. 7171 makes two major changes in dairy price support programs. It would increase the minimum price support level for milk to 80 percent of parity, and it would require quarterly review and semiannual adjustment of this price support level by the Secretary of Agriculture.

This outcome was a compromise between those who wanted even higher support levels—90 percent or more of parity—and more frequent required adjustment, and those who preferred the current system with support prices between 75 and 90 percent of parity that are annually adjusted.

We have sought to meet the needs and concerns of the primary milk producing areas, which have been beset by drought and ever-rising feed prices, without raising the support price to levels which will stimulate overproduction and continue the disturbing cycle of abrupt upward and downward shifts in production which has been characteristic of the milk industry in recent years.

Many of those I talk to in Pennsylvania and elsewhere are concerned about the possibility that support prices at 83 percent of parity, which were established by Secretary Bergland this Spring, may well cause production to grow, at least in the East, and Commodity Credit Corporations stocks of milk products to continue to increase. I can only hope that in establishing the 80 percent floor the committee has not exceeded that delicate but inherently elusive balance which we have sought in all the commodity programs.

At this point I would like to dwell briefly upon a provision of H.R. 7171 which applies to many of the farm price support programs. That is title I, which establishes limitations on payments to producers of wheat, feed grains and upland cotton.

Title I would raise the current $20,000 payment limitation to $35,000 in fiscal year 1978. It would also permit 10 percent increases in the limitation each year thereafter, which would result in the payment limitation rising to $46,600 for the fiscal year 1981 crop year.

Mr. Chairman, I believe that increases of that magnitude—more than 130 percent over a 5-year period—are far larger than can be justified even allowing for the effects of inflation. A number of my colleagues on the Agriculture Committee have estimated that a payment of $46,600 would be sufficient to cover the production of around 5,000 acres of corn or 2,400 acres of wheat. Holdings of that size are much larger than is typical of the small and medium-sized family farmer which the farm income support programs are designed to help.

I do not believe it is fair to the taxpayer to permit payments of the size contemplated by title I. I voted in favor of an amendment to retain the $20,000 payment limitation in committee. I shall do so on the floor as well.

No discussion of our proposed farm bill would be complete without some mention of the Carter administration's position on this legislation. We can certainly not be expected to adopt obediently all proposals put forth by the new Democratic President. Indeed, this is proving to be one of the most independent Congresses serving with a President of the same party in this century.

I believe it is incumbent on us, however, to make a reasonable effort to reach agreement with the administration on the broad lines of agricultural policy. The President has already raised his proposed target prices and loan rates once in an attempt at compromise. And the House bill exceeds even those revised levels. I expect that H.R. 7171, which the Congressional Budget Office estimates will require an annual average of almost $4 billion of Commodity Credit Corporation outlays for price support and related programs over the fiscal year 1978–1982 period, is already at the upper reaches of what is fiscally acceptable to the President. I believe it would not only be a departure from fiscal responsibility but also risk a veto to push the costs of these programs to higher levels.

And let me add that I do not think President Carter is a man who will shrink from every fiscal confrontation posed by this Congress. He knows full well that if he does, the United States will be no closer to a balanced budget in 1981 than it is now. I believe not only that he will hold our feet to the fiscal fires but also that that is the responsible course.

Mr. Chairman, having expressed my general view in support of this legislation, permit me to turn to one part of H.R. 7171 which is of especial interest both to me and to the 23d District of Pennsylvania. That is title XIII—the National Agricultural Research, Extension, and Teaching Policy Act of 1977.

Over the past 2 years both the Agriculture and the Science and Technology Committees have devoted a concerted effort to examining the adequacy of management, coordination, and funding of the Nation's diverse and farflung agricultural research, extension, and teaching activities. Our committees have found the central conclusion of a number of studies of this area to be the need for a national agricultural research policy which would effectively coordinate and integrate the many and diverse activities ongoing at the Federal and State level and in both public and private universities and other institutions.

Our committees have also found, moreover, that the level of effort in agricultural research within the U.S. Department of Agriculture, which once was its most important function, has shrunk almost to insignificant levels in comparison with its other functions. In addition, funding for agricultural research has fallen over the last four decades from almost 40 percent of the total Federal research and development effort to under 2 percent of it.

Our committee believes that these trends and priorities must be reversed and research in the food and agricultural sciences must be treated as an equal partner with the other sciences in the determination of the Nation's research and development policies. It is also essential to place renewed emphasis on the conduct of agricultural research and education as important and distinct missions of the U.S. Department of Agriculture, as well as to establish a mechanism for identifying the Nation's highest priorities for agricultural research.

An essential role in this process is played by the Extension Service and the State cooperative extension services, which are responsible under the Smith-Lever Act for disseminating and encouraging the use of agricultural research results. Both of our two committees have found that current funding levels for this vital activity are inadequate for it to meet the needs of agricultural producers and consumers alike.

Title XIII of H.R. 7171 is designed to meet the many and varied needs of this sector. It gives the Secretary of Agriculture new authority to coordinate these activities, with the U.S. Department of Agriculture to be the lead Federal agency for the food and agricultural services. The Secretary would be assisted by two statutory activity groups—a Joint Council on Food and Agricultural Services to represent the professionals working in this field, and a National Agricultural Research, Extension, and Teaching Policy Advisory Board to represent the users of agricultural research.

The bill will also provide a major increase in funding for these activities. The fund authorization for research in the food and agricultural sciences would rise from $505 million in fiscal year 1978 to $780 million in fiscal year 1982. Funding for work at State agricultural experiment stations would increase from $120 million to $220 million over this same period. The bill would also establish a program of competitive research grants, which would rise from $25 million to $50 million by fiscal year 1982. In addition, title XIII would authorize an expansion of funding for the extension programs of the Department of Agriculture from $260 million to $350 million over the fiscal year 1978–82 period.

In summary, I believe title XIII goes a long way toward providing the improved management and greater emphasis that our agricultural research and education community needs. I have dealt at length with this section of H.R. 7171, but the bill as a whole is simply too large and complex for me to discuss all of its many provisions.

The bill certainly has weak points as well as strong points. But, on balance, I have concluded that H.R. 7171 will be helpful to Americans in general and Pennsylvanians in particular. I urge my colleagues to support H.R. 7171 as setting out a responsible and balanced farm and food program for the Nation over the next 4 years.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. Mr. Chairman, I thank the gentleman from Washington (Mr. FOLEY) for yielding.

I, too, join the others in complimenting the chairman, the gentleman from Washington (Mr. FOLEY), and the ranking minority member, the gentleman from Virginia (Mr. WAMPLER), for their long-enduring patience and efforts, as a result of which they have brought the bill to this point.

I rise only to speak to a very specialized point on the bill rather than to its entire content.

Mr. Chairman, I would alert the House that I do intend to offer a payment limitation on sugar, and at the same time that I alert the Members with respect to that amendment, I want to say that in no way does the offering of this amendment indicate that I disagree with the Comptroller General. The Comptroller General, I believe, is correct that the administration has no basis, in point of law, for offering this 2-cent payment; and I will be offering that amendment at the appropriate time.

Second, Mr. Chairman, I would like to say that I wish that we could do more in this bill providing for agriculture in some other areas such as by developing overseas purchasing and the overseas marketing of American grain, for without that, there is only one alternative, and no one really wants to go to that alternative. That is the old program which we had, and that has been repudiated in the past.

Again, Mr. Chairman, I commend the chairman for his efforts with respect to this bill. I think it has some inadequacies, and I call attention particularly to what is coming in the area of sugar.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the gentleman from Montana (Mr. BAUCUS).

Mr. BAUCUS. Mr. Chairman, 80 years ago, William Jennings Bryan voiced an apocalyptic vision of the importance of agriculture. He said:

> Burn down your cities and leave our farms and your cities will spring up again as if by magic; but destroy our farms, and the grass will grow in the streets of every city in the country.

Bryan's vision is as true today as it was in 1896. Today, those who would destroy our farms disguise themselves as consumer advocates, budget balancers, and proponents of cheap food. The truth is that their program would lead to higher food prices, fewer family farms, more unemployment, and greater Federal expenditures.

H.R. 7171 is known as the farm bill, but it should really be called the food bill. It is the most important piece of legislation relating to food since 1973, and will be in force until 1981. Food is the essence of life and is the fundamental concern of every person in this country and around the world.

Today's food bill, with its unrealistically low target price for wheat, is almost as insulting to the American consumer as it is to the American farmer. It reflects the views of an administration that cannot look beyond a simplistic and erroneous plan to balance the budget at the expense of food production. Everyone wants to balance the budget, but H.R. 7171 is certainly not the way to do it. All this bill will balance is the bank accounts of the conglomerates which will gain control of many family farms if it passes in its present form. I, therefore, will be cosponsoring an amendment to raise target prices for wheat.

Besides producing America's food, our family farmers consume a major portion of our industrial output. Today's farm requires large quantities of chemicals, fuels, machinery, and vehicles. When farm income falls, the entire economy suffers. In 1973, farm income was $33.1 billion. When it fell to $26.1 billion in 1974, tractor sales fell from 197,000 to 174,000. Try to tell the tractor manufacturer who lost money and laid off workers that low price supports are good for the economy.

USDA studies indicate that the family farm is the most efficient production unit. Unfortunately, family farms are also the only production units in our economy with absolutely no control over the price of their product. General Motors could announce a price increase tomorrow and probably get away with it. How successful would a farmer be who announced that he was raising the price of his crop by 10 percent to cover increased costs?

The target prices and loan rates in H.R. 7171 are a tragic mistake. Montana wheat farmers spend over $3 to produce a bushel of wheat, even if they own all their land. Yet this bill tells them that they must accept $2.65 as their "cost of production."

This figure can only lead to the bankruptcy of farms and sales to conglomerates. As some farmers leave the farm and others cut purchases to a bare minimum, unemployment will grow. Fewer and larger farms will mean lower output and higher food prices. Unemployment payments, food stamp outlays, and welfare payments will increase. Cost of living escalators will boost Federal spending even further. This is not the way to balance the budget.

We are told that prices are too low because production is too high. Yet this bill would base allotments on current production. Rumors of this change have already encouraged those who can afford it to break up new land; 600,000 acres in Montana in the past 3 years alone. We are in the middle of a major drought, yet we are asked to encourage farmers to break up marginal land. These kind of Federal policies create problems; they do not solve them.

I am glad this bill would provide the Secretary of Agriculture with authority to declare a set-aside to combat overproduction. That authority, however, is meaningless unless it is used. We must have a set-aside for 1978 crops, and we must continue the policy of excluding from the set-aside those who summerfallow 55 percent of their land. The Federal Government which told farmers to plant fence-to-fence, but slapped an embargo on grain exports, has a responsibility to alleviate the situation which it has brought about.

Every dark cloud has a silver lining, and the monumental errors in this food bill do stand alongside some accomplishments. I was pleased to see my small farms bill and rural solar energy bill included in titles X and XIV respectively. Payment limitations of $35,000 are realistic, and inclusion of the Wheat and Wheat Foods Research and Nutrition Education Act is encouraging. Improvements and extension of the Wool Act will help keep the American wool industry healthy.

Section 904 is especially pleasing for me. It would automatically set the loan rate at parity, currently $5.08 for wheat, if the President suspends grain exports. I agree with the Agriculture Committee that if such a suspension is in the national interest, the entire Nation should pay for it. I hope the House will retain this provision.

This handful of minor accomplishments will not offset the injustice of piddling price supports. I cannot justify support for this food bill unless major changes are made in it. I will be working for these changes as we consider the bill.

Daniel Webster described the place of the farmer in society best when he said:

> When tillage begins, other arts follow. The farmers therefore are the founders of human civilization.

Consumers and farmers are natural allies, and I will not vote for a food bill that drives a wedge between them.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. Mr. Chairman, it is impossible in a very few moments to try to convey to this House the extent of the magnitude of the economic crisis that faces a good part of rural America today.

Over the Fourth of July I went back to my district and visited with a good many farmers. A number of farmers told me that the 1930s were easy compared to now.

Mr. Chairman, the legislation under consideration today, the Agricultural Act of 1977, will provide for a farm program through 1981. It will provide planning and direction for our production of food and fiber for that period of time. It will provide some assistance to a large segment of our population who are the producers of what we eat, a large part of what we wear, and who have given us in the recent past a balance of payments surplus on our world trade.

The fact is, however, this is an emergency bill.

It speaks to a very real crisis in this country. It is not exactly the bill that I would write if the members of the Agriculture Committee had given me their franchise to draft this legislation. It is a product of extensive hearings, long and laborous debate and markup sessions. The chairman, Mr. FOLEY, has, in his customary manner, gone out of his way to be fair and to produce a good bill.

The crisis is not a military crisis, and it is not a foreign relations crisis, although foreign relations are involved. It is not the result of a sweeping natural disaster, although the elements have contributed to the problem. It is a crisis of people. If America's farm families lose the battle they are fighting today, tomorrow America's urban families as well as the underfed nations of the world will be the victims. The abundance of cheap food and fiber we have enjoyed in this land of plenty will have gone the way of the farm families.

In this House we talk today of grain and cotton, of research and conservation, of size of harvest and price. These are all factors applied to one central player: the American farm family.

The 13th Congressional District of Texas that I am honored to represent has been on the front page of several national publications during the past 6 months. There have been stories of drought and gale force winds that screamed down the great plains rolling fertile farmland into clouds of dust. These were followed by stories of dropping wheat prices, as a battered wheat crop came back from the hard winter. Then the economic impact all of this was having on those families and communities began to be seen as a hard reality. That is the crisis today. These are hard-working people, men and women who work 12 to 18 hours a day to earn a living. No minimum wage, no paid vacations, no air-conditioned offices.

It is heartbreaking to see a family lose 20 years of work and love and sweat, but it is happening. It has happened this year on the largest scale in years. I need not repeat the USDA statistics, although they back what I am saying. So often statistics cause us to forget that we are dealing with people's lives. The Extension Service finds the cost of production in Texas for a farmer to grow a bushel of dry-land wheat is $3.87 and $4.10 to grow it on irrigated land. To sell their wheat this year they must accept from $1.85 to $1.95 per bushel.

If we are going to have a farm bill, it should help in hard times. If it is not going to help, we do not need it. Since the 1973 bill was passed, the Federal Government has not had to make any payments under the target price concept. There will be payments this year. There will be a lot of wheat, corn, and grain sorghum on loan. The Secretary of Agriculture is going to have to use every tool he has to help get us back on track. We will have to be innovative in our approach to export markets. We have an innovative Secretary of Agriculture and I feel confident in his concern for the family farm.

In many ways this is an innovative farm bill. It is more market oriented than ever before. I hope we have seen the last of planting to protect historic allotments. Our production will be geared to the needs of the country and the world. Provided for the Secretary are tools like the graze out program and the critical lands program through which he can effect production and the market. Each will also help preserve that most vital of all resources: the land. More encouragement for farmers to be able to decide when to sell their crops should help the consumer as well as the farmer. If it rounds off the sharp peaks and deep valleys, a more stable income should result to the farmer and more stable prices to the consumer.

Important funds committed by this program will be the amount of money earmarked for agricultural research. We must always be working to open those new doors, to better use the resources available.

I hope the food-for-peace program will become a more vital tool to help developing nations and create markets for American producers. The changes we have made in this provision should provide for less redtape and more food where it is needed. The horror stories of commodities rotting on the dock while famine grips a people must become history instead of current events.

I hope redtape and fraud which have scandalized the existing program, will be greatly diminished by the changes in the food stamp program. It tightens the eligibility requirements and will encourage people to seek jobs.

As this House considers the entire farm program, keep in mind we are talking about people, rural and urban. If we cannot help during the hard times, there is no need to help at all. Agriculture is in step with our modern world. It must be to feed it. The farmer must still do battle with the weather, insects, and a fast changing market. While farm income today is at the same level it was in 1970, other real income is up 24 percent. The people that produce the food and fiber for the world deserve a little better.

Farmers have been accused of "crying 'wolf'" too often. The truth is that the wolf comes to see the farmer to often. Agriculture is a basic economy. We have seen many changes in our national economy in the last 50 years, but agriculture is still basic. The farmer can no longer be self sufficient. Now he, too, feels the "energy crunch." The farmer is a consumer of manufactured articles and knows what inflation has done to the costs of the equipment and supplies that he must purchase to remain a producer. He alone seems to be helpless to do anything about his increased costs and now he is helpless when he must market his products.

We must give the farmer the kind of support he must have to stay in business because he is essential to the economic health of this country and to our very survival.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the distinguished gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, a series of important changes have occurred since Congress last evaluated comprehensive agricultural policy for this country. Our increased dependence on international trade has heightened our

concern about how our domestic policies will affect other nations, particularly developing nations. No longer can we assume that we are acting alone when we set down our own farm programs. In addition, adverse weather conditions and rapidly increasing costs of production have added to the difficult situation our farmers face today. The drought is seriously threatening farmers in more than 24 States. And the rising costs of machinery, fertilizers, energy, and land are driving thousands of farmers off their land.

The structure of agriculture has also changed. Farms have become fewer in number—now 2.8 million as compared with 5.4 million in 1950—larger in size, more specialized in the commodities they produce, more energy intensive and generate fewer jobs. As a consequence, since 1920, 40 million more people have migrated off the farm than have entered into farming. And nonfarm corporate involvement is on the rise. These trends, if they continue, at current rates, greatly endanger our family farms, rural communities and the economy as a whole.

Today we must consider the Agricultural Act of 1977, the omnibus bill which seeks to address all of the major issues affecting not only farmers and consumers in this country, but farmers and consumers throughout the world. I urge my colleagues to be cautious in your consideration of this complex bill, as well as the wide variety of amendments that will be offered.

In my view, H.R. 7171 offers a sound approach to most of the needs of our agricultural sector and it contains several innovative programs so that we can begin to look towards the concerns of the future. I would like to briefly mention a few provisions of the bill which I believe fall into these categories.

RURAL DEVELOPMENT AND CONSERVATION (TITLE X)

This section includes substantial new efforts concerning the conservation of our soil and water resources. Of particular importance are the provisions calling for an assessment of existing rural water resource programs and the establishment of a program of small farm research and extension by the Department of Agriculture.

FOOD STAMPS (TITLE XII)

Provisions to define income eligibility limitations, eliminate the purchase requirement, stimulate outreach, distribute nutritional information, and to alleviate the fraud and administrative errors demonstrate the Agriculture Committee's commitment to reforming the food stamp program.

AGRICULTURAL RESEARCH (TITLE XIII)

This section offers several new guidelines which will better integrate and coordinate food and agricultural research conducted at the Federal and State levels and in public and private colleges and universities. One provision that is noteworthy is that which will institute a system of competitive grants open to the whole research community, including land grant and nonland grant colleges as well as to the private sector. Title XIII, including the new emphasis placed on human nutrition, energy conservation, and small farming should go a long way in developing additional information and stimulating new ideas to meet today's food and agricultural needs.

AGRICULTURAL SOLAR ENERGY (TITLE XIV)

In light of President Carter's request for congressional action on energy conservation matters, this section is one of the most innovative sections in this year's farm bill. By promoting research and development of solar energy for agriculture, providing for the demonstration of solar energy projects on the farm, this title will encourage farmers to adopt and install solar powered systems, machinery, and production techniques as alternatives to other more energy intensive systems.

As is the case with most omnibus bills, there are areas which can be greatly improved upon. These include the following:

PAYMENT LIMITATIONS

I believe that it is in the best interests of consumers and the rural economy for agricultural production to remain in a widely dispersed system of small family farmers. Increasing corporate concentration in agricultural production will inevitably result in higher food prices and the channeling of new capital away from family farm operators and rural communities. There are several steps that must be taken to prevent the demise of family farming and private land ownership, most of them are not relevant to the bill we have before us. However, we can and must use every opportunity to protect the family farmer in America. For this reason, I am supporting an amendment to title I, the payment limitation section, to restrict non-farm corporations from receiving price supports and disaster payments. This amendment will begin to eliminate some of the competitive advantages now enjoyed by nonfarm corporations.

GRAIN RESERVES

I feel the farm bill does not go far enough in providing for a strong grain reserve program or in offering practical mechanisms to stabilize prices in the world market. Therefore, I am cosponsoring an amendment to institute a comprehensive grain reserve program which will secure our domestic supply, build an inventory to meet our foreign commitments, and alleviate world hunger.

AGRICULTURE RESEARCH

Although this section does contain many welcome provisions, there is one area which I feel has been overlooked—that is, water conservation. In light of recent weather changes, it is evident that water shortages will continue to threaten our agricultural community. It is, therefore, important that we begin to stress the need to conserve water. Although the extension service is already involved in educating farmers on various means for water conservation, I feel it is important for these efforts to be expanded. I will be offering an amendment to the extension education section of title XIII to include water conservation as a new area of concentration and to broaden its scope so as to include the development and dissemination of information to improve conservation methods and practices.

Mr. Chairman, there are many other provisions in this bill which may or may not go far enough in providing what is best for our farm community, our consumers and our Nation. I am certain that most of these will be debated and amended within the next 2 days. It is my hope that the result of the actions we pursue here will be a fair and forward-looking policy which will preserve the delicate balance between serving the needs of producers and consumers within this country and throughout the world.

Mr. FOLEY. Mr. Chairman, I yield one and a half minutes to the gentleman from Hawaii (Mr. AKAKA).

Mr. AKAKA. Mr. Chairman, as one of the cosponsors of H.R. 7171, I would like to express my support of this bill. The Agriculture Committee has worked very hard to put together a farm bill which is both fair to the farmer and the consumer. Some of the principal features of the bill include: Price supports for most farm crops, establishment of a loan program expected to result in a large on-farm grain reserve, expansion of agriculture research and extension service programs, continuation of the Public Law 480 Food for Peace program, and food stamp reform legislation.

The reforms that are contained in the food stamp section of the bill will bring more integrity into the program. The work requirements have been tightened and the penalties for fraud have been made harsher. Every attempt has been made by the committee to devise food stamp legislation which will allow only those who deserve and qualify for food stamps to receive them. With the elimination of the purchase requirement, the potential for fraud will be lessened, and a greater amount of the poorest of the poor will be able to enter the program.

This legislation will authorize a 4-year extension of the omnibus farm law which would otherwise expire at the end of the year. It brings about reforms which are vital to our agriculture community and to our Nation as a whole. I urge its adoption.

Mr. FOLEY. Mr. Chairman, may I inquire how much time we have remaining on this side?

The CHAIRMAN. The Chair will state that the gentleman from Washington has 4½ minutes remaining.

Mr. FOLEY. I thank the Chairman.

Mr. Chairman, I yield 1½ minutes to the distinguished gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I wish to commend the distinguished chairman of the committee for his effort in putting up this legislation.

Mr. Chairman, I rise in strong support of H.R. 7171 to point out some of the more significant features of the legislation before us to amend and extend the Food Stamp Act of 1964.

As the Resident Commissioner from Puerto Rico, I want to extend the appreciation, not only on my behalf, but of the people of Puerto Rico for the commendable work the House Committee on Agriculture has done in bringing this legislation to the floor, and in its thor-

ough review of the national food stamp program.

It is no secret to Members in this Chamber that Puerto Rico presently has one of the highest levels of food stamp participants, and that this program has helped Puerto Rico immensely through our most recent and severe recession in years.

Those of us who work for Puerto Rico wish that the economic upturn now becoming evident in parts of the United States would also immediately affect Puerto Rico, but whether that happens or not, the food stamp program will continue to benefit our local economy.

We prefer, of course, programs of development rather than welfare, or dependency. But the unshakeable fact remains that the simple reason that so many people in Puerto Rico participate in the food stamp program, as citizens of the United States, is that we have more poor citizens among our population, more families in need of an adequate nutritional diet, and more of a need to continue and improve this vital program.

As I have stated, the food stamp program has helped the island through the most recent recession.

And yet there are some common and persistent myths about our level of participation in the program. I would like to discuss them today. I shall be brief, since I know there are many important amendments to this legislation, and there will be some attempts to turn back the work that members of the House Agriculture Committee have done in bringing this bill to the floor today.

The legislation before us culminates more than 2½ years of arduous work by the Committee on Agriculture. I would be remiss if I did not thank the gentleman from New York (Mr. RICHMOND) for his subcommittee's hard work on this legislation, as well as the chairman, the gentleman from Washington (Mr. FOLEY) and the dedicated staff members, both majority and minority, who have worked long hours in bringing this bill to the House floor.

As the House report on this bill notes, the continuation of the food stamp program will extend a program that has brought basic measures of social justice, and access to an adequate diet, to millions of Americans from low-income families, both in the mainland and in Puerto Rico.

The food stamp program is not, as some contend, a basic "ripoff" of the American taxpayer. As the House committee report notes, it is a program conceived in justice, dedicated to helping those most in need, and one seen by those benefiting from it the most, the recipients of food stamps, as a means of obtaining adequate nutrition.

To countries abroad, it is a symbol of the fact that this country deeply cares about the less advantaged citizen in our midst and that, along with democratic ideals, our Nation is also concerned and caring for those who, for reasons not of their own, need some programs to provide themselves and their children with an adequate diet.

In the case of Puerto Rico, another reason for our high level of participation is that Puerto Ricans, while American citizens, still do not participate in welfare programs on an equal basis with the States. In particular, I mention the supplementary security income program which, while bringing benefits totaling $177 a month to mainland U.S. citizens who are blind, aged, and disabled, only provides a level of support to Puerto Ricans in an equal situation of $14 to $18 per month under the terms of the now superseded provisions in the mainland of aid to the disabled, the elderly, and the blind.

SSI benefits are viewed as additional income to food stamp participants. Not having SSI benefits at the mainland level in Puerto Rico creates more food stamp participants.

The food stamp program has helped not only our participating families but the general economy of Puerto Rico.

The turnover from commodity food distribution at an approximate level of $40 million to an islandwide food stamp program was authorized by Congress, and the word "cupones" overnight became a familiar one to Puerto Ricans, our Spanish word for food stamps.

It is a popular program, it is a sound one, and it is one we in Puerto Rico view as a vital ingredient to an island suffering the pains of a deep depression.

In particular, the committee's efforts to eliminate the purchase requirement will provide the "poorest of the poor" who may not now be participating in the program with the means to have access to the program previously denied them.

I also commend the committee for its thorough efforts to eliminate any fraud in the program, or abuses that may presently exist, while retaining the best provisions of the current legislation, and perfecting others.

The provision to allow States 75-percent grants, instead of the normal 50-percent administrative matching costs will enable States, as well as Puerto Rico, some program of rewards and penalties to improve program administration.

Additional reform objects such as those provisions to facilitate the participation of the deserving needy to get food stamps, to minimize the loss of benefits to current needy participants, are also commendable and I believe it fair to say that the committee's actions, as contained in the House bill as it was sent to the floor, should be supported by all Members of Congress interested in the welfare of their constituents.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the distinguished gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Chairman, I certainly do not represent a farm district. I have learned that on occasion a plant is planted in some of the backyards of Baltimore, but it is not for normal consumption. However, I rise in support of this legislation and I will support some of the strengthening amendments to be added to it, those aimed primarily to benefit small farmers. I do this because I am struck by the symbiotic relationship between those of us in urban centers and on farms. Our interdependency is clear, and we are going to have to work with one another. I am also struck by the fact that the farmers were clobbered with last winter's bad weather, and they are being clobbered now by a drought. I am impressed with the significant reforms, Mr. Chairman, that the Chairman and the members of the committee have made in terms of the food stamp proposal. I think these are excellent reforms, and I am wholeheartedly committed to them. I hope that I can urge the urban Members to support this bill and the strengthening amendments designed to aid small farmers.

Mr. Chairman, I rise in strong support of the Agriculture Committee's recommendations to reform the food stamp program.

The reforms which I am talking about are the commendable proposals, such as elimination of the purchase requirement, which will insure that our most needy citizens are able to participate in the program.

While the record of the Department of Agriculture in administering the program during the previous administration can most charitably be described as abysmal, the needed reforms to the food stamp program were not proposed, despite that administration's continual harping about food stamps. Instead, a number of myths were promulgated which masked the reality that the food stamp program is currently the only national program which can provide income supplements to all needy Americans—not only welfare recipients but also the working poor.

The myths included such fallacies as:

There is extensive fraud in the program. The fact is that the Department of Agriculture reported last year that the percentage of households caught committing fraud is eight-hundredths of 1 percent of the caseload.

A second myth is that millions of high income people participate in the food stamp program. In fact, the Department of Agriculture has found that 78 percent of the participants have incomes below the poverty level and 90 percent of participants had incomes below 125 percent of the poverty level. The Department further found that only 0.4 percent of households participating in the program had gross incomes of $1,000 or more a month.

Still another myth is that:

The food stamp program is subsidizing college students from wealthy families. Data collected by the Agriculture Committee, which is included in the report on this bill, rather effectively dispels this myth. The Agriculture Committee found that slightly more than 200,000 students were participating in the program. This represents 1.3 percent of the caseload. Many of those students work while they are attending school. The committee found that 52 percent of the households headed by students had earned income. In addition, the committee's data indicate that about 40 percent of the students who head food stamp households are age 25 or older, which hardly is the stereotype of the idle undergraduates from wealthy families who are ripping off food stamps. Although one can conclude from this data

that abuse of the program by students is quite limited, the committee has wisely taken steps in this bill to insure that participation of students is limited to the truly needy. The committee bill prohibits students from receiving benefits unless they are needy and either working at least half-time or registered to work, or unless they are a head of a household with at least one dependent.

A final myth is that the food stamp program subsidizes strikers. In the first place, there are not many people receiving food stamps who are on strike. Data collected by the Department of Agriculture, the Census Bureau, and the House Agriculture Committee indicate that participation of strikers is between 0.2-0.3 percent of the caseload. In the second place, a person on strike cannot receive food stamp benefits under current law and also under the committee bill unless the striker meets both the income and asset tests and also the work registration requirement.

I intend to support vigorously the committee's proposals and with equal vigor oppose the amendments which would undo the reforms contained in this bill.

One amendment which I will oppose is the Jeffords amendment which would require food stamp participants, whose annual income turns out to exceed 200 percent of the poverty level when tax filing time comes around, to repay the Government for their food stamp benefits. This amendment is apparently based on the supposition that people who become unemployed during the year can live off their past income. I know of many hard-working, middle-income people who would quickly become needy were they to lose their jobs. With taxes and inflation, it is very difficult for middle-income people to save for a possible rainy day.

I intend also to oppose the Kelly amendment which would prohibit strikers from participating in the program. If the Federal Government is to be neutral in its treatment of strikers, we should also eliminate the tax writeroff which management can take after a strike.

I shall also oppose the so-called workfare amendment. I do not believe that the public service job program for which we have fought so hard over the past several years should be distorted into a variant on the old, discredited poor farm concept. If people are truly concerned about jobs for the needy, we should increase the number of public employment job slots, not distort the basic purpose of the program with this workfare provision.

It is with reluctance that I will not oppose the pilot tests of the workfare concept which is included in the committee bill. I feel that this is an idea which will fall of its own weight since most unemployed Americans want to work but simply cannot find jobs.

To transform this poor idea into a national program, as the Findley-Mathis amendment proposes, however, would be a grave error.

Finally, I will oppose amendments to cap the cost of this automatic entitlement program. If the cost of the program increases over what is assumed by the staff of the Congressional Budget Office and the Agriculture Committee, it could occur for two reasons. First, the economy might not recover as fast as we all hope it will. That would increase the cost of the program. If we placed a cap on spending, we could hurt recipients just at the time the benefits would be most needed.

Second, the cost of the program could also increase if the cost estimates in the bill turn out to be inaccurate. I do not think that this will be the case, however. The independent estimates of both the Congressional Budget Office and the House Agriculture Committee are both below the current policy level for fiscal year 1978.

In closing, I want to congratulate my good friend from the State of Washington, the chairman of the committee, and his colleagues for bringing before us a bill which truly reforms the food stamp program by insuring that our most needy citizens are able to participate.

Mr. FOLEY. Mr. Chairman, I yield 1½ minutes to the distinguished gentlewoman from Kansas (Mrs. KEYS).

Mrs. KEYS. Mr. Chairman, the context of food policy decisionmaking has come full circle since the passage of the 1973 Act: From record high farm income to the spectre of bankruptcy; from the need for full production the need for some restraint. These profound swings have been bewildering, and I am afraid they have obscured some of the things that have remained constant: the hunger of one quarter of the earth's population; the financial plight of small scale farmers in this country and throughout the world; the dependence of modern agriculture on fossil fuels and other expensive inputs; the depletion of our agricultural land and water resources.

In the next few days the House will take action on the Agricultural Act of 1977, H.R. 7171, a bill which addresses many of these problems and contradictions. The Committee on Agriculture is to be commended for the responsible manner in which it has proceeded with this extremely complex legislation. It is not a perfect bill, but rather a creature of compromise. Through amendments offered on the floor of the House, or though the work of the House-Senate conference, I believe the bill should be improved in several important ways.

First of all, the loan rate and target price for wheat in H.R. 7171 must be viewed as minimum acceptable levels. The loan rate of $2.25 per bushel for 1977 and 1978 represents about 44 percent of parity. Mr. Speaker, the Department of Agriculture has calculated that for 1977, the variable, machinery ownership, overhead, and management costs alone average $2.36 per bushel of wheat.

If we add to this a charge for land, including average acquisition value over a number of years, the cost per bushel is about $3.16. The 1977 target price for wheat in H.R. 7171 is $2.65, about 84 percent of this cost. We must do better.

Just 2 months ago the Department of Agriculture issued a special report on the financial condition of farmers in the wheat belt. The imminent bumper crop, when added to last year's surplus, will seriously weaken the already low prices wheat farmers except for their crop. Having reaped the "bounty" of full production agriculture for several years, these farmers must now prepare for several years of financial disaster. The USDA study showed that as many as one-third of the farm borrowers may have to sell out. Small farmers and young farmers just getting started will be hardest hit. Income and price support levels must move closer to those of the Senate bill if we are to avoid financial ruin in the wheat belt.

For that reason I believe the English-Harkin amendment with its $2.90 target price for wheat and $2 target price for corn in 1977 is a necessity. Only this will deal with the emergency surplus we have at the time and save many thousands of family farmers from bankruptcy.

Most of my colleagues are aware of the fact that the main reason for the low levels of support for wheat and feed grains in H.R. 7171 is an attempt to strike a compromise with the proposals of the administration and the Senate. Grain farmers across the country recall with some bitterness Mr. Carter's promise of a year ago to seek support prices equal to at least the cost of production. In light of the tremendous contribution wheat and corn producers make to the overall economy of this Nation, I think we cannot turn our backs on them now for the sake of marginal savings in Government spending.

Another shortcoming of H.R. 7171 is its failure to deal with investment in agriculture by large corporations and foreign investors. The threat to the family farmers of this country by investments of this type was underscored by the Ag-Land Trust proposal of earlier this year. Small scale operators have not a hope of competing with large corporations or foreign investors for agricultural land. The escalation of land prices has averaged 10 percent for the last decade, and each day it becomes more difficult for young people to get a start in farming. As a first step, we should consider ways of limiting the participation of large, nonfarm corporations and alien investors in the Government commodity programs. The Senate bill (S. 275) contains such provisions, and I hope they will be favorably considered in the debate and conference.

On the positive side, the provisions of the food stamp reform bill (H.R. 7940) represent great strides in rationalizing the present system. In regard to the gross income limits on eligibility and deductions, I believe the committee has struck a fair compromise between the administration and Senate proposals. Important changes have also been made in special standards of eligibility for Indians and students, and the application procedures for social security recipients.

On the whole, the legislative package presented by the Committee on Agriculture should provide a useful point of departure for the debate and the House-Senate conference which lie ahead. We cannot afford to let the present law expire without replacement. My only hope is that we can achieve a fairer deal for the grain farmers of this Nation who are watching our deliberations with great interest.

Mr. RONCALIO. Mr. Chairman, almost without exception, America's agriculture community is in trouble.

Costs for fuel, fertilizer, labor, machinery have skyrocketed over the past few years. Banks have extended credit for operating loans beyond farmer ability to repay and foreclosures are becoming commonplace. Policies of the previous administration produced a glut on the market and now a major drought further threatens the economic survival of farmers and ranchers across much of the Nation.

Coupled with these negative factors, prices have remained sluggish and far below what is needed to meet costs for this year, let alone to provide for living expenses and repayment of loans and other obligations. Because markets have not responded to increases in production costs, the entire agriculture community and in turn the economic base of much of America is threatened.

Farmers and ranchers in my State of Wyoming share in this dilemma. Statistics from the Division of Agriculture Economics at the University of Wyoming show an increase in costs of production for sugar beets in the Worland, Wyo., area of 25.2 percent in the 2 short years from 1974 to 1976:

Cost items[1]	Worland 1974	Worland 1976	Percent change 1974 through 1976
Tractors, trucks, machinery:			
Fixed	$77.96	$104.01	+33.4
Operating	46.49	69.59	+49.7
Materials:			
Fertilizer	56.25	55.36	−1.6
Herbicides	11.28	10.91	−3.3
Nematocide	35.00	48.60	+38.8
Insecticides	8.32	9.56	+2.9
Seed	4.95	9.45	+90.9
Other	1.67	3.35	+100.6
Contract labor	54.50	59.00	+8.2
Full-time labor	47.45	58.29	+22.8
Miscellaneous	20.90	21.35	+2.1
Interest on cash costs	13.36	16.96	+26.9
Management	44.00	35.20	−20.0
Land:			
Net rent	51.75	84.94	+64.1
Taxes	2.68	3.00	+11.9
Water	5.75	5.68	−1.2
Improvements:			
Fixed	9.86	18.73	+89.8
Operating	4.14	8.30	+100.5
Total, production and opportunity costs	496.31	621.28	+25.2
Expected yield (tons per acre)	22	22	----------
Cost per ton (breakeven price)	$22.56	$28.24	+25.2
Changes in costs:			
Per acre (2 yr)		+124.97	+25.2
Per ton (2 yr)		+5.68	+25.2

Cost items[1]	Worland 1974	Worland 1976	Percent change 1974 through 1976
Per acre per year		+$62.48	+12.5
Per ton per year		+$2.84	+12.5

[1] Data from: "Costs of Producing Crops, Big Horn Basin Area, Wyoming 1974," Agricultural Extension Service, Division of Agricultural Economics, University of Wyoming, January 1975, AE 75-01, pp. 10 and 11 and preliminary costs for Worland area 1976.

U.S. Department of Agriculture statistics show that this trend is by no means limited to sugar beet production nor to Wyoming:

INDEXES OF PRICES PAID BY U.S. FARMERS

Item	January to June 1974	1975	1976	Percent change 1974 to 1976
Commodities and services, interest, taxes and wages	162	178	192	+18.5
Family living items	146	163	173	+18.5
Production items	161	179	195	+21.1
Taxes on farm real estate	154	162	169	+9.7
Wage rates (seasonally adjusted)	175	190	211	+20.5
Production items, interest, taxes, and wage rates	168	184	200	+19.1

Source: Agricultural Outlook, USDA, ERS, AO-15, October 1976, p. 19. Indexes of prices received and paid by farmers, U.S. averages.

As these production costs have risen, prices received for livestock and produce have not responded, but instead there has been a general downward trend for most items.

ANNUAL AVERAGE PRICES IN WYOMING FOR SELECTED PRODUCE

WYOMING CROP AND LIVESTOCK REPORTING SERVICE, JULY 7, 1977

Year	Per hundredweight: Beef cattle	Calves	Sheep	Wool (cents per pound)	Milk (per hundredweight)	Corn (per bushel)	Per hundredweight: Barley	Oats	Dry edible beans	Wheat (per bushel)
1973	$45.50	$56.90	$15.50	$0.92	$7.08	$2.77	$2.06	$1.39	$25.99	$4.21
1974	31.10	33.10	8.60	.69	8.34	3.44	2.74	1.77	25.80	4.06
1975	31.10	32.50	11.10	.43	8.70	3.10	2.50	1.70	17.70	3.69

These figures taken in conjunction with increases in production costs leave no doubt that the Wyoming farmer and rancher is in serious financial shape and Wyoming's situation is not unique. Few businessmen anywhere could survive these conditions.

The American farmer today is the world's most efficient producer of food and fiber. Drought and economics have now forced him to be even more efficient. He has little recourse today than to turn to his government for assistance and the Congress must respond with programs and financial support to sustain agriculture until the market place itself becomes adjusted to high production costs and can accommodate the food supplies currently available.

Many of you have been visited by groups of farm and ranch men and women trying to convey the message of how desperate their situation is. In Wyoming, our grain, cattle, dry bean, and sugar producers are especially in trouble. H.R. 7171 speaks to many of the needs of the farm community, though not all by any means. It does not touch every crop grown in my State and in some instances, target levels do not meet today's costs.

As indicated in this morning's Washington Post, the President's sugar program is in jeopardy and may not be able to be implemented. Our colleague from Texas, KIKI DE LA GARZA, who serves on the Agriculture Committee, will offer amendments for sugar in the hopes of bolstering that industry where farmers and processors are now receiving about half of what they need to make a profit. I ask your support.

I urge my colleagues to listen closely to debate on this bill, to the discussion of the many amendments to be offered, and to keep in mind, whether representing a rural or urban district, that we all depend upon a viable farm economy and community.

If by inaction we drive the small family farmer and rancher out of business, if we allow acceleration of foreclosures, if we fail to respond to the urgent needs of a farm crisis, we will all suffer. Through positive action on this bill, we can help. I urge my colleagues active attention and support.

Mr. DRINAN. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Indiana. This amendment is a simple one; it would place a ceiling of $50,000 on Federal payments to individual sugar producers. This is the same limit which applies to wheat producers, feed grain producers, cotton producers, and rice producers. The amendment thus places the sugar subsidy program in conformity with the other Federal subsidy programs and prevents a few huge sugar producers from receiving enormous payments. The Senate has adopted a similar amendment, and I hope that we will take action today to prevent massive, unjustified subsidies.

In the absence of this ceiling, the taxpayers of the United States will see their tax dollars used to subsidize the corporate giants of the sugar industry. With-

out a ceiling on payments to individual producers, the 40 largest sugar growers—all of which are large corporate entities rather than small farms—would receive almost half of the $240 million in the sugar subsidy program. At least 25 agribusiness giants will receive annual subsidies of more than $1 million; one firm alone will receive a staggering $14.2 million per year.

Unless we adopt the amendment before us, we will commit the taxpayers of this country to a multimillion dollar bailout of the giants of the sugar industry. This would constitute still another instance in which the taxpayers are called upon to rescue giant corporations from their own business decisions. No one called upon the sugar producers to yield back to the taxpayers or consumers some of their record profits of recent years; we should not now call upon the taxpayers and consumers to save the giant sugar growers from the consequences of their own actions. The present glut of sugar is the result of the decision of the industry's leaders to plant as much sugar as possible when prices were sky-high. Profits were enormous during that period. Now that the price has fallen to a more reasonable level, the taxpayers are being asked to subsidize the industry.

The amendment before us is carefully designed to eliminate the most serious defects in the sugar subsidy program. It permits payments of up to $50,000, so that small- and medium-size growers can receive payments which may be genuinely needed to stave off serious financial problems. The ceiling will prevent massive giveaways to the giants of the industry—the very corporations whose unwise decisions led to the sugar glut. Without the $50,000 ceiling, the subsidy program could produce serious anticompetitive effects within the sugar industry, helping to finance the demise of small farms at the hands of the gigantic grower-processors who will benefit disproportionately from the program.

The four largest recipients of subsidies would receive annual payments of $14.2, $10.8, $9.6, $8.8, and $5.7 million. This is in contrast to the strict $50,000 limit on annual payments to growers of wheat, cotton, feed grains, and rice. We imposed those limitations because large corporations were receiving windfall payments from the Federal Government and driving out small family farmers, ultimately to the detriment of the family farmers and consumers alike.

Moreover, such huge subsidies provide no real solution to the problem; they may actually exacerbate the situation by creating artificial incentives to increase production at a time of worldwide surplus. Surely these compelling reasons for the imposition of the $50,000 ceiling on subsidy payments to producers of other commodities applies with equal force to sugar growers, who have until now not received any Federal subsidies.

Mr. Chairman, the entire sugar subsidy program is an example of hastily drafted legislation which is characterized by serious inequities. The funds for this program were not budgeted. There was no discussion of it in any congressional hearing. The administration is, in effect, asking the taxpayers to bail out the giants of the sugar industry without careful analysis of the nature and consequences of this action.

In addition to the highly unusual method by which the sugar subsidy plan reached the Congress, there is also considerable doubt as to its legality. The Sugar Act, which included authority for payments to the sugar industry, expired 3 years ago. The Agricultural Act of 1949 does not authorize payments to producers and provides that any payments to processors must be for the sole purpose of direct price supports. In spite of this, the Agriculture Department intends to inaugurate a plan to provide income, not price, supports, which will go in large measure to producers, and in disproportionate shares to large producers. On July 19, Comptroller General Elmer B. Staats stated that, in his view, the plan was clearly illegal. It is certain that a multitude of private lawsuits will be filed challenging the legality of the subsidies.

We can best prevent the most wasteful, legally questionable, and anticompetitive effects of this program by adopting the $50,000 ceiling. This will avoid a ripoff of the taxpayers by the giants of the sugar industry while providing payments to small growers. I urge my colleagues to follow the example of the Senate and put the sugar subsidy program on the same footing as other subsidy programs by adopting the amendment before us, limiting payments to $50,000 per producer.

Mr. HAGEDORN. Mr. Chairman, H.R. 7171 is one of the most comprehensive and complex bills that will be considered by this Congress. Standing by themselves, the agricultural and the food stamp components of this legislation would be far-reaching initiatives. For this reason, I would now like to briefly address only the broad policies apparent in this bill.

For a period of more than 30 years ending in the late 1960's, our agricultural economy was plagued with chronic surpluses. In response, Federal policies attempted in a variety of ways to limit farm production—direct subsidies, huge government reserves, and acreage diversions. As the waste and inefficiencies attendant with these policies became increasingly apparent, and as the nutritional needs of impoverished nations overseas became more pressing, the wisdom of these policies was called into serious question. By the early 1970's, a new farm policy had evolved. Government controls were, to a large extent, removed, heavy government stocks were diminished, and new markets encouraged. U.S. farmers were once again making production decisions on the basis of market demand, not on the basis of government price supports and subsidies.

Since 1972, more than 60 million acres have been released from nonproductive status, with 35 million of these already put back into useful production. Farmers have been encouraged to maximize their production, with the promise that the government would minimize its interference with their markets.

Today, farm exports are the Nation's single largest source of foreign earnings, contributing substantially to the strength of the U.S. dollar. The more than $22 billion per year realized in farm exports in recent times have almost singlehandedly recouped what we have paid for energy imports. This is up from an annual export level of approximately $5 to $6 billion during the 1960's. Almost one-third of our total grain supply is presently being exported, representing nearly one-six of total world exports. Most goes to relatively stable markets such as West Germany, Japan, Canada, and the Netherlands.

During this same period, Federal payments to farmers, which has reached nearly $4 billion in the early 1970's, fell nearly 90 percent to little more than $500 million, most of it for disaster relief programs.

While I am extremely concerned that in some respects we now seem to be retreating from these commitments, such as the reinstitution of "set-asides" and the increasingly sympathetic view of international grain reserves and cartelization programs, on balance I believe that the agricultural titles of H.R. 7171 are good ones. The target prices established in this bill, with the notable exception of wheat and feed grains, reflect fairly the concerns of farmers, consumers, and taxpayers. There are differences between the levels established in this bill and in the Senate bill, but they are differences that can be handled with little difficulty in conference. Wheat, however, is now in substantial worldwide surplus which, combined with the particularly high costs of production that wheat farmers are now facing, requires, in my judgment, a target price level much closer to that set in the Senate bill.

In addition the feed grain section needs to be beefed up to more adequately reflect costs of production in relation to crashing prices at the local marketplace.

Also, one should remember that these higher target prices would be directed at crops which are currently being produced on the farms in 1977 crop year.

The loan levels set in H.R. 7171 also reflect fairly the needs of farmers, providing for their basic protection without jeopardizing their ability to compete in international markets and without creating huge Government-held grain reserves.

I am concerned, however, about the bill's failure to adequately recognize and deal with long term trends in this country which are resulting in the substantial restructuring of farm organization. Many of these trends, such as the migration of farm youths to the cities and the development of technology which seems to reward larger holdings, are probably beyond the ability of Congress to address. Other trends which are not, and which are slowly eroding the foundations of the family farm, ought to be addressed.

While I am aware of the efficiencies that industrial concentrations can sometimes implement, the strengths in the traditional family farm structure contribute something far greater to the rapidly disintegrating social fabric of

our country. The family farm is one of the dwindling number of institutions in our country in which the virtues and strengths that were early identified with our country and which contributed to its greatness are still clearly evident. While I am not one of those who view large farmholdings as an unabated evil, I do not believe it is incumbent upon the Government to promote such holdings through target price payment and commodity loan programs which reimburse farmers without reasonable limits.

Mr. Chairman, H.R. 7171 also continues the recent upgrading of our Nation's agricultural research and development efforts, providing substantial amounts of needed funding for State agricultural experiment stations, while reorganizing the efforts of the Department of Agriculture. Since 1969, so-called income security expenditures within the Department have soared from approximately 12 percent of its budget to more than 60 percent, with traditional agricultural expenditures having declined from 62 percent to less than 25 percent.

In terms of 1969 dollars, USDA is actually spending less for agricultural research today than it was 8 years ago. H.R. 7171 represents a departure from these trends and would require USDA to place a renewed emphasis on its research efforts. At a time when rates of increase in farm productivity are declining, a step-up in agricultural research efforts could well represent one of the most enduring achievements of this bill.

Despite the many excellent provisions in the agricultural titles of this bill, I am going to have a great deal of difficulty in supporting final passage due to the inclusion of the food stamp bill as title XII. It is hard for me to believe that we have the clamor that has been heard about the need for food stamp reform, and with the growing public indignation at abuses of the program that we are faced with a reform bill that actually increases outlays for food stamps.

We have done almost nothing to eliminate the voluntary poor from the food stamp rolls, little to reduce the administrative complexity of the program, and a great deal to transform the program into simply another dreary, dead-end welfare program. A welfare program, incidentally, for the poor and nonpoor alike. Someone once said that the great myth fostered by the welfare state was that every individual felt that he could live off of every other individual. As well as any legislation that we have considered recently, the food stamp provisions of this bill reflect that philosophy. It is sad to have to say, but the Agriculture Committee, after having labored for months during the past two Congresses to revamp a popularly discredited program, has emerged with a bill that will worsen things still further. In opposing two amendments, one to provide for the recoupment of food stamp payments to families at twice the poverty level, and the other to place a ceiling on annual food stamp outlays, supporters of this bill have implicitly indicated that they recognize and accept this fact also.

Mr. O'BRIEN. Mr. Chairman, I represent a district in Illinois that extends from densely populated suburbs of Chicago to some of the most fertile farming areas of the world. My constituents, whether they live in crowded urban neighborhoods or on farms in Iroquois, Will, and Kankakee counties, all have an important stake in this legislation. For the productive skills of our farmers not only put food on our tables but also provide the surpluses which, when sold abroad, generate the trade dollars we need to pay for foreign oil and other imports.

While I have reservations about certain features of H.R. 7171 and will vote for some amendments, I believe that on the whole it strikes a reasonable balance between the needs of both consumers and farmers. The 1973 Agricultural and Consumer Protection Act, which expires this year, has worked reasonably well in stimulating farm production to meet increased domestic and foreign demands for the products of American farms. The bill before us extends the present commodity programs for another 4 years with responsible increases in target prices and price supporting loan levels. A new formula for setting target prices will allow for annual adjustments reflecting changes in farmers' production costs.

These increases, in my judgment, are reasonable. They are designed to give farmers sufficient income protection without abandoning the free market concept of the 1973 legislation. Corn and soybeans are the major crops produced in my district. The minimum loan rate for corn under H.R. 7171 is raised from $1.10 a bushel to $1.75 a bushel for the 1977 crop and $2 a bushel for the 1978–81 crops. Target prices for corn are set at $1.85 a bushel for this year's crop, $2.10 for the 1978 crop, with the target prices for the 1979–81 crop to be set at the previous year's level adjusted to reflect increases in average production costs.

The bill requires the Agriculture Department to make loans available to soybean producers at levels corresponding to those set for competing commodities, taking into account the supply and demand. The notion of a $4 loan rate on soybeans, as proposed in one of the amendments to be offered later, does not seem to be popular with soybean growers in our area. They are concerned that an overly high loan rate will attract more marginal producers and build up the kinds of surpluses that have kept down market prices for other commodities. As one of my constituents put it:

> The next thing you know, the government would be in the bean business.

Favorable growing conditions in various parts of the world have resulted in reduced demands for our farm products at a time when our farmers have produced near record crops of wheat and feed grains. As a result, once again we are faced with the prospect of burdensome surpluses depressing market prices. I strongly urge the Department of Agriculture to utilize Public Law 480 and CCC credits to the fullest possible extent to maintain grain levels at maximum levels.

In conclusion, Mr. Chairman, let me say that I am reasonably satisfied with this bill and commend the distinguished chairman of the Committee on Agriculture (Mr. FOLEY), the ranking minority member (Mr. WAMPLER) and, indeed, all members of the committee, for a job well done.

Mr. LEGGETT. Mr. Chairman, I rise in support of the provisions in the agriculture bill for the construction and expansion of veterinary colleges. As part of a coordinated agricultural research effort, title 1320 will do much to advance our livestock medical care.

The bill provides for 50-percent Federal funding of construction and initial establishment and operation of schools of veterinary medicine and expansion of existing veterinary schools. Individual States will provide the remaining 50-percent funding.

The Congress has long recognized the value of the State veterinary colleges, which have been a significant asset to animal care in this century. By instituting the land grant program, Congress helped establish these schools.

In my own district, the University of California's School of Veterinary Medicine at Davis has for years trained a large percentage of the Nation's veterinary teachers and researchers. There are currently 115 graduate students at the school, many of whom will fill teaching and research positions upon graduation.

As we open new veterinary schools across the country, the personnel that Davis produces will become more and more important.

In addition, there are 379 students currently enrolled in the doctor of veterinary medicine program. Davis graduated 95 DVM's from this 4-year program last year. Combining all graduate, specialty, and regular veterinary students, Davis has 585 students matriculating at present.

In this regard, I would like to point out that this legislation applies equally to expansion of existing schools as it does to establishment of new ones. When it is implemented, I would hope that the Secretary will keep this provision in mind.

Preference will be given by the Secretary to States which cooperate with other States in establishing joint veterinary medical training programs. States that make a good-faith effort in this direction, even if they are unsuccessful, will receive equal preference.

In addition, the Secretary will give high priority to schools which emphasize care and preventive medical programs for food-producing animals. This provision will insure positive economic results from the legislation. By improving veterinary care for livestock, we will reduce the unnecessary loss of food-producing animals, thus increasing the productivity of every farmer.

Over the past many years, we have seen time and again the need for quality veterinary care. Epidemics of major proportions have been halted or prevented by efficient and skillful veterinarians.

One of the best known examples of this was the 1971 Venezuela equine encephalitis epidemic in the Southwest.

This disease spread from across the border to strike horses in 26 counties in the southern part of Texas. It also infected human beings in nine counties.

It was only through the hard work of local and Department of Agricultural veterinarians that the disease was detected, surveilled, and, through extensive vaccinations, halted.

Other epidemics faced by this country have included Newcastle disease in chickens and screw worms in livestock. In these and countless other cases, a shortage of veterinary personnel would have meant much more severe losses than actually occurred.

Billions of dollars are lost every year from livestock diseases, despite the progress that has already been made in eradicating them. It is clear that anything we can do to increase the number and quality of veterinarians in this country will prove to be very beneficial.

I urge my colleagues to support this legislation. It will guarantee a very productive expenditure of Federal funds.

Mrs. HOLT. Mr. Chairman, the previous administration pursued a very sane policy of reducing Government intervention in the agricultural economy. It recognized that in the great and expanding world market, it made no sense for the United States to be restricting agricultural production and propping up farms with subsidies.

H.R. 7171 would cancel the market-oriented reform and return us to the old system of production controls and increasing farm subsidies. The Congressional Budget Office studied this legislation very carefully and warned that it could cause U.S. agricultural export prices to be less competitive in world markets, ultimately creating a need for export subsidies.

Mr. Chairman, this appears to be the course of madness. It is also the course of Government control of agriculture. In the long run it will damage both consumers and farmers, and the damage to taxpayers generally will come very swiftly.

During the 5-year life of this legislation, direct payments to farmers would total $5.8 billion more than current policy would allow. The companion bill on the Senate side is even worse, costing $10.8 billion more than current policy over the 5 years.

It is important to understand where this largesse would be flowing. Fifty percent of the money would go to that 4 percent of farms with sales of over $100,000 a year; 25 percent of the payments would go to the 12 percent of farms with sales of $40,000 to $100,000 a year. This legislation is for the biggest and richest farms. The large majority of farms would receive marginal benefits or nothing at all.

The ceiling on total payments to any farmer would be raised from the current $20,000 to $35,000 and thereafter by 10 percent a year. The Senate bill would jump the ceiling up to $50,000 immediately.

Mr. Chairman, the study by the Congressional Budget Office suggests that this legislation provides incentives for the increasing concentration of American agriculture into large commercial farms. The report also warned that it might intensify the inflation of farmland prices. It says:

Increasing land prices mean capital gains for landowners, higher entry costs, and higher production costs for renters. Land price increases that escalate production costs may, over time, contribute to higher food prices and reduce the U.S. comparative advantage in export markets.

This legislation offers harmful potential for consumers and American agriculture. I urge my colleagues to join me in voting to defeat it.

The CHAIRMAN. All time has expired.

The Clerk will now read the bill by title.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Act of 1977".

Mr. BURLISON of Missouri. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do not expect to use the full 5 minutes, but since we ran out of time on general debate, I did want just a couple of minutes.

A number of allusions were made during the debate to the threats of the President to veto the bill if we increase the funding that is in the House bill. I think there ought to be some base laid in the record, Mr. Chairman, that the President is wrong in making that threat. He should not veto this bill if we merely raise the expenditures by up to as much as the $4 billion that it is estimated the Senate bill will cost.

There are a number of reasons for this, Mr. Chairman. One is that the function of agriculture, one of the 15 functions of Government as carried in the President's budget, is the smallest segment of the Federal budget, the smallest of the 15 functions of Government.

I think it should also be pointed out that in recent years we have seen this function of Government, which is the smallest of the 15, cut a larger percentage than any of the other functions that have been cut. Many of them in fact have been increased. To illustrate that, Mr. Chairman, let me refer to my questioning in the Appropriations Committee of Secretary Shultz, the Secretary of the Treasury at that time, in 1973 on the 1974 budget when I directed his attention to the fact that the agriculture function of the budget had been cut. I said this:

We note that agricultural programs are cut for fiscal year 1974 by $2-plus billion. We look at the Defense programs, which are budgeted manyfold of Agriculture, yet they are cut only $2.7 billion. We look at HEW, which has a budget of approximately eight to nine times the resources of Agriculture, yet their cut is only twice that of Agriculture, $4.8 billion . . .

In that budget, Agriculture was in fact cut 18.3 percent.

The response of Secretary Schultz to that was as follows:

Let me say in general that the bulk of the downward movement in appropriations for agriculture reflect the very success that farmers are having in this country—that is, their incomes are rising because their products are in great demand and we no longer have to pay storage costs because these products are moving into markets.

With the rise in demand around the world for agricultural products, I believe our farmers are now moving to a position where they can have high and rising farm income based on expanded production, as distinct from a philosophy for holding production down and paying large Federal subsidies.

The point is that the situation is totally different now from what it was in 1973. The farmers are not at the apex of prosperity and in effect, as evidenced by the situation with respect to wheat and feed grains and some of the other commodities, quite the reverse is true.

Mr. Chairman, there is similar testimony in my colloquy with Mr. Lynn, at that time Director of the Office of Management and Budget, 2 years later before the Appropriations Committee, which essentially makes the same point. I am not going to take the time of the committee now to read that testimony also. The point is that our agriculture budget has been cut during the recent years of prosperity. Now in our new farm commodity recession, we should be willing to spend more for the program. Let me summarize, Mr. Chairman, by again making the point that in Agriculture we are only spending this year less than $2 billion for an agricultural program which compares to about $110 billion or $115 billion for Defense. It compares, Mr. Chairman, with $6 billion for food stamps alone, one small, minor segment of the welfare program. Yet the President gets emotional and gets excited when we talk about spending as much as $3 or $4 billion on a farm program. We were in fact, spending almost $6 billion on such a program way back in 1969.

I thought, Mr. Chairman, that this base should be laid in the record at this point to show that the President is wrong in his threat to veto a $4 billion farm bill and that he ought to reconsider, if in fact the Congress does enact such a program.

AMENDMENTS OFFERED BY MR. FOLEY

Mr. FOLEY. Mr. Chairman, I offer certain technical amendments to various titles of the bill and ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. FOLEY:

TITLE IV—WHEAT

Page 12, line 1, strike out "by allocating" and insert in lieu thereof "in the manner provided in this paragraph. The Secretary shall allocate".

TITLE V—FEED GRAINS

Page 19, line 1, strike out "by allocating" and insert in lieu thereof "in the manner provided in this paragraph. The Secretary shall allocate".

TITLE VIII—PEANUTS

Page 38, lines 13 and 21, strike out the subsection designations (g) and (h) and re-

number them as (f) and (g), respectively, and

Page 39, lines 8, 16 and 23, strike out the subsection designations (i), (j) and (k) and renumber them as (h), (i), and (j), respectively.

Page 41, line 14, strike out "following" and insert in lieu thereof "1978 through 1981".

Page 43, line 5, strike out the quotation mark at the end of the paragraph.

TITLE IX—MISCELLANEOUS COMMODITY PROVISIONS

Page 50, line 6, strike out "grain" and insert in lieu thereof "the commodity".

TITLE X—RURAL DEVELOPMENT AND CONSERVATION

Page 63, line 5, strike out "These" and insert in lieu thereof "There".

Page 64, line 8, strike out "The" and insert in lieu thereof "Title V of the".

TITLE XI—PUBLIC LAW 480

Page 65, line 9, strike out "fees" and insert in lieu thereof "fee".

Page 65, line 22, insert immediately after "Agriculture" the phrase "and the Committee on International Relations".

TITLE XIII—NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT OF 1977

Page 70, line 18, strike out "PURPOSE" and insert in lieu thereof "PURPOSES".

Page 72, line 23, insert a comma at the end of the line.

Page 77, line 23, strike out ", recognized as a need" and insert in lieu thereof "to a recognized need".

Page 78, line 3, insert quotation mark after "State".

Page 80, line 3, strike out "and".

Page 80, lines 15 and 16, strike out "shall relate to the problems of" and insert in lieu thereof "means".

Page 81, line 4, strike out "including".

Page 81, line 6, insert "and" at the end of the line.

Page 81, line 12, insert immediately after the word "research" the following: "(except with respect to the biomedical aspects of nutrition concerned with human health or the prevention, diagnosis, or treatment of disease)".

Page 81, immediately following line 14, insert the following new subsection (a) and redesignate succeeding subsections accordingly:

"(a) establish jointly with the Secretary of Health, Education, and Welfare procedures for coordination with respect to nutrition research in areas of mutual interest;"

Page 83, lines 12 to 14, strike out "to the committees of both Houses of the Congress which have jurisdiction over appropriations and over agriculture" and insert in lieu thereof "to the House Committee on Agriculture, the House Committee on Appropriations, the Senate Committee on Agriculture, Nutrition, and Forestry, and the Senate Committee on Appropriations".

Page 87, line 3, strike out "universities participating" and insert in lieu thereof "participating" and insert in lieu thereof "participants".

Page 88, lines 4 through 6, strike out the phrase "without regard to the provision of title 5, United States Code governing appointments in the competitive service,".

Page 88, strike lines 15 through and including line 21, and insert in lieu thereof the following: "a rate not in excess of the rate for GS–18 of the General Schedule of section 5332 of title 5, United States Code.".

Page 90, line 11, insert "(" immediately before "Public Law 89–106)".

Page 93, line 23, strike out everything after "compensation" through and including line 6 on page 94, and insert in lieu thereof the following: "at a rate not in excess of the rate for GS–18 of the General Schedule of section 5332 of title 5, United States Code."

Page 94, lines 9 through 11, strike out the phrase ", without regard to the provisions of title 5, United States Code, governing appointments in the competitive service,".

Page 95, line 23, insert immediately after "Act" the following: ", except that it is not the intent of Congress in enacting this Act to limit the authority of the Secretary of Health, Education, and Welfare under any Act which he administers.".

Page 98, line 10, insert "AND ALCOHOLS" immediately after "HYDROCARBONS".

Page 98, line 16, insert ", producer gas, and other coal derivatives" immediately after "coal tar".

Page 98, line 16, insert ", methanol, methyl fuel" immediately after "agricultural chemicals".

Page 99, line 13, insert "AND ALCOHOLS" immediately after "HYDROCARBONS".

Page 99, line 15, strike out "Consolidated Farm and".

Page 99, line 18, strike out "SEC. 509" and insert in lieu thereof "SEC. 510".

Page 100, line 1, insert "and alcohols" immediately after "hydrocarbons".

Page 101, line 3, insert immediately after "shall" the phrase "supply from Commodity Credit Corporation stocks or, to such extent or in such amounts as are provided in appropriation acts,".

Page 101, line 17, insert "a" immediately before "college".

Page 102, line 6, strike out the comma immediately following the parenthesis and insert in lieu thereof "including".

Page 102, line 20, strike out "hereafter" and insert in lieu thereof "after the date of enactment of this Act".

Page 103, line 13, strike out ", and" and insert in lieu thereof "including".

Page 106, line 22, insert "laboratories," immediately after "farms,".

Page 107, lines 24 and 25, strike out "in accordance with applicable laws." and insert in lieu thereof "in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of Title 5, United States Code.".

Page 108, line 7, strike out "authorized" and insert in lieu thereof "appropriated".

Page 114, lines 9 and 10, strike out "in the agricultural sciences" immediately after "programs" and insert "in the food and agricultural sciences" immediately after "results".

Page 114, lines 22 and 23, strike out "in the food and agricultural sciences" immediately after "programs" and insert such words immediately after "results".

Page 115, insert "and" at the end of line 12.

Page 115, line 17, strike out "; and" and insert a period in lieu thereof.

Page 115, line 18, strike out "(C) that at" and insert in lieu thereof "At".

Page 181, immediately after line 4, insert the following new title:

"TITLE XVI—EFFECTIVE DATE

"SEC. 1601. The Agricultural Act of 1977 shall become effective October 1, 1977, except for those provisions for which a later date is specified elsewhere in this Act."

Mr. FOLEY (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the technical amendments be dispensed with and that they be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. FOLEY. Mr. Chairman, these are technical amendments to title IV, title V, title VIII, title IX, miscellaneous commodity provisions; title X, rural development and conservation; title XI, Public Law 480; title XIII, title XIV, title XV, and also title XVI of the act dealing with the effective date.

The purpose of the various technical amendments is:

First. To correct typographical errors in the printing of the bill.

Second. To correct other technical errors.

Third. To bring certain sections into conformity with the Congressional Budget Act in accordance with an agreement reached with the Budget Committee.

Fourth. To amend provisions of the research section to take into account nutrition and other activities carried out by the Department of Health, Education, and Welfare. This reflects concerns expressed by the Subcommittee on Health of the House Commerce Committee.

Fifth. To take account of concerns expressed by the Committee on Post Office and Civil Service on certain provisions relating to supergrades and civil service benefits.

Mr. Chairman, copies of these amendments have been provided at the minority desk.

Mr. Chairman, I yield to the distinguished ranking member of the committee, the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Chairman, I have examined the amendments. I think they do comply with what the gentleman has said. I think the gentleman's explanation is adequate and sufficient and certainly we have no objection.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Washington (Mr. FOLEY).

The amendments were agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 2. TABLE OF CONTENTS.

Title

I. Payment Limitation for Wheat, Feed Grains, and Upland Cotton.
II. Dairy and Beekeeper Programs.
III. Wool and Mohair.
IV. Wheat.
V. Feed Grains.
VI. Cotton.
VII. Rice.
VIII. Peanuts.
IX. Miscellaneous Commodity Provisions.
X. Rural Development and Conservation.
XI. Public Law 480.
XII. Food Stamps.
XIII. National Agricultural Research, Extension, and Teaching Policy Act of 1977.
XIV. Agricultural Solar Energy Research, Development, and Demonstration Act of 1977.
XV. Wheat and Wheat Foods Research and Nutrition Education Act.

TITLE I—PAYMENT LIMITATION FOR WHEAT, FEED GRAINS, AND UPLAND COTTON

SEC. 101. Section 101(1) of the Agricultural Act of 1970, as amended, is amended to read as follows:

"(1) The total amount of payments which a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949, as amended, for wheat, feed grains, and upland cotton shall not exceed $20,000 for the 1974 through 1977 crops, $35,000 for the 1978 crop, $38,500 for the 1979 crop, $42,350 for the 1980 crop, and $46,585 for the 1981 crop of such commodities.".

Mr. FOLEY (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read. printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

AMENDMENT OFFERED BY MR. FINDLEY

Mr. FINDLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FINDLEY: Page 2, strike lines 2 through 13 inclusive and insert in lieu thereof the following:

"TITLE I—PAYMENT LIMITATION FOR WHEAT, FEED GRAINS, RICE, AND UPLAND COTTON

"SEC. 101. Section 101(1) of the Agricultural Act of 1970, as amended, is amended to read as follows:

"'(1) The total amount of payments which a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949, as amended, for wheat, feed grains, rice, and upland cotton shall not exceed $20,000 for the 1974 through 1981 crops of such commodities.'

"SEC. 102. Section 101(g)(13)(A) of the Agricultural Act of 1949, as amended, is hereby repealed."

Mr. FINDLEY. Mr. Chairman, this amendment keeps the provision which has been the law since 1973. It keeps the provision in the law under which no person can receive more than $20,000 annually under the feed grains, wheat, and cotton target price and disaster programs. In respect to these commodities, this amendment represents no change whatever in the existing law.

The only change made is the addition of rice payments and, of course, rice is now under the same loan and target price arrangement that has applied for a number of years to feed grains and wheat.

Payment limitation is a concept that is already widely accepted. The concept itself should not be an issue here today, although I suspect that echoes of arguments from years ago will be heard.

Before the limitation was established, Government target payment price programs resulted in some enormous payments to farmers.

One in California, for example, got more than $4 million a year. The bill as reported by the committee provides a payment limit for all of the commodities set forth in my amendment, but at higher levels. But, it does accept the concept of payment limitation. The limit recommended would start next year at $35,000 and increase each year to $46,600 for feed grains, wheat, and cotton. For rice, curiously, payments would start at $55,000 and drop gradually each year to $46,600.

The only real question before the committee at this point is where the limitation should be placed—just how high should it be? The argument, perhaps, will be made that the target price is tied somehow to the cost of production, and the higher limit as recommended by the Committee on Agriculture is needed to approximate more closely reimbursement for cost of production in times of low prices, such as this year.

In my view, this is wrong-headed reasoning. I will cite a couple of reasons why. Cost of production is a will-o-the-wisp. It is as elusive as a drop of mercury. Cost of production for one farmer is a high-profit bonanza for another. The U.S. Department of Agriculture and Senate studies of recent date, after hundreds of pages of testimony, finally gave up trying to fix the cost of production. It simply cannot be done.

Taking the average farmer's cost of production is equally hazardous. An income guarantee at that level would guarantee very high profit to all the highly efficient commercial farmers of the Nation. But, even if cost of production could be precisely fixed, I submit that it would be very poor policy for the Government to guarantee farmers cost of production return.

That would be a sure way to disaster for the farmer and all other U.S. citizens. It would wipe out the supply-demand disciplines in the marketplace, and put Government fully in the business of running the U.S. farm plant. With costs guaranteed, farmers would turn on production without regard to consumer needs and consumer preferences.

Let us be honest. The payments under these farm programs have social policy purpose. That is their main function. They are income support for farm families when commodity prices are down. They are not support for bushels nor for bales; they are support for people. I contend that family farm income support at $20,000 is high enough. These payments are intended to help farm families over the rough spots in the road. They are intended to strengthen the family structure of American agriculture. They are not intended to cater to large corporation-type farms.

These payments are a subsidy to people operating family-owned farms, whose role in rural agriculture and rural America we all cherish and wish to protect.

Without a prudent limit, most of the payment money will go to big farms, the immense operations with several thousand acres—hardly the family farm type the programs are intended to support.

The Congressional Budget Office studies indicate that without a payment limit, most of the payment money would go to just a tiny percentage of farms. Somewhere between 4 and 10 percent of the farms would get over half the payment money. This fact of life makes it absolutely essential that the payment limit be held at $20,000 in the aggregate. The higher the limit, the bigger the grab by big farms.

Most farmers are in favor of the $20,000 payment limitation. I urge support of the amendment.

Mr. FOLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, for a number of years now we have had the amendment to farm bills that limit payment to $20,000. The Committee on Agriculture, when it considered this bill, took into account the fact that we have had these provisions in the bill for the last 4 years.

Since the first quarter of 1972, when the 1973 Farm Act was first being developed, there has been an increase in the price index paid by farmers of 64 percent, which approximates the change that the committee has brought into this bill in increasing the $20,000 payment limitation.

We have had, I do not need to tell every Member here, a variety of changes in the law which reflected the cost of inflation, in terms of living costs, in terms of production costs. Although it is not an easy task to determine how exactly the individual farmers are affected by production costs, the fact that they are grossly affected is clear. They have been affected most strongly since the 1973 bill came into effect. In the years 1974, 1975, and 1976, the increase in every single aspect of the production inputs that farmers used to raise the food and fiber of this Nation have increased dramatically.

The second problem raised by this amendment is that it tends to discourage not only the huge producers, but even the moderately large producers from cooperating in the program, and that in itself tends to hurt the smaller farmers. In my judgment, we are going to have to face the fact this fall we will be going into some production restraint on wheat and perhaps on corn and other feed grains. The ability of those set-aside programs to work and to moderate excessive stock developments depends upon wide compliance with the set-aside, which is voluntary under this act, as a condition of loans or payments. If those loans are not restricted but the payments are restricted, then certain larger producers will have an incentive to stay out of the compliance with the production restrictions. It only makes the problem of the small farmer more serious and requires a deeper cutback on his production and creates a further problem with the continuing softening of prices due to oversupply. So, in my judgment, increasing these price support levels to the $35,000 which the committee did, is modest and prudent, is something which helps food farmers. It is the large farmer who can well stand outside of these programs often, but whose compliance is often necessary to make the program work.

I hope the amendment of the gentleman will be rejected, and I urge the committee to reject it.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. I thank the gentleman for yielding.

In regard to a large farmer and a small farmer, is it the gentleman's argument that above $35,000 in the present bill, then it would be applicable, therefore you would not come under the program, and above $20,000 under the amendment, then you would not come under the program? So are we talking about the farmers that would fall in between the $20,000 and the $35,000?

Mr. FOLEY. The large farmer, who normally, without a payment limitation might receive a $75,000 payment, can receive up to a $35,000 payment.

Mr. BEDELL. It would still apply equally to him whether it is $20,000 or $35,000?

Mr. FOLEY. Not equally. Under the $35,000 limitation, the producer would be eligible for larger payments. If the cutoff were lower it would tend to discourage participation.

The Department and the administration state that they are opposed to the amendment offered by the gentleman from Illinois (Mr. FINDLEY).

We believe that it is necessary to have larger producers encouraged to stay in the program, and we oppose bringing the payment limitation down to $20,000. Particularly, we discourage that in wheat.

Mr. FITHIAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Findley amendment.

Mr. Chairman, I would suggest that we give very serious consideration to the amendment offered by my friend, the gentleman from Illinois (Mr. FINDLEY), not perhaps because we are going to end up with $20,000, I would say to my colleagues, but because in the other body they are working on a $50,000 limitation now.

What we will probably end up in the final conference report is something reasonably close to a limitation of $30,000 or $35,000. It is in the $30,000 to $35,000 range that we will in fact have accounted for all of the items our distinguished committee chairman has mentioned in terms of inflation and still maintain the fundamental concept that we are in the farm program and the price support program not to guarantee profit but to set some kind of income limit and some kind of support for the small farmer.

I am not interested really in seeing this House once again chastised for a $1 million payment to a farmer. It jeopardizes the entire public image of agriculture in this country when we lay out payments like that.

In a short time I am going to offer an amendment calling for a payment limitation on sugar, because if we go through with what the administration is now proposing to effectuate, we would be paying to a single company over $14 million. Just imagine what Jack Anderson is going to do with something like that.

We in agriculture represent a diminishing number. We are fewer than 5 percent in the House; we are fewer than 5 percent in this country. If we are going to defend a bona fide agricultural program—and I am a very strong supporter of that program—then we are going to have to say that we are not going to lay out payments of very large amounts and not expect the concurrent criticism of the consumer sector of our society.

Therefore, Mr. Chairman, I rise in support of the amendment offered by my friend, the gentleman from Illinois (Mr. FINDLEY), to limit the payment to $20,000. That has been the expression of the House in the past, and I would like to see the House bill go forward with that limit in it, in the hope that the committee chairman and our distinguished conferees would be able to hold the limit down so that we end up with a figure somewhere in the vicinity of $30,000.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I support the statement made by the gentleman from Indiana (Mr. FITHIAN). It seems to me that if we are really going to be concerned about what type of society we are building here in America, we had better look to the small farmers and we had better start to move away from this "more and more" business, the idea that the figures constantly have to be more and more and more.

Mr. Chairman, I think this amendment addresses that idea, and I certainly support the amendment.

Mr. FITHIAN. Mr. Chairman, my friend, the gentleman from Iowa (Mr. BEDELL), is absolutely correct. We do much in this country to support the large corporate farmer, and we should encourage small farmers.

Mr. JOHNSON of Colorado. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I oppose the amendment. It seems to me that the gentleman is setting up a tortured argument when he says that we have to be wary of what some newspaper columnist will say or of what the Senate has done.

It seems to me that what the gentleman is saying is that he agrees with a $30,000 or $35,000 figure, but that we ought to take $20,000 so that we can compromise in the conference. That, I believe, is a weak way to legislate. If we think that $35,000 is the correct figure, let us accept $35,000 and then have the conferees stand for $35,000.

Mr. FITHIAN. Mr. Chairman, I would point out to my friend that I would just call this the pragmatic legislative process.

Mr. MOORE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am opposed to the Findley amendment.

The committee has gone a long way in this first title toward drawing language that brings about a reasonable increase based simply on inflation and today's needs recognizing the high cost of farming today.

If we accept the $20,000 figure, it sounds as though we are supporting small family farmers, but that is not what we are doing. As the chairman of the full committee said, we are considering the average farmer today, the farmer who is neither a corporate farmer nor a big farmer. But he is operating under the disadvantage of the high cost of farming today.

Let us take rice, for instance, which is covered by this limitation. Rice farming today is the most expensive type of farming in the Nation.

It costs many times more per acre to farm rice than it does corn or wheat or feed grains, the other commodities being sought to be limited under the gentleman's amendment. It costs $387 per acre to produce rice compared to $139 for wheat and $221 for corn.

Therefore, Mr. Chairman, we would be hitting the small rice farmer. We would be hitting him to the point that if he must have a support payment made, as was done during this current year, we will be seeing to it that the $20,000 figure means nothing. We would be simply telling him, "We are going to give you a little bit of help, but because you are not so small that you cannot make money, we are going to write you out altogether." A payment of $20,000 against a production-expense possible loan of $325,000 for a 1,000-acre rice farm—not at all uncommon—means nothing.

Mr. Chairman, the bill is realistic. The committee worked hard on it. It is a realistic effort to help farmers today with meaningful aid; and the amendment offered by the gentleman from Illinois (Mr. FINDLEY) will simply make it totally unrealistic at today's high cost of farming.

Therefore, Mr. Chairman, I urge that the amendment be defeated. We would not be hurting the big farmers. We would be hurting the small and middle-size farmers who are trying to operate today faced, as they are, with the high cost of production.

Mr. HAGEDORN. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois (Mr. FINDLEY). H.R. 7171 increases aggregate target price payments for feed grains, wheat, and cotton from $20,000 to $35,000 in 1978 with a 10-percent annual upward adjustment for the remaining 3 years of the bill. The limitation would thus be increased to $38,500 in 1979, $42,350 in 1980, and $46,585 in 1981.

The original purpose of the target price program was to provide support for family farm incomes during periods of low commodity prices. With the increased limitation levels, however, a farmer would have to produce approximately 5,000 acres of corn or 2,400 acres of wheat by 1981 before his eligibility for benefits would be cut off.

While I am not one of those who view large farm operations with unmitigated disdain, I do not believe that it is incumbent upon the Federal Government to promote such holdings through target price payments or commodity loan programs which reimburse farmers without reasonable limits. Not only is the effect of the new payment limitations to promote and encourage concentrated holdings, but it is also a new, unjustified burden upon the taxpayer. A $20,000 cap would result in a savings of nearly $37 million for the Government, while the caps proposed in this bill would reduce this figure by more than $26 million. With less than 1 percent of wheat and feed grain producers benefiting from the new caps, it is difficult for me to justify this additional cost.

At a time when we are threatened by total deficiency payments of more than $2 billion, we should be cautious about extending levels of eligibility among those farmers least in need of such extended coverage.

Mr. CONTE. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois (Mr. FINDLEY). The amendment, of which I am honored to cosponsor, would limit the payments made by the Federal Government to $20,000 per producer annually for upland cotton, rice, wheat, and feed grains. Mr. Chairman, I believe that $35,000, and $55,000 in the case of rice, is too much for any individual farmer to receive as a Federal payment. If any farmer whose operation is large enough to entitle him to receive such an extravagant payment also possesses the financial resources to absorb the price and income fluctuations that plague farmers everywhere. This is an old issue, on which the Congress has been wrestling with for years. I submit that this amendment is a rational approach to the issue, not by establishing the precedent of providing large farm subsidies, but rather providing assistance for small farming operations that are facing increased challenges to its survival. Additionally, this rational approach will not be of significant benefit to the growing corporate farming sector, but rather it is designed to be of maximum assistance to the small farmer throughout the country.

Due to the time restrictions, I would like to focus my remarks on the rice supports. The basic problem with this commodity is that the loan rate, the target price, and the limitation on deficiency payments to individual producers are set so high that they seriously interfere with the proper functioning of the marketplace. The maximum deficiency payment an individual rice producer can receive is a shocking $55,000, or nearly three times the $20,000 aggregate payment limitation for wheat, feed grains, and cotton in 1973. I firmly believe that a $20,000 limitation is ample for these producers, as well as the producers of wheat, feed grains, and cotton. This limitation compares to the average income for a family in the United States of $14,000, and the fact that only a fourth of the families have an annual income of over $20,000.

Mr. Chairman, recently the Department of Agriculture released a list of recipients of these payments. This list revealed that over a hundred instances of two or more individuals claiming rice payments in excess of $20,000 each living in the same county, and each having the same last name. It appears that we have not fully severed our regrettable habits of the past. In addition, the list shows that nearly 1,000 rice producers have received payments in excess of $20,000. What this all means is that we are going to be paying large payments to these producers for some time to come, but I believe that the Congress must adopt the responsible approach and place limitations of $20,000. I also believe that this crop should be extended the same treatment as we do for wheat, feed grains, and cotton. The increased popularity of this product should be more than enough to insure the survival of the producers in the foreseeable future.

Mr. Chairman, I urge the adoption of this responsible amendment in the interest of both the consumers and the taxpayers.

Thank you, Mr. Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. FINDLEY).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. FINDLEY. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Sixty-seven Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 443]

Accordingly the Committee rose; and the Speaker pro tempore (Mr. BOLLING) having assumed the chair, Mr. EVANS of Colorado, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill, H.R. 7171, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 360 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Illinois (Mr. FINDLEY) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 183, noes 230, answered "present" 1, not voting 19, as follows:

[Roll No. 444]

ANSWERED "PRESENT"—1

Daniel, R. W.

NOT VOTING—19

Archer	Ford, Mich.	McKinney
Brademas	Holland	Murtha
Burke, Mass.	Howard	Teague
Dent	Hyde	Ullman
Dickinson	Koch	Wilson, C. H.
Fish	Luken	
Flippo	McClory	

The Clerk announced the following pairs:

On this vote:

Mr. Ford of Michigan for, with Mr. Teague against.

Mr. Burke of Massachusetts for, with Mr. Brademas against.

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. NOLAN

Mr. NOLAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NOLAN:

TITLE I—PAYMENT LIMITATIONS

Page 2, insert the following immediately after line 13:

"SEC. 102. Section 101(4) of the Agricultural Act of 1970, as amended, is renumbered as section 101(5) and the new section 101 (4) is added as follows:

"(4) No payments shall be made under the annual programs established under the Agricultural Act of 1949, as amended, for the 1978 through 1981 crops of wheat, feed grains, upland cotton, and rice to;

"(a) a corporation, partnership, or other legal entity comprised of more than one person if a majority interest in such legal entity is held by stockholders, partners, or persons who themselves are not engaged in farming operations as a sole proprietorship;

"(b) a trust or similar arrangement established by a person who would not have been eligible for payment under this subsection;

"(c) The provisions of this subsection shall not prohibit program participation by:

"(i) Any farmer-owned and controlled cooperative, corporation, or association which meets the requirements of the Act entitled "An Act to authorize association of producers of agricultural products", approved February 18, 1922 (42 Stat. 388, 7 USC 291–292, the Capper-Volstead Act) or as defined in section 15(a) of the Agricultural Marketing Act of 1929 (49 Stat. 317: 12 USC 1141).

"(ii) Any family farm corporation, partnership or other legal entity founded primarily for the purpose of earning income from agricultural production. A majority of the shares must be held by, and a majority of the shareholders must be, close relatives. To qualify, a farm must be lived on or actively operated by one of the related family member stockholders.

"(iii) An organization described in section 501(c)(3) of the Internal Revenue Code of 1954 and exempt from tax under 501(a) of such Code."

Mr. NOLAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota

There was no objection.

Mr. NOLAN. Mr. Chairman, this amendment is very simple in substance, but it is important and far-reaching in effect.

What it does essentially is to prohibit farm subsidy payments to corporate enterprises that are not owned or controlled by farmers. Specifically exempted, of course, under that definition are family farm corporations or family farm organizations.

Mr. Chairman, this amendment has the potential of saving vast sums of money for the Treasury and seeing to it that the farm supports intended in this program to be of assistance to small farmers and family operators will, in fact, go to them, as opposed to going to such firms as Merrill Lynch or Exxon or any other large nonfarm corporation.

That, in short, Mr. Chairman, is the purpose of my amendemnt.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I congratulate the gentleman from Minnesota (Mr. NOLAN) for offering this amendment.

I would like to say that in all the hearings that we have had and also based on the experience that some of us in the Midwestern area have had with proposed operations of farms by large corporations, if we were not able to curtail what they proposed to do, in the future, if the people of this Nation think that the price is high, I assure the gentlemen who are here today that it will rise considerably if the large corporations are able to invest in farming and take over most of the farm operations.

Mr. Chairman, I would further like to point out to the Members that just recently there was a report that the Merrill

Lynch-Hubbard firm which, we thought, had agreed not to go forward with their proposal, is now going full steam ahead, and they propose to purchase massive amounts of farmland throughout the Midwest in order to take over the operations of the farms.

Mr. Chairman, that will be the end. Once this occurs, it will be the end of the family farm operation, and the competition that presently exists in the agricultural industry will fully demise, and we will have only a few firms which will ultimately own most of the farmland throughout the Midwest.

Once they get control of the production of our grain and necessarily of our livestock, they can then control the flow of those supplies, as has been seen in many other instances in this Nation.

In that event, Mr. Chairman, I am afraid that the price of food necessarily, I would say within a limit of the next 4 or 5 years, would more than double.

Again, Mr. Chairman, I commend the gentleman for offering the amendment.

Mr. NOLAN. Mr. Chairman, I thank the gentleman for his support, and I agree with everything that he said.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. FLYNT and by unanimous consent, Mr. NOLAN was allowed to proceed for 5 additional minutes.)

Mr. FLYNT. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Georgia.

(By unanimous consent, Mr. FLYNT was allowed to speak out of regular order.)

AGREEMENT BY LEON JAWORSKI TO SERVE AS SPECIAL COUNSEL TO HOUSE COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT

Mr. FLYNT. Mr. Chairman, I am pleased to announce that Mr. Leon Jaworski of Houston, Tex., a former president of the American Bar Association, and presently a member of the firm of Fulbright and Jaworski, has agreed to serve as Special Counsel to the House Committee on Standards of Official Conduct. This agreement is contingent on only two factors. One, that the Committee on Standards of Official Conduct accept my recommendation that Mr. Jaworski be employed and retained as Special Counsel by a vote of seven affirmative votes at a meeting which I have called for 10 o'clock tomorrow morning. Let me add, parenthetically, that I already have pledges of more than seven votes. The second contingency is that also at the earliest possible time Mr. Jaworski and the committee will agree on a written memorandum of understanding concerning his role as Special Counsel, which memorandum of understanding will define total independence in his role as Special Counsel to this committee.

To further clear up any possible misunderstanding, Mr. Jaworski was offered this position by me, in my capacity as chairman of the House Committee on Standards of Official Conduct. I spoke to him yesterday and I spoke to him again at 4:25 p.m. this afternoon. I believe that we have a complete meeting of the minds. I believe that the interruption of the committee's work was only of a temporary nature and that we can and will proceed to conclude this investigation in the very near future.

Mr. MOFFETT. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Chairman, can the gentleman from Georgia (Mr. FLYNT) describe what he believes will be the difference between Mr. Lacovara's role and Mr. Jaworski's role?

Mr. FLYNT. Only that this time it is going to be in writing instead of orally as it was before. The substance and contents of that agreement will be identical with the one which was entered into with the former Special Counsel who resigned.

Mr. MOFFETT. I thank the gentleman.

Mr. Chairman, will the gentleman yield still further?

Mr. NOLAN. I yield further to the gentleman from Connecticut.

Mr. MOFFETT. How could Mr. Jaworski be discharged, by the chairman, or by the full House, or how?

Mr. FLYNT. Mr. Jaworski will not be discharged by the chairman or the committee.

Mr. MOFFETT. But how could he?

Mr. FLYNT. He will not be.

Mr. RHODES. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the distinguished minority leader.

Mr. RHODES. Mr. Chairman, I would like to congratulate my good friend the gentleman from Georgia (Mr. FLYNT) on the selection he has made. Mr. Jaworski has a reputation that could not be enhanced by my description, but if I had the time I would be glad to try. I think he is one of the more distinguished members of the American Bar Association. I personally am pleased that he has accepted this position.

Mr. FLYNT. I thank the minority leader.

Mr. QUILLEN. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Tennessee, a member of the committee.

Mr. QUILLEN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I want to congratulate the gentleman from Georgia (Mr. FLYNT) upon his devoted and concerted efforts to bring this investigation to a conclusion.

I am happy to report to the Members of the House that this morning I offered a motion, which was adopted unanimously by 12 votes to 0, that the committee proceed and continue full speed ahead with the investigation within the framework of the committee's special staff and counsel, and to hire a new special counsel. I feel that the committee now, without any division, is going full speed ahead, and with the eminent gentleman who is going to assume the position of special counsel in charge, I agree with the chairman, the gentleman from Georgia (Mr. FLYNT), that the investigation will go full speed ahead and come to a conclusion without delay.

Again I thank the gentleman for yielding.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding.

I think the chairman, the gentleman from Georgia (Mr. FLYNT), said a little earlier that Mr. Jaworski could not be dismissed under any circumstances. Did I understand him correctly?

Mr. FLYNT. If the gentleman from Minnesota will yield further, I said that he would not be dismissed.

Mr. WYLIE. The gentleman said he would not be dismissed. Does that mean even if he does not do the job?

Mr. FLYNT. I do not anticipate that anything will arise that would involve a desire on the part of the committee to terminate his services.

Mr. WYLIE. I think there ought to be some condition subsequent to employment. If Mr. Jaworski does not follow through with the job and does not do the job which this House thinks he should do, there ought to be an opportunity for someone to dismiss him.

Mr. FLYNT. If the gentleman from Minnesota would yield further, I will reply that there are times when one has to trust people. This is one of those times, and I trust Leon Jaworski.

I thank the gentleman from Minnesota for yielding.

AGRICULTURAL ACT OF 1977

Mr. HIGHTOWER. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Texas.

Mr. HIGHTOWER. I thank the gentleman for yielding.

Do I understand the gentleman's amendment to apply to any kind of corporation?

Mr. NOLAN. Any kind of corporation where it is not controlled by farmers.

Mr. HIGHTOWER. How does the gentleman define that in his amendment?

Mr. NOLAN. The majority of the controlling interest has to be held by bona fide farmers who are living on, farming the land, or sole proprietors.

Mr. HIGHTOWER. We might have situations where we would have what would be called a family corporation, but the people owning it are landlords and living in another place, perhaps, and farming out or renting out the land, but it is a family corporation. This happens often where you have an estate or trust where they see there would be a tax advantage to incorporate.

Mr. NOLAN. Yes.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. HIGHTOWER, and by unanimous consent, Mr. NOLAN was allowed to proceed for 2 additional minutes.)

Mr. NOLAN. In that instance as long as it is a family farm corporation, they would be entitled to payments. If the membership were made up of nonfamily, nonfarmer members, such as the Continental Illinois Bank & Trust Co., that type of trust would not be eligible.

Mr. HIGHTOWER. I think I understand what the gentleman is doing, but

how does he actually define it, or does he define in his amendment what a family farm corporation is?

Mr. NOLAN. Yes. It is a corporation where the controlling stockholders are members of the family farm.

Mr. HIGHTOWER. That is it?

Mr. NOLAN. If a family wants to incorporate and operate a farm, they are entitled to payments and they are enentitled to benefits.

Mr. HIGHTOWER. Even though they may not be actually out there farming it themselves?

Mr. NOLAN. The corporation may be acting as a landlord and renting out the farm, but they would still be entitled to the payments.

Mr. HIGHTOWER. I thank the gentleman.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Washington.

Mr. FOLEY. I thank the gentleman for yielding.

I am concerned about the gentleman's amendment and would like to ask him a question. He suggested a corporation, partnership, or other legal entity comprised of more than one person is excluded if the majority interest in such legal entity is held by stockholders, partners, or persons who themselves are not engaged in farming operations as a sole proprietorship. Suppose we have farm A that is operated by the brothers Brown in a partnership, and farm B operated by the brothers Green in a partnership, and farm C operated by one farmer Brown and one farmer Green. Is it not true that farm C would not be eligible for payments because the majority of the stockholders do not farm any single farming operation as a sole proprietorship?

Mr. NOLAN. No; that is not correct because they are all sole proprietors.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

(On request of Mr. FOLEY, and by unanimous consent, Mr. NOLAN was allowed to proceed for 1 additional minute.)

Mr. FOLEY. Mr. Chairman, if the gentleman will yield, I would point out the amendment reads:

"(4) No payments shall be made under the annual programs established under the Agricultural Act of 1949, as amended, for the 1978 through 1981 crops of wheat, feed grains, upland cotton, and rice to:

"(a) a corporation, partnership, or other legal entity comprised of more than one person if a majority interest in such legal entity is held by stockholders, partners, or persons who themselves are not engaged in farming operations as a sole proprietorship;

Mr. NOLAN. That is correct.

Mr. FOLEY. That means they cannot receive payments unless they are engaged in farming operations as a sole proprietorship.

Mr. NOLAN. Yes; it does. They can join in other cooperatives.

Mr. FOLEY. I understand. But, going back to my example, Brown and Green, who own farm C, each have a farm—farm A and farm B in my example—in partnership with a brother. Neither is engaged in farming operations as a sole proprietorship as required by the amendment. They are engaged in farming operations as partners in a partnership. They would be denied payments under this amendment. Is that not correct?

Mr. NOLAN. If they were engaged in a number of farm corporations and they themselves were not the sole proprietor of any one farming operation, then that person would clearly be defined as an investor in the operation and would not be entitled to payment. He is not actively engaged.

Mr. FOLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the Committee on Agriculture had extensive discussions surrounding proposals to eliminate certain types of organizations and entities from the farm payments. One of them was an earlier different amendment suggested by the gentleman from Minnesota.

The problems that are created by amendments of this kind are so complex that it is not easy to know who might be affected. One of our members of the committee offers an amendment that specified that no alien could receive a payment and no organization which included an alien could receive a payment. It sounded good on the face of it, but we have family trusts around this country of various kinds involving a brother or sister who may be a citizen of another country, Sweden or Germany for example. The injustice would be the application of such an amendment to the whole trust. In the case of this amendment, for example, brothers in a family farm could not form a partnership with a brother and a sister who farmed together in a separate farm. One partner from each group could not join in a new partnership and receive farm payments because not one of those individuals, even though they number only five, farms as a sole proprietor. Thus, the majority of partnership interest in the final or third farm are not in fact sole proprietors.

That is just one of the examples of complication we invite if we adopt this amendment.

It is an effort to get at a problem which in my judgment is not a severe problem at this time and I do not believe it is going to be a severe problem in terms of what the gentleman from Missouri talked about for example. That is an entirely different issue of the so-called ag land trust. This has nothing to do directly with that issue.

The amendment extends much further and affects a number of different individuals and groups of individuals which may operate small farms.

Also, if I can suggest it, I think there is an easy way around this amendment for corporations. All they have to do is cash lease property to a second party who would be eligible for a payment. The payments could be received through the rent charged in the lease. So it does not even accomplish what it is designed to do.

I really believe we would be much better advised to get some serious study undertaken of the effects of this kind of an amendment to the bill and to the program, and I ask the Members to defeat the amendment. I will undertake as chairman of the committee to ask the Department of Agriculture to conduct a thorough study of the impact of this kind of amendment in the bill.

If it can be worked out, the gentleman from Minnesota can introduce separate legislation to consider the issue. I hope we will not engage at this time in this complicated effort that I think will not achieve its purposes, but also create dangerous problems.

Mr. SISK. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from California.

Mr. SISK. Mr. Chairman, let me ask my colleague, if I can, would not the problem of policing such an amendment really create tremendous confusion?

I totally agree with the chairman in the gentleman's analysis of this. I sympathize with the problem that some people feel about certain individuals going out and buying huge pieces of land. There is a way to get to that, but the cost of qualifying who could buy and who could not would be unbelievable. I just raise that as an issue.

I hope this amendment will be defeated. I do not want all our farmers to go into corporate farms and corporations.

Mr. FOLEY. Mr. Chairman, the gentleman talks about these huge multinational corporations; but this bill would affect all small family partnerships. They would be eliminated from participation in the program under the amendment.

Mr. NOLAN. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Minnesota.

Mr. NOLAN. Mr. Chairman, the gentleman from Washington is quite correct. If you have farm A owned by two members of family and have a farm here and you have another couple members of the family that have another farm——

The CHAIRMAN. The time of the gentleman will yield further—these four

(At the request of Mr. NOLAN, and by unanimous consent, Mr. FOLEY was allowed to proceed for 2 additional minutes.)

Mr. NOLAN. Mr. Chairman, if the gentleman will yield further—these four people would then get together and form another third farming corporation and are eligible for payments on all three farming operations, this amendment does not help them, because, clearly, they would not get payment on the third corporate enterprise.

What the amendment is designed to try to do is stop the proliferation of the ever increasingly large scale nature of our farming operations in this country, whether held by families or held by Exxon or Continental or other large nonfarm corporations.

Mr. FOLEY. Mr. Chairman, if I can regain my time, this is precisely what I am concerned about. It does not say how large the farm has to be. Family "A" can have 100 acres and family "B" can have 100 acres and the "C" farm 150 acres and they are still ineligible. That is not Exxon or Tenneco or any huge vertically stratified organization. It is just a couple

families who have joined together in buying and operating another farm.

The fact of the matter is that under the technical nature of this amendment, we get the kinds of inequities that I do not think any Member would want to go home and explain to his constituents. Why those two families of brothers and sisters could not get together and buy a farm, even a small farm, and be eligible for payments. It just indicates the kind of technical problems we are going to reach if we adopt amendments of this kind. We would deny payments to individuals and people who are not multinational corporations, but individual families that just chose to farm with their brothers and sisters or a cousin or a neighbor.

We do not even have a limit here in terms of size. This is going to become the thrust of many individual injustices, while the large corporation it is designed to eliminate will have plenty of ways to get around it.

Mr. JOHNSON of Colorado. Mr. Chairman, I move to strike the requisite number of words. I rise against the amendment.

Mr. Chairman, I would like to emphasize what the chairman has said with respect to section B of the amendment. Those of us who have had anything to do with probating farms and estates when the farmer chooses to leave his farm to his children, know he frequently sets up a trust. The trust operation would be vitally affected by this particular amendment. It would affect all estate planning that goes on with the small farmer as he tries to leave his estate to his children and leave it intact so that the farm can be operated as a unit; nevertheless, the proceeds would be divided among his children. All that would be affected by this seemingly inocuous amendment. It is so far-reaching that it would require the whole rewriting of our estate tax laws, in addition, by the adoption of this amendment.

Mr. Chairman, I urge that we reject the amendment.

Mr. GRASSLEY. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment of the gentleman from Minnesota (Mr. NOLAN).

Mr. Chairman, if we look at this amendment and tear aside all the trappings of opposition to this amendment, it basically gets down to the philosophical approach of whether or not we feel anything ought to be done about the problem of a lot of great big nonfarm interests reaping benefits from a farm program that was meant to preserve the family farmer, the backbone of American agriculture, that produces cheap food for the American consumer.

I do not know, as a nonlawyer, whether Mr. NOLAN's amendment is a total solution to this problem, but I know that he is the only one that has tried to do something about it. I have listened to the opposition to the amendment on the floor, and they have not come up with any sort of suggestion as to where he is wrong, but they raise all sorts of scare tactics in opposition. It boils down to that.

So, I am rising in support of this amendment. It should be adopted because it focuses deficiency and disaster payments on the people the commodity programs are designed to assist in the first instance. There is no reason to give investment trusts or huge farm corporations the financial incentives of program payments.

Specific organizations such as the tax exempt trusts that have been mentioned here have been withdrawn nationally, but others appear to be rising in their place. Of course, shutting off farm programs is not going to stop these organizations entirely, just as it will not stop any corporation which really wants to get into agriculture. But, it surely ought to act as a disincentive.

It would reduce profitability over the long term, and those with the sharp pencils and the calculators who are looking out for the interests of people in nonfarm categories who want to get into agriculture, it will make it less practical for them to advise investments in agriculture.

Farm program benefits should be directed to the family farmer, to the folks who depend upon agriculture as the prime source of their income. They are the ones who do not have the resources to ride out extensive periods of bad weather or prices, but they can survive as a result of this program. The trusts can take care of themselves.

The Nolan amendment will guarantee that only those with the greatest need, who contribute the most to agriculture, will receive the protection the American taxpayer offers in major farm legislation like this.

Mr. MATHIS. Mr. Chairman, I move to strike the last word.

I would like to ask the author of the amendment how many corporations he thinks would be affected by his amendment.

Mr. NOLAN. If the gentleman will yield, according to the Congressional Research Service, there are about 2,000 very, very large corporations in America of the mathematical type that has been described on the House floor. They account for about 3 to 5 percent of production. They could possibly account for as much as $100 million in farm price support payments.

Mr. MATHIS. I would like to say to the gentleman from Minnesota that I—and I think most of the other Members of this House—certainly concur with the objective he has; that is, to do away with these large corporations receiving payments. We have heard these horror stories, and I am surprised that the gentleman left out the Queen of England. I understand she owns some land in Mississippi and is supposed to get payments on some cotton she grows there.

The problem with the amendment is that it simply will not work because it is not drawn in such a way that it does exclude the people that I think the gentleman wants to exclude. One thing about this amendment is that it sounds so doggoned good. When it comes time for a vote the gentleman is going to stand at the door and say, "Vote against big corporations." That is not the way it is going down.

The gentleman is voting against small corporations, against family corporations and against the family farms the gentleman wants to help as well as I do. We do not have any prohibition against doctors incorporating and being paid by medicaid and medicare funds. We do not have any prohibition against Lockheed or other military contractors being paid.

What the gentleman is really doing here today is laying on family farmers who have decided, under the tax laws this Congress has created, that they would be better off to be incorporated. I urge that we reject this amendment.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. MATHIS. I yield to the gentleman from New York.

Mr. DOWNEY. In Mr. NOLAN's 3 by 5 index card that was just handed to me, he has listed a number of the specific exemptions the gentleman just talked about. I am not an expert in this matter. I came to the floor to listen. I listened to my friend from Iowa passionately describe the fact that this is one of the few instances in which somebody wants to do something for the small farmer.

The gentleman suggested that this would hurt the small corporate farm, yet I see on this 3 by 5 index card that he specifically exempts: First, farmer cooperatives; second, incorporated farm operation; third, a tax-exempt charitable organization.

What I would like to know from the gentleman is this: How does this hurt the small corporate farmer and how does this hurt the small farmer specifically exempted?

Mr. MATHIS. The first point I would like to mention is that I concede that the gentleman is not an expert. If the gentleman had been present during the debate with my distinguished chairman, we went over this whole thing. He outlined several instances of farmer brother Brown and farmer brother Green, and farmer Green and farmer Brown attempting to incorporate. I think it is very real that we do in fact hurt the small corporate farmer.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield further?

Mr. MATHIS. Yes, of course, I yield to the distinguished gentleman from New York.

Mr. DOWNEY. Mr. Chairman, I thank the esteemed gentleman, for whom I have the highest regard, for yielding to me.

I heard the distinguished chairman describe farmer Brown and farmer B and C and the description of the case example. What I would like to know is whether or not such an entity exists. It is one thing to think of a legal fiction and come up with an example.

Mr. MATHIS. I would say that of course it exists.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. MATHIS. I yield to the gentleman from Washington, the distinguished chairman of the committee.

Mr. FOLEY. I thank the gentleman for yielding.

Mr. Chairman, I think if the gentleman would go out in the wheat, corn,

cotton, and rice areas of this country he would find many, many farms which are operated and jointly owned by brothers and sisters, by relatives. And this has happened as a result of inheritance of land. They also may engage in a joint ownership of another piece of property with a third family or a second family. And I guess what I have to compliment the gentleman from Minnesota on is that he was very candid. He said:

Yes, we will deny payments to those families of two or three who join together in a partnership—just accidentally none of them are single proprietors—because we do not want to proliferate land ownership.

There will be an attempt, perhaps, on the part of somebody to offer an amendment to straighten this out. I detect a certain amount of concern among the sponsors. That is just one example of writing these amendments on the floor without careful analysis, which is going to do an injustice and create a problem.

Mr. PANETTA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I have the greatest respect for the chairman of the committee and his position opposing this amendment. At the same time, I think he has engaged in some very good lawyer tactics by pointing to one small example within the amendment and overlooking the fact that we are primarily dealing with the 2,000 nonfarm corporate interests which are engaged in agriculture. I think the Members of this body have to make a basic philosophical decision and choice between large nonfarm corporate interests and family farming. There is a real crunch with the family farmer. We engage in a great deal of rhetoric, both in the committee and on the floor, with regard to losing family farmers. In this session of Congress alone, we are going to lose something like 40,000 to 50,000 family farmers. And it is a continuing crisis in this country. We have to take some steps, but every time we start to take some steps everybody can find some reason why nothing should be done. But we have to draw the line. We have had major proposals in this country now to buy vast areas of prime agricultural land by investment interests and then lease that property back to tenant farmers.

It is a return to the feudal system. So the basic decision that this body must make is whether indeed we are going to have family farms or whether we are going to have large-scale corporate farming in this country. This amendment tries to deal with one element of it, which is the payments. Let me tell the Members that nonfarm corporate interests also can get tax advantages, they can get the value of the land, they get the agricultural products, and they get Government subsidies. We are dealing with one small element, the payments issued by the Department of Agriculture. I think that is one area of advantage that we do not have to give to nonfarm corporate interests. That is what this amendment tries to do. That is why I support it and that is why I urge the Members to support it.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Chairman, I certainly commend the gentleman from Minnesota in what he is trying to do. I must agree with the chairman in what he says. It appears to me there are many, many farms in this country today that are family farms, that are second, third, and fourth generation farms, which have been in the family.

But there is only one person working that farm. Now, his two brothers and a sister may have equal interests, but they are off in another city, and hence the controlling interest of that small family corporation is not held by farmers.

We have literally hundreds of these farming operations in various trusts and partnerships and corporations throughout the United States.

Mr. Chairman, as I understand it, the way the gentleman's amendment is worded, all of these farms, which are family farms, would be excluded.

Mr. PANETTA. Mr. Chairman, that is not my understanding. My understanding is that this applies where there is no farmer-related interest in the corporation. That is what we are trying to deal with. But where farmers are involved in the corporation, where they form the corporation and are literally working the land as a corporation, then they are entitled to the payments.

Mr. HUCKABY. Yes, but if the gentleman will yield further, let us say one has two brothers and a sister who inherit the farm; one brother operates the farm and he has another brother who is on another farm and, let us say, another brother and a sister somewhere else. They each have equal ownership of the corporation. The corporation is not controlled by farming interests; they have other interests, and I do not believe they would be eligible under this amendment.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the chairman of the committee.

Mr. FOLEY. Mr. Chairman, if the gentleman is accusing me of a lawyer-like tactic in trying to think up one kind of a problem, let me say that I can think of a lot of problems here.

If the gentleman wants me to give examples of problems, let us take a widow. She inherits land from her husband who died and who was a farmer. She inherits one-half of the property, and her two children would, let us say, each have a one-quarter interest. It is her farm, and the children farm the land. What would be the effect of this amendment?

Mr. PANETTA. Mr. Chairman, if the gentleman will allow me to answer that, the interpretation of the author of the amendment is that in that instance they would be exempt from the amendment because they are in fact involved in a farming operation. Her interest would at least be related to a farming operation.

Mr. FOLEY. She would be related to somebody engaged in a farming operation, but she is not engaged in a farming operation.

Mr. Chairman, if we proceed on the basis that a person is eligible if she is related to somebody engaged in a farming operation, we are going to have hundreds of thousands of administrative determinations in a multitude of varying individual situations or types of farm ownership as to whether or not this amendment applies. I would hope that we have a clear rejection of this amendment and that a study of its consequences be made. The gentleman can then, if he so desires, introduce appropriate legislation and bring it out with some assurance that the problem has been properly studied and is being properly addressed.

Mr. PRESSLER. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the amendment.

Mr. Chairman, it seems to me that we are faced with the situation in rural America that we now have the last generation of family farmers, and unless some action is taken to preserve the family farm, we will have only corporate agriculture. In that event consumers will certainly suffer ultimately because corporate agriculture will be far less efficient and there will be far more of an inclination toward price-fixing.

Mr. Chairman, I commend the gentleman from Minnesota (Mr. NOLAN) for offering the amendment, and I associate myself with the remarks of the gentleman.

Mr. JOHNSON of Colorado. Mr. Chairman, will the gentleman yield?

Mr. PRESSLER. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Chairman, I thank the gentleman for yielding.

Let me just suggest that the Members read the language of the amendment. The chairman of the committee, the gentleman from Louisiana (Mr. HUCKABY), and I have all laid out this situation and explained that we are not talking about corporate farms. We are talking about a situation where a man dies and he leaves half of his farm to his wife and the other half to his kids, and then we are cutting them out. Let us just read the language of the amendment.

The committee chairman is exactly right, and the gentleman from Louisiana (Mr. HUCKABY) is right. This has nothing to do with doing away with corporate farming, and I cannot do anything more than to suggest that if the Members will read the language, then they will know that the chairman of the committee is correct in what he says.

Mr. PRESSLER. Mr. Chairman, the legislative history will show the sponsor of the amendment has stated such a situation is not covered by his amendment, and the legislative history will clearly show to anyone looking for it that such a situation is not covered. The gentleman from Minnesota (Mr. NOLAN) has pointed this out. Therefore, I strongly support his amendment.

Mr. MOFFETT. Mr. Chairman, will the gentleman yield?

Mr. PRESSLER. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Chairman, I wish to associate myself with the remarks of the gentleman from South Dakota (Mr. PRESSLER) and say that I hope we win this amendment, but if nothing else happens, I hope that this makes a solid record. I think it does accomplish something for the concern of family farmers, and I do not think that concern has been met.

I must say that I have the highest respect—and I mean this very sincerely—for the chairman of the committee, but I hope the gentleman will give us some suggestions as to how we can move away from the dangerous trend of wiping out the family farms of this country. I do not believe his suggestions so far have accomplished that result, and I hope the Members who have spoken on this subject today will make some constructive suggestions.

Mr. WIRTH. Mr. Chairman, will the gentleman yield?

Mr. PRESSLER. I yield to the gentleman from Colorado.

Mr. WIRTH. Mr. Chairman, I have a question to ask the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Yes.

Mr. WIRTH. In the event that this amendment does not pass—and I certainly hope it will pass—perhaps the gentleman would agree with me that maybe we ought to have an amendment that will require all the presidents of the corporate farming operations to work off their subsidy at the minimum wage in a public service job.

Mr. MOFFETT. If the gentleman will yield, I think that might be a good idea.

Mr. WIRTH. I thank the gentleman.

Mr. PRESSLER. Mr. Chairman, I yield back the balance of my time.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I voted in favor of the Findley amendment in order to limit payments because I believe a limit is necessary; and I certainly would like to vote for an amendment that would limit payments to corporate farmers. However, I think we ought to be sure we know what we are doing; and therefore, we should go along with the chairman of the committee, who assures us he is going to look into this matter and have the Department of Agriculture study it to find out exactly what this amendment would do. We do not want to make a serious error in our efforts to limit these payments.

Therefore, Mr. Chairman, I would say that we should support the committee; the chairman has assured us he will make certain that what we should do will be correct. This is the kind of amendment on which it is easy to say: "We are trying to eliminate the corporate farmers." People are automatically going to vote "yes." We may well injure some family farmers whom we do not want to injure.

However, I would like to speak to another problem we have, and that is the cost involved in this farm bill. I would like to inform Members of the budgetary implications of the Agricultural Act of 1977 because it includes entitlements for farm commodity supports and food stamps. This is one of the most important spending bills the Congress will consider this year.

Spending for farm commodities is included in the agriculture function. For agriculture, the first budget resolution provided $2.2 billion in budget authority, and $4.35 billion in outlays.

Mr. Chairman, let us not concern ourselves so much with the budget authority figure. The driving figure in agriculture is outlays. We are now at $4.3 billion, about $2 billion over what President Carter's original estimate of outlays was on February 22. However, we estimate that we would need, because of the crisis in agriculture, an additional $2 billion in outlays this year, bringing the total outlays up to $4.35 billion.

Up to this point, the House has already provided $2 billion in authority and $4.1 billion in outlays. The budget authority amounts were provided for in the agriculture and related agencies appropriations bill. Outlays, actual spending, are attributable both to that bill and to permanent appropriations.

The commodity support provisions of H.R. 7171, together with reestimates of spending for existing support programs, would result in our exceeding the outlay targets for agriculture set in the first budget resolution for fiscal year 1978.

The $4.1 billion in outlays have already been provided for in this function, primarily from the agriculture appropriation bill and permanent appropriations.

This bill would authorize appropriations of $70 million for agriculture research and $357 million in additional price supports for commodity programs for the 1977 crop, payable in fiscal year 1978. In addition, spending for farm commodities under existing law has been reestimated upward in the amount of $521 million.

The result, if H.R. 7171 is adopted as reported, will be as follows: Budget authority for agriculture will be below our first resolution target; but outlays for agriculture will be $700 million above the first budget resolution budget.

Mr. Chairman, if we go along with the committee bill, that will be one thing; but if we add amendments for additional commodity price supports, we are going to increase that $700 million substantially.

Obviously, any amendments to increase supports will add to the amount that outlays already exceed the target.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. GIAIMO was allowed to proceed for 2 additional minutes.)

Mr. GIAIMO. The budget situation is much simpler with respect to the food stamp program, which is included in the income security function—function 600.

The first budget resolution assumed $5.358 billion for this program for fiscal year 1978. The bill being considered today would provide nearly that exact amount.

Mr. Chairman, at the proper time I shall seek permission to include at this point the Congressional Budget Office's 5-year cost estimates for farm commodities resulting from this bill, the Senate bill, and the administration proposal.

(The information referred to is as follows:)

CBO ESTIMATES OF COMMODITY CREDIT CORPORATION OUTLAYS FOR PRICE SUPPORT AND RELATED PROGRAMS

[In billions of dollars]

Mr. GIAIMO. Mr. Chairman, all I am urging the Members to do here today is to look carefully at all the amendments that are offered to the committee bill. The gentleman from Washington (Mr. FOLEY) has been trying to hold the line, quite properly in my opinion. We recognize that there is a very real crisis in agriculture, a crisis brought about by the bountiful crops that we have had, particularly in wheat and corn and feed grains. But I am urging Members to concern themselves because there are many amendments that are going to be offered to increase payments by the Federal Gov-

ernment, particularly with respect to the 1977 crop, which has already been planted.

I would urge the Members to look carefully at whatever they do here today. Whatever we do here today, more than anything that we have done all spring and summer, is going to affect the fiscal year 1978 budget. It is going to affect substantially that massive budget deficit of from $61 to $64 billion.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment offered by the gentleman from Minnesota (Mr. NOLAN).

Mr. Chairman, it is clear that much of the objection to this amendment has not really referred precisely to the amendment, and I will yield to the gentleman from Minnesota (Mr. NOLAN) to explain the situation.

Mr. NOLAN. Mr. Chairman and members of the committee, I was concerned as to the type of person or corporation covered, and in reference to the situation described by Chairman FOLEY, my amendment defines it as:

Any family farm corporation, partnership or other legal entity founded primarily for the purpose of earning income from agricultural production. A majority of the shares must be held by, and a majority of the shareholders must be, close relatives. To qualify, a farm must be lived on or actively operated by one of the related family member stockholders.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, I want to say that the gentleman from Minnesota unintentionally misspoke himself in explaining the amendment. He said that they have a particular provision which exempts the family farm corporation, and family farm partnerships or other legal entities. There is not the word "partnership" in my copy of that provision.

Mr. NOLAN. There certainly is.

Perhaps this is where the confusion arises. I do not think the gentleman from Washington has a correct copy of the amendment.

Mr. FOLEY. I have the copy offered by the gentleman from Minnesota, and if it is not correct, then I am not aware of it.

Mr. NOLAN. I am sorry if the gentleman does not have a copy of the amendment that is at the desk.

I would like to reclaim my time, if I may, from the distinguished Chairman.

I would like to conclude by reading (c):

"The provisions of this subsection shall not prohibit program participation by:

"(i) Any farmer-owned and controlled cooperative, corporation, or association which meets the requirements of the Act. . . .

"(ii) Any family farm corporation, partnership or other legal entity founded primarily for the purpose of earning income from agricultural production. A majority of the shares must be held by, and a majority of the shareholders must be, close relatives. To qualify, a farm must be lived on or actively operated by one of the related family member stockholders."

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. I yield to the gentleman from Washington.

Mr. FOLEY. I thank the gentleman for yielding.

Will the gentleman agree that this is not the amendment that was printed in the CONGRESSIONAL RECORD on July 15, 1977?

Mr. NOLAN. The amendment that is sitting at the desk is exactly the same as the one that was printed in the RECORD last week, with the exception that after the word "corporation" we have inserted "partnership or other legal entity," and that is just merely to make it conform to the proper language that is required in the law.

Mr. FOLEY. Then the copy I was provided and the copy that was printed in the RECORD is not the copy the gentleman provided the Clerk.

Mr. NOLAN. The right copy is the one I submitted to the desk and asked this House to consider. I am sorry if somebody gave the gentleman from Washington the wrong copy of the amendment.

Mr. SISK. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to have the attention of my friend, the gentleman from Oregon (Mr. WEAVER). I think he rose in support of this amendment.

Mr. WEAVER. Yes, sir.

Mr. SISK. How many people does the gentleman assume it is going to take to police this? Where are we going to get the people? Where are they going to have the responsibility? Does the gentleman have any idea?

Mr. WEAVER. If the gentleman will yield, I have been told that on the third floor of the Secretary of Agriculture's building there is a whole bunch of people available to do this.

Mr. SISK. Does the gentleman mean they are not working at the present time?

Mr. WEAVER. They have the ability to cope with it.

Mr. SISK. I beg the gentleman's pardon?

Mr. WEAVER. The Department of Agriculture certainly has the bureaucracy to cope with this issue.

Mr. SISK. I just seriously doubt that. I wonder if the gentleman has any idea at all what he is talking about here when he starts policing a program which is proposed in this amendment. It means that every conceivable agricultural producer in America is going to have to be checked as to who owns it. They are going to have to make a search of the title as to the ownership of the area, and the whole works. In other words, as I indicated to the gentleman a few moments ago in conversation with my good friend, the gentleman from California (Mr. PANETTA), I think I am just as strongly in support of the intention of the gentleman from Minnesota as I think is my colleague, the gentleman from Oregon, or anyone else. I am totally opposed to the so-called-in-California farm term Tenneco's, the Tarrent County land, and that type of ownership. Very frankly, it has already been proven that they were not really feasible operators. Fortunately, what we have seen is some of these organizations getting out of farming, and we are going back, I think, more to what one might call the small corporation.

This appears to be almost or in fact is what is totally a legitimate business operation in this country. Today farming is definitely a business. I assume that all my friends are totally in agreement on that. If it is not operated as a business they soon go out of business. I simply see nothing wrong with a family which is operating a family corporation.

But there is no question in my mind, in reading this, that the imposition of additional duties on the department will mean probably thousands more new people who will have to be brought aboard to police the whole program.

Again I would hope that the amendment would be defeated.

Mr. POAGE. Mr. Chairman, I move to strike the last word.

It seems to me we are overlooking the very basis of this bill. The whole basic philosophy of this bill is that we are going to try to balance supply and demand; that we are going to try to produce about the right amount of these commodities. Now how do we go about doing it? We do not go about doing it with compulsion. We go about doing it basically by saying that if they comply with the regulations set up by the Secretary of Agriculture we will make some payments to them.

There are some corporations which own some land in the United States, some agricultural land. It produces just the same as anybody else's land. We are trying to make all of the agricultural land in the whole United States participate in the program. To get land in the program we offer the producers an inducement by saying we will make these payments if they come in the program and are a part of the program.

We need to have these corporate lands in, just the same as we need to have everybody else in the program. How are we going to get the corporations to come into the program if we say they cannot draw any of the benefits of the program? Are we going to deny them all of the benefits but we expect them to make all of the contributions that anybody else makes?

Now, unless we are going to make this a mandatory program and impose criminal penalties, how are we going to get the cooperation that is essential to make this program work?

If we leave the corporate lands out of the program we will be weakening the entire program. I do not know what percentage these corporate lands make up, but whatever percentage it is, it is large enough to mean that we are going to have to take more of the privately owned lands out of production if we are going to achieve the balance we are trying to achieve. That means we have to take that fellow who has only 40 acres and instead of making him reduce by 5 acres we make him reduce by 6 acres.

Let us be fair about it. On whom does the burden fall? The burden ultimately falls on the smaller farmers because we are going to make them make larger contributions to make up for that land

that we are not getting into the program because we are afraid or unwilling to pay the corporation the same as we pay anybody else.

I think we are tending to break down the entire program. I do not think there is enough corporate land in the entire United States really to break down the program, but the whole thrust of this amendment is to make the whole program less effective.

Mr. CUNNINGHAM. Mr. Chairman, I move to strike the requisite number of words.

One of the things that concerns me, and I certainly agree with the intent of the gentleman who has offered the amendment, to protect the small farmer, but in listening to the chairman I am wondering if he is really going to do that, and therefore I wonder if the gentleman from Minnesota who offered the amendment would respond.

Mr. NOLAN. I will respond to the gentleman.

Mr. CUNNINGHAM. Suppose we have a corporation X which has 30,000 acres and they are farming it and they go ahead and lease it out to the gentleman for a percentage lease and he goes ahead and farms it. He as an individual would be eligible under the amendment to receive the payment?

Mr. NOLAN. I would be eligible. The corporation is not.

Mr. CUNNINGHAM. The corporation is not. The corporation has rented the gentleman the land.

Mr. NOLAN. But the lessee or renter would be eligible for payment.

Mr. CUNNINGHAM. And it is agreed the person operating the land who has leased the land would receive the benefits?

Mr. NOLAN. That is right.

Mr. CUNNINGHAM. Therefore if he had the right type of lease the corporation could be as well off. The rent that is paid by the individual after receiving the benefits is still deductible to him, not taxable to him, but it is income to the corporation, and therefore I wonder whether really we are getting to the root of what the gentleman wants to get at?

Mr. NOLAN. Well, we think we are, because the payment is made directly to the farmer and he singularly benefits from it, not at the beginning of the year, because they do not know if it will be required or not. A lot of these payments are disaster payments. It would be very difficult to factor that in.

Mr. CUNNINGHAM. Mr. Chairman, the gentleman would agree if somebody would be unscrupulous, that we would not get at what we are trying to get at.

Mr. NOLAN. We are getting at that. We do realize that many farmers in an effort to get started do not have the capitalization necessary to go out and buy a farm in its entirety. They find it necessary to rent land from absentee landlords and larger enterprises. As was said earlier, there are many advantages that corporations have, tax advantages, advantages of vertical integration. One of the advantages that accrues almost year after year is some form of disaster or deficiency payments. The gentleman from Texas (Mr. POAGE) cited the example of a set-aside. That does not occur anywhere near as much as the deficiency and disaster payments would occur.

While we think this does not solve the problems of nonfarm corporations in agriculture, we are taking away one little benefit that accrues to them now. We think it is a step in the right direction. Although it does not put an end to corporate agriculture, we do think it represents a good start.

Mr. CUNNINGHAM. Mr. Chairman, I thank the gentleman for his answer. I think the gentleman does agree with me.

I would like the RECORD to show that it could pass through to these corporations.

Mr. Chairman, I yield to the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Chairman, the gentleman from Washington has described another problem. In the present circumstances a landlord receives a share of the crop and is usually considered a producer for the purpose of receiving a share of the payment. If the amendment were adopted, the landlord, the corporation in this amendment, would change to a cash lease, and lease out the land at a higher rate. The tenant would take all the payments, pay higher cash lease and it would, in effect, pass all the payments to the corporation, notwithstanding the amendment.

It is very difficult to draft this kind of amendment without doing real harm, so that we do not harm those people not intended to be harmed.

We need a real study to find out the impact before serious legislation such as this is enacted.

Mr. Chairman, I thank the gentleman from Washington. I hope the Members will reject the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. NOLAN).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. NOLAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 199, noes 207, answered "present" 1, not voting 26, as follows:

ANSWERED "PRESENT"—1

Runnels

NOT VOTING—26

Badillo	Flippo	Marks
Bevill	Ford, Mich.	Murtha
Bolling	Howard	Pepper
Brademas	Hyde	Pressler
Broomfield	Koch	Stokes
Burke, Mass.	Lent	Teague
Collins, Ill.	Luken	Wilson, C. H.
Dent	McClory	Wright
Dickinson	McKinney	

The Clerk announced the following pairs:

On this vote:

Mr. Burke of Massachusetts for, with Mr. Teague against.

Mr. Ford of Michigan for, with Mr. Bevill against.

Mr. Koch for, with Mr. Pepper against.

Mr. Badillo for, with Mr. Brademas against.

Mr. PRICE and Mr. CONYERS changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. FITHIAN

Mr. FITHIAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FITHIAN: Page 2, line 3, insert "SUGAR," immediately after "FEED GRAINS,".

Page 2, line 13, add a new paragraph as follows:

"(2) The total amount of payments which a person may receive under any program established under the Agricultural Act of 1949, as amended, for sugar shall not exceed $50,000."

Mr. FITHIAN. Mr. Chairman, I would ask the House to support this amendment.

The amendment is one which would limit the payments on sugar, which is under a proposed regulation by the Department of Agriculture. The proposal is to subsidize sugar at the rate of 2 cents per pound.

I would point out and I hope that my friend, the gentleman from Illinois (Mr. FINDLEY), would share with the House a little later a letter from the Comptroller General in which the Comptroller General says that there is no legal basis for such payment.

I would add to that, that by offering this amendment—and I want the RECORD to show this—I do not give any legal basis nor any indication that there is intention to show a legal basis for a payment which is now being proposed, which I believe to be without any basis in law.

I am joined in that particular opinion by our negotiator, Robert Strauss, who just a couple of hours ago told the Committee on Banking, Finance and Urban Affairs at a hearing,

We are going to have to come up with a better program, hopefully by the end of the week.

He went on to speak of the GAO ruling by saying about the GAO, "I think they're dead right on that."

Mr. Chairman, the Secretary of Agriculture has indicated that he would ask for an Attorney General's opinion on this matter. If by some chance that opinion should come in and rule that such payments are in order, let me point out to the House what we are going to be doing with the 2-cent subsidy under the proposed arrangement by the administration, without this limitation and without some other limitation. We are going to be paying firms at the rate of $14 million, $10.8 million, $9.6 million, $8.8 million, and $5.7 million. That is the level of payments which are construed from the proposal by the Department of Agriculture.

I do not believe that the Congress is ready for that.

I do not construe the farm program in any sense to be a program of that dimension.

I would point out that—unless I am wrong, and the gentleman from Connecticut (Mr. GIAIMO) chairman of the Committee on the Budget can correct me if I am—that there is no money in the proposed budget resolution that would take care of the estimated outlay. It is estimated to be, by some—and I do not have these figures accurately and conclusively—but it could be almost a billion and some estimate it could be as low as a quarter of a billion.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, let me state that the first budget resolution did not include in it any funds for 301 payments on sugar, which are estimated to be somewhere in the neighborhood of $200 to $240 million. They were not included.

Mr. FITHIAN. I thank the gentleman from Connecticut.

Mr. Chairman, it has been said that this limitation would destroy the sugar beet industry. That simply is not true. The average sugar beet grower would feel no impact through the payment limitation at all, $50,000 would be sufficient to cover their losses.

Horace Godfrey, vice president of American Sugar Cane League, said:

Louisiana's growers do not favor subsidy payments, but tariffs and restrictions on the amount of sugar that can be imported.

And I can support that opinion.

What I would argue against is a situation in which we get the House of Representatives in a position of laying out payments. I will concede to the chairman, whose judgment I trust and respect a great deal, that the present bill does not address itself to sugar, that is correct.

This is, however, a germane amendment because it is an amendment to limit payments. And simply because the present agricultural legislation does not limit payments, does not deal with sugar, does not mean that we cannot deal with it here.

I would urge, then, that when we consider this present assistance to consider whether or not we really want to lay out $14 million of the taxpayers' money to AM–FAX, or another $9.5 million to another company or another $8.1 million to Brewer & Co., and so on.

We will hear in the debate today undoubtedly that this will ruin the sugar cane industry in Hawaii. I personally do not believe it is correct.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. FITHIAN was allowed to proceed for 1 additional minute.)

Mr. FITHIAN. This argument that it would ruin the industry is the same argument that was offered to Theodore Roosevelt at the turn of the century wher. we started talking about a sugar program.

I believe those who are interested in keeping the farm bill in line and keeping it from being vetoed, and keeping from an overextended budget, should very seriously consider whether or not this House should limit payments in sugar to $50,000.

I would prefer we changed them to nothing.

Mr. BOWEN. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from Mississippi.

Mr. HUCKABY. Mr. Chairman, I would inquire of the gentleman from Indiana (Mr. FITHIAN) whether it is not a fact that the multibillion dollar figure that was cited as the supposed big payments are the amounts that are to be paid to the mills and not to the producers?

Mr. FITHIAN. That is correct. However, I would point out that in many instances they are one and the same payment such as in the Hawaiian sugar industry because they own the land and the industry and process it all.

Mr. HUCKABY. Is it not also true in many instances that there will be farmers who participate in the program, and they will get their payments at the mill because the payment goes to the mill and not to the farmers?

Mr. FITHIAN. My estimate is that the reason the payments are being funneled through this process is that it would be a clear violation of the law without any exception if they tried to make a direct subsidy payment to the individual farmer. A certain portion of the payment, around 10 to 20 percent will be taken off by the process, as I understand the whole operation. In many instances, however, the large operators own the land; they own everything except the laborers who work on the land; so the payment is going directly to the corporation.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield further?

Mr. FITHIAN. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

I would like to point out that today we import over 50 percent of our sugar. There will be a significant sugar amendment offered later on in the farm bill, but if this amendment is passed, it will totally gut the sugar program. Secretary of Agriculture Bergland stated yesterday

that the sugar industry will probably collapse in this country within 2 years if something is not done, and to date we have not been able to negotiate tariff agreements in limiting reports. I must rise in strong opposition to the gentleman's amendment.

Mr. PHILLIP BURTON. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. PHILLIP BURTON. I thank the gentleman for yielding.

This is essentially the same amendment that the House turned down overwhelmingly in the appropriation bill. The gentleman from Indiana says cavalierly there are some big people in Hawaii who are getting large payments. Yes, that is the fact. The fact is that this industry is the total backbone of the economy of Hawaii. If this amendment passes, we will make one of our 50 States an army duckball.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. PHILLIP BURTON, and by unanimous consent, Mr. FITHIAN was allowed to proceed for 1 additional minute.)

Mr. PHILLIP BURTON. If the gentleman will yield further, in Hawaii they have collective bargaining agreements, and the industry is in such outrageous shape, this union has had to work without a contract. They have never done this before. They have had to work without a wage increase despite unfair inflation. If the gentleman's amendment is adopted, the sugar industry in Hawaii is wiped out, and the economy in Puerto Rico will not recover. The amendment is outrageous and ought to be rejected.

Mr. FITHIAN. I would point out to my friend, the gentleman from California, that if things are in that dire straits, and if the Comptroller General of the United States is correct, and if our international negotiator, Mr. Strauss, is correct, then, indeed, they are going to collapse entirely. I doubt the wisdom of the argument. I think that the amendment may ultimately not be necessary because I think they are going to rule, and the Comptroller General has already so said, that these payments are extralegal. I am simply urging this amendment because of the outside chance that that is not true.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from Louisiana.

Mr. MOORE. I thank the gentleman for yielding.

I think my colleague was striking at this point, and I am not sure I heard the answer correctly, or heard the answer. The gentleman's amendment refers to the total amount of payments which a person may receive. Is the gentleman defining, or is there a definition of, "person" in his amendment? I am afraid by "person" the gentleman means the processor to whom the payment is made. I would like to get the gentleman's answer to that.

Mr. FITHIAN. I believe my friend from Louisiana is one of the better lawyers in the House. I am not a lawyer, but I believe the long-standing historical definition of "person" includes "corporation."

Mr. MOORE. Then if I understand the gentleman correctly, a $50,000 limit would mean that a processor could not get more than $50,000.

Mr. FITHIAN. That is correct.

Mr. MOORE. No matter how sugar producers in turn had to split that money up?

Mr. FITHIAN. That is correct.

Mr. MOORE. I thank the gentleman.

Mr. FOLEY. Mr. Chairman, I rise in opposition to the amendment.

The agriculture bill, H.R. 7171, before us does not have any sugar provisions whatsoever. The gentleman is offering a special amendment that would cover two things. One part of it would prevent the application of the present proposed sugar program until the President certified to the Congress that it was legal. The Secretary of Agriculture has assured me personally that no final regulations will be undertaken or issued on this program until the Attorney General of the United States certifies that the program is legal in his opinion. So that part of the amendment is not necessary.

The second part would attempt to impose a $50,000 payment limitation on sugar processors. If this program does not have a legal basis, the Attorney General is going to say that and it is not going to ever get off the ground and we will not have anything to worry about, for those who worry about it. If in fact the program is decided to be legal in the opinion of the Attorney General, then these payments are going to be passed through to producers by the processors, and the $50,000 per person limitation is a straight effort to make that program impossible to carry out. It guts the program.

The United States is participating in the International Sugar Agreement talks in an attempt to work out plans for an international agreement on sugar.

I do not think this is a necessary amendment. I would hope the committee would reject it. We expect to have hearings in the Agriculture Committee on sugar at a later date.

Mr. JOHNSON of Colorado. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Chairman, I want to endorse what the chairman has said and urge defeat of the amendment.

Mr. MICHEL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to make the observation that my distinguished chairman says it is a mischievous amendment. I remember when the appropriation bill was on the floor and we were standing at the door of the House and the chairman of the Agriculture Committee was cajoling the members into voting his position on the amendment at that time with the clear understanding that when the agriculture bill comes before the House they will have an opportunity to vote on this issue.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I will be happy to yield in one moment. I am just saying at that time unless the gentleman is really sincere in giving a full opportunity for it to be discussed here, he was misrepresenting the position at that time and the Members were following him in good faith, saying that it was going to be the subject of discussion and discussion would not be limited.

Mr. FOLEY. If the gentleman will yield to me, that is exactly what we are doing. I said at that time that the amendment was premature. I say at this time it is mischievous.

Mr. FITHIAN. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Indiana.

Mr. FITHIAN. Mr. Chairman, I rarely so sharply disagree with the chairman, the gentleman from Washington (Mr. FOLEY), as I do now. I want to assure this House that this is not a mischievous amendment. I want to assure this House the other body, the U.S. Senate, on the agriculture bill by a vote of 54 to 44 passed the same amendment. Unless we are willing so to criticize and chastise our other body across the way—I doubt if we would characterize that body as being mischievous.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, I hope the gentleman does not take too much offense at the word "mischievous." Mischievous is variously defined. My purpose was not to cast a reflection on the gentleman. I think the gentleman is perfectly sincere in what he wants to do.

He does not want to limit payments under this program to $50,000. He wants to make the program impossible, and I think he is honest enough to say without reservation that his amendment makes the operation of the present program impossible.

Mr. MICHEL. Mr. Chairman, if the gentleman from Indiana wants to respond, I will be happy to yield to him.

Mr. FITHIAN. I will be happy to respond.

I would point out to the gentleman there are a lot of little sugar growers and little beet growers who will not be affected and they will get the payment.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield one more time to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, the gentleman has just said he intends the $50,000 payment limitation to apply to processors who have to pass it on to producers. The gentleman knows that a $50,000 limit on payments to the processor destroys the program.

The gentleman from Illinois (Mr. FINDLEY) was frank enough to say in the committee that was exactly correct, and I am sure the gentleman from Illinois (Mr. MICHEL) would say this is a gutting amendment.

Mr. FITHIAN. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Indiana.

Mr. FITHIAN. Mr. Chairman, if the gentleman from Washington, the chairman, is saying, yes, I would like to prevent or that I construe and the Attorney General of the United States construes it is an end run, and that is all the administration is doing here, making an end run around the present law, yes. I would say that is correct, I would like to defeat that proposition.

Mr. Chairman, I would like to defeat that proposition. I would, indeed, like to see us abide by the laws of the House and of the Senate and the laws of the land. We are not doing that, in my judgment, if we go for a vote with this payment; so I would like to prevent a process-oriented tax rebate.

Mr. HEFTEL. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. FINDLEY. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

The Chairman, our esteemed colleague from Washington (Mr. FOLEY) placed his argument against this amendment on the contention that the word "person" in the amendment would mean that a processor could not receive more than $50,000, and therefore the program would be gutted; it would be made a nullity.

Now, that is not the intent and effect of the Fithian amendment.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield.

Mr. FOLEY. In response to a colloquy with the gentleman from Louisiana (Mr. MOORE) I understood Mr. FITHIAN to say that he intended the word "person" to include a corporation, and that he agreed generally with the assumption that it would cover the mill and the processor.

Mr. FINDLEY. Will the gentleman from Indiana clarify this point?

Mr. FITHIAN. As I said at the outset, I am not a lawyer. That is my layman's interpretation.

Mr. FINDLEY. I will say to the gentleman, if he will stay on his feet, that the law, the basic law, says the Secretary shall issue regulations defining the term "person" and prescribing such rules as he determines necessary to assure a fair and reasonable application of such limit. In joining with my friend from Indiana, I have no thought that the effect of the amendment as he drafted it would be to restrict the Secretary from passing through the processor to the producer sums up to $50,000.

Now, it is clear that the Secretary has ample latitude in the statute to define persons in that way, and thus make this a workable program which would yield up to $50,000 to each farmer producing sugar; permit the processor to be the agent for passing the funds through, assuming that the President finds a lawful way that this can be done.

I would say further that I appreciate Chairman FOLEY citing me as an authority when he makes an argument on an amendment, but, if my memory is correct, the amendment I offered at that time was a limitation to processors. It named processors, not persons.

I had in mind stopping the program by that amendment, and I believe the limitation of $50,000 would have that effect.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, the gentleman's recollection is precisely correct. At least, it is in accordance with mine, and I am sure we must both be right. In the committee the gentleman offered an amendment specifically limiting to $50,000 any payment to processors.

Mr. FINDLEY. That is correct.

Mr. FOLEY. And the gentleman very candidly said that would gut the program and that was his intention.

Mr. FINDLEY. Exactly.

Mr. FOLEY. A few moments ago we had a dialog with the gentleman from Louisiana (Mr. MOORE) and the gentleman from Indiana (Mr. FITHIAN), and the gentleman from Indiana (Mr. FITHIAN) said that the word "person," as I understood him was to include processor.

We do not make any payment to producers directly, as the gentleman knows. And the program is intended to be carried out, at least according to preliminary regulations which have been issued, by making payments to processors.

Mr. FINDLEY. That is correct.

Mr. FOLEY. If the term "person" means processor, then the program obviously cannot work under this amendment.

Mr. FINDLEY. The chairman, of course, is correct, that the program announced by the President, which has now been declared to be unlawful by the Comptroller General, is a program for the payments to processors as a pass-through to producers. But no one knows how ingenious the executive branch will be. Presumably they could come up with payments for producers on some other grounds. If that happens, I would hope this committee would try to establish a limitation of $50,000 on any such payments. We do not know what the executive branch is going to do tomorrow. The executive branch certainly has wide latitude to do all kinds of things under basic law in the agricultural field. The executive branch obviously thought it had more latitude than the Comptroller General thought it had. But we are dealing with possibilities.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. FINDLEY) has expired.

(By unanimous consent, Mr. FINDLEY was allowed to proceed for 3 additional minutes.)

Mr. FINDLEY. Mr. Chairman, I think the gentleman from Indiana is entirely right and proper and prudent in giving this committee the opportunity to establish the $50,000 as the maximum amount which any person can possibly get under a payment program dealing with sugar.

Why the $50,000 level? The committee has recommended a limitation which goes up to $47,600 for other commodities; $50,000 is not too far away from that level. It seems to be in the proper range. The Senate, on a record vote, has established its own view as to limitation on payments to sugar producers. It has voted a level of $50,000, and that seems prudent and proper to a majority of the Members of the Senate.

So I think the gentleman has chosen a good figure, and I think this is the proper time for this committee to register its opinon on that question. We have just had a vote, a very close vote, on the amendment offered by the gentleman from Minnesota (Mr. NOLAN) an amendment which was supposed to throttle down on big payments on corporate agriculture. It came within 10 or 12 votes. It is unthinkable, to me, that this committee, in the light of that decision, would limit this to $50,000 in payments to sugar producers. I think it is an absurdity for us to act otherwise and to vote affirmatively for the Fithian amendment.

Mr. CORRADA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the Findley/Fithian amendment, which would limit individual producer payments under USDA's proposed sugar program to $50,000. For months now I have been in constant communication with USDA Secretary Bergland and the Sugar Task Force, apprising them of the critical situation faced by our sugar farmers and refiners in Puerto Rico. Although we in Puerto Rico welcomed the President's program, we felt that it was quite narrow and limited in scope. President Carter's guarantee of a 13.5 cents was the estimated break-even price for domestic sugar growers, but not Puerto Rico's. The President yielded further by limiting the share sugar refiners and processors could obtain. Now we face another initiative aimed at further limiting the program.

The sugar situation in Puerto Rico is indeed acute. The cost of land, shortage of labor, and inadvisability of mechanization have all helped the skyrocketing costs of production. In 1966, the Puerto Rican government had to reluctantly rescue the floundering industry by forming the Sugar Corporation. This wholly government-owned instrumentality currently operates all 11 sugar mills in Puerto Rico. The decision to enter into the sugar sector was motivated because of the severe unemployment problem on the island, and the necessity of supplying the rum industry with molasses. To say that the corporation has operated in the red is an understatement. In 1976 it suffered a deficit of $58 million, and for fiscal 1977 it is calculated at $70 million. The short-lived boom of 1974 prompted some planters to put marginal acreage into sugar cane. At today's deflated prices, these marginal lands fail to cover costs.

The proposed sugar price support program would alleviate our sugar industry's crisis and help us to retain approximately 13,000 jobs, while we continue to modernize. We are certainly not talking of windfall profits. Given the maximum allowable price support of 2 cents a pound and the 1977 crop total, the Sugar Corporation would qualify for $7,195,040 in price supports.

Last year Puerto Rico produced 308,000 tons of sugar, 185,000 tons of which was

exported. Our production level today is one fourth of what it used to be when we had a flourishing industry. I think it is in the national interest to upgrade our production levels, lest we completely default by inaction to foreign competitors.

I think it inadvisable to yield to those who claim that sugar subsidies pad the pockets of the refiners and large commercial growers. I am concerned about the livelihood of thousands of citizens, both on the mainland and in Puerto Rico, who depend on sugar and sugar derivatives such as rum for their livelihood. We have an opportunity, limited as it may be, to lend a helping hand. The limitation imposed by the Findley/Fithian amendment is unconscionable in its limitation, and should be defeated.

Mr. AKAKA. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, in the past 2 years, sugar prices have fallen sharply. Growers have been receiving less than the cost of production for their product. The President and Secretary Bergland have determined that a program offering payments of up to 2 cents per pound of sugar should be undertaken to assist producers and processors through the present period of low prices.

No one will get rich from this program. It will, however, allow the domestic sugar industry to exist until the market price reaches 13½ cents per pound. It will keep our country's sugar industry in business so that thousands of workers will not have to be laid off. If the Fithian amendment passes, it will have the effect of destroying the President's program completely and will force one of our Nation's largest industries into bankruptcy.

Any payment limitation would work a particular hardship on one single State—Hawaii. Without the ceiling, assuming payment of the full 2 cents per pound for a year, Hawaiian producers would receive $40 million. A $50,000 ceiling would limit the Hawaiian total to $750,000. Hawaii's unique situation, being 2,400 miles away from the nearest market, requires large corporate farming. A $50,000 payment which may assist a family farmer to stay in business, will be of no benefit to the corporate farm. As a result, they will no longer be able to stay in business, and tens of thousands of workers will have to be laid off. Passage of the amendment would be devastating to the State's economy since the sugar industry, now losing money, is the third largest industry in Hawaii.

On March 17, 1977, after a 6-month investigation, the U.S. International Trade Commission concluded that the increased importation of foreign sugar, most of it heavily subsidized by its country of origin, was indeed injuring our domestic sugar industry. The ITC immediately called for the reduction of import quotas. The President rejected this method of relief since it would raise the price of sugar and be harmful to consumers. Instead, he devised a price support program for interim relief until a permanent solution to the sugar crisis could be devised. It must be kept in mind that under the President's approach, the price of sugar will not increase to the consumer. If we allow the amendment to eliminate this approach, the President will be forced to limit sugar imports as recommended by the International Trade Commission, and the price of sugar will go up to the consumer. I know that this is what those who represent the corn industry want so that corn-based sweeteners will sell for considerably less than sugar.

The issue here, however, is not one of sugar versus corn. The issue that we face today is, are we going to allow cheap foreign imports to destroy one of our Nation's most important industries and throw thousands of American workers out of work. This country has painfully learned what happens when we allow ourselves to be totally dependent on the products of other nations. Only if we have our own domestic sugar industry, will we be able to control the price of sugar, so that it will be fair to growers and reasonable to consumers. I urge you to prevent any interference with the President's proposals, and vote against the amendment.

Mr. FOLEY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. EVANS of Colorado, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7171) to establish more responsive programs for the benefit of farmers and consumers of farm products; to extend and improve the programs conducted under the Agricultural Trade Development and Assistance Act of 1954, as amended; and for other purposes, had come to no resolution thereon.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 7553, PUBLIC WORKS FOR WATER AND POWER DEVELOPMENT AND ENERGY RESEARCH APPROPRIATION ACT, 1978

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 7553) making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1978, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

CONFERENCE REPORT ON S. 1377, EXTENDING TIME FOR COMMENCING ACTIONS ON BEHALF OF AN INDIAN TRIBE, BAND, OR GROUP

Mr. DANIELSON submitted the following conference report and statement on the Senate bill (S. 1377) to extend the time for commencing actions on behalf of an Indian tribe, band, or group:

CONFERENCE REPORT (H. REPT. No. 95-505)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1377) to extend the time for commencing actions on behalf of an Indian tribe, band, or group, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That (a) the third proviso in section 2415 (a) of title 28, United States Code, is amended by striking out "after August 18, 1977" and inserting in lieu thereof "after April 1, 1980".

(b) The proviso in section 2415(b) of title 28, United States Code, is amended by striking out "on or before August 18, 1977" and inserting in lieu thereof "on or before April 1, 1980".

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title of the bill and agree to the same.

GEORGE E. DANIELSON,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill S. 1377, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment to the text of the bill struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment and the substitute agreed to in conference are also noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

Two changes made by the House amendment to S. 1377 were necessitated by the fact that section 2415 of Title 28, U. S. Code, was amended on July 11, 1977 when the House Joint Resolution 539 was approved as Public Law 95-64. That law deleted the words "more than eleven years after the right of action accrued" from the third proviso of section 2415(a), and inserted the words "after August 18, 1977" in their place. This change in the law extended for 30 days the statute of limitations applicable to contract actions for money damages which accrued prior to July 18, 1966 and are asserted by the United States on behalf of Indians. The House amendments eliminated the reference in S. 1377 to the language in the third proviso of subsection (a) of section 2415 already deleted by Public Law 95-64, that is, the words "more than eleven years after the right of action accrued" and in their place provided for a deletion of the words "after August 18, 1977"

from that proviso of section 2415(a) in order to provide for a new date for the expiration of the statute of limitations for contract actions subject to that proviso. The Conference Report adopts the same language and fixes the new date as April 1, 1980 for such actions.

The second change made by the House amendment to S. 1377 necessitated by the enactment of Public Law 95–64, related to the proviso in subsection (b) of section 2415. Public Law 95–64 deleted the words "within eleven years after the right of action accrues" from that proviso and, by inserting the words "on or before August 18, 1977", provided for a 30-day extension for the bringing tort actions by the United States in behalf of Indians which accrued prior to July 18, 1966. The House amendment struck the words "within eleven years after the right of action accrues" and in their place provided for the deletion of the words "after August 18, 1977" from the proviso in section 2415(b) in order to provide for a new date for the expiration of the statute of limitations for the tort actions subject to that proviso. The Conference Report adopts the same language and fixes the new date for the expiration of that statute of limitations as April 1, 1980 for those actions.

PERSONAL EXPLANATION

Mr. PRESSLER. Mr. Speaker, on rollcall 445, the vote on the Nolan amendment on H.R. 7171 today, I am not recorded by the machine as voting. During the debate on the amendment I spoke in support of the amendment.

Mr. Speaker, the fact is that I did vote "aye" on the amendment, but my vote was apparently not recorded by the machine.

FISHERIES SERVICE REPORTS DRAMATIC REDUCTION IN DOLPHIN MORTALITY

(Mr. LEGGETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEGGETT. Mr. Speaker, the National Marine Fisheries Service has reported a dramatic reduction in the incidental take of dolphins by tuna fishermen during the first part of the current fishing season. The Fisheries Service estimates that 8,412 dolphins have been taken by the fleet through July 3, 1977. The importance of this figure becomes clearer when you realize that the fleet is only taking one dolphin for every four tons of yellowfin tuna landed. Expressed in another manner, the fleet is taking 2.97 dolphins per "set." Last year NMFS estimated that the fleet killed 1.1 dolphin per ton of yellowfin landed or 14.4 animals per set. In other words, the fleet has reduced dolphin mortality this year by over 400 percent!

If the fleet can continue this remarkable performance they will have no difficulty meeting the 59,050 dolphin quota for 1977 imposed under the terms of the regulations promulgated under the Marine Mammal Protection Act. Assuming a mortality per ton of .3, the total mortality for 1977 would be 20,000 animals. The National Marine Fisheries Service cautions that it is still too early to accurately estimate total mortality for the entire year. The fleet is fishing in an entirely new manner this year due to their late start. Normally, the fleet begins fishing in January and ends around October. This year most of the fleet did not begin fishing until May 13.

Despite these caveats, it is clear that the fleet has dramatically reduced dolphin mortality this year. Although everyone is ecstatic about these early reports, no one apparently can explain the drastic reduction in mortality. It is assumed that the use of fine-mesh by the entire fleet plays a large part in the mortality reductions. This year the National Marine Fisheries Service required the fleet to install 1¼-inch nets in the backdown area of the net. In the past, many dolphins died because they became entangled in the nets despite the best efforts of the fishermen to release them from the net. The fine mesh nets tend to alleviate that problem by preventing the dolphins from becoming entangled until the fishermen are given an opportunity to release them via the backdown procedure.

Dolphins are incidentally captured in the first place because of their unique association with the yellowfin tuna. Yellowfin tuna are known to swim beneath and behind dolphin schools. Tuna fishermen exploit this relationship by herding the dolphins enclosing them with nets, thereby capturing the tuna below. Unfortunately, thousands of dolphins incidentally captured along with the tuna become entangled in the nets and die.

The Subcommittee on Fisheries, Wildlife Conservation and the Environment, which I chair, has struggled with this issue over the last 2 years. I believe that these encouraging statistics indicate that much of our effort has begun to pay off.

We still have more to accomplish, however. The new statistics are based on the weekly reports by National Marine Fisheries Service observers. Currently, the National Marine Fisheries Service has observers on about 40 percent of the vessels fishing "on dolphin." The total observer coverage for 1977 will be about 20 percent of the trips taken by the American fleet. I would personally like to see the observer coverage increased to 100 percent so that we can get an absolutely accurate report of dolphin mortality in the eastern tropical Pacific Ocean.

The latest National Marine Fisheries Service report on dolphin mortality is summarized as follows:

Total 1977

Species	Allowable mortality	Cumulative mortality [1]
Spotted dolphin (offshore)	43,090	5,798
Spinner dolphin (white belly)	7,840	1,791
Common dolphin (northern)	400	170
Common dolphin (central)	600	10
Common dolphin (southern)	5,600	265
Striped dolphin (northern)	40	0
Striped dolphin (north equatorial)	400	79
Other dolphin	80	18
Total	59,050	8,141

[1] Through July 3, 1977.

Mortality per ton: 1976, 1.1; 1977, .24.
Mortality per set: 1976, 14.4; 1977, 2.97.

PEACE FOR CYPRUS MUST BE MADE A PRIORITY IN OUR FUTURE FOREIGN POLICY

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, today, July 20, 1977, we solemnly commemorate a tragic day in world history. Three years ago today, Turkey ruthlessly and without provocation invaded Cyprus. For 3 years, Turkey has occupied some 40 percent of the island. For 3 years, peace has been sought. Yet after 3 years, peace remains an illusion.

The Cyprus conflict is far more than a political issue. It is a profound human tragedy. The invasion and occupation has uprooted and displaced almost one-third of the island's predominantly Greek population. Many families have been separated and still, after 3 years, do not know the fate of their wives, husbands and children.

An estimated 2,000 Greek Cypriots are officially listed as missing since the invasion. Turkey has repeatedly failed to account for these individuals, and it is a source of deep resentment in the Greek community. I have contacted the President on this matter.

Peace for Cyprus is a formidable, but not an insurmountable challenge. The United States must assume greater leadership. Thus far, the Carter administration has not been as aggressive as we had hoped, in pursuing peace. Our concern for human rights must be the foundation in our work for peace. Peace for Cyprus must be made a priority in our future foreign policy. Let us not be forced to observe another tragic anniversary.

Marches and other commemorative observances are being held throughout the Nation today. One such march will be held in New York City's Dag Hammarskjold Plaza. The group will be led by Archbishop Iakavos—the archbishop

of the Greek orthodox archdiocese of North and South America—and Father John Poulos, pastor of St. Demetrios Church in my home district of Astoria, the largest Greek community outside of Greece. The highlight of the New York march will be the carrying of a torch which was lit in Cyprus by President Archbishop Makarios. I salute the New York participants and feel such observances should be conducted throughout this country and the world to focus on the need to bring peace to Cyprus.

U.S. TAXPAYER IS VICTIM OF WORLD BANK STING

(Mr. YOUNG of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. YOUNG of Florida. Mr. Speaker, I have spent a great deal of time, of late, studying the activities of one of our most influential international financial institutions, the World Bank. I have stated publicly, and often, that if the American people knew how this organization spends the hard-earned taxpayer dollars that we appropriate for its use, they would be more than a little upset, and not a bit supportive. And now I offer further evidence to support that statement.

Some people in our Government, and perhaps even some of our colleagues in this Congress, have been mesmerized by the carefully contrived "public image" of the World Bank, into believing that the money that the United States and a number of other nations of the world contribute to this organization, is doled out regularly and conscientiously only to relieve the suffering of the world's poorest people. Everyone understands that some portion of this money must be used for the administration of these "humanitarian" programs, but we are always led to believe that this sum is kept to a bare minimum. Some very interesting information has come to my attention recently, Mr. Speaker, concerning the "administrative" practices of the World Bank, and I am anxious to share that information with you, and with all of the Members of this Congress—and especially with the American people.

An upsetting part of this revelation, is how hard I had to dig to find it out. Perhaps if the World Bank was more open with Congress; if it would lay its cards on the table and explain and justify—assuming such justification is possible—their procedures; if its representatives would submit to questioning by the Members of our subcommittee which appropriates the funding the World Bank needs for its very existence, we would not be surprised when we finally do learn what they have been up to. But the fact that they have flatly refused to answer many of our questions, only serves to underline my suspicions that those internationalists know, better than anyone else, that our Nation, and a number of other nations, would not approve of their business practices if we ever found out what they were.

How would your constituents feel, Mr. Speaker, if they knew that substantial amounts of money expended by the World Bank in fiscal year 1976, purportedly to help the "poorest of the poor," actually wound up in the pockets of World Bank employees in the form of personal, low-interest loans? These loans were granted at interest rates as low as 4 percent. The American taxpayer cannot get a personal loan on such easy terms, but they are subsidizing loans for World Bank employees who make as much as 57 percent more than comparable employees in the U.S. civil service, and who pay no U.S. income taxes.

Some of these loans are granted to World Bank employees for the purpose of making a downpayment on a house. Such loans are repayable over a 12-year period. One of the stipulations of these loans is that the house cannot cost more than $125,000. Most Americans cannot borrow money anywhere, at any rate, for the downpayment on a house. In fact, most mortgage companies require the buyer to sign a statement that the downpayment has not been borrowed. If they do borrow the money surreptitiously, on a personal basis to use for the downpayment on a house, their interest rate for such a "personal" loan ranges from as much as 11 percent from a bank to as high as 24 percent from a loan company.

Education loans for staff members who wish to continue their education, may be borrowed in any amount up to the equivalent of 6 months of their salary. These loans are repayable over a 6-year period at the very low interest rate of 4 percent. Education loans are also granted, at similar rates for the education of the employees' dependent children. Few of our constituents, Mr. Speaker, can get this kind of a deal.

The third type of loan available from the World Bank to their employees is even less justifiable. These are loans to buy furniture. New appointees to the World Bank staff are eligible for loans in an amount equivalent to 6 months of their salary to buy furniture. These loans are granted at 8-percent interest and are repayable over a 6-year period. One of our constituents who wishes to borrow money to buy furniture will probably pay 11-percent interest to the bank, 15.5-percent interest if the purchase is a time payment through a local furniture store, or as much as 24 percent from a loan company. It is highly unlikely, in any event, that they could get a loan for that purpose in an amount equivalent to 6 months of their salary, and certainly not with 6 years to pay it off.

Why, Mr. Speaker, should the World Bank have the privilege of using U.S. dollars to grant low-interest loans to its own employees? These are some of the highest paid bureaucrats in the world, 95 percent of whom live in the United States, yet pay no U.S. income taxes. If the World Bank wants to help them with their personal financial problems, that is fine, but why should the American taxpayer have to foot the bill? And let us not try to fool the American taxpayer by continually telling him that his contribution is going to the "poorest of the poor," when actually a lot of it goes to the "richest of the rich." Since these World Bank employees make so much money—pay no U.S. income taxes—why not let them use the same borrowing facilities we do, just like those of us who are presently subsidizing them?

Don't you think, Mr. Speaker, that it is time we stopped being "put on" by these multilateral organizations, and started doing the job we were sent here to do—the job of spending the taxpayer's dollars prudently and sensibly, and getting something worthwhile for our money? At the very least we are entitled to an accounting of the money we do give them. I would like to provide for you more of the specifics on this World Bank employee loan program, but unfortunately, those specifics were presented to me by the U.S. Department of the Treasury with the condition that I honor the World Bank's classification of "confidential." This example of hiding information from the U.S. Congress is just another in a list of activities designed to keep World Bank operations secret. World Bank officials refuse to testify before our committees, they refuse to provide us with audits of their loans, and they won't even allow Members of Congress to attend the meetings they hold to make decisions on loans. If we ever should get an accounting, Mr. Speaker, we might really be surprised at what we learn.

RADIOACTIVE MATERIAL PROTECTION ACT OF 1977

(Mr. SKUBITZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKUBITZ. Mr. Speaker, today I am introducing the Radioactive Material Protection Act of 1977. This legislation would provide to the maximum degree possible, protection to our Nation's citizens from the threat of terrorists and other criminals who would seek to use radioactive material to inflict harm upon our people.

This legislation is stern—make no mistake about it. The bill provides for the death penalty or life imprisonment for the sabotage of nuclear facilities, hijacking or sabotaging vehicles carrying nuclear materials, or threatening to expose another to radiation as part of an extortion punishable by death or life imprisonment.

Not only is this legislation stern, but the most careful steps were made to insure its constitutionality. A great deal of time and effort has been taken to provide that my legislation falls within the framework of recent Supreme Court decisions where the imposition of the death penalty is involved. The American Law Division of the Library of Congress has carefully reviewed my bill and they have stated that the bill's provisions fall within the guidelines established by the Supreme Court.

Another feature of my bill provides for a reward of $50,000 to any person who furnishes original information leading to the arrest and conviction of the person or persons charged with violating sections of my bill. This reward may seem steep, but when one considers that the terrorist often moves on the international scene we must insure that any individual who violates provisions of my bill never sleeps a quiet night until his arrest. We must serve notice upon the terrorists and criminal community that to inflict harm upon citizens of the United States with radioactive material is a crime of the most heinous nature—and that our Government will not allow such a criminal a moment's rest if he violates the provisions of my legislation. Only by offering such a reward for these criminals and combining this with the death penalty can we greatly diminish the likelihood of terrorism and criminal acts with radioactive material.

The necessity for my legislation has been brought about because of several factors. Among these factors is the increasing incidence of terrorism, the expansion of our Nation's reliance upon nuclear energy, published reports of security problems at nuclear facilities, a myriad of inadequate Federal statutes dealing with violations of the Atomic Energy Act of 1954, and widely divergent State statutes dealing with the imposition of capital punishment. It is entirely possible that a terrorist could cause the release of radioactive wastes from a nuclear facility in one State where no death penalty exists, but where people are killed; the wastes could then be transmitted to another State where again citizens could be killed by the same released radioactive wastes. Not 1 person could be killed, not 2, not 5, not 10, nor even 50 but conceivably thousands could be killed. And the actual question of such a terrorist facing the sentence of death—because of differing States' jurisdiction—could actually be in doubt.

We all hope and pray that such an event never happens. But if it does, we must be sure that justice is meted out and that our citizens are protected from the hazards of the nuclear age. My legislation, put forward in a nonpartisan spirit, will deal with the problem now at hand—and our people will be safer if it is enacted.

DR. ALICE PAUL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana (Mrs. BOGGS) is recognized for 60 minutes.

Mrs. BOGGS. Mr. Speaker, as the sponsor of today's special orders honoring the memory of Dr. Alice Paul, a major leader of the women's suffrage movement in the United States and abroad, I am both saddened and proud.

The news of Dr. Paul's death on July 9, at the age of 92, came as a loss to all of us who work to promote the interests of women in America. Although she was characterized as a "living legend" and a symbol of the women's suffrage movement, Dr. Paul was also a very real woman who literally dedicated her life's work to advancing the position of women and who enchanted all of us who have been privileged to meet her.

The tales of Dr. Paul's campaign in behalf of the right to vote for all women includes anecdotes of political persuasion and the generation of attention-getting publicity which would awe any professional campaign manager. With little money and even less public credibility, Dr. Paul and her colleagues orchestrated a tide of public opinion in favor of the vote for women. They raised money; they wrote pamphlets; they held meetings and conventions; they conducted processions (we would call them marches); they burned President Wilson's speeches; they picketed the White House; and they were often arrested.

But throughout the campaign for the suffrage amendment, Dr. Paul and the members of the National Woman's Party steadfastly maintained their commitment to obtaining the vote for women, and in 1920 the 19th amendment was ratified.

Created to spearhead the passage of the women's suffrage amendment, the National Woman's Party continues today as a forceful voice in behalf of women's rights as citizens. A lasting memorial to Dr. Paul's efforts, the party is housed in the historic Sewall-Belmont House, at 144 Constitution Avenue NE., just a stone's throw from this Chamber.

The Sewall-Belmont House incorporates a house built on the property in the early 1700's, thus giving the Sewall-Belmont House claim to being one of the oldest houses on Capitol Hill. Inhabited by Albert Gallatin, Secretary of the Treasury to Presidents Jefferson and Madison, the Sewall-Belmont House is thought to have been the location where Gallatin worked out the financial matters dealing with the Louisiana Purchase. The House also served as one of the last defenses against the British Army marching to burn Capitol buildings during the War of 1812.

After changing hands several times, the Sewall-Belmont House was sold to the National Woman's Party in 1929 and was renamed the Alva Belmont House in honor of the party's chief benefactress. The house has been used as a residence and national headquarters by the National Woman's Party since that time despite an attempt to acquire and level it to provide additional parkings spaces. The steadfastness of the membership in saving their residence was a great victory for the Historic Preservation Movement.

I feel that it is especially appropriate that the architecture housing Dr. Paul's organization should be an ancient and venerable structure, constantly growing and changing and incorporating newer architectural modes. Like the Sewall-Belmont House, the women's suffrage movement has grown to embrace all political affiliations. Just as the preservation of the Sewall-Belmont House signifies the values of our society which most revere historic association and a love of beauty, Dr. Paul worked to preserve the natural resources that women truly are for society by bringing them into the mainstream of American political life through that indispensable tool—the vote.

Mr. LUNDINE. Mr. Speaker, what does this country owe to Alice Paul? Although her name is unfamiliar to many of us, her story is that of a remarkable woman who devoted over 60 energetic years to the cause of equal rights. In all of her adult years Dr. Alice Paul never gave up the struggle to achieve equality between men and women. She died last week, but evidence of her influence will live on in the hearts, minds, actions, and accomplishments of all women and men who undertake the task of achieving equal rights for all people.

Dr. Paul is perhaps best remembered for her role in the woman's suffrage movement. It was largely through her efforts that the dying movement gained new life in the early 20th century. Alice Paul never took full credit for achieving that first step to equality, for she recognized the importance of the work done by women such as Carrie Chapman Catt, and before that, Elizabeth Cady Stanton and Susan B. Anthony. But no one can deny that without the endless energy Dr. Paul marshalled to the cause of women's suffrage, that first step, long overdue, would have been delayed even longer.

After the 19th amendment passed, and women gained the right to vote, Alice Paul did not stop there. She recognized from the start that the ballot may be powerful, but it is not a panacea. She faced even the opposition of many women's groups when she drafted and set out to incorporate into the Constitution an amendment which read:

> Men and women shall have equal rights throughout the United States and in every place subject to its jurisdiction.

Throughout the remainder of her life she devoted her considerable energy to passage of the equal rights amendment.

On July 9, the day of Alice Paul's death, over 7,000 women were gathered in Albany, N.Y., to nominate delegates for a National Women's Conference to be held later this year. Their very presence may signify that there is still much work to be done before Dr. Paul's dream becomes reality. But much more than that, it means that the spirit of equality which Alice Paul strengthened will live on long after she is gone.

Mr. SOLARZ. Mr. Speaker, a great figure in American history passed from the scene last week. Alice Paul was a woman of vision and of spirit: The vision to see new directions and new arenas for the women's movement when all around her were mired in discouragement and the spirit to sustain that vision year after year in an uncomprehending and indifferent world.

Her vision enabled her to turn the suffrage movement in 1912 onto the path toward a suffrage amendment to the national Constitution—at a time when most of the movement was hopelessly bogged down in an endless succession of State referenda. She formed the Congressional Union for Woman Suffrage, which later became the National Woman's Party.

Her vision enabled her to write the equal rights amendment in 1923 and to begin the long campaign to get it accepted—at a time when most of the women's movement was confused and scattered after the passage of the suffrage amendment.

Her vision enabled her to move the women's movement to the world arena—at a time when it was at a low ebb in the United States. She worked to establish the still-active Inter-American Commission on Women in 1929 and she founded the World Women's Party in 1938.

But even more remarkable than the vision was the spirit—a mixture of courage, tenacity, and the ability to inspire others.

Her spirit enabled her to embolden 5,000 women to march down Pennsylvania Avenue for suffrage in 1913—at a time when most women marched only between the kitchen and the bedroom.

But, above all, her spirit enabled her to keep alive the flame of the women's movement between 1920 and 1969—at a time when most women did not even know that they were not equal before the law. She maintained the national headquarters of the Woman's Party as what we would now call a women's center—offering unfailing hospitality and warm encouragement to party members and to all women. She dreamed that the handsome old house on Constitution Avenue would some day be augmented by a vast arena where women could come together to plan and build a new life for themselves.

She saw to it that the equal rights amendment was introduced in every session of Congress beginning in 1923—at a time when most women were unwilling to give up men's protection to gain equality, even if that protection meant permanent second-class status.

Because Alice Paul's spirit and her vision often made her out of step with her time, she was not well known throughout most of her life. But the ideas which were perceived by her vision and nurtured by her spirit are now reshaping the lives of women. And the full impact of her lifelong campaign for women's rights has not yet begun to be felt.

Mrs. HOLT. Mr. Speaker, at this point in American history, when an equal role for women in political life is acquiring the status of normalcy, it is strange to recall that women lacked the right to vote as recently as the early years of this century.

Today we find women in the President's Cabinet, in Congress, in elective and appointive offices at all levels of government, and entering all kinds of careers in the private sector.

We should not forget the crusading women who made this possible, and today we honor the memory of one of the great ones, Dr. Alice Paul, who died July 9. She led the campaign for women's right to vote, an effort which required monumental courage.

It provoked violent reactions. Her march of 5,000 women down Pennsylvania Avenue to the White House in 1913 was planned as a peaceful demonstration, but was reduced to violence. Dr. Paul knew and accepted personal danger as the price of continuing her crusade. She was jailed in England when she carried her campaign to Great Britain.

It was in 1919 that Congress proposed the 19th amendment to the U.S. Constitution to guarantee women the right to vote. Only a little more than a year later, three-fourths of the States had ratified the amendment to make it part of our Constitution.

Dr. Paul's lifelong devotion to the cause of advancing the status of women should interest every Member of this House who is committed to equal opportunity for all citizens. The women in Congress should remember her with gratitude, for her crusade gave us the right to run for election to this body.

I consider it an honor to participate in this tribute to Dr. Alice Paul.

Mr. EDWARDS of Alabama. Mr. Speaker, in January of this year, women's groups nationwide celebrated the 92d birthday of Dr. Alice Paul, a leader of the women's suffrage movement in America. Today, I join with pride in memorializing Dr. Paul and in recognizing her many accomplishments for women throughout the world.

Dr. Paul once said:

> I feel very strongly that if you are going to do anything, you have to take one thing and do it. You can't try lots and lots of reforms and get them all mixed up together.

Well, that is exactly how she ordered her own life, dedicating all of it toward the right to vote for women and equality of the sexes.

Although there was grassroots support for the women's issues she advocated, Dr. Paul brought them into the national focus. She came to Washington in 1913 to lead the drive for women's suffrage, and it is doubtful whether the 19th amendment giving women the right to vote would have been ratified by 1920 without the work of the National Woman's Party, which she organized. She carried her campaign internationally, working first for women's suffrage in Great Britain and then as a U.S. member of the International Council of Women. She was chairman of the Women's Research Foundation for over a decade, and she was instrumental in getting the principle of sexual equality written into the U.N. Charter preamble when it was written in 1945. Dr. Paul drafted the first version of the proposed equal rights amendment in 1923 and was successful that year, and in the following 49 years, in getting it introduced in Congress. The Lucretia Mott amendment, as it was called, met strong opposition from virtually all the women's groups organized at the time, including the League of Women Voters.

Dr. Alice Paul was clearly ahead of her time, a visionary whose goals were based on compassion and on her belief in freedom and individual equality. It is those principles of freedom and equality on which our country was founded, and without the dedication of Americans like Dr. Alice Paul, we cannot expect to protect them.

Mr. ADDABBO. Mr. Speaker, I join with my colleagues today in honoring one of the great citizens of this Nation, Dr. Alice Paul who died on July 9.

When Dr. Paul died at the age of 92 at her home in Moorestown, N.J., she had compiled more than 60 years as an activist on behalf of equal rights for women. She was one of those most responsible for the granting of voting rights for women, and she lived long enough to see her radical and outrageous opinions of the early 20th century come close to fruition and taken as a matter of right, in her latter days.

We in this Nation owe much to Dr. Paul who had the courage of her convictions in the days when women were supposed to be confined only to the home. Today, thanks to Dr. Paul and the many who followed her in the cause for human rights for women, we have learned to value and appreciate the skills and talents of our female citizens, and the Nation is a far better place for that hard-learned lesson.

But in honoring Dr. Paul, we ought to note what she undoubtedly would tell us if she were here today: the battle for human rights is not over. Not in this Nation and not around the world. If this Nation is to serve as an example to the rest of the world, then let us insure that we fight any attempt, no matter how subtle, to deny any segment of our population the rights they are accorded in our Constitution and our laws. We know just from hearings held by the Congress this year that discrimination still exists against women in this land, and against other minorities as well. Let us use this occasion in which we honor the memory of Dr. Paul to rededicate ourselves to stamping out discrimination once and for all in this Nation. And the sooner the better. Dr. Paul would approve of that most of all.

Mr. EDWARDS of California. Mr. Speaker, I would like to join with my colleagues in paying tribute today to Dr. Alice Paul, leader of the movement for women's suffrage and author of the original equal rights amendment.

Dr. Paul first became involved in the struggle for women's rights during her years in Great Britain from 1907 to 1909 where she fought along with Emmeline and Christabel Pankhurst on behalf of the British women's suffrage movement. After her return to the United States in 1912, she became the guiding force in the American women's suffrage movement which had been floundering since the introduction of the first suffrage amendment in Congress.

Utilizing the techniques she had had learned in the British suffrage movement, Dr. Paul organized a massive demonstration in Washington, D.C., immediately preceding the inauguration of President Woodrow Wilson. The next years saw a continuation of the demonstrations, picketing, imprisonments, hunger strikes and lobbying in behalf of the suffrage amendment.

It was largely through the dedication and commitment of Dr. Paul and her Congressional Union for Woman Suffrage, and later the National Women's Party, that the President was persuaded

to back the suffrage amendment and the Congress passed the 19th amendment in 1919. The amendment was ratified by the States some 14 months later.

Although many of those involved in the struggle for suffrage felt that the major battle had at last been won, Dr. Paul realized that there was still much work to be done if women were to achieve true equality. In 1923, the first Equal Rights Amendment to the U.S. Constitution, authored by Dr. Paul, was introduced in Congress.

Dr. Paul and the National Women's Party persisted in their efforts and the ERA was introduced in every Congress for the next 49 years, until at last in 1972 it successfully cleared the Congress.

Unfortunately, Dr. Paul did not live to see the ERA ratified by the required 38 States. To date, only 35 States have ratified the amendment. Now seems a fitting time to renew our commitment to ratification of the ERA in the additional States needed to make it part of our Constitution.

The struggle for women's equality will continue, but the movement has lost a great leader and our country has lost a great citizen.

Mr. McKINNEY. Mr. Speaker, the death of Dr. Alice Paul on July 9 marks the passing of a gracious and determined woman who selflessly devoted more than 60 years of her life to securing equality under the law for women in this country and abroad.

Dr. Paul began her valiant and colorful crusade for women's rights in 1913, establishing the National Woman's Party through which she spearheaded the women's suffrage movement. For the next 8 years, Dr. Paul zealously organized, demonstrated, fasted, marched on the White House and even went to jail until the 19th amendment to the Constitution was finally ratified and women were given the right to exercise the franchise.

However, unlike so many involved in the suffrage movement, Dr. Paul wisely perceived the vote as merely the first step in the long and ongoing struggle by women to gain their rightful place in society. Thus, in 1923, she drafted the legislation which is the basis for the equal rights amendment passed by Congress in 1972 and now ratified by 35 States. She championed the rights of women abroad as well, serving as a consultant to the League of Nations on women's problems in the world and founding the World's Women's Party in 1938. It was this organization which is responsible for having the principle of equal rights for women affirmed in the preamble of the United Nations Charter because, said Dr. Paul, "there will never be a new world order until women are given a part of it."

"I never doubted that equal rights was the right direction," Dr. Paul said in an interview with American Heritage in 1974. "Most reforms, most problems are complicated. But to me, there is nothing complicated about ordinary equality."

Unfortunately for Dr. Paul and for both women and men in this country, many persons apparently do not agree. It is tragic indeed, Dr. Paul died before adoption of the equal rights amendment to which she devoted so much of her energies and so much of her life. No tribute would be greater to the memory of this magnificent woman that ratification of this constitutional amendment by the people in three more States so that all women in this country could finally be guaranteed their equality under the law.

Elizabeth Chittick, who now chairs the National Woman's Party, observed upon the death of Dr. Paul that "the full impact of Dr. Paul's lifelong efforts to secure equal rights for women in the U.S. Constitution and in the United Nations Charter and throughout the world has yet to be felt." To insure the equal rights and opportunities of all men and women, I can only hope that someday soon it will.

Mrs. MEYNER. Mr. Speaker, I am sure that by now my colleagues are familiar with the life and achievements of Dr. Alice Paul. Rather than repeat what has already been said, I would like now to discuss on a broader scale her place in American annals.

A good starting point for our frame of reference is the U.S. Revolutionary War. It lasted about 8 years and, during that time, thousands of cannons boomed and millions of bullets filled the air. Much blood was shed for the cause of "liberty and justice for all." When the smoke cleared and the Treaty of Paris was signed, formally ending the war, liberty and justice were established—but only for the white, male, property-owning elites—not for all.

Since our Nation's founding, the right to vote has been granted to more and more of our citizenry; the requirement that one be a property owner was dropped, the requirement that one have white skin was dropped, and in 1920, the requirement that one be born male was dropped. After long years, many demonstrations, jail terms and forced feedings, suffrage for women was won.

But being an American means more than simply being able to vote. Alice Paul knew this and, without pausing to take a much needed and well-earned rest, she pushed on to obtain full citizenship for American women. In 1923, the equal rights amendment she had written was finally introduced in Congress. It was not until 1972, nearly half a century later, that it passed Congress and went on to the State legislatures for ratification.

She died with 35 States having ratified her dream, 3 still to go before it could become a reality. I can think of no tribute to her more fitting than to make the ERA a part of our U.S. Constitution. I, for one, pledge to carry on the work she has begun. Dr. Paul blazed a trail in the wilderness, made a clearing and proceeded to nearly complete the job. The foundation having been laid, our goal of "liberty and justice for all" is almost accomplished. Much hard work remains, but anything short of this ideal is inexcusable and ill-befitting a nation which calls itself the leader of the free world.

Looking to future elementary and secondary school textbooks, I can envision Dr. Paul being mentioned—not in some special course on "women in America"—but in the standard chronicles of the American story. I can see her being given as much time and attention in these classrooms as other Americans who contributed equal amounts of energy and daring to the concept of individual freedom—places now reserved for the Thomas Jeffersons and the George Washingtons.

Mr. STEERS. Mr. Speaker, yesterday as I was putting together my thoughts on the commemoration of Dr. Alice Paul's great contributions to the women's movement, I noticed a story in the Washington Post reporting that the Justice Department is starting, only now, a project to root out sex discrimination from thousands of Federal laws and regulations.

This item caught my eye because I had attempted to do the same with Maryland statutes when I served in the Maryland State Senate. In return, I received a great deal of cynicism from detractors of the women's movement, particularly those opposing the equal rights amendment.

I could not help but think of the kind of courage and sense of principle that was required of someone who began such efforts 70 years ago which is when Alice Paul at the age of 22 came to the aid of suffragettes in London while she was attending the School of Economics there. Certainly at that time, she was in the "wilderness" of such reforms, before women had the vote, and faced obstacles impossible for us to imagine today.

Five years after her experiences in London, in 1912, she was appointed by the National American Suffrage Association to the chairmanship of its Congressional Committee in Washington to work for passage of "the amendment that Susan B. Anthony had helped to draw."

She arrived in Washington with only a handful of contacts and no financial support. Within a year of that arrival, Dr. Paul had organized a crowd of 5,000 suffragettes in a march down Pennsylvania Avenue to the White House on the eve of President Wilson's inauguration.

Four years after the march, she was jailed for obstructing traffic during a protest for women's suffrage. This was the first of several times she was imprisoned for her efforts to gain the vote for women.

Through these sometimes dramatic efforts, the National Woman's Party, which Dr. Paul founded, was successful in achieving voting rights for women when the 19th amendment was ratified in 1920.

Shortly thereafter, the Woman's Party met in February of 1921 to decide whether to disband or as Dr. Paul put it, "take up the whole equality program—equality for women in all fields of life—that had been spelled out in the Seneca Falls convention of 1848." The party decided to go ahead and expand its efforts accordingly and in 1923 on the 75th anniversary of the Seneca Falls convention adopted the concept of the ERA.

Thereafter, Dr. Paul, who drafted the original language of the ERA, began going to "convention after convention" in order to change "the thinking of American women" many of whom feared loss

of alimony, special labor laws, and other benefits.

Dr. Paul, who earned a degree in social work from Swarthmore College, a master's and doctorate from the University of Pennsylvania, a law degree from Washington College, and a doctorate of law from American University, credits her dedication to female equality to her Quaker religion which, when founded in the 1600's, was based on equality of sexes. When asked about the basis for her strong support and lifelong dedication to the concept, Dr. Paul simply and modestly answered that—

The principle was always there. . . . I have never doubted that equal rights was the right direction.

In summing up her contribution to women's rights in an interview 3 years ago at the age of 89, she responded that—

Each of us puts in one little stone, and then you get a great mosaic at the end.

For those of us who are still fighting to implement the ERA, Dr. Paul's example of perseverance continues to serve as a guiding light in the face of our detractors.

Perhaps all our frustrations to move on equal rights for women can be summed up by Dr. Paul when she noted that—

. . . there is nothing complicated about ordinary equality. It is really true, at least to my mind, that only good will come to everybody with equality.

Mr. FRASER. Mr. Speaker, today we are paying our respects to the late Alice Paul. She will be remembered as a radical suffragist who, with untold others, worked for women's rights in the United States and around the world. Alice Paul endured prison, hunger strikes and many indignities for the goals of women's suffrage, the ERA and other efforts to insure an equal place for women in society.

At the age of 92 she died, having seen 35 States ratify the constitutional amendment she authored. But, like many leaders, she did not live to see the moment of her triumph.

The National Woman's Party, founded by Alice Paul, held a memorial service for her this morning. They have requested that expressions of sympathy be in the form of contributions to the Alice Paul ERA fund of the National Woman's Party, 144 Constitution Avenue NE., Washington, D.C.

Today few scoff at the notion of women voting. Some Americans still find the equal rights amendment a strange and frightening concept. Yet for most aspects of women's liberation, the risk of personal danger to the advocates is gone. Alice Paul was one of those who made the path easier for her intellectual heirs.

Ron Davis has chronicled the life of Dr. Alice Paul in an obituary which appeared in the Washington Post July 10. I would like to share his words with my colleagues:

ALICE PAUL, 92, LED EARLY PROTESTS FOR EQUAL RIGHTS

(By Ron Davis)

Alice Paul, a leader of the women's suffrage movement who championed women's rights for more than 60 years and was a main author of the proposed Equal Rights Amendment, died yesterday morning at the Quaker Greenleaf Extension Home in Moorestown, N.J. She was 92.

Born of Quaker parents in Moorestown in 1885, Dr. Paul pursued an education in social work and law, receiving a degree in social work from Swarthmore College in 1905, a master's and a doctorate from the University of Pennsylvania by 1912, a law degree from Washington College of Law in 1922 and a doctorate of law from American University in 1928.

Dr. Paul's crusade for women's rights began when she came to Washington in 1913 to lead the drive for women's suffrage. On March 3, 1913, the day before Woodrow Wilson's inauguration. Dr. Paul led a crowd of about 5,000 women on a march down Pennsylvania Avenue to the White House.

The demonstration, showing Dr. Paul's flair for the dramatic, never reached the White House because large crowds attracted to the event subsequently engaged in a brawl after which 40 persons were hospitalized. Cavalry troops from Ft. Myer were called to help restore order.

Four years later, in 1917, Dr. Paul and several of her associates were jailed for obstructing traffic when they were staging a protest for women's suffrage in Britain. They were given jail sentences of six months each.

While in jail, Dr. Paul went on a 22-day hunger strike and, during the last two weeks of the strike, was force-fed by a nasal tube twice a day. Such treatment generated public outrage and national protest until the women's sentences were commuted. But the incident marked only one of several times Dr. Paul was jailed for her activities.

In 1913, Dr. Paul founded the National Woman's Party, which spearheaded the movement to acquire for women the right to vote. Through continued hunger strikes and political protests, the organization was successful in achieving voting rights when the 19th Amendment was ratified in 1920.

Not content with that victory, Paul set about seeking further changes in the status of women, and in 1923, she drafted a proposed Equal Rights Amendment and presented it to a conference of the National Woman's Party at Seneca Falls, N.Y., where it was endorsed as the next major goal of the party.

The original text was brief and to the point, in keeping with Dr. Paul's direct approach in getting things done: "Men and women shall have equal rights throughout the United States and in every place subject to its jurisdiction."

When the amendment was proposed, it met stiff opposition from women's groups around the Nation, including the National League of Women Voters, which claimed that women needed protection under the law rather than equality.

Called the Lucretia Mott Amendment by Dr. Paul after her predecessor in the suffragette movement, the amendment was introduced into Congress that year, and Dr. Paul worked to see that it was introduced annually for the next 49 years.

The amendment cleared the House and Senate in 1972 after the women's liberation movement came to the fore in the late 1960s, and has been ratified by 35 states, three less than the number needed before it can become law.

Dr. Paul did not confine her efforts to the United States and Britain. In 1934, she worked on a consultant committee created by the Council for the League of Nations to study women's problems and concerns, after which she concluded that women in Europe were "straining at the leash" with the result that "men and women are facing each other as enemies today as never before."

To help correct the situation, Dr. Paul in 1938 founded the World Woman's Party, which later sent delegates to a convention that drafted the United Nations charter in order to insure recognition of women's rights by the body. The organization was successful in having the principle of equal rights for women affirmed in the preamble of the charter.

Following a two-year stay in Geneva, Switzerland, Dr. Paul returned in 1941 to resume her leadership on the domestic front, saying, "There never will be a new world order until women are given a part of it."

In 1957, Dr. Paul and the National Woman's Party faced a challenge of a different sort when the Senate started proceedings to have the party's headquarters building, historic Sewell-Belmont House at 144 Constitution Ave. NE., razed for a parking lot.

The women successfully fought attempts to remove their headquarters and in 1972, the building was declared a national landmark in commemoration of Dr. Paul and ratification of women's suffrage.

Sara McClendon, a journalist and a member of the National Woman's Party and friend of Dr. Paul, said yesterday that Dr. Paul once told her, "I never saw a day when I stopped working for women's rights," despite all the rebuffs and defeats.

According to McClendon, Dr. Paul said that she had kept a day-by-day list of members of both the House and the Senate and their position on ERA for years since 1920 and that until she became ill in recent years, she frequently lobbied members on Capitol Hill.

Elizabeth Chittick, chairwoman of the National Woman's Party, said in a statement that "the full impact of her (Dr. Paul's) lifelong efforts to secure equal rights for women in the United States Constitution, in the United Nations Charter, and throughout the world has yet to be felt."

McClendon said yesterday that memorial services will be held Friday at the Sewell-Belmont House for members of the National Woman's Party only.

McClendon said the organization plans to reenact Dr. Paul's famous march on the White House on Aug. 26 following a celebration to commemorate her life.

Dr. Paul, who was never married, is survived by a nephew.

Ms. HOLTZMAN. Mr. Speaker, I was deeply saddened to learn of the death of Alice Paul. Always it is difficult to adequately praise her extraordinary accomplishments, but I would like to add my voice in honoring her selfless and lifelong devotion to women's rights.

Dr. Paul would probably be uncomfortable with the recognition she is receiving in this public tribute. She was modest about her personal achievements and viewed the past as a thing to be vanquished rather than dwelled upon.

Nonetheless, her achievements were numerous. She founded and served as chair of the National Women's Party and founded the World Women's Party. She chaired the Congressional Committee of the American Woman's Suffrage Association and the Women's Research Foundation.

Her contribution to the international struggle for women's rights equaled her activities at home. She lobbied ably in the League of Nations for the principle of equal rights, and this principle was adopted in the preamble to the United Nations Charter. These practical efforts supplemented her impressive education which included a doctorate and three law degrees.

Alice Paul's life's work in the women's movement demonstrated an unflagging

commitment to end the inequality of women. Her vision, her active role, and her uncompromising devotion to the principle of equality contributed to the success of the two most important campaigns of her career: the ratification of the 19th amendment for women's suffrage and congressional passage of the equal rights amendment.

The women's suffrage movement was energized by Alice Paul's efforts. The political demonstrations and hunger strikes which she organized and participated in brought the 70-year battle for the vote to a successful conclusion. A similar commitment accompanied Dr. Paul's work for ERA. After securing introduction of the ERA in the Congress in 1923, Dr. Paul succeeded in seeing that it was reintroduced in every Congress for the next 49 years.

The commitment to women's issues in this country has fluctuated. The interest of the 1920's and 1930's that waned in the 1940's and 1950's and rose again in the 1960's and 1970's. All through this time, Alice Paul's devotion to equal rights of women remained constant. She remained active in this cause until 1974 when she became seriously ill.

Although we will miss her deeply, her example will inspire generations to come.

GENERAL LEAVE

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the subject of the special order today by the gentlewoman from Louisiana (Mrs. BOGGS).

The SPEAKER pro tempore (Mr. GONZALEZ). Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

CAPTIVE NATIONS WEEK, 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 60 minutes.

Mr. FLOOD. Mr. Speaker, during this week of July 17–23 the 19th Captive Nations Week is being observed in this country and abroad. In 1959, Congress provided for this annual observance in its Captive Nations Week resolution which President Eisenhower signed into Public Law 86–90.

HUMAN RIGHTS AND CAPTIVE NATIONS

The cause of human rights is nowhere more applicable, more pressing and more noble than in the direction of the over 27 captive nations found in that vast imperio-totalitarian part of the world. As has been pointed out by spokesmen of the National Captive Nations Committee, the captive nations issue has always been intertwined with that of human rights. As massive evidence shows, no part of this globe represents a graver denial of human rights, including the right to national independence, than the Communist imperio-totalitarian world imprisoning the captive nations.

For those who would restrict the scope and meaning of human rights, it cannot be emphasized too strongly that human rights encompass not only personal and civil rights but also, and in an aggregate sense most importantly, national rights.

THE HELSINKI ACCORDS

As we observe this week in dedication to the natural alliance and bonds that exist between the captive peoples and us, we must focus our sights on the Belgrade conference and its evaluation of compliance with the Helsinki accords.

Contrary to some opinion in this country, basket one in the accords is more important and fundamental than basket three, for the principle of national self-determination is what captive nations and the generic, national category of human rights are all about. Also, several colleagues and I have a pending measure, House Concurrent Resolution 165, which seeks the resurrection of the Ukrainian Orthodox and Catholic Churches in Ukraine.

The religious genocide of these churches is unparalleled and deserves top priority consideration at the Belgrade Conference. And, finally, dissidence in the Soviet Union and throughout the captive world must be supported in the spirit of personal, civil and national human rights. Soviet Russian imperio-colonialism, Russification and the economic exploitation of the non-Russian nations within the U.S.S.R. are forces that must be highlighted and brought before the court of world opinion.

Mr. Speaker, as part of my remarks I submit: First, the proclamations of Gov. Meldrim Thomson, Jr., of New Hampshire and Gov. William G. Milliken of Michigan; second, an excellent piece by Andrew M. Greeley on the captive nations issue; and third, the testimony of Dr. Lev E. Dobriansky of Georgetown University on the Genocide Convention, with reference to House Concurrent Resolution 165:

The material referred to follows:

STATE OF NEW HAMPSHIRE.

A PROCLAMATION: CAPTIVE NATIONS WEEK

Whereas, the greatness of the United States is in large part attributable to its having been able, through the democratic process, to achieve a harmonious national unity of its people, even though they stem from diverse racial, religious, and ethnic backgrounds; and

Whereas, since 1918 the imperialistic and aggressive policies of Russian communism have resulted in the brutal subjugation of free people in a vast and growing area of the world which poses a dire threat to the security of the United States and all of the remaining free peoples of the world; and

Whereas, these policies of the Communist world have led, through direct and indirect aggression, to the subjugation of the national independence of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, Rumania, East Germany, Bulgaria, mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Tibet, Cossackia, Turkestan, North Vietnam, South Vietnam, Cambodia, Laos and others; and

Whereas, it is fitting that we make clear to such peoples through appropriate and official means that the people of New Hampshire share with them our aspirations for the recovery of their freedom and independence; and

Whereas, the United States of America has and will continue to strive toward the day when all people of the world may live in freedom, and will continue to work to reverse the trend whereby freedom loving individuals and nations are losing their independence to aggressive communist nations at an ever increasing pace; and

Whereas, President Dwight D. Eisenhower, on July 17, 1959, signed into law, a joint resolution authorizing and requesting the President of the United States to proclaim annually, the third week in July as Captive Nations Week until such time as freedom and independence shall have been achieved for all the captive nations of the world; and

Whereas, the true spirit of the congressional resolution was to give support and encouragement to the enslaved people of captive nations to carry on their struggle for Freedom from Communist domination until liberty again reigns triumphant in their oppressed lands;

Now, therefore, I, Meldrim Thomson, Jr., Governor of the State of New Hampshire, do hereby proclaim the week of July 17–23, 1977 as Captive Nations Week, and urge our citizens to observe this week with appropriate ceremonies and activities including strong opposition to the continuation of detente with Communist Russia and Red China.

STATE OF MICHIGAN.

EXECUTIVE DECLARATION IN OBSERVATION OF CAPTIVE NATIONS WEEK

The desire for freedom and liberty burns in the hearts of people throughout the world, including those living in nations dominated by the policies of Communist Russia.

Freedom-loving peoples of Albania, Armenia, Bulgaria, Byelorussia, Croatia, Czechoslovakia, Estonia, Hungary, Latvia, Lithuania, Poland, Rumania, Serbia, The Ukraine and other captive nations look to the United States as the vanguard of human freedom.

Therefore, I, William G. Milliken, Governor of the State of Michigan, do hereby declare July 17–23, 1977, as Captive Nations Week, and I urge all citizens to dedicate some of their time and effort to the goal of freedom and liberty for all people throughout the world.

[From the Sunday News, Oct. 24, 1976]

THE CAPTIVE-NATION CAPER

(By Andrew M. Greeley)

Before Americans forget completely about Eastern Europe—that marvelous election bonus which President Ford gave to Governor Carter—there is an important point to be made: The captive nations issue, so much before the public eye for a few weeks, has been a matter of profound concern to some 7 percent of the population for three decades.

The national elites, the media, both political parties, and almost everyone else in the population have not taken this concern seriously. To forget about the captive nations again, as the country surely will, is going to be interpreted as a gross insult by that 7 percent of Americans who think the problems of people in those nations ought to merit attention by other Americans.

Israel is a concern to some 3 percent of the American population, and the rest of us are not permitted to forget about it—nor should we be permitted to forget it. Black rights are a concern of 10 percent of the country, and again we are not permitted to ignore those rights—nor should we be.

Then by what standards are we permitted to forget or ignore the oppression of Eastern Europe?

Immediately the answer comes that Israel is "different" or American blacks are "different" or Chile is "different" from Eastern Europe. If one wants to play that game, the differences go both ways. Israel is an independent country and Lithuania, the Ukraine, and even Poland and Hungary are not.

American blacks have more political freedom and a higher standard of living than

Poles or Bohemians or Croatians Obviously antiblack racism is a problem inside our borders, and obviously the Holocaust makes Israel a special case—though a lot of Eastern Europeans died in concentration camps, too.

Such attempts to weigh the "greater" importance of human freedom and dignity in one corner of the world against freedom and dignity in another corner are essentially hypocritical and irrelevant. Freedom and dignity are indivisible. One supports them everywhere or nowhere.

The Jew who is for freedom in Israel and not in Poland is a hypocrite; the black who is for equal rights in the United Sates and not for equal rights in Lithuania is a hypocrite; the liberal who is opposed to torture in Chile while not troubled by it in Ulster is a hypocrite; the Catholic who is worried about the right to life in the United States and not in India is a hypocrite.

Obviously one puts the major emphasis on the causes closest to home or in which one has a greater personal interest; there is nothing wrong with that. Obviously some forms of injustice are worse than others; and there is nothing wrong with calling attention to that.

What is wrong is to urge other Americans to support one's own cause in the name of freedom, dignity and justice and ignore their claim to support in return when freedom, dignity and justice are at stake.

STATEMENT OF DR. LEV E. DOBRIANSKY

Mr. Chairman, having testified over a 27 year period twice before in favor of the ratification of the Genocide Convention, I want to take this third opportunity to submit a brief statement within the new context of our human rights discussion and the primacy of the issue for a strong and influential policy. I believe the political climate today is quite different from what it was in 1970 and certainly in 1950, when I first testified on this treaty. It is unfortunate that this highly important treaty has had to be subjected to the vagaries of any political climate, since, dealing with the preservation of life itself, the treaty and its ratification should have received long ago a thoroughly apolitical and objective treatment. President Carter with his emphasis on human rights and your Committee with its patient perseverance are to be commended in striving for such treatment and the treaty's ratification by the Senate.

TRIBUTES TO PROFESSOR LEMKIN AND SENATOR PROXMIRE

It is not my intention here to repeat arguments and data which I provided in the previous testimonies. All of the supporting, substantive data offered back in 1950 apply without any qualification today. (The Genocide Convention. Hearing, Committee on Foreign Relations, U.S. Senate, 1950, pp. 319–413). The same can be said for the legal and constitutional points and arguments stressed in my testimony in 1970 (Genocide Convention, Hearings, Subcommittee of the Committee on Foreign Relations, U.S. Senate, 1970, pp. 165–174). However, for the record, certain things do require repeating.

One, it was my precious privilege to work with Dr. Raphael Lemkin on this treaty's ratification. Mention is made of this again because few now realize that in fact a life was literally sacrificed to advance this treaty and its ratification by the United States especially. Dr. Lemkin, of Polish Jewish origin and an esteemed international lawyer, coined the word "genocide", knew from experience its special meaning and horrors, and was primarily instrumental in the drafting of the convention and its carefully prepared provisions. He was an outstanding scholar and truly great person who could have leisurely extended his years on the faculty of Yale University, but who, instead, dedicated to the universal realization of this convention, spent his time and energies, and with increasing personal poverty, in the halls of the United Nations and our Capitol, promulgating this vital treaty. His death was premature. He died as a sad and disillusioned man, not understanding how some have failed to understand the crucial import of this treaty. It was, above all, the United States, his adopted country, that he placed his complete faith in leadership on this.

If, as I believe, the treaty will finally be ratified by us in view of the existence of no creditable opposition to it at this time and of the pressing need to support the human rights orientation of our foreign policy, I propose again the idea of a fitting posthumous tribute by our Congress to the works and efforts of the real father of the Genocide Convention, Dr. Raphael Lemkin. On this basis, he would also be fully deserving of a posthumous Nobel Prize Award.

To coin, help draft, lay the foundation and to struggle unto death are one end of the spectrum of this subject. The other end of dedication and perseverance in the present constitutes an equally important one. This has been provided by the steadfast efforts of Senator William Proxmire. For some ten years on a daily legislative basis he has uniquely covered the ground of all the proferred objections and criticisms to the treaty. Without his leadership in this respect, the vast majority of voices in this country for ratification of the treaty would have been stilled for want of direction and concentrated expression. As a reader of the Congressional Record and one who was well taught by Dr. Lemkin as to the legal and constitutional aspects of the treaty, I can attest to the Senator's full and objective coverage of the subject. While we pay tribute posthumously to one, we cannot but pay equal tribute to the Senator for carrying on the fight with equal dedication to this day.

FURTHER ESSENTIAL POINTS AND A CURRENT CASE

Further essential points that need restating are as follows:

(a) the inordinate delay in ratifying the Genocide Convention has been a disgrace for the United States and a source not only of embarrassment to our representatives but also of impediments to a dynamic foreign policy. Particularly in this period of human rights consciousness, the end of this delay is more urgent than ever before. The Convention has much to do with certain generic categories of human rights;

(b) the misconceptions of genocide that have mounted for over two decades have militated more against the treaty's ratification than the many relatively petty legalistic misinterpretations. For examples, mass killing in itself is not genocide, whereas mass deportations can be genocidal. The crux of genocide's meaning is found in the treaty's words, "with intent to destroy, in whole or in part, a national, ethnical, racial, or religious group, as such."

As so well exemplified by Hitler's assault upon the Jews, Stalin's destruction of the Ukrainian Orthodox and Catholic Churches, which remains a current case, and Mao's attack against the Tibetans, to mention only a few, the intent to destroy in whole or in part, and regardless of motivation or purpose, was realized overtly in the act itself. The consummate aim of the Convention is to prevent such an act in the first place through the force of international law and morality. The "as such" is the determining qualification here that differentiates this special type of crime from all others;

(c) once the special meaning of genocide is grasped, it flows logically that this type of crime, heinously denying any of the above groups its very right to exist, is impossible within a democratic society and even an authoritarian one. In a totalitarian society, such as Nazi Germany, the USSR or mainland China, where political power was and is monopolized, the environment for its commission is fertile and the means for its execution is readily available;

(d) reflective insights into these two previous points are sufficient to place into perspective the so-called legal objections about foreign dictation to our Congress, the illusory expansion of power of the International Court of Justice, and the United Nations, and vulnerability to charges of genocide in warfare. This gamut of objections and criticisms against the treaty for almost 30 years has been almost entirely one of misinterpretation of the treaty's provisions and safeguards. Most of all, in any given analysis, it invariably was founded on a false conception of genocide and an inadequate empirical insensitivity to the real facts and experiences of genocide as precisely defined in the convention;

(e) with the American Bar Association finally favoring ratification in this decade and almost all national groups (the Ukrainian Congress Committee of America since 1950) maintaining their previous positive positions, it would be the apogee of arbitrariness for a relative few to stall further the necessary process of Senate ratification; and

(f) such arbitrary stalling would not only continue to deprive our nation of a politico-moral force in our foreign policy, such as it has done for over a generation, but it would also blindly obstruct at this stage the President's commendable attempt to make human rights the foundation of our foreign policy. In short, how would it look to others throughout the world—a world in which over 80 states have ratified the treaty—for the U.S. to continue its stall without any substantial justification on a treaty that deals with a basic human right, a specified group's right to exist and live, and yet to advocate human rights. It would be an open invitation to becoming a laughingstock at the very time that numerous LDC's look to American moral leadership and friendship.

RELIGIOUS GENOCIDE IN UKRAINE

The current case of genocide cited above has to do with Stalin's liquidation of the Ukrainian Orthodox and Catholic Churches. Why should this be pointed out here in this statement? For very practical reasons, pertaining to the Convention itself, the President's human rights advocacy, and our substantive and tactical approach to the Belgrade conference and its evaluation of compliance with the Helsinki Accords. These are all closely interrelated and serve as an exercise of thought bearing on the Convention.

As I emphasized in my recent testimony before our Commission on Security and Cooperation in Europe ("Helsinki, Human Rights and U.S. Foreign Policy") the annihilation of these two Churches is an act of religious genocide. By concept and definition, it fits to a "T" the provision of Article II in the Convention—an act "committed with intent to destroy, in whole or in part, a national . . . or religious group as such", by killing "members of the group", "causing serious bodily or mental harm to members of the group, and by deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part . . ." The murders and deportations of the Ukrainian Orthodox and Catholic clergy, the concentration camp incarcerations of their faithful and the obliteration of the two national institutions and all their functioning properties spell, without doubt, religious genocide.

Going a step beyond in the generic order of human rights, this genocide of the soul of a nation and all the mental harm this has caused, also entails in major part the genocide of the national group, the Ukrainian nation as such. As I stated in the human rights testimony, "In speaking of the genocidal surgery of a nation, just imagine what would happen if the Polish Roman Catholic Church were similarly liquidated." Moreover, the fact that this outstanding combination of genocidal operation was committed under Stalin, does not render the cases obsolete. The disintegrative effects of the crime continue with regard to the nation to this very day, and the renewal of the religious groups is possible once the continuing intent perpetuated by Stalin's successors is eliminated. H. Con. Res. 165, submitted by Representative Daniel J. Flood and several of his colleagues, seeks the resurrection of the Ukrainian Orthodox and Catholic Churches in Ukraine on the basis of this logical line of reasoning and empirical validation.

HUMAN RIGHTS AND THE CONVENTION

In terms of magnitude, intensity and significance for the preservation of a nation, no other contemporary case of religious genocide can parallel this one of the two Ukrainian Churches. Yet, isn't it peculiar and strange that the councils of the world—our democratic governments, the committees and bodies of the United Nations, indeed, the Vatican and the World Council of Churches—scarcely have raised a voice against this heinous, genocidal crime? It cannot be said that they are unaware of it. Is it the fear of irritating the Russian bear, regardless of principle, value and civilized judgment?

It is fervently hoped that this Soviet Russian crime will be placed high on the agenda of the Belgrade conference, where our representatives are expected to uphold human rights. The fact that the completion of this genocidal act under Stalin predates the Helsinki Accords in no way detracts from its continuous impact on the Ukrainian nation, not to speak of the factor of institutional recoverability. Apprehended underground priests still are being murdered or imprisoned, and the faithful still are being subjected to mental harm in order to destroy permanently the two religious groups.

Philosophically, the rational link between human rights and the Genocide Convention is to be found in the two higher generic orders or categories of human rights. The delineation and explanation of the three generic categories of human rights—the personal, the civil, and the national—are provided in my recent testimony before the Commission. For clarity and precision of thought, suffice it here to state that the Convention can be applied only to the civil and national categories of human rights since, again, the treaty specifically deals with, "in whole or in part, a national, ethnical, racial or religious group, as such." The first relates to national human rights, even for a nation to exist in all of its manifold expressions; the last three relate to the civil rights category of human rights. The Convention has no direct bearing on the first generic category of personal rights.

In making these necessary distinctions, it should be clear that the combined case of the genocided Ukrainian Orthodox and Catholic Churches in Ukraine falls under the Genocide Convention and is related only, in terms of the treaty, to the civil and national categories of human rights. Without the guidelines of such necessary conceptual distinctions we would only lend ourselves to the dialectic play of the Russians.

Finally, as I argued in the Commission testimony, the possibilities of human rights serving as the centerpiece of our new foreign policy and laying the groundwork for accountability by signatory states in terms of the U.N. Charter, the Universal Declaration of Human Rights, the Genocide Convention and so forth are tremendous. Provided we attain to a clear conception of human rights in the objective and even graded quantitative form of three generic categories, this policy application can work toward international order through the rule of law. But, as applied, for example, to the combined genocidal case presented here, how could we with any credibility pursue this course without having ratified the Genocide Convention? The answer is obvious. All the essential ingredients of this statement were offered 27 years ago, again thanks to the guidance and wisdom of Dr. Lemkin, but the climate and environment were short. They appear long now in their total characteristics and, as then, we just as strongly in thought and conviction still favor the necessary ratification of this basic, group right-to-life convention.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. FLOOD. I am happy to yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate my colleague, the gentleman from Pennsylvania (Mr. FLOOD) yielding to me. I believe that this House is eternally grateful to the gentleman from Pennsylvania (Mr. FLOOD) for his recurring and persistent effort to make sure that Captive Nations Week will not be forgotten and will remain as a symbol of human rights around the world. Also that the gentleman from Pennsylvania has not allowed time nor events to dissuade him and others to let this issue slip by or to forget it.

I know that I speak for many Members of the House when I say how grateful we are that he has kept up this persistent effort. I wish to compliment the gentleman for it.

I also know that people who are in captivity behind these various forms of tyranny are also grateful for his voice and for his willingness to make sure, along with others, that this resolution is presented each year and passed by the House. I want to add my voice to those who are grateful for his continuing efforts in this regard.

Mr. Speaker, during this 19th observance of Captive Nations Week, it is most appropriate that we take time to consider the millions of people throughout the world from whom tyranny and oppression are features of everyday life. The list of captive nations is long. They exist in virtually all parts of the world. Some of these countries once enjoyed long periods of self-determination and freedom. Others have been free for only the briefest of moments.

Yet in each of these countries, the spirit of liberty remains alive—held dear by those who continuously struggle to rid themselves from the oppression which grips their homelands. In recognition of their ongoing battle, we have set aside the third week in July as Captive Nations Week. Through this commemoration, we pay tribute to the courage of those who are not yet free and we reaffirm our own country's strong commitment to human and civil rights for all people. It is, therefore, truly unfortunate that America's current foreign policy seems to conflict with our respect for the human rights of these captive nations.

For the past 2 years, the only country to enjoy United States most-favored nation trade benefits, subject to the human rights and free emigration conditions of the Trade Act of 1974, has been Romania. In the past, the Government has granted Romania a waiver from those requirements because, allegedly, the Romanians were pursuing a foreign policy independent of the Soviet Union. Many of us here in Congress, however, have been concerned about constant charges that attempts have been made to suppress the language and culture of ethnic minorities. In addition, recent news accounts have referred to continued harassment of those seeking to emigrate and a new crackdown on dissidents—actions which point to a serious disregard for human rights and a badly-needed reconsideration of our trade position.

Unfortunately, the Carter administration does not share that viewpoint. On June 3, the President recommended that a waiver from the human rights and free emigration conditions of the Trade Act be extended—that we continue to trade with Romania. Earlier this week, the Trade Subcommittee of the House Ways and Means Committee added its approval to the administration's recommendation. I find these actions tragic and wonder aloud when we are going to stop having a selective human rights foreign policy—when we are going to give more than lip service to Captive Nations Week.

Mr. DERWINSKI. Mr. Speaker, I know that I express the sentiments of many of the Members of this House when I say we are grateful to the distinguished gentleman from Pennsylvania (Mr. FLOOD) for taking this special order today. The distinguished gentleman has always taken the initiative to make sure that we do not forget those nations living under tyranny behind the Iron Curtain, and we especially appreciate his continuing efforts to make sure America does not forget these victims of communism.

Captive Nations Week of 1977 takes on added significance. Perhaps the significance of this observance is as great this year as it was the year the commemoration was first established in 1959.

In making this point, I specifically refer to President Carter's emphasis on human rights. Certainly there is not a more flagrant denial of human rights than the loss of freedom which has afflicted all peoples under Communist rule.

Communism by its very nature deprives people of their basic rights. Freedom of speech, freedom of religion, freedom of movement, freedom of expression, and freedom of political activity are all denied peoples by various Communist governments. Whether it be the major Communist powers, the Soviet Union or Red China, or one of their European or Asian satellites, or even a semi-independent Communist state, the adverse impact on their respective populations is the same. This is true, regardless of the diplomatic independence that some of these nations occasionally try to display.

It would seem to me that at the time that diplomats are engaged in developing the agenda of the Belgrade Conference that it is most appropriate for us to emphasize the complications which beset people who are behind the Iron or Bamboo Curtain. And even though the liberal

establishment looks down on Captive Nations Week observances as being obsolete, the facts of life are that there is not any subject that so directly effects world political, geopolitical, and military relations than the issue of the captive peoples and the totalitarian regimes which oppress them.

Mr. Speaker, may I point out to the Members that, even though there is a similarity in terms of internal oppression that is characteristic of every Communist government, the captive peoples themselves are a diverse group with their own individual nationalistic traditions and spirit, which are their strength as they continue the battle against the false ideology of communism. For example, the non-Russian peoples of the Soviet Union include the Armenians, Byelorussians, Georgians, Cossacks, the Tartars, the Ukrainians—largest of the non-Russian peoples—and the Baltic States—Lithuania, Latvia, and Estonia—which constitute in terms of population almost half the populace of the U.S.S.R. Then, when we add the countries of Eastern Europe—Albania, Bulgaria, Poland, Romania, Czechoslovakia, and Yugoslavia—that were communized by Russian military forces after the close of World War II, we have another group of people whose great spirit, determination, and nationalistic integrity are their weapons in combating the ideology of communism.

In Asia where the greatest threat is posed by the dictatorship in Peking, we must note that the recent tragedy of Communist conquest of Cambodia, Vietnam, and Laos has added millions more people to the status of captives under communism.

It is especially important that we utilize this annual Captive Nations Week observance as a means of rallying the people of the United States and peoples of the free world in support of the just aspirations for independence of the people under Communist rule. It must be noted that there is not a single case where people voluntarily came under Communist rule; it was either by military invasion or revolution that the Communists have seized control. Communism cannot survive the application of democracy. This was demonstrated by the Soviets when they moved into Czechoslovakia to crush the aborted development in that country when there was an effort made to permit an evolution to democracy at that time.

Mr. Speaker, I think it is important that we stress the worldwide importance of the Captive Nations Week commemorations, because, when we speak of those held under the alien ideology of communism, we speak of peoples in Asia, Europe, Cuba in the Western Hemisphere and we now find that the aggressive designs of Communist imperialism are clearly visible on the African continent.

As so aptly stated by Lincoln, our Nation could not long endure half slave and half free, so it is that the world cannot endure half slave and half free. The freedoms which all men seek—legitimate nationalistic aspirations, the right to national identity, the right to maintain their language, culture, and traditions, the right to worship in a manner of their choice—give more strength to the cause of the free world than to atheistic Communist totalitarianism.

Mr. Speaker, I am especially pleased that the distinguished mayor of Providence, R.I., the Honorable Vincent A. Cianci, Jr., has issued a timely proclamation for Captive Nations Week. I am pleased to insert it in the RECORD as part of my remarks:

PROCLAMATION

Whereas, the United States of America has enjoyed full freedom for all of its citizens ever since it became "one nation under God, with liberty and justice for all" in 1776; and

Whereas, throughout the world in 1977, the same rights for freedom and personal liberty to which all men are heirs, are not presently available to countless millions of our fellow human beings in many captive nations; and

Whereas, it is incumbent upon all elected officials in this nation, to whom the deprivation of human liberty and the continuing enslavement of peoples is most reprehensible, to speak out on behalf of all who reside in these captive nations;

Now, therefore, do I, Vincent A. Cianci, Jr., Mayor of the city of Providence, hereby proclaim the week of July 17th through the 23rd, 1977 as Captive Nations Week in Providence and urge all of my fellow citizens in the capital city of Rhode Island to become cognizant of the fact that all of the personal freedom that we enjoy is still being denied many of our fellow human beings throughout the world.

Mr. FLOOD. Mr. Speaker, I appreciate the remarks of the gentleman from California (Mr. ROUSSELOT). Each year the gentleman stands here and says these racious things and takes part in what we are continuing to do.

Mr. PEPPER. Mr. Speaker and Members of the House, I want to join in commending the distinguished gentleman from Pennsylvania (Mr. FLOOD) and all of those who have associated themselves with him today in his pledge of sentiment here attesting to our love for freedom on Captive Nations Week. His special order is required for that purpose.

Mr. Speaker, it is a tragic thing that we are in the 2000th year of the Christian era, when we are in the grcat age of enlightenment, the greatest that mankind has ever known, that we have had so many centuries of political struggle, and so many martyrs who have died for the cause of freedom and for the experience of liberty and independence, yet we have to look across the world today with deepening sentiments of sadness, pain and anguish that so many men, women and children throughout the world still live under slavery, still are denied the exhilarating and inspiring influence of the experience of freedom, liberty, and independence.

This week is dedicated to making ourselves a commitment and a commitment to all those who do not today enjoy freedom. Their cause is our cause. We share their aspirations. We are determined to make what contributions we properly and reasonably can to their securing the blessings and liberty and enjoying them as it has been the privilege of the people of this country for so long to do.

I think history will call to account all oppressors of mankind, whatever be the day and place of judgment which they shall face. One of those nations that will be called to account is the Soviet Union. That is a great nation. It stood with great courage and with great persistence and great faith against the terrorist attacks of Hitler. I had an interview with Stalin in 1950 in the course of which he told me that Hitler and his aggression upon Russia had been responsible for the death of at least 15 million Soviet people. We aided Russia very substantially in her resistance to Hitler's tyrannical aggression. It may well have been that without the assistance we accorded the Soviet Union, she would not have been able to stop Hitler's aggression upon the very threshold of the city of Moscow. But we gave that assistance to Russia gladly because we were fighting a common foe—Hitler, who was endeavoring to enslave as much of Europe as he could, indeed, as much of mankind as could come within the reach of his power.

But when that great victory was won against tyranny, when the bestiality of that brutal Hitler was destroyed, instead of becoming the champion of liberty and freedom, the Soviet Union repudiated its obligations to those who had helped to win her freedom and began to enslave Eastern Europe, and at another time the three great nations of the Baltic, Estonia, Latvia, and Lithuania. Today liberty and freedom as we know it in America does not exist in the Soviet Union. Why does that great country wish to repudiate the honor that it has achieved in so many areas of man's competition? Why does it not also take the lead in enjoying and giving to other people, such as it can, the blessing of liberty and freedom and independence?

Surely they are not afraid to allow those privileges to their own people. How can they be secure, how can they stand before the world proud of their accomplishment, secure in the enjoyment of the system that they have, if they are unwilling to leave that system if they want to, if they are willing to deny the fundamental simple human rights and justice to which mankind has come to believe God intended his people everywhere to enjoy?

So today we call upon every Nation that oppresses the rights of any people anywhere, a large number of people or a few people, we call upon them in the words of the Bible: "Let my people go."

Let them go, as we would allow people to leave our country. We do not have to get permission to leave America. All we have to do is to leave. We do not commit any offense. We do not offend against any law. We do not cause any police officer to be trying to keep us from getting out of the confines of our land. We have a right to go when we will and where we will.

We have enough confidence in the kind of government we have, in the sort of society that we have been able to build here, in the rights and privileges that our people enjoy, that we can with security give anybody who wishes to do so the right to leave our land.

Why cannot other nations of the world do the same thing? Many of the great nations of the world have done that for a

long time. It is a part of their cherished history. Why cannot all the nations do that? They never will be great nations, they never will stand out in history and deserve the acclaim and the commendation and the honor of mankind until those nations do make their system embrace the respect for the rights and privileges of all people who live within their borders and see to it that they get justice before the law and that they are protected against any kind of oppression maintained by the government.

We today therefore recommit ourselves to the cause of human freedom. We commend our great President for the leadership he has given to the world in calling for respect for human rights. So we particularly call upon all those nations who oppress anybody anywhere at any time to free their people from these restraints and lift them up into the beautiful air of freedom, into the enjoyment of liberty and independence which is God's blessing to all men anywhere in the world.

Ms. OAKAR. Mr. Speaker, to my distinguished chairman of the Aging Committee, I would say his words are meaningful and eloquent, and I wish to associate myself with what the gentleman from Florida has just said.

Mr. KEMP. Mr. Speaker, I wish to thank and commend the efforts of my friend and colleague, Representative DANIEL FLOOD of Pennsylvania to focus congressional attention on the plight of the Captive Nations. It is vitally important that our Nation fittingly observe Captive Nations Week. Throughout history, the American people have overcome great obstacles, in order to stand on behalf of those people who love freedom as we do.

In July 1959, the Congress passed Public Law 86–90 which authorized and requested the President of the United States to designate the third week in July of each year as Captive Nations Week "until such a time as freedom and independence shall have been achieved for all the captive nations of the world."

I am pleased to know that President Carter has now issued the annual Presidential declaration in commemoration of Captive Nations Week. At a time when the administration is looking toward normalizing relations with Cuba, has accepted Vietnam into the United Nations, and withdrawing our troops from South Korea, any hesitation may have been interpreted as turning our backs on the millions of people who look to the United States as the citadel of human freedom and democracy. It would also have been a disappointment to those Americans whose relatives and heritages are still tied to those nations held captive. While we in America are enjoying the fruits of 201 years of freedom, we must remember that God who gives life is the ultimate source of our freedom and that of all people everywhere.

It is important to keep in mind that the price of maintaining freedom in every corner of the globe is far less than the cost we would have to pay to regain it, if lost. The people who live in the captive nations are those who are imprisoned within the Communist-dominated states under dictatorship of the Communist parties, and their consummate experiences attest to the overall truth that in both theory and action, communism is the worst form of totalitarianism and imperiocolonialism in the history of mankind rivaled only by Nazi/Fascism.

All too many times, we take the convictions and ideals that our forefathers fought for too casually. For these are what have formed the ideological base in our country, and the ones which have given those people in the captive nations hope, encouragement, and a goal to base their struggle for freedom on as well. These convictions were founded in a firm belief in the spiritual worth of the individual. They must be free to think, to speak, to print, to assemble, and to worship in accordance with their consciences. They must enjoy equality before the law. They must have a fair chance to develop and use their talents and to rise to the top of their abilities.

The purpose of government is to serve its citizens in freedom. Our forefathers did not claim to have discovered novel principles. They looked on their findings as universal values, the common property of all mankind. These ideas of freedom are still the truly revolutionary political principles abroad in the world. They appeal to the timeless aspirations of mankind. In some regions they flourish; in others, they are outlawed. But everywhere, to varying degree, they stir and inspire humanity. The affairs of men do not stand still. The ideas and convictions of freedom grow in vigor and influence and only if freedom continues to flourish unrestricted around our globe, will men realize the prosperity, the happiness, and the enduring peace they seek.

Citizens of the captive nations can only look forward to continued oppression, unless we spearhead and continue to lead the efforts of all free nations to work in harmony for the common goal of bringing freedom to all mankind. To further this objective, we must rededicate ourselves to the realization that no arena is too remote, no cause too small for us to reaffirm and dedicate ourselves to a total fulfillment of this commitment.

These nations look to the United States as the distant but strong beacon of freedom shining through the darkness of tyranny. We must continue to assist these captive nations in their courageous and never-ending struggle for freedom, so that one day, that beacon might shine over their lands as well.

Since 1917, over 1 billion members of mankind have lost their independence under the heels of Soviet Russian and Red Chinese totalitarianism. With the nations of Albania, Armenia, Bulgaria, Byelorussia, Cambodia, Crimean Tartars, Croatia, Cuba, East Germany, Estonia, Georgia, Hungary, Idel Ural, Laos, Latvia, Lithuania, North Korea, Vietnam, Poland, Romania, Serbia, Slovakia, Tibet, and the Ukraine, to name a few, all in the tightened grips of communism, one can only wonder who will be the next victims to fall prey to the dark cloud of oppression and domination.

For this reason, we must remain strong both in our conviction and in our support of the captive nations, and especially in letting the captors know that we are unswerving and steadfast as a free people and a free Nation, perpetually confirming the rights of all nations to know their own national freedom and independence.

Mr. Speaker, in this regard, it is of great importance that our remarks this day are not words of rhetoric, but rather words of action. I therefore urge that my colleagues join in cosponsorship of House Concurrent Resolution 278, which would allow the Baltic States the right of self-determination, the withdrawal of all Russian troops and other nonnative troops from these countries, and the return of Baltic prisoners from Soviet Labor camps. The United States has never acknowledged or recognized the incorporation of these once independent nations into the calamitous hands of the Soviet Union.

The Russian hierarchy remains an instrument of oppression for the people living imprisoned in these captive nations. Let us then demonstrate our concern and active commitment by dedicating ourselves as the guarantors of freedom, liberty and self-determination around the world, for all mankind. Let us send a strong and forceful message to our enemies stating that we will never acquiesce to any temporary or permanent captivity of these nations, or our captive allies, and that we are determined to work for their freedom, which in essence means our national freedom as well.

I have introduced today a resolution that was first suggested by Vladimir Bukovsky, the courageous Soviet dissident whom I was honored to meet just 2 months ago, on behalf of all captive peoples of the world. Mr. Bukovsky called this "a Strategy for Freedom" and I introduce it on his behalf and those giants of recent history such as Alexandr Solzhenitsyn, Andrei Sakharov, Alexander Scheransky, Ginzburg and hundreds of thousands more whose courage is unequaled in standing up to the whole totalitarian machinery of the Communist world. I also pay tribute to the great work of Dr. Lev Dobriansky of Georgetown University whose help and leadership on this is deeply appreciated.

The Strategy for Freedom resolution follows:

Whereas under the communist Soviet state persons are routinely deprived of basic human rights, including freedom of speech and of the press, freedom to choose alternative economic, educational, social and political systems other than that imposed by force; and

Whereas this policy denial of human rights denies the spiritual worth of the individual; and

Whereas the purpose of government is to serve its citizens; and

Whereas the ideals of freedom that sparked the American Revolution 201 years ago were merely a reaffirmation of the inherent rights of all humanity; Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the President of the United States of America shall take immediate and determined steps to enact the following measures strongly supported by such Soviet human rights leaders as Vladimir Bukovsky, and proposed as a

Strategy for Freedom on behalf of all oppressed peoples, to—

(1) Make U.S. trade with an economic aid to the Soviet Union dependent on Soviet observance of civil rights agreements; and

(2) Demand that Soviet leaders admit observers to their prisons, prison camps, psychiatric hospitals and trials; and

(3) Investigate infringement of civil freedom in the Soviet Union; and

(4) Obtain free contact between Western groups which seek to bolster the Helsinki accords and similar groups which have spontaneously sprung up behind the Iron Curtain; and

(5) Appeal to Moscow at the Belgrade Conference as a signatory to the Genocide Convention, for the restoration of Ukraine's Orthodox and Catholic Churches; and

(6) Urge the direct signations of Ukraine and Byelorussia, which are members of the United Nations, to the Helsinki Accords while advancing the idea of direct diplomatic relations with these non-Russian republics; and

(7) Advance the human rights issue by openly exposing all the accumulated cases of Moscow's continuing violation and deprivation of these rights within the USSR; and

(8) Press for accountability in terms of the U.N. Charter, the Declaration of Human Rights, and other legal instruments upholding human rights.

Mr. RODINO. Mr. Speaker, I am pleased to join in commemorating the 19th observance of Captive Nations Week. It is a time when we give special attention to the plight of countless people around the world who are denied their basic freedoms and liberty—ideals which were cherished even before this Nation's birth. As America begins her second 200 years, we cannot forget our commitment to the goal of securing the fundamental rights of all individuals.

Since the writing of the Declaration of Independence, America has recognized the importance of national self-determination. The Bill of Rights is a striking indication of our forefathers concern for safeguarding basic freedoms, and we have a responsibility to carry on that tradition. We must continue to strive for human rights on all levels—personal, civil, and national. Unfortunately, there is no greater denial of these rights than the oppressive treatment to which those people living in captive nations are subject.

Nineteen years ago, the Congress proclaimed Captive Nations Week to recognize the political and cultural suppression in the captive nations throughout the world. For the people of these nations freedom is still only an ideal. During our Bicentennial Year, people across the Nation celebrated America's independence. Now we must emphasize the cause of freedom in our relations with other nations until all the people of the world may celebrate their successful quest for human dignity and freedom.

Mr. WINN. Mr. Speaker, the third week of July marks the 19th anniversary of Captive Nations Week. In 1959, President Dwight D. Eisenhower signed into law a resolution calling for an annual recognition of the oppressed peoples of the world.

The resolution states:

Whereas it is vital to the national security of the United States that the desire for liberty and independence on the part of peoples of these conquered nations should be steadfastly kept alive.

This strong statement underlines the need to acknowledge the democratic aspirations of men and women who are shackled under Communist or autocratic regimes. We must look beyond our national boundaries and reassure these people that we encourage their ideals of freedom and independence. Not so long ago, we founded our own country upon these same ideals.

Captive Nations Week is especially significant in this year of the official review of the Helsinki Final Act. Without a respect for human rights, stability in Europe will continue to be threatened by insurrections. Peace and security cannot be sustained if citizens are deprived of their basic civil liberties.

By acknowledging Captive Nations Week, we are reminding Soviet-dominated Eastern Europeans that we have not forgotten them. "Life, liberty, and the pursuit of happiness" are words from the American Declaration of Independence but freedom and self-determination are universal concepts. By reaffirming our dedication to liberty, we provide the oppressed men, women, and children with hope for the future. As long as captive nations exist in the world, the United States must honor those who are struggling toward justice and freedom.

Mr. CLEVELAND. Mr. Speaker, this week marks the 19th annual observance of Captive Nations Week, and it is very disheartening that the roster of nations under Communist domination grows longer with each passing year. More than 30 countries, whose inhabitants number some 160 million, now exist under conditions that deny or repress the fundamental human freedoms that we in America are blessed with but too often take for granted.

Since the designation of Captive Nations Week by unanimous consent of the Congress in 1959, we have seen one nation after another fall before the force of communism, and it is well worth pointing out that in every single instance it was military force that was the agent of change. These countries did not choose their Communist governments by free elections and, in fact, in the elections held in Europe in the last few years, the Communist Party candidates were roundly defeated.

Even as we stand in this Chamber and speak of the freedoms unavailable in these countries, Communist forces are attempting to enlarge the list of captive nations. Several countries in Africa stand on the brink of domination, and who knows how many more throughout the world will be arenas of ideological conflict soon.

Mr. Speaker, the new administration is focusing national attention on the important issue of human rights, and I applaud that commitment. I sincerely hope, as do all Americans, that it will bring about concrete and lasting results without damaging our relations with important allies.

I am alarmed, however, by recent overtures made to several Communist governments, especially the proposals to resume diplomatic relations with Cuba, and to withdraw American troops from South Korea. The barbaric and senseless shooting down of an American helicopter last week by North Koreans should convince us that a troop withdrawal would only invite a massive invasion from the North.

These overtures, unfortunately, seem symptomatic of the American mood, which over the years has become frighteningly complacent and insensitive to those hundreds of millions of people throughout the world who cannot even voice their own inner thoughts without fear of arrest or worse. We have become so used to our own precious individual freedoms, that we cannot realistically appreciate the fact that these freedoms are only a dream in the quiet of the night to the residents of the captive nations.

Somehow that complacency has to be shaken, and attention directed with renewed strength to the cause of speaking out in behalf of these people. Let us hope that the human rights campaign of the administration helps restore some of that zeal, and let us hope as well that this 19th observance of Captive Nations Week will raise more voices to join with us. The rights and freedoms of self-determination and justice belong to all nations, and we should never waver in our determination to achieve that goal.

Mr. ADDABBO. Mr. Speaker, today marks the 19th anniversary of Captive Nations Week and it is especially important in this era of stressing human rights throughout the world that we direct our thoughts to those people whose human rights have for so long been denied.

This is additionally a good time for us to dwell upon those international conferences now underway in which the question of freedom in all nations will be a topic of serious discussion.

Our Nation has served as a beacon for those who have left Estonia, Latvia, and Lithuania, and so I believe our Nation has not only the right but the obligation to remind the world that the people of these nations are still not free and have no hopes of freedom coming anytime soon.

For these nations, it has been 37 years without freedom, from the early days of World War II through the dominance of the Soviet Union from the end of the war.

Many violations of human rights have been documented since the Soviet takeover of these nations, including genocide and forced deportations.

In this Nation, we are deeply concerned with human rights, and we are willing to report to the world violations of civil rights no matter where they occur.

I believe it is of extreme importance that on this important anniversary, we remind the world of the tribulations of millions of people who yearn for freedom but who are denied their basic human rights. Let us not forget them.

Mr. RHODES. Mr. Speaker, for the past quarter century, we Members of Congress have been discussing the plight

of the many nations of the world that have been taken over by the armed might of communism.

From the days of President Dwight D. Eisenhower, we have observed Captive Nations Week, a time to remind the world that freedom is beset with dangers, and that totalitarianism constantly is trying to capture more of the world's people.

This year is more than a reminder, it is recognition that in many countries that have been overrun by the Red tide, the people are beginning to stir. Resentment of dreary, no-hope lives, and the prospects of a dead-end future has surfaced. Dissent is being voiced, the Communist system questioned, and the yearning for self-determination expressed by many who rebel at the Communist yoke.

We all should look back at the course of the world, and realize how far communism has advanced at the expense of freedom. Much of Europe and a substantial portion of Asia has been seized through force of arms. Many other areas of the world seek our assistance, to prevent takeovers by the world Communist conspiracy.

This year, the observance of Captive Nations Week is perhaps the marking of a beginning, a time in the world when oppressed peoples rekindle the desire and the will to work toward more freedom of thought and action. We should help them in every way.

This week also is a reminder that only a strong United States, with unmatched military and economic power, can preserve the bastions of freedom that remain, and help extend self-government to the downtrodden who live against their wishes under imposed Communist rule.

Mrs. FENWICK. Mr. Speaker, I would like to draw the attention of this Chamber to the plight of the world's latest refugees, the Vietnamese, Cambodians, and Laotians. The United States did a great deal to help refugees from these countries after their governments fell in 1975. We admitted 145,000 refugees in the past 2 years and provided shelter for them in this country until they could fend for themselves. The State Department now estimates that over 80,000 refugees are living on boats or in camps in Thailand. The flow of refugees into the United States, on the other hand, has slowed to a trickle in the past 6 months, and we have allowed entry of only 100 refugees a month. This summer the rate will increase to 300 per month, but it is far from the effort we could undertake and is far from the humanitarian spirit that moved our Nation to accept refugees from other captive nations in years past.

The condition of many of the Indochinese refugees is desperate The New York Times has estimated that over 4,500 refugees are living on boats in the waters of Southeast Asia. In an excellent series of articles in July, a New York Times correspondent, Mr. Henry Kamm, reported on the conditions in the refugee camps throughout Southeast Asia. Contrary to what we may have thought, the flow from Vietnam, Cambodia, and Laos has not ceased. Each month over 1,000 Laotians, 100 Cambodians, and hundreds of Vietnamese reach Thailand, which is the closest friendly country.

Mr. Speaker, on this day in which we commemorate our dedication to our freedoms and recommit ourselves to helping those people abroad who are subject to repressive communist regimes, we should not forget the Indochinese refugees. They are fleeing those Communist governments in Southeast Asia which do not recognize the value of the individual and the inherent rights of people everywhere. Our involvement in the war in Southeast Asia contributed to the creation of these refugees, who have now literally become the flotsam of the conflict. We have a responsibility to put meaning into our words here today.

The State Department has recommended to the White House that 15,000 Indochinese refugees be admitted to the United States on an emergency basis. Under this plan, our first priority should be the boat people who have not been allowed to land in any country and who, in some instances, have been towed back out to sea by the country in which they landed. We should also add our voices to those calling for an international arrangement whereby merchant ships would be rewarded for picking up refugees who reach international waters in small, unseaworthy boats. At a minimum, we should seek to defray the expenses they encounter in picking up and supporting refugees. Many times, these ships are the refugees' only hope.

The International Organizations Subcommittee of the International Relations Committee held hearings on the condition of human rights in Vietnam in June of this year. The picture which was painted by many of the witnesses was not a pretty one. While there is no systematic elimination of opponents of the government, many are intentionally left in inhuman prisons to starve or die of disease. Others are kept from their families for years in "reeducation centers" It is no wonder that hundreds flee this type of system, even when the only alternative is a small, unprovisioned boat on an open sea.

These remarks concerning the captive nations will not, I hope, suggest indifference to the tragic situation of the Baltic countries, the Ukraine, and the other captive nations of Eastern Europe and other countries in the world. The list is long but none is forgotten.

Mrs. HOLT. Mr. Speaker, for the 19th year, we are observing Captive Nations Week, and let no one suggest that we are indulging in an exercise in futility. The struggle for freedom is never ending. It has continued through all the ages of mankind, and will continue as long as the human soul exists.

Poland, Czechoslovakia, Estonia, Latvia, Lithuania, the Ukraine, Hungary, and others remain under the heel of foreign oppression, but the hope of freedom endures. Resistance continues, if only in the passive mode today, but patriots have shed blood for the freedom of those nations and continue to endure imprisonment and/or death for their dissent.

We honor these patriots today. Americans must never forget their sacrifices. Americans must never accept the rule of the captive nations by the ruthless despotism of Soviet Russia. They will be free someday, if not in our generation, then in the next.

America won her independence through revolution against colonial imperialism, but that was a mild and benign imperialism compared with the ruthless totalitarianism of Soviet Russia, which has the most formidable police state apparatus ever seen in the world.

It imposes a system which violates all human rights. It crushes not only political freedom but also deprives its subjects of freedom of speech and press, religious freedom, and property rights. It seeks total control of the individual, and those with the courage to resist risk the horrors of prison, labor camps, or insane asylums. By subversion and aggression, it attempts to spread this system to all parts of the world.

America remains a powerful symbol of freedom in the world. As long as America remains true to her heritage and her mission in history, hope survives for oppressed peoples everywhere, and the will to resist survives in countries threatened by Soviet imperialism.

As we mark Captive Nations Week, let us conduct a self-examination to evaluate how well we are fulfilling our destiny, and whether we are effectively responding to the threat of a totalitarian force that seeks control of the world.

Mr. GILMAN. Mr. Speaker, I am pleased to join with my colleagues in this special order arranged by the distinguished gentleman from Pennsylvania (Mr. FLOOD) and the distinguished gentleman from Illinois (Mr. DERWINSKI) marking the 19th observance of Captive Nations Week.

Since enactment in 1959 of Public Law 86–90, designating the third week in July as "Captive Nations Week," forums such as this have provided us the opportunity to reflect upon those democratic ideals in which our Nation's valued traditions are rooted, while addressing at the same time, the heinous affront perpetrated against all mankind when, in the name of communism, access to even the most fundamental vestiges of democratic human rights are denied en masse.

The words of the Captive Nations Week Resolution assert that—

> The greatness of the United States is in large part attributable to its having been able to achieve a harmonious national unit of its people, even though they stem from the most diverse of racial, religious, and ethnic backgrounds. . . .

The persevering spirit of accommodation which has characterized the formation of this Nation, stands in marked contrast to what Alexandr Solzhenitsyn in the "Gulag Archipelago" describes as the Soviet Union's "sewage disposal system," into which have been dumped not only tens of millions of unsuspecting "arrested" individuals, but from 1920 onward, "whole nations" as well. Those within the Soviet orbit unwilling to relinquish their birthright to basic human freedoms, are persecuted or eliminated outright.

The list of those nations over which the stultifying, oppressive pall of communism pervades has grown steadily since 1920. Throughout Eastern Europe,

in vast territories of Asia, within the Soviet Union, and in the imprisoned outpost island of Cuba, the insatiable Communist inclination toward forcible domination has made a mockery of that long recognized right to self-determination. While gallant and laudable struggles, taking many forms, have been mobilized—in Hungary, East Germany, Czechoslavakia, and within the Soviet Union, to mention but a few instances—the virulent manifestations of communism, buttressed by the naked force of brutal, unrelenting retaliatory might, have remained intact.

We have also recently seen the duplicitous manner in which Eastern Bloc countries—attempting to win the favor of Western nations—engage in projecting an image of independent-minded, liberal regimes struggling against Soviet domination. However, behind this facade, many of these countries systematically persist in wholesale, blatant violation of the rights of ethnic and minority group citizens.

That just such a scenario has been unfolding in Rumania, was well documented by a group of individuals, with whom I met this week, who are tirelessly striving to see that these abuses are terminated. Included among the flagrant systematic violations of minority rights in Rumania are: First, elimination of many Hungarian schools and the establishment of discriminatory quotes limiting minority language classes; second, elimination of Hungarian universities; third, harassment of minority churches; and fourth, obstruction of personal contacts by these minority groups with non-Rumanians.

Most of Rumania's 3.5 million minority citizens do not want to emigrate; for many it would be tantamount to expulsion from their homeland. These Rumanian citizens seek only to enjoy the basic human rights denied them by the Rumanian Government's abhorrent program of cultural genocide.

Systematic violation of the basic human rights of both individuals and ethnic groups, has become the focus of increasing public attention and concern—largely as a result of the 1975 Helsinki Accords. Illuminating its commitment of nations signature to honor and promote the human rights of all peoples. The Helsinki Final Act has been much heralded and widely applauded. However, it should be recognized that the assurances received by this Nation at Helsinki, constitute but a beachhead in what has been, since 1975, an extremely arduous, uphill effort to obtain and monitor Communist compliance with the provisions of the Final Act. Regrettably, convuluted interpretation, and in some instances, blatant defiance and disregard for the Helsinki Accords, resulting in mass imprisonments and intensified persecution of those hopeful of enjoying those human rights provisions outlined at Helsinki, have been widespread in the Soviet Union and in the Eastern bloc countries.

As we turn toward the 1977 Belgrade Conference on the Implementation of the Helsinki Accords, our strategy should be two fold. While we should try to prevent the Conference from developing into a fruitless exchange of recrimination, we must nevertheless, dedicate our energies to exposing the suspect rationale upon which Communist noncompliance with the provisions of the Helsinki Final Act is predicated.

Only by seeking full implementation of the important guarantees outlined in the Helsinki Accords; only by consistent articulation of this Nation's commitment to the realization by all peoples of their human rights, can we advance the cause of those ideals outlined in our observance of Captive Nations Week.

Mr. McDONALD. Mr. Speaker, Captive Nations Week serves as an annual reminder to us of the millions of people still held in Communist slavery. In the 60 years since the seizure of Russia by the Communists, led by Lenin and Trotsky, the drive for world conquest has enslaved nations in Europe, Asia, Latin America, and Africa. The most recent victims are Angola, South Vietnam, Laos, and Cambodia. The Angola conquest was carried out by the Soviet Union using mercenary troops supplied by Fidel Castro, the Soviet puppet ruler of Cuba.

There is a dreadful silence over Indochina. The press which was so vocal in reporting every real or fancied defect in the Governments of Vietnam, Cambodia, and Laos, no longer cover news from that area. Correspondents have been expelled and the Communists are in almost complete control of the sources of news. Nevertheless, some information has filtered out about the horrible blood bath in Cambodia and the slave labor camps and killings in South Vietnam. Even the apologists for the Communist regimes admit to 40,000 political prisoners in South Vietnam. Other estimates put the figure at hundreds of thousands in the slave labor camps and many thousands murdered.

Nguyen Cong Hoan was a hero to our press before South Vietnam fell. He was a Communist stooge operating as a leader of a so-called Third Force. His function was to undermine American support for the Government of South Vietnam. After the North Vietnamese troops conquered South Vietnam, Hoan was rewarded with a post in the puppet "Congress" set up by the Communists. After 2 years of living under communism Hoan escaped to Japan. His account of the horrors of communism received little coverage in the American press. Hoan reported 200,000 inmates in the slave labor camps called by the Communists, "Reeducation Centers."

Hoan was interviewed in the English language edition of Toyko's Mainichi Daily News on May 3, 1977. The interview read in part:

An anti-American leader of the "peace-bloc" under the Thieu regime, Hoan opposed U.S. intervention in Vietnam. He welcomed the communists as liberators when Saigon fell in April 1975, and was selected by the Vietnamese Communist Party as a representative to the Hanoi congress in April 1976.

"My first motivation was to help with the reconstruction of the country in 1975," he explained, "but I realized that the communists were worse than I had imagined.

"In Vietnam today, the fundamental human rights are not guaranteed. No freedom of religion, speech, or movement. In a word, there is no freedom at all except the freedom to obey the orders of the Communist Party, otherwise you will be put into prison."

"Reeducation," says Hoan, means simply to be in prison. The Paris agreement stipulated that Hanoi would not punish officers and employees of the Saigon regime, but he says 200,000 former military men and civilians are being kept in prison camps throughout Vietnam.

"The communists sent nearly all senior officials and high-ranking officials of the Saigon regime to the large prisons in Ha Bac Province near the Chinese frontier."

All religious publications have been stopped. And in former Catholic schools throughout the south all teachers must present Marxist-Leninist lectures. One film called "The Holy Days" distributed in the south reportedly shows Christian women who visit churches being raped by the priests, said Hoan.

Admission to universities and technical schools is reserved strictly for students whose parents did not serve the Saigon government in any capacity.

Many former politicians, including opposition party members under the Saigon government, have disappeared and are presumed executed, said Hoan.

These horrors come as no surprise to those who know the history of communism. Wherever the Communists have taken power, the first step is to wipe out any potential political or intellectual leadership that may oppose the Communists in the future. The classic example of this is in Poland after its conquest in 1939 by the combined Nazi and Soviet Armies. Much has been written about the Nazi murder of millions of people, many of whom were killed only because they were Jewish. Not enough, however, has been written about the murders committed by the Communists sometimes in collaboration with their Nazi allies. The best known of these Communist atrocities was the murder of thousands of Polish officers in the Katyn Forest. After many years of attempting to blame this atrocity on the Nazis, the Communists themselves have now admitted their responsibility.

Wladyslaw Gomulka served Moscow for many years as dictator of Poland. A few years ago, he decided to dictate his memoirs to a trusted associate. Copies of the memoirs were smuggled to the West and published in the Polish language Noviny-Kurier of Tel Aviv, April to July 1973. Gomulka wrote:

As early as 1957, Khrushchev suggested that I make a public statement about the incident at Katyn, and to reveal who was really responsible, naturally, laying the blame on Stalin. "It will not matter to him," Khrushchev said humorously, "he is already so burdened with guilt that one more charge will not make any difference. Anyway, everyone knows whose hand did this work. And even if we don't want to reveal this in an official statement and admit our guilt, we will be accused of this by everyone anyway."

Gomulka went on to say:

He was right. I am sorry now that I did not agree with him. At the time I did not want to do this, since shortly after the war I had categorically accused the Germans of the responsibility for Katyn, and (if he changed his story) my personal authority would come under attack.

Gomulka said that when he raised the question again wih Khrushchev in 1964 the answer was:

It was the work of Stalin.

Gomulka says that he answered "Yes, I agree with you it happened on Soviet controlled territory, and this has had an effect on Soviet-Polish relationships." Thus putting the blame not only on Stalin but on the whole Soviet apparatus including Khrushchev.

According to the Russian language magazine Grani of July–September 1976, the authenticity of the memoirs has been admitted by a publication associated with the Polish Communist Embassy in Canada.

The murders at Katyn were only the tip of the iceberg. The story goes back to August 1939, when Soviet-Russia and Nazi-Germany signed the misnamed "Nonaggression Pact." In reality, it was an aggression pact since it opened the door for Soviet conquest of Latvia, Lithuania, and Estonia, and the division of Poland between Nazi-Germany and Soviet-Russia. The section of the pact relating to this was labeled "Secret Additional Protocol" and was not published at the time.[1]

Immediately after the Nazi invasion of Poland, Soviet troops moved in to take the territory allotted to them.[2] On October 31, 1939, Soviet Foreign Minister, Molotov, boasted in the Supreme Soviet:

One swift blow to Poland, first by the German army and then by the Red army, and nothing was left of this ugly offspring of the Versailles Treaty . . .[3]

Britain and France had gone to war against Germany in defense of Poland. Molotov openly favored Nazi-Germany in the conflict. He said:

Germany is in the position of a state which is striving for the earliest termination of the war and for peace, while Britain and France, which only yesterday were declaiming against aggression, are in favor of continuing the war and are opposed to the conclusion of peace. The roles, as you see, are changing.[4]

According to Molotov:

One may accept or reject the ideology of Hitlerism as well as any other ideological system; that is a matter of political views[5] and further, we have always held that a strong Germany is an indispensable condition for a durable peace in Europe.[6]

In November 1939, Stalin repeated Molotov's pro-Nazi statements. He said:

(a) It was not Germany that attacked France and England, but France and England that attacked Germany, thereby assuming responsibility for the present war;

(b) After hostilities had broken out, Germany made overtures of peace to France and England, and the Soviet Union openly supported Germany's peace overtures, for it considered, and continues to consider, that the earliest possible termination of the war would radically improve the position of all countries and nations;

(c) The ruling circles of England and France rudely rejected both Germany's peace overtures and the attempts of the Soviet Union to secure the earliest-possible termination of the war.[7]

By the end of November 1939, the Soviet Union invaded Finland. According to the official magazine of the Communist International:

It was England, primarily, that spurred on the reactionary Finnish bourgeoisie to reject the peace offer of the Soviet Union.

And further:

They are using every method to keep the Soviet Union "preoccupied" in a military way; to organize a number of military ventures against it. Thereby, they hope to make it difficult for the Soviet Union to supply Germany with the necessary war materials; [8]

The conquest of Poland and the Baltic States, as well as the attack on Finland, violated solemn treaties signed by the Soviet Union with each of these countries. On July 25, 1932, the Soviet Union signed a nonaggression pact with Poland which said in part:

Should one of the Contracting Parties be attacked by a third state or by a group of other states, the other Contracting Party undertakes not to give aid or assistance, either directly or indirectly, to the aggressor state during the whole period of the conflict.[9]

The Soviet Union violated this treaty when it attack Poland together with Nazi Germany.

The Soviets signed a nonaggression pact with Estonia on May 4, 1932,[10] and with Latvia, July 28, 1932.[11] The nonaggression treaty that the Soviets signed with Lithuania dated from September 28, 1926, and was prolonged by another treaty signed by the Soviets May 6, 1931.[12]

The nonaggression treaty with Finland was signed by the Soviets on August 9, 1932.[13] Our own experience with Soviet treaties has been identical. The Soviets violate every agreement they make as soon as it suits their purpose. We should note that the current Soviet violations of the Helsinki Agreement to allow both freedom of information and travel in no way changes the fact that through the agreement we recognized the legitimacy of the Soviet conquest of Eastern Europe.

The conquest of Poland and the Baltic States gave the Soviet Union the first opportunity to communize new territory since 1920. They immediately began the arrest of potential political opponents. For almost 2 years the Soviet secret police—at that time called the NKVD—rounded up members of opposing political parties, clergymen, teachers, and other leaders of the community. Those arrested included members of Zionist groups with particular attention paid to members of the right-wing Zionist Revisionist Movement and its youth group Betar. One of those arrested in 1941, was Menachem Begin, now Prime Minister of Israel. He had been a leader of Betar and was sentenced by the NKVD without a trial to 8 years in a slave labor camp. After the Nazi invasion of Russia, he was released to serve in the Polish army and was able to escape from Communist hands.[14]

It is an interesting historical fact that even the leaders of the prewar Polish Communist Party were murdered in the Soviet Union. Isaac Deutscher, the Trotskyite historian, himself a former member of the Polish Communist Party, wrote of the havoc that Stalin made of their party, "delivering nearly all its leaders to the firing squad." [15]

Even Wladyslaw Gomulka was purged on Soviet orders in 1948. From 1951 until 1954, he was incarcerated. In 1956, as part of Khrushchev's de-Stalinization campaign, he was returned to power as First Secretary of the Communist Party of Poland.[16]

Socialists, who advocated collaboration with the Communists, also found themselves victims. Henryk Erlich and Victor Alter were the leaders of the Jewish Socialist "Bund" of Poland. During the 1930's, they advocated a united front with the Communists. They were arrested in September 1939, shortly after the Soviet conquest of eastern Poland. They were released in September 1941, after the Nazi attack on Russia, and agreed to aid the Soviet Union in its war against Germany. In 1942, they were rearrested and executed.[17]

On January 27, 1943, a group of American labor and liberal leaders sent a protest telegram to the Soviet Government, on the arrest of Erlich and Alter. The telegram read:

It is now more than a year that Henryk Erlich and Victor Alter two prominent leaders of Jewish masses Poland were re-arrested in Kouibychev stop most prominent representatives of freedom loving people throughout the world of British and American labor movements repeatedly requested their release in vain stop today when universal public opinion unites in condemnation of Nazi criminals who are murdering in cold blood entire Jewish population Poland we renew in name of justice and humanity our request for release of these outstanding courageous fighters against fascism and Nazism Henryk Erlich and Victor Alter.

They were answered by the Soviet Ambassador to the United States, Maxim Litvinov, who wrote:

EMBASSY OF THE SOVIET UNION,
Washington, D.C., February 23, 1943.

DEAR MR. GREEN: I am informed by Mr. Molotov, People's Commissar of Foreign Affairs, of the receipt by him of a telegram signed by you concerning two Soviet citizens, Alter and Erlich.

I am instructed by Mr. Molotov to inform you of the following facts:

For active subversive work against the Soviet Union and assistance to Polish intelligence organs in armed activities, Erlich and Alter were sentenced to capital punishment in August, 1941.

At the request of the Polish Government, Erlich and Alter were released in September, 1941.

However, after they were set free, at the time of the most desperate battles of the Soviet troops against the advancing Hitler army, they resumed their hostile activities including appeals to the Soviet troops to stop bloodshed and immediately to conclude peace with Germany.

For this they were rearrested and, in December, 1942, sentenced once more to capital punishment by the Military Collegium of the Supreme Court. This sentence has been carried out in regard to both of them.

Yours sincerely,
Ambassador MAXIM LITVINOV.

A similar note was sent by the Soviet Ambassador to London, A. Bogomolov, to the Polish Minister of Foreign Affairs, E. Raczynski, in response to a Polish Government protest about the murders. This note read:

LONDON,
March 31, 1943.

Mr. MINISTER: In reply to your Note of March 8, 1943, I have the honor to inform you that the Soviet Government reject the entirely unfounded protest of the Polish Government concerning the execution of Ehrlich and Alter, sentenced on account of their activities directed against the U.S.S.R. at the end of the year 1941, which went so far as to appeal to the Soviet armies to cease this bloodshed and to conclude an immediate peace with Germany; this at the time of the hardest struggle of the Soviet armies against the advancing armies of Hitler.

I have the honor to be, etc.,
BOGOMOLOV.[18]

The fate of a Polish officer, who had protected Jews during the Nazi occupation, was described by Herbert Romerstein in testimony before the House Committee on Internal Security on February 20, 1973, as follows:

The career of another non-Jewish Pole was also affected by his relationship to the Jews. He is Wladyslaw Bartoszewski who was described as follows by the official communist publishing house Interpress Publishers in 1970:

Wladyslaw Bartoszewski, office of the underground military organization, the Home Army, and participant of the 1944 Warsaw Uprising, was decorated several times during the war. In 1942 during the Nazi occupation in Poland, he was one of the co-founders of the underground Council for Aid to Jews (cryptonym: "Zegota"). At the same time, in the years 1942–1944, he was deputy-chief of the Jewish Section of the Delegate's Office of the Government-in-Exile in London. Among the main tasks of that underground unit was to collect information and documents concerning the situation of the Jewish population in occupied Poland. They prepared reports on this subject which dispatched to London, contributed to rouse world public opinion.

In April 1963, on the 20th anniversary of the uprising in the Warsaw Ghetto, the Council of State, highest organ (after the Seym-Parliament) of State authority in Poland, conferred a high decoration, the Knight's Cross of the Polonia Restituta Order, on Wladyslaw Bartoszewski for his distinguished services in the saving of Jews. A few months later, in October 1963, he was among the first ones invited to plant a symbolic tree in the Avenue of the Righteous Among Nations on the Mount of Remembrance in Jerusalem. He was also one of the first persons upon which a diploma and medal were conferred by the Israeli Martyrs' and Heroes Remembrance Authority at the Yad Yashem Institute in Jerusalem. Engraved on the medal are these words: "He who saves one life saves the whole world."

(From the Publisher's introduction to Bartoszewski's book "The Blood Shed Unites Us," Warsaw 1970, which details the help given by non-Jewish Poles to the Jewish victims of Nazism.

Bartoszewski, a Roman Catholic who had risked his life to help the Jewish victims, and was honored for this by both the Israelis and Polish communist government, has also been persecuted by the communists for these actions. According to Jewish Currents of March 1972,

Like the fate of so many other Poles, Bartoszewski's has ebbed and flowed with the rapidly changing political tides in Poland. Recently, word was received by the Anti-Defamation League of B'nai B'rith, that he was imprisoned from 1948–56 because of his undue concern over the Jewish catastrophe during the war and anxiety about Polish-Jewish relations after the war. Again, now, he is the victim of repression of the new regime and is again in prison, even though the book he has compiled, stretches the extent of Polish aid very far. We do not yet know the nature of his new crime.[19]

Probably the most horrible single crime committed by the Communists against Poland was the massacre of the Polish officers at Katyn Forest. Most of the victims were reserve officers, the cream of Poland's younger intellectuals and professionals.

On April 13, 1943, the Germans announced the discovery of mass graves at Katyn Forest in Russia, which contained the bodies of thousands of Polish army officers, government officials, and clergymen.[20] Extensive hearings in 1952 before a select committee of the House of Representatives, chaired by the Honorable Ray J. Madden of Indiana, showed conclusive evidence that the Soviets committed these murders, although Communist propaganda blamed it on the Nazis. The Germans had even brought American prisoners of war to the site to confirm the evidence that the victims had been killed during the period that the territory was in Soviet hands. A Polish report, published in volume 6 of the hearings, showed that over 4,000 bodies were recovered but that thousands more were still missing.[21]

In 1944, after the Soviet reconquest of the area, a special Soviet commission did its own investigation. They, of course, concluded that the Nazis had committed the murders. However, they examined 11,000 bodies, almost 7,000 more than the Nazis had found. Obviously, those who buried them in the first place could find them more easily than anyone else. The Soviet report also contained internal contradictions. For example, on page 19 they reported that the Germans had stripped the bodies of all documents dated later than April 1940. However, on pages 29 to 30, they list nine documents of later dates that they allegedly found on the bodies.[22]

It is a shocking fact that the U.S. Government covered up for Soviet complicity in this hideous crime. The U.S. Ambassador to the Soviet Union, Averell Harriman, sent his young daughter as the U.S. representative to observe the Katyn Commission, because to send the Embassy doctor might offend the Soviets, who would think that we did not trust them.

The Madden committee in its final report was very critical of the Office of War Information and the Federal Communications Commission. The report stated:

When the Nazis, on April 13, 1943, announced to the world the finding of the mass graves of the Polish officers at Katyn and accused the Soviets, the Allies were stunned by this action and called it propaganda. Mr. Elmer Davis, news commentator, then head of the Office of War Information, an agency established by Executive order, told this committee he reported direct to the President. Under questioning he admitted frequent conferences with the State Department and other Government agencies. However, testifying before this committee, when faced with his own broadcast of May 3, 1943, in which he accused the Nazis of using the Katyn massacre as propaganda, he admitted under questioning that this broadcast was made on his own initiative.

This is another example of the failure to coordinate between Government agencies. A State Department memorandum dated April 22, 1943, which was read into the record (see vol. VII of the published hearings), stated:

"And on the basis of the various conflicting contentions [concerning Katyn] of all parties concerned, it would appear to be advisable to refrain from taking any definite stand in regard to this question."

Mr. Davis, therefore, bears the responsibility for accepting the Soviet propaganda version of the Katyn massacre without full investigation. A very simple check with either Army Intelligence (G–2) or the State Department would have revealed that the Katyn massacre issue was extremely controversial.

Furthermore, members of the staff of both OWI and FCC did engage in activities beyond the scope of their responsibilities. This

[18] Polish-Soviet Relations 1918–1943, Official Documents, Polish Embassy in Washington, D.C., 1943, pg. 180.

[19] Theory and Practice, op. cit. pg. 2126.

[20] The Katyn Forest Massacre, Interim Report of the Select Committee, House of Representatives, Washington, D.C., 1952, pg. 5.

[21] The Katyn Forest Massacre, Hearings of the Select Committee, Part VI, pg. 1627

[22] The Truth About Katyn, Report of Special Commission, Soviet War News (official Soviet agency), London, 1944.

unusual activity of silencing radio commentators first came to light in August 1943 when the House committee investigating the National Communications Commission discovered the procedure.

The technique utilized by staff members of OWI and FCC to silence was as follows: Polish radio commentators in Detroit and Buffalo broadcasting in foreign languages after the announcement of the discovery of the mass graves of Polish officers at Katyn reported facts indicating that the Soviets might be guilty of this massacre.

In May 1943 a member of the FCC staff suggested to a member of the OWI staff that the only way to prevent these comments was to contact the Wartime Foreign Language Radio Control Committee. This committee was made up of station owners and managers who were endeavoring to cooperate with the OWI and FCC during the war years. Accordingly a meeting was arranged in New York with two of the members of this industry committee. They were specifically requested by the OWI staff member to arrange to have a Polish radio commentator in Detroit restrict his comments to straight news items concerning Katyn, and only those by the standard wire services. The fact that a member of the FCC staff attended this meeting is significant because the FCC in such a case had no jurisdiction. In fact, the FCC member was in New York to discuss the renewal of the radio license of one of these industry members. The owner of the radio station in Detroit was contacted and requested to restrict the comments of the Polish commentator on his station, and this was done.

By applying indirect pressure on the statio wner, these staff members accomplished their purpose, namely, keeping the full facts of the Katyn massacre story from the American people. (See vol. VII of the published hearings.)

Office of Censorship officials testified and supported the conclusion of this committee that the OWI and FCC officials acted beyond the scope of their official Government responsibilities on this matter of Katyn.

Testimony before this committee likewise proves that the Voice of America—successor to the Office of War Information—had failed to fully utilize available information concerning the Katyn massacre until the creation of this committee in 1951. The committee was not impressed with statements that publications of facts concerning this crime, prior to 1951, would lead to an ill-fated uprising in Poland. Neither was it convinced by the statements of OWI officials that for the Polish-Americans to hear or read about the Katyn massacre in 1943 would have resulted in a lessening of their cooperation in the Allied war effort.[23]

The German announcement of finding the bodies of missing Polish officers at Katyn came as a great shock to the Polish Government in exile. On April 15, 1943, 2 days after the German announcement the Polish Government appealed to the International Red Cross to send a delegation to inspect the site of the atrocity.[24]

The Soviets responded by sending a personal and secret message from Stalin to President Roosevelt. The message stated that the Soviets were breaking relations with the Polish Government. The message read:

The behaviour of the Polish Government towards the U.S.S.R. of late is, in the view of the Soviet Government, completely abnormal and contrary to all the rules and standards governing relations between two allied states.

The anti-Soviet slander campaign launched by the German fascists in connection with the Polish officers whom they themselves murdered in the Smolensk area, in German-occupied territory, was immediately seized upon by the Sikorski Government and is being fanned in every way by the Polish official press. Far from countering the infamous fascist slander against the U.S.S.R., the Sikorski Government has not found it necessary even to address questions to the Soviet Government or to request information on the matter.

The Hitler authorities, having perpetrated a monstrous crime against the Polish officers, are now staging a farcical investigation, using for the purpose certain pro-fascist Polish elements picked by themselves in occupied Poland, where everything is under Hitler's heel and where no honest Pole can open his mouth.

Both the Sikorski and Hitler Governments have enlisted for the "investigation" the aid of the International Red Cross, which, under a terror regime of gallows and wholesale extermination of the civil population, is forced to take part in the investigation farce directed by Hitler. It is obvious that this "investigation," which, moreover, is being carried out behind the Soviet Government's back, cannot enjoy the confidence of anyone with a semblance of honesty.

The fact that the anti-Soviet campaign has been started simultaneously in the German and Polish press and follows identical lines is indubitable evidence of contact and collusion between Hitler—the Allies' enemy—and the Sikorski Government in this hostile campaign.

At a time when the peoples of the Soviet Union are shedding their blood in a grim struggle against Hitler Germany and bending their energies to defeat the common foe of the freedom-loving democratic countries, the Sikorski Government is striking a treacherous blow at the Soviet Union to help Hitler tyranny.

These circumstances compel the Soviet Government to consider that the present Polish Government, having descended to collusion with the Hitler Government, has, in practice, severed its relations of alliance with the U.S.S.R. and adopted a hostile attitude to the Soviet Union.

For those reasons the Soviet Government has decided to interrupt relations with that Government.

I think it necessary to inform you of the foregoing, and I trust that the U.S. Government will appreciate the motives that necessitated this forced step on the part of the Soviet Government.

APRIL 21, 1943.[25]

Roosevelt responded with a conciliatory letter to Stalin dated April 26, 1943, in which he criticized the Polish Government for appealing to the International Red Cross for information about its murdered officers. Roosevelt's letter read:

I received your telegram during an inspection trip which I was making in the western part of the United States. I fully understand your problem but at the same time I hope that you can find a way in this present situation to define your action as a suspension of conversations with the Polish Government in exile in London rather than to label it as a complete severance of diplomatic relations between the Soviet Union and Poland.

I cannot believe that Sikorski has in any way whatsoever collaborated with the Hitler gangsters. In my opinion, however, he has erred in taking up this particular question with the International Red Cross. Furthermore, I am inclined to think that Prime Minister Churchill will find a way of prevailing upon the Polish Government in London in the future to act with more common sense.

I would appreciate it if you would let me know if I can help in any way in respect to this question and particularly in connection with looking after any Poles which you may desire to send out of the Union of Soviet Socialist Republics.

Incidentally, I have several million Poles in the United States, a great many of whom are in the Army and Navy. I can assure you that all of them are bitter against the Hitlerites. However, the overall situation would not be helped by the knowledge of a complete diplomatic break between the Soviet and Polish Governments.

APRIL 26, 1943.[26]

Also on April 26 the Soviets sent a note to the Polish Government breaking relations. That note read:

(Note of April 25, 1943, from Mr. Molotov, People's Commissar for Foreign Affairs, to Mr. Romer, Polish Ambassador in the U.S.S.R. severing relations between the Soviet Government and the Polish Government.)

Moscow,
April 26, 1943.

Mr. AMBASSADOR: On behalf of the Government of the Union of Soviet Socialist Republics, I have the honor to notify the Polish Government of the following:

The Soviet Government consider the recent behavior of the Polish Government with regard to the U.S.S.R., as entirely abnormal, and violating all regulations and standards of relations between two Allied States. The slanderous campaign hostile to the Soviet Union launched by the German Fascists in connection with the murder of the Polish officers, which they themselves committed in the Smolensk area on territory occupied by German troops, was at once taken up by the Polish Government and is being fanned in every way by the Polish official press.

Far from offering a rebuff to the vile Fascist slander of the U.S.S.R., the Polish Government did not even find it necessary to address to the Soviet Government any inquiry or request for an explanation on this subject.

Having committed a monstrous crime against the Polish officers, the Hitlerite authorities are now staging a farcical investigation, and for this they have made use of certain Polish pro-Fascist elements whom they themselves selected in occupied Poland where everything is under Hitler's heel, and where no honest Pole can openly have his say.

For the "investigation," both the Polish Government and the Hitlerite Government invited the International Red Cross, which is compelled, in conditions of a terroristic regime, with its gallows and mass extermination of the peaceful population, to take part in this investigation farce staged by Hitler. Clearly such an "investigation, conducted behind the back of the Soviet Government cannot evoke the confidence of people possessing any degree of honesty.

The fact that the hostile campaign against the Soviet Union commenced simultaneously in the German and Polish press, and was conducted along the same lines, leaves no doubt as to the existence of contact and accord in carrying out this hostile campaign between the enemy of the Allies—Hitler—and the Polish Government.

---

[23] The Katyn Forest Massacre, Final Report of the Select Committee, Washington. D.C., 1952, pg. 8–10.

[24] Select Committee Interim Report, op. cit. pg. 5.

[25] Correspondence between the Chairman of the Council of Ministers of the U.S.S.R. and the Presidents of the U.S.A. and the Prime Ministers of Great Britain during the Great Patriotic War of 1941–1945, Foreign Languages Publishing House, Moscow, 1957, Vol. II, pg. 60–61.

[26] Ibid pg. 61.

While the peoples of the Soviet Union bleeding profusely in a hard struggle against Hitlerite Germany, are straining every effort for the defeat of the common enemy of the Russian and Polish peoples, and of all freedom-loving democratic countries, the Polish Government, to please Hitler's tyranny, has dealt a treacherous blow to the Soviet Union.

The Soviet Government is aware that this hostile campaign against the Soviet Union is being undertaken by the Polish Government in order to exert pressure upon the Soviet Government by making use of the slanderous Hitlerite fake for the purpose of wresting from it territorial concessions at the expense of the interests of the Soviet Ukraine, Soviet Byelorussia and Soviet Lithuania.

All these circumstances compel the Soviet Government to recognize that the present Government of Poland, having slid on the path of accord with Hitler's Government, has actually discontinued allied relations with the U.S.S.R., and has adopted a hostile attitude towards the Soviet Union.

On the strength of the above, the Soviet Government has decided to sever reations with the Polish Government.

MOLOTOV.[27]

Despite the fact that the Soviet Government in a statement on July 26, 1944, had said:

The Soviet Government declares that it does not pursue the aim of acquiring any part of Polish territory whatever or of altering the social system in Poland, and that the military operations of the Red Army on the territory of Poland are dictated solely by military necessity and the aspiration to render the friendly Polish people assistance in liberating themselves from German occupation.[28]

The reality was different. A Communist puppet regime had already been prepared for Poland and the legitimate government was rejected by the Soviets, because of its protest on Katyn. As early as January 23, 1944, Molotov had written to the U.S. Government:

The Soviet Government severed relations with the Polish Government in London because of the latter's participation in the Hitlerite slander over the 'Kattyn massacre.' At that time the Polish Government was headed by General Sikorski. The Mikolajczyk Government, instead of dissociating itself from the fascist act of the Sikorski Government, declared that it would continue Sikorski's policy, and the Mikolajczyk Government, far from disavowing its Ambassadors to Mexico and Canada and its supporters in the U.S.A. (the Matuszewski group), who are engaged in a campaign openly hostile to the Soviet Union, is actually abetting them.

It will be seen from these facts that the Polish Government in London has called on the U.S. and British Governments to mediate, not with a view to reaching agreement with the Soviet Government, but in order to aggravate the conflict and involve the Allies in it, for it is obvious that in the absence of a common basis for agreement negotiation and mediation are doomed to fail.

The Soviet Government would not like the friendly mission of mediation to be exposed to the threat of inevitable failure.

"That is why I believe conditions are not yet ripe for negotiation and mediation.

As I see it, a radical improvement of the composition of the Polish Government, one that would exclude the pro-fascist imperialist elements and include democratic elements, a point that I made to Mr. Harriman orally, could provide a favourable basis both for the re-establishment of Soviet-Polish relations and settlement of the frontier question and for fruitful mediation.[29]

As Soviet troops drove the Germans out of Poland, Communist teams took control of the "liberated" areas. The persecution of dissidents among the indigenous population was organized by a Soviet military intelligence unit called Smersh. The unit, who's name came from the contraction of the Russian words meaning "death to spies" was originally set up to combat dissatisfaction in the Soviet army. Its major function, however, soon became the persecution of populations in the conquered territory. After the war, Smersh was disbanded and its leadership reassigned to the NKVD, now called the KGB. They continued the persecution in the occupied territories in their new assignments.

An important part of the Soviet takeover of Eastern Europe was the destruction of all anti-Nazi, non-Communist military units in the area.

In August 1944, the Polish underground Home Army began an uprising against the Nazis in Warsaw. The Soviet army, which was approaching Warsaw, stopped its advance and refused supplies to the Polish Freedom Fighters. An exchange of letters between Roosevelt, Churchill, and Stalin give an interesting insight into this Soviet crime against Poland. Roosevelt and Churchill wrote on August 20, 1944:

We are thinking of world opinion if anti-Nazis in Warsaw are in effect abandoned. We believe that all three of us should do the utmost to save as many of the patriots there as possible. We hope that you will drop immediate supplies and munitions to the patriot Poles of Warsaw, or will you agree to help our planes in doing it very quickly? We hope you will approve. The time element is of extreme importance.

Stalin answered on August 22:

The message from you and Mr. Churchill about Warsaw has reached me. I should like to state my views.

Sooner or later the truth about the handful of power-seeking criminals who launched the Warsaw adventure will out. Those elements, playing on the credulity of the inhabitants of Warsaw, exposed practically unarmed people to German guns, armour and aircraft. The result is a situation in which every day is used, not by the Poles for freeing Warsaw, but by the Hitlerites, who are cruelly exterminating the civil population.

From the military point of view the situation, which keeps German attention riveted to Warsaw, is highly unfavourable both to the Red Army and to the Poles. Nevertheless, the Soviet troops, who of late have had to face renewed German counter-attacks, are doing all they can to repulse the Hitlerite sallies and go over to a new large-scale offensive near Warsaw. I can assure you that the Red Army will stint no effort to crush the Germans at Warsaw and liberate it for the Poles. That will be the best, really effective, help to the anti-Nazi Poles.[30]

As late as 1975, the Polish Communist Government was still embarrassed by this Soviet crime. In an official book on World War II, they wrote:

Between 16 and 23 September the Polish First Army, supported by Soviet artillery and amphibious units, forced the Vistula at Czerniaków, in an attempt to come to the aid of the Warsaw insurgents.[31]

They neglected to mention that the Nazis had been slaughtering the poorly armed Poles for many weeks by that time.

In addition, to the betrayal of the Warsaw uprising, Smersh Units arrested members of the Polish underground army, who had fought the Nazis. On June 18, 1945, a "show trial" was held of 16 Polish officers and political leaders who had been captured by the Soviets. Most of these anti-Nazis were convicted of anti-Soviet acts and sentenced to long terms in the Soviet slave labor camps.[32] Thousands of others were convicted in secret trials and were similarly sentenced.

Poland was not the only victim of Soviet mass murders. Although many of the gravesites have never been found, some have. In 1943, a mass grave was found in the Ukrainian city of Vynnytsia. The total number of corpses found at this site was between 11,000 and 12,000.[33]

The methods used by the Soviet secret police in choosing victims was graphicly revealed in a collection of NKVD documents dated 1940–41, discovered in Lithuania. I have attached these documents as an appendix to this statement. They make it clear that the victims were any members of rival political organizations ranging from conservative to socialist. Zionists were particular targets, but members of the right-wing Zionist youth group, Betar, were the main victims. You will remember that Israeli Prime Minister Begin had been arrested in Poland in 1941, because of his membership in this organization.

Captive Nations Week is the time we should all remember the millions of victims of Communist terror. The following is a list of the countries taken by the Communist either through armed coup or direct aggression and the dates of the conquest:

Russia	1917
Armenia	1920
Azerbaijan	1920
Byelorussia	1920
Cossackia	1920

DOCUMENTS RELATING TO THE FIRST SOVIET OCCUPATION OF LITHUANIA, 1940–41 [1]

1. MOSCOW INSTRUCTIONS ON DEPORTATIONS, ORDER NO. 001223

(Strictly Secret)

INSTRUCTIONS REGARDING THE MANNER OF CONDUCTING THE DEPORTATION OF THE ANTI-SOVIET ELEMENTS FROM LITHUANIA, LATVIA AND ESTONIA

1. General situation

The deportation of anti-Soviet elements from the Baltic States is a task of great political importance. Its successful execution depends upon the extent to which the county operative triumvirates and operative headquarters are capable of carefully working out a plan for executing the operations and of foreseeing in advance all indispensable factors. Moreover, the basic premise is that the operations should be conducted without noise and panic, so as not to permit any demonstrations and other excesses not only by the deportees, but also by a certain part of the surrounding population inimically inclined toward the Soviet administration.

Instructions regarding the manner of conducting the operations are described below. They should be adhered to, but in individual cases the collaborators conducting the operations may and should, depending upon the peculiarity of the concrete circumstances of the operations and in order to evaluate correctly the situation, make different decisions for the same purpose, viz., to execute the task given them without noise and panic.

2. Manner of issuing instructions

The instructing of operative groups should be done by the county triumvirates within as short a time as possible on the day before the beginning of the operations, taking into consideration the time necessary for traveling to the place of operations.

The county triumvirates previously prepare necessary transportation for transferring the operative groups to the villages in the locale of operations.

In regard to the question of allotting the necessary number of automobiles and wagons for transportation, the county triumvirates will consult the leaders of the Soviet party organizations on the spot.

Premises in which to issue instructions must be carefully prepared in advance, and their capacity, exits, entrances and the possibility of strangers entering must be taken into consideration.

During the time instructions are issued the building must be securely guarded by the administrative workers.

In case anyone among these participating in the operations should fail to appear for instructions, the county triumvirate should immediately take measures to substitute the absentee from a reserve force, which should be provided in advance.

The triumvirate through its representative should notify the officers gathered of the decision of the government to deport an accounted for contingent of anti-Soviet elements from the territory of the respective republic or region. Moreover, a brief explanation should be given as to what the deportees represent.

Special attention of the (local) Soviet-party workers gathered for instruction should be drawn to the fact that the deportees are enemies of the Soviet people and that, therefore, the possibility of an armed attack on the part of the deportee is not excluded.

3. Manner of obtaining documents

After the issuance of general instructions to the operative groups, they should definitely be issued documents regarding the deportees. Personal files of the deportees must be previously discussed and settled by the operative groups or townships and villages, so that there are no obstacles in issuing them.

After receiving the personal files, the senior member of the operative group acquaints himself with the personal files of the family which he will have to deport. He must check the number of persons in the family, the supply of necessary forms to be filled out by the deportee, and transportation for moving the deportee, and he should receive exhaustive answers to questions not clear to him.

At the time when the files are issued, the county triumvirate must explain to each senior member of the operative group where the deported family is to be settled and describe the route to be taken to the place of deportation. Route to be taken by the administrative personnel with the deported families to the railway station for embarkation must also be fixed. It is also necessary to point out places where reserve military groups are placed in case it should become necessary to call them out during possible excesses.

Possession and state of arms and ammunition must be checked throughout the whole operative personnel. Weapons must be completely ready for battle and loaded, but the cartridge should not be kept in the chamber. Weapons should be used only as a last resort, when the operative group is attacked or threatened with an attack, or when resistance is shown.

4. Manner of executing deportation

Should a number of families be deported from one spot, one of the operative workers is appointed senior in regard to deportation from the village, and his orders are to be obeyed by the operative personnel in that village.

Having arrived in the village, the operative groups must get in touch (observing the necessary secrecy) with the local authorities; chairman, secretary or members of the village soviets, and should ascertain from them the exact dwelling of the families to be deported. After that the operative groups together with the local authorities go to the families to be banished.

The operation should be commenced at daybreak. Upon entering the home of the person to be banished, the senior member of the operative group should gather the entire family of the deportee into one room, taking all necessary precautionary measures against any possible excesses.

After having checked the members of the family against the list, the location of those absent and the number of persons sick should be ascertained, after which they should be called upon to give up their weapons. Regardless of whether weapons are surrendered or not, the deportee should be personally searched and then the entire premises should be searched in order to uncover weapons.

During the search of the premises one of the members of the operative group should be left on guard over the deportees.

Should the search disclose hidden weapons in small numbers, they should be collected by and distributed among the operative group. Should many weapons be discovered, they should be piled into the wagon or automobile which brought the operating group, after the locks have been removed. Ammunition should be packed and loaded together with rifles.

If necessary, a convoy for transporting the weapons should be mobilized with an adequate guard.

Should weapons, counter-revolutionary pamphlets, literature, foreign currency, large quantities of valuables, etc. be disclosed, a short search act should be drawn up on the spot, which should describe the hidden weapons or counter-revolutionary literature. Should there be any armed resistance, the question of arresting the persons showing armed resistance and of sending them to the county branch of the People's Commissariat of Public Security should be decided by the county triumvirates.

An act should be drawn up regarding those deportees hiding themselves before the deportation or sick, and this act should be signed by the chairman of the Soviet-party organization.

After the search the deportees should be notified that upon the decision of the Government they are being banished to other regions of the Union.

The deportees are permitted to take with them household necessities of not more than 100 kilograms in weight.

1. Suit
2. Shoes
3. Underwear
4. Bed linen
5. Dishes
6. Glasses
7. Kitchen utensils
8. Food—an estimated month's supply to a family
9. The money at their disposal
10. Haversack or box in which to pack the articles.

It is recommended that large articles be taken.

Should the contingent be deported to rural districts, they are permitted to take with them a small agricultural inventory: axes, saws and other articles, which should be tied together and packed separately from other articles, so that when embarking on the deportation train they are loaded into special freight cars.

In order not to mix them with articles belonging to others, the name, father's name, and village of the deportee should be written on his packed property.

When loading these articles into the carts, measures should be taken so that the deportee cannot use them as means of resistance while the column is moving along the highway.

At the time of loading, the operative groups together with representatives of the Soviet-party organizations shall prepare a list of the property and the manner in which it is to be preserved in accordance with instructions received by them.

If the deportee has at his own disposal means of transportation, his property is loaded into the vehicle and together with his family is sent to the designated point of embarkation.

If the deportees do not have their own means of transportation, wagons are mobilized in the village by the local authorities upon directives of the senior member of the administrative group.

All persons entering the home of the deportees during the execution of the operations or found there at the moment when these operations are begun must be detained until the conclusion of the operations, and their relationship to the deportee should be ascertained. This is done in order to disclose policemen, military police and other persons hiding from investigation.

Having checked the detained persons and ascertained that they are persons to whom

[1] Copies of the original Lithuanian and Russian texts of these documents are deposited in the archives of the Lithuanian-American Information Center, 233 Broadway, New York 7, N.Y. Photostatic copies are deposited in the law library of the Library of Congress.

English translations of these documents have been made by the Lithuanian-American Information Center.

the contingent is not interested, they are liberated.

Should the inhabitants of the village begin to gather around the home of the deportee during the operations, they should be called upon to disperse to their homes, and crowds should not be permitted to be formed.

Should the deportee refuge to open the door of his home in spite of the fact that he is aware that members of the People's Commissariat of Public Security are there, the door should be broken down. In individual cases neighboring operative groups performing operations in that vicinity should be called upon to assist.

The conveyance of the deportees from the villages to the gathering place at the railway station should by all means be done in daylight; moreover, efforts should be made that the gathering of each family should take not more than two hours.

In all cases throughout the operations firm and decisive action should be taken, without the slightest pomposity, noise and panic.

It is categorically forbidden to take any articles away from the deportees—except weapons, counter-revolutionary literature and foreign currency—or to use the food of the deportees.

All members of the operations must be warned that they will be held strictly responsible for attempts to appropriate individual articles belonging to the deporters.

5. Manner of separating deportee from his family

In view of the fact that a large number of the deportees must be arrested and placed in special camps and their families settled at special points in distant regions, it is necessary to execute the operation of deporting both the member of his family as well as the deportee simultaneously, without informing them of the separation confronting them. After having made the search and drawn up the necessary documents for identification in the home of the deportee, the administrative worker shall draw up documents for the head of the family and place them in his personal file, but the documents drawn up for the members of his family should be placed in the personal file of the deportee's family.

The moving of the entire family, however, to the station should be done in one vehicle, and only at the station should the head of the family be placed separately from his family in a railway car specially intended for heads of families.

While gathering together the family in the home of the deportee, the head of the family should be warned that personal male articles are to be packed into a separate suitcase, as a sanitary inspection will be made of the deported men separately from the women and children.

At the stations the possessions of heads of families subject to arrest should be loaded into railway cars assigned to them, which will be designated by specific operative workers appointed for that purpose.

6. Manner of convoying the deportees

It is strictly prohibited for the operatives convoying the vehicle-move column of deportees to sit in the wagons of the deportees. The operative must follow by the side and at the rear of the column of deportees. The senior operator of the convoy should periodically go around the entire column to check the correctness of movement.

The convoy must act particularly carefully in conducting the column of deportees through inhabited spots as well as in meeting passers-by; they should see that there are no attempts made to escape, and no exchange of words should be permitted between the deportees and passers-by.

7. Manner of embarking

At each point of embarkation the members of the operative triumvirate and a person specially appointed for that purpose shall be responsible for the embarkation.

On the day of the operations the chief of the point of embarkation together with the chief of the echelon and of the convoying military forces of the People's Commissariat of Internal Affairs shall examine the railway car furnished to see whether they are supplied with all necessities—(bunks, beds, pans, lanterns, railings, etc.) and shall discuss with the commander of the echelon the manner in which the latter will take over the deportees.

Embarkation station shall be encircled by the soldiers of the convoying troop of the People's Commissariat of Internal Affairs.

The senior member of the operative group shall deliver to the commander of the echelon one copy of the list of deportees in each railway car. The commander of the echelon thereupon shall call out the deportees according to the roll and shall carefully check each family and designate their place in the roll and shall carefully check each family and designate their place in the railway car.

The possessions of the deportees should be loaded into the car together with the deportees, with the exception of the small agricultural inventory, which should be loaded into a separate car.

The deportees shall be loaded into railway cars by families; it is not permitted to break up a family (with the exception of heads of families subject to arrest). An estimate of 25 persons to a car should be observed.

After the railway car has been filled with the necessary number of families, it should be locked.

After the people have been taken over and loaded in the echelon train, the commander of the train shall bear responsibility for all the persons turned over to him for their reaching the destination.

After turning over the deportees the senior member of the operative group shall draw up a report to the effect that he has performed the operations entrusted him and address the report to the chief of the county operative triumvirate. The report should briefly contain the name of the deportee, whether any weapons and counter-revolutionary literature were discovered, and how the operations ran.

Having placed the deportees on the echelon of deportees and submitted report of the results of the operations performed, members of the operative group shall be considered free and shall act in accordance with the instructions of the chief of the county branch of the People's Commissariat of Public Security.

DEPUTY PEOPLE'S COMMISSAR OF STATE SECURITY OF THE U.S.S.R.
Commissar of State Security of the Third Rank

2. THE PREPARATORY PLAN FOR THE LIQUIDATION OF IMPORTANT PERSONNEL BELONGING TO "ANTI-STATE" PARTIES IN LITHUANIA, DATED JULY 7, 1940.

(Strictly Secret)

Translation: Confirmed (signed) A. SNIE KUS, Director of State Security Department, 7th day of July, 1940.

PLAN OF THE PREPARATORY ACTIVITIES OF LIQUIDATION AND OPERATIVE LIQUIDATION OF THE LEADING PERSONNEL OF ANTI-STATE PARTIES; NATIONALISTS, VOLDEMARISTS, POPULISTS, CHRISTIAN DEMOCRATS, YOUNG LITHUANIANS, TROTSKYISTS, SOCIAL-DEMOCRATS, ESSERS (SOCIALIST REVOLUTIONARIES), NATIONAL GUARDSMEN AND OTHERS

The operation is to be effected simultaneously in all of Lithuania, the night of July 11 to 12, 1940.

Prior to July 10, information is to be prepared regarding all people who must be isolated. In the "index cards" of all detainable people must be indicated the surname, name, father's name, year and place of birth, nationality, education, social origin, material situation/property/, the last place of employment and position, party membership and party work performed, a short summary of the compromising material, and at the end of the "index card" must be indicated the *verified* address of the place of permanent residence. If residing/or owning/a summer house, include the address of the summer house, and the home telephone number.

Five groups of 1 to 4 persons each are to be made up of the operative personnel of the First Division and Kaunas Circuit workers to prepare the indicated "index cards." The work is to be distributed among them in the following manner:

First group—4 persons—prepares "index cards" for the leading membership of the Nationalists. The group's leader—Krastin.

Second group—2 persons—prepares "index cards" for the leading membership of the Voldermarists. The group's leader—Dembo.

Third group—1 person—Finkelstein, prepares "index cards" of Trotskyists and Essers.

Fourth group—4 persons—prepares "index cards" for Christian Democrats. The group's leader—Komodos.

Fifth group—3 persons—prepares "index cards" for Populists and Socialdemocrats. The group's leader—Macevicius.

Responsibility for the timely submission of the above indicated "index cards" is borne by Todes, chief of the First Division.

Gailevicius, chief of the II Division, must arrange for the timely established and verified addresses of the detainable persons. For this purpose, from July 8th an appropriate number of scouts must be detailed, who must be diligently briefed (instructed) regarding the retention of strictest caution during the work of establishment and verification of the addresses.

For the execution of these operations before the 10th of July must be organized a number of active groups, headed by capable workers. What persons are to be arrested by each group must be settled in advance. In order to strengthen the active groups, the required numbers of officers from the Crime Department and civil policemen must be mobilized. Their chiefs must be made acquainted with the operation beforehand; but they must not be told for what purpose these officers are to be mobilized. Executive: Zdanavicius.

For a smooth and successful execution of the action there shall be issued a special instruction on searches and arrests, and the instruction is to be delivered to the leaders of the groups in the evening before the actions begin. Executive: Gailevicius.

In order to provide the active groups with means of communications, prior to the day of action 30 motor cars must be in readiness. Executive: Snieckus.

In case of necessity to put rooms and flats under seal in the process of operations, the chief of the Police Office, Slavin, has to order 10 seals for wax and these seals must be ready before the 9th of July. For that date Slavin must provide 20 picket lanterns.

For the successful execution of the operations and for securing effective assistance on the spot, operative workers must be sent from Kaunas to the following places:

(1)	to Vilnius	8 men
(2)	to Siauliai	1 man
(3)	to Ukmerge	1 man
(4)	to Mariampole	1 man
(5)	to Panevezys	1 man

The chiefs of all Branches and of the Kaunas District must deliver to the Secretary of the State Security Department full lists of all employees at their Branches, before the 8th of July. Executive: Slavin.

The chief of the Investigation Branch, Razauskas, is to be charged with the duty of preparing before the 10th of July all necessary orders according to lists, put up by the groups in charge.

When the "Information" necessary for arresting the leading persons of the anti-State parties is ready, it must be checked with that in possession of the Minister for the Interior, Gedvilas. Executive: Snieckus.

The chief of the Investigation Branch, Razauskas, with the chief of the Kaunas Prison, Kucinskas, shall organize the housing of arrested persons and articles and documents taken in the course of searches.

In order to ensure strict isolation of persons to be arrested, care must be taken which persons should be located into which cells. They must be classified so that persons indicted on similar charges are not put into the same cells.

For the imprisonment of persons arrested, up to the 11th of July must be emptied the necessary number of cells in the Kaunas Prison, bearing in mind that there would be 200 arrests. For the same date a detachment of proved cell-inpectors must be found.

The chief of the prison, Kucinskas, must see that the prison guards are strengthened from the date of July 12th.

A special group of trial officers (law officers who conduct the preliminary part of a trial) shall be selected, and this group must be charged with the duty of starting at once, the arrests being concluded, with the trial of especially noted persons, the leading staff of the anti-State parties. Executive: Razauskas.

Outside pursuit of specially distinguished enemies of the State must be organized, beginning on July 9th up to the date of their arrest. For that purpose the chief of the 2nd Branch must organize eight local sentry stations.

From July 9th a conference of district chiefs must be convened; they are to hand in their ready material in order to compare the lists of candidates for imprisonment, and they must be given instructions on executing the whole operation. Responsible Snieckus.

At the conference of the district chiefs must be settled in advance who of the arrested persons, after local action, are to be sent to Kaunas and to Vilnius. Executive: Snieckus.

Considering the eventuality that persons who are to be arrested or such as are not yet on the lists, will be attempting to cross the State boundaries, an agreement with the frontier Army must be made in order to fortify the boundary guards from July 8th and to close the frontiers from July 11th to the 16th.

The action of isolating persons to be arrested among the Polish fugitives must begin on July 8th.

All active workers and policemen, who are to take part in the execution of the scheme, must be provided with firearms. Those who are not versed in the use of firearms, must be given special instructions, two academic hours each day, from July 9th to 10th, followed by an excursion to the drill-ground. Executive: Zdanavicius.

This plan must be carried out minutely and energetically. The Director or his deputy, however, considering eventualities, may change or supplement certain points.

JULY 7TH, 1940.

The plan prepared by:

ZDANAVICIUS,
Chief of State Security Police.

---

3. LETTER OF MECYS GEDVILA, MINISTER OF THE INTERIOR OF LITHUANIA TO PRESIDENT JUSTAS PALECKIS, ON JULY 16, 1940

TO MR. PRESIDENT OF THE REPUBLIC: For reasons of State security, I hold that it is necessary to deport from the territory of Lithuania, as persons dangerous to the Lithuanian State, and to settle in the Soviet Union, the former Prime Minister of the Republic of Lithuania, A. Merkys, and Minister of Foreign Affairs Urbsys, together with their families.

Mr. President, I ask for your consent.

(signed) M. GEDVILA,
Minister of Internal Affairs.

KAUNAS, *16th July 1940.*

I confirm and consent.

(signed) J. PALECKIS,
President of the Republic.

KAUNAS, *16th July 1940.*

---

4. NEGLIGENCE IN ACCOUNTING OF THE ANTI-SOVIET ELEMENTS; AND AN ORDER TO CARRY OUT ORDER NO. 001223 OF THE NKVD

(Strictly Secret)

ORDER [2] OF THE PEOPLE'S COMMISSAR FOR THE INTERIOR OF LITHUANIAN SSR OF YEAR 1940

Contents: About negligence in accounting concerning anti-Soviet and socially alien element.

No. 0054:

KAUNAS,
November 28th, 1940.

In connection with the great pollution of the republic of Lithuania with the anti-Soviet and socially alien element, the account concerning same acquires an especially great importance.

For the operative work it is important to know how many former policemen, white guardsmen, former officers, members and the like of anti-Soviet political parties and organizations are in Lithuanian territory, and where the said element is concentrated.

This is necessary in order to define the strength of the counter-revolution and to direct our operative-agencies apparatus for its digestion and liquidation.

Despite the importance of keeping all such accounts, our operative organs did not seriously undertake this work.

The materials cleared by the agencies-investigative apparatus remain scattered in the cabinets of operative collaborators without proper usage.

Executing the order of 001223 of NKVD of the USSR about the accounting concerning the anti-soviet element and concerning the liquidation of negligence in this work.

I. ORDER

1. Chiefs of operative branches of the Center and of county branches and units to take over within 3 days all files and cases entered on the account of 1st Spec(ial) division—the formulars and persons mentioned therein.

2. Within 10 days to take over into the 1st Specdivision all anti-soviet element, listed in the alphabetical files (index accounting).

3. At the same time to undertake clarification of all anti-soviet and socially alien element on the territory of the republic of Lithuania and to transfer same to the jurisdiction of operative account of 1st Specdivision.

4. The accounts of persons mentioned in agency files, also in the alphabetical files (index accounting), to be concentrated in the Specdivision of NKVD or LSSR, for which purpose special cards must be filled in concerning each transferred person by the county branches and units of NKVD and by the City Council of Vilnius, and said cards must be mailed to the 1st Specdivision of NKVD or the LSSR.

5. The index account must cover all those persons who by reason of their social and political past, national-chauvinistic opinions, religious convictions, moral and political inconstance, are opposed to the socialistic order and thus might be used by the intelligence services of foreign countries and by the counter-revolutionary centers for anti-soviet purposes.

These elements include:

(a) All former members of anti-soviet political parties, organizations and groups: trotskyists, rightists, essers (socialist revolutionists), mensheviks, social democrats, anarchists, and the like;

(b) All former members of national chauvinistic anti-soviet parties, organizations and groups: nationalists, Young Lithuania, voldemarists, populists, christian democrats, members of nationalist terroristic organizations ("Iron Wolf"), active members of student fraternities, active members of Riflemen's Association, Catholic terrorist organization "White Horse";

(c) Former gendarmes, policemen, former employees of political and criminal police and of the prisons;

(d) Former officers of the czar, Petliura and other armies;

(e) Former officers and members of military courts of the armies of Lithuania and Poland;

(f) Former polit(ical) bandits and volunteers of the white and other armies;

(g) Persons expelled from the Communist Party and Comm-youth for anti-party offences;

(h) All deserters, polit(ical) emigrants, re-emigrants, repatriates and contrabandists;

(i) All citizens of foreign countries, representatives of foreign firms, employees of offices of foreign countries, former citizens of foreign countries, former employees of legations, firms, concessions and stock companies of foreign countries;

(j) Persons having personal contacts and maintaining correspondence abroad, with foreign legations and consulates, esperantists and philatellists;

(k) Former employees of the departments of ministries (from referent up);

(l) Former workers of the Red Cross and Polish refugees;

(m) Religionists (priests, pastors), sectants and active religionists of religious communities;

(n) Former noblemen, estate owners, merchants, bankers, commercialists (who availed themselves of hired labor), shop owners, owners of hotels and resturants.

6. For preparation of index accounts of anti-soviet elements all sources must be availed of, including: agencies' reports, special investigative materials, material of party and soviet organizations, statements of citizens, testimony of the arrested persons, and other data. As a rule, statements, testimony and other official materials must first be verified in an agency manner.

7. Operative branches and county branches and units must prepare separate rosters for accountable persons who had departed elsewhere, and must take steps to clarify some. At the same time, cards of sought persons must be filled in and transferred to the 1st Specdivision.

8. Files-formulars must be introduced and transferred into active agency account concerning the former activists of anti-soviet polit-parties and organizations (trotskyists, mensheviks, essers, nationalist associations and the like) counter-revolutionary authorities of religionists (priests, mullas, pastors), responsible collaborators of police, ministries, foreign firms and the like, in accordance with available material about anti-soviet activity.

9. Chiefs of 1st Specdivision of NKVD of the LSSR are to report to me every day about the progress of this order.

10. The order is to be discussed in operative consultations and concrete means for its execution are to be provided for.

(Signed) GUZEVICIUS,
People's Commissar for the Interior of Lithuanian SSR.

The copy is authentic. (Signature illegible)

[Note by translator:]

Above document No. 0054 mentions "Executing order No. 001223 of the NKVD of the USSR about the accounting concerning the anti-Soviet element and concerning the liquidation of negligence in this work . . ." It is evident that Order No. 001223 paved the way

---

[2] Taken from Lithuanian Archives—1.(19).

for the mass arrests and deportations of June 13–14, 1940.

A later order printed here, Order 0023 states "existence of a large continent of persons, subject to operative accounting under Order 001223 of the NKVD of the USSR date 11th, October, 1939." It appears that Moscow Headquarters of the NKVD had issued its first order directing the preparations for mass liquidation of "the anti-Soviet and anti-social elements" of Estonia, Latvia and Lithuania on the next day following the signing of the Non-aggression and Mutual Assistance Pact with Lithuania. That Pact was signed October 10, 1940.

Mr. CRANE. Mr. Speaker, the annual observance of Captive Nations Week has become a tradition, commenced in 1959, observed by five Presidents and 10 successive Congresses. The 19th observance of Captive Nations Week has been tarnished this year, however, by the very man who has attempted to identify himself most with the issues of human rights and dignity. This person was lauded not long ago for his leadership in utilizing his office, as the leader of a free nation, to proclaim the U.S. dedication to the causes of human rights and freedom. Yet, for the first time in 19 years, the President of the United States has determined not to proclaim Captive Nations Week. This may seem unimportant to some, but this inaction can only be interpreted by most to mean that President Carter is not willing to put into action what he personally pays lip service to.

In light of the President's inaction, let us in the Congress reflect on what we have done to improve the prospect of human rights and freedom for the peoples of captive nations.

There are questions we must honestly ask ourselves. Questions that must be answered, not by the abundance of statements and speeches we make, but by the laws and stands which we take here in these halls. The answers to these questions are not simple ones. Let us answer them as though someone whether that person is a prisoner in a Soviet jail, a political dissident in a totalitarian state, or a family wanting, but unable, to emigrate in order to join a loved one were asking each of us: how have our actions and most important, our votes, reflected our true dedication and commitment to human rights and freedom.

Have we shown courage in the face of continued Soviet aggression and intervention outside the Soviet dominated world? Have we enhanced our global posture by only fitfully aiding and supporting our allies? Have we turned a passive back on those who ask only for our vigilance and support? Have we advanced the cause of self-determination of newly independent states by allowing Sino-Soviet penetration and pressure to determine a nation's destiny? Have we applied our human rights commitment to all nations equally, or have we singled out a few and selectively ignored the gigantic deprivation of human rights and freedom by the Communist leviathans? Have we accepted Eastern Europe as a sphere of perpetual Soviet domination? Have we turned our back on the aspirations of those countries yearning to be free? Have we shown real leadership and moral rectitude by asking Russian nations to allow a few persons to exercise personal rights to emigrate, while simultaneously helping the Soviet Union to deny human rights by blinding ourselves to their aims and objectives? Are we really helping once free nations break away from totalitarian domination by creating myths about the Soviet Union and ignoring the realities of Eurasia? Have we forgotten that these captive nations were once free and sovereign? Have we forgotten the facts on how totalitarian Russia exercised aggression more than half a century ago and how it continues to do so today?

Have we colored inescapable truths by redefining words like communism, imperialism, aggression, intervention, and totalitarianism to render them acceptable to our consciences? Have we accepted cultural genocide in certain lands and mesmerized ourselves into accepting forceful assimilation and the eradication of diversity among groups as a nation's "internal affairs"? Do we believe that there are no oppressed, exploited classes of nationalities in the Soviet Union? Do we believe that peaceful coexistence and noninterference means that nations should no longer be accountable for their violations of human rights?

I would hope that all my colleagues might ask themselves these questions, and I would also hope that one day these captive nations will be free, aided not by our eloquent and sometimes self-serving speeches, but by the laws we enact and the laws we stand behind.

Mr. KOCH. Mr. Speaker, as we observe Captive Nations Week for the 19th time since it was designated by Congress and approved by President Eisenhower, we must beware lest we forget the meaning of our observance and let our words and ceremonies become perfunctory.

The freedom and affluence of this Nation make it hard for most Americans to imagine what life is like in one of the captive nations. Subjugation by a foreign power, mass exportations, systematic cultural repression, rewritten history, and predatory police action are virtually unknown in this country's experience.

The seductive atmosphere of stability created by détente tends to dull our perception of the fundamental antagonism between the principles that underlie our society and those that underlie the Soviet Union, which is the master of the vast majority of the extant captive nations. Because of the balance of terror and our own mistakes in Vietnam and elsewhere, it is not uncommon today to hear the United States and the Soviet Union jointly described as two superpowers which are basically similar and which differ in little more than societal organization. This viewpoint I fervently reject. Détente may be mistakenly interpreted to be a means by which both countries overcome their differences and become friendly, but in reality it is a strictly pragmatic policy to avoid an unimaginably devastating war by obviating potentially explosive confrontations and by slowing the arms race. It would be tragic if we started fooling ourselves into believing that the Soviet empire is not so bad after all.

The danger of such a development is not a new one. Even as Hitler's armies overran Poland, many voices in this country argued that Germany was bringing order to a chaotic Europe, that Hitler was stern but fair, and that the Nazis' treatment of the Jews was being grossly exaggerated in the press.

The atrocities committed by Stalin's U.S.S.R. were equal to those committed by Hitler's Germany. To this day the Kremlin continues its campaign to eliminate all non-Soviet national and cultural identity in the republics which were forcibly incorporated into the U.S.S.R. and to manipulate the populations of the other Eastern European nations behind the Iron Curtain. Because of the shortness of our memories and the effectiveness of Soviet propaganda and secrecy, most of the atrocities are unknown to the American people today.

I am not concerned whether a society is Communist or capitalist or leftist or rightist. My concern is whether the people in that society are free to choose the kind of society and government they want without outside interference and to run their own lives. The individual rights proclaimed in our Declaration of Independence are not simply "American" values. Rather, they are "inalienable," or "rooted in nature," which means they belong to all human beings everywhere in the world, whether in the United States, in the Soviet Union, in Latin America, or in Southeast Asia.

There are many independent countries such as Chile, Nicaragua, Uganda, and South Africa where these basic, or human, rights are grossly violated. But the captive nations are a unique class in that their sovereignty has been trampled and their independence squelched so that the violations of human rights that take place within their borders are directed from abroad. In many cases such as Poland and Romania there is good reason to believe that democracy and respect for human rights would quickly return should the dominating power recede.

In making note of the plight of the captive nations, it is vital that we not forget the less prominent among them or that we allow longevity to give one iota of legitimacy in our minds to imperial rule. The Ukraine, Byelorussia, Turkestan, Tibet, Latvia, Lithuania, and Estonia were all independent nations not long ago, and we cannot rest our vigil until they and all the other captive nations are once again free.

Mr. WOLFF. Mr. Speaker, this week will mark the 19th observance of Captive Nations Week. Today, when world attention is focused upon the issue of human rights, it is imperative that we remember those who have struggled for years under the yoke of Soviet totalitarian rule. As one concerned about the basic human rights of peoples throughout the world, I would like to take this time to join my colleagues in protesting the intolerable situation that continues to exist in Eastern Europe.

The period of the Second World War witnessed the forced occupation and seizure of Czechoslovakia, Romania, Bulgaria, Poland, and Hungary. The Soviet Union has been ruthless in its efforts to obtain complete control of Eastern Eu-

rope. Sadly, it has been successful in seizing Latvia, Estonia, Lithuania, Byelorussia, and the Ukraine. The occupying Soviet tanks trampled the basic human rights of the peoples of these now-oppressed nations and substituted a totalitarian rule predicated on fear, obliteration of the basic freedoms of speech, assembly, and religion.

When the Final Act of the Helsinki Accords was signed in August 1975, by the United States and the Soviet Union, a standard of basic freedoms and human rights was set out. But the accords also served to recognize Soviet East-European borders—borders established by force. In response to the Soviet tightening of control over the captive nations which followed the signing of the accords, I sponsored House Resolution 864, which stated that it was the sense of the House that the United States continue its policy of nonrecognition of the Soviet occupation of the Baltic Nations.

As the Belgrade Conference progresses, now is the time to call attention to Basket I of the Helsinki Accords which guarantees the principle of national self-determination. Let us remember the proud peoples of Byelorussia and the Ukraine. Let us give top priority in our discussion of human rights to the religious oppression on a horrifying scale that is being practiced by the Soviet Union upon the Ukrainian Orthodox and Catholic churches and those of the Jewish faith. It is anomalous that Byelorussia and the Ukraine, the largest non-Russian nation in Eastern Europe, are not signatories of the Helsinki Accords.

In the captive nations millions have been killed, thousands have been forcibly relocated, harassed, tortured, and held in camps, prisons, and mental institutions. Persecution has been carried out savagely and on a massive scale against intellectuals, religious leaders and their followers, cultural leaders and ordinary citizens. Soldier's graves have been desecrated, churches, libraries and historical buildings have been destroyed.

Yet the ranks of dissenters has continued to grow, with arrests only provoking further antagonism and strengthening the determination of the captive peoples. In the words of Valentyn Moroz, such repression is like a "boomerang," flying back at Russia.

The cause of freedom and human rights for the captive nations must not be abandoned. It has been demonstrated that the Soviet Union will move in response to world public opinion, albeit too slowly. But again in the words of Moroz:

> The new processes are only beginning, and [Soviet] repressions have ceased to be effetcive. What will happen next?

So let us commemorate Captive Nations Week by saluting the determined peoples of the captive nations in their struggle to obtain the human rights guaranteed to them by the Helsinki accords and international law, and let us spare no effort in assisting those peoples to live once more in freedom.

Mr. McCLORY. Mr. Speaker, this is both a time of irony and of hope. Those of us who believe strongly in the cause of the captive nations speak here today about their tragedy, their loss of freedom and, in some cases, even the subversion of the traditions of these once established national entities.

Yet, in Belgrade, Yugoslavia, skirmishing already has begun to prepare for a meeting this fall of signatories to the Helsinki agreement. That agreement, with its underscoring of "Respect for Human Rights and Fundamental Freedoms," has become a beacon of hope to millions who live within those captive nations, and to millions of Americans who view their courage with respect and concern.

Mr. Speaker, I use the word "skirmishing" with forethought. Already the goals of the United States and the Soviet Union are in conflict in Belgrade. Clearly, to some of the 35 signatories of the Helsinki agreement, the very phrase, "Respect for Human Rights" is as alien as our Bill of Rights.

Dr. Lev E. Dobriansky of Georgetown University, chairman of the National Captive Nations Committee, wrote the Members of this Chamber about this 19th observance of Captive Nations Week, July 17 through July 23. In that letter he pointed out that—

> No part of the world represents a graver denial of human rights, including the right to national independence, than the totalitarian world imprisoning the captive nations.

This is not the time to debate the current relationships between ourselves and the Soviet Union nor to argue the rights of national sovereignty and self-determination versus global human rights.

But it is the time to speak of change. The Helsinki agreement represented change. Many of us in the West hoped it would open a crack in the window to the East. Our relationships with Cuba, an economic vassal of the Soviet Union, are changing. This could bring a lessening of restrictions on some who live there—not tomorrow, not next week, or even next year.

But Mr. Speaker, what seems paramount to me today is what has not changed. In 1959, this House and the Senate approved and then President Eisenhower signed Public Law 86–90—a joint resolution providing for the designation of the third week of July as Captive Nations Week.

The commitment of the Congress to the welfare and eventual freedom of these nations has not changed. Our desire that they enjoy the "Respect for Human Rights and Fundamental Freedoms," as it is phrased in the Helsinki pact, is steadfast.

Moreover, this is not rhetoric for distant people unknown. In my own 13th Congressional District of Illinois are American citizens of Albanian, Bulgarian, Czechoslovakian, Estonian, Hungarian, Latvian, Lithuanian, Polish, and Romanian descent.

And in my 13th Congressional District are leaders such as Dr. Kazys Bobelis of Dundee, president of the Lithuanian American Council, and Edward R. Skalisius of Waukegan, vice president of the Lithuanian World Community. Gediminas Damasius of Waukegan is president of the Lake County chapter of Lithuanian American Community. Another friend is Olaf Tammark, president of the Estonian Association of northern Illinois. There are many others, too numerous to name. But what they have brought us enriches America and impoverishes the nations from which they felt forced to flee.

A special week set aside in sorrow once a year is little solace. But the concerns of a great nation unswerving year after year in its devotion to freedom for itself and for others is a reservoir of hope for those who have no other place to seek it.

Mr. Speaker, it is a reservoir that will never be found empty.

Mr. STRATTON. Mr. Speaker, the 86th Congress, by a joint resolution approved July 17, 1959, authorized and requested the President to proclaim the third week in July of each year as Captive Nations Week. I stand here today to reaffirm my commitment made 18 years ago in support of Public Law 86–90, to commemorate the 19th observance of Captive Nations Week, and to pledge my continued support for the legitimate aspiration of those being held behind the Iron Curtain to be free of foreign subjugation.

There has been much talk over the past few weeks and months over the so-called Basket Three provisions of the Final Act of the Helsinki Conference on Security and cooperation in Europe relating to human rights, or more aptly put, the denial of human rights in the Communist nations. The President's campaign on human rights, especially as applied to the Soviet Union, has caught the public imagination and even resulted in the release of several hostages from behind the Iron Curtain, including 8-year-old Maria Atanasov from Bulgaria, daughter of Mr. and Mrs. Basil Atanasov of Schenectady, N.Y. However, there is more to the Helsinki agreement; the so-called Basket One section, the "Declaration on Principles Guiding Relations between Participating States," is very appropriate to our discussion of Captive Nations Week.

Mr. Speaker, we all know that the Ukraine and the Baltic States of Latvia, Estonia, and Lithuania have been forcibly incorporated into the Soviet Union. The United States, however, has never recognized this illegal annexation. In fact, this body went on record in 1975 in House Resolution 864 that the signing in Helsinki of the Final Act did not change in any way the long-standing policy of the United States on nonrecognition of the Soviet Union's illegal seizure and annexation of the three Baltic States. In addition, although the Communist government of the Ukraine occupies a seat at the United Nations, it was not allowed to take part in the Helsinki deliberations and sign the Final Act.

A number of points can be made then about the relationship between Basket One and the status of the captive nations: First, the Helsinki agreement was not a peace treaty and did not establish the final map of Europe; second, the Soviet Union in Basket One reaffirmed its commitment to the United Nations Charter that the occupation or acquisition of territory by force would not be recognized as legal; third, European frontiers

can be changed in accordance with international law, by peaceful means and by agreement; and fourth, as pointed out in subsection VIII of Basket One—

All peoples always have the right, in full freedom, to determine, when and as they wish, their internal and external political status, without external interference, and to pursue as they wish their political, economic, social and cultural development.

Mr. Speaker, the right to freedom for the captive nations is, indeed, imbedded in international law and agreements, and I urge our delegation now in Belgrade to pursue this matter further. We must insist that these human rights provisions be adhered to by the Soviets and their satellites.

Mr. STEERS. Mr. Speaker, in accord with Public Law 86–90, the third week in July has been set aside as Captive Nations Week, dedicated to the commemoration of the fate of millions of people denied basic human rights by Soviet oppression.

In celebrating this 19th observance of Captive Nations Week, we continue to admire the strength and moral dedication of that portion of our human race held in constant check by the omnipotent arm of the Soviet Union.

The Soviet Union's aim in maintaining a firm hold over the captive nations is not preservation of the heritage, tradition, or culture of these regions, but eradication of them. Yet these vital elements remain, because of the strength of the captive nation peoples, bolstered by the free, self-determined nations of the world and the hope that there will one day be no more captive nations.

Despite the nearly overpowering attempts of the Soviet hierarchy to create a nation of identical automatons, these people are still able to continue the struggle for their right to individuality as single human beings and as societies. It is commendable that these people can continue to speak out for their right to self-determination. They continue to exercise and demand their right to worship, their right to express themselves as they choose. They are able to maintain their heritage, their traditions, and their culture, despite the inhumanity of the force hovering all around them.

It is indeed unfortunate that man did not long ago realize, accept, and automatically adopt the commitment to human rights that has recently surfaced to world attention. However, the captive nations should take heart in that their frustration will be the focus of the Belgrade Conference which convenes this fall.

The Belgrade Conference will examine and assess the status of the Helsinki Declaration, signed by the Soviet Union and many other countries, including the United States. This declaration includes the right of self-determination, which, at present, the captive nations do not enjoy. Basket Three of the declaration also provides for religious and social freedoms presently denied the peoples of the captive nations.

Mr. ASHBROOK. Mr. Speaker, Captive Nations Week is again being commemorated. The purpose of this week is to express our support of the captive nations, and peoples of this world—all those millions who are being held captive and being oppressed by Communist regimes.

In the past several years more countries have fallen to Communist imperialism. The peoples of Vietnam, Laos, and Cambodia have joined the ranks of the millions of others under Communist oppression. In addition, there is speculation that the Carter administration might be abandoning free China in order to get closer relations with the oppressors of 800 million people on the mainland of China. This would be another setback for the hopes of all people throughout the world who love freedom.

While there were some indications that President Carter was not going to issue a Captive Nations Week proclamation, he has done so. Unfortunately, President Carter's proclamation of July 20, 1977, is weak, vague and useless.

In July 1959, Congress passed Public Law No. 86–90 which authorized and requested the President to designate the third week of July as Captive Nations Week. The resolution further provided for a similar proclamation each year "until such time as freedom and independence shall have been achieved for all the captive nations of the world." Like our own Declaration of Independence, the resolution specifically signaled out the source of oppression, Communist imperialism, in denying the captive peoples "of their Christian, Jewish, Moslem, Buddhist, or other religious freedoms, and of their individual liberties."

I first began comparing with Public Law 86–90 the texts of succeeding proclamations from President Eisenhower to the present in July 1961. In his 1959 proclamation, President Eisenhower points the finger at "Soviet communism" as the tyrant:

CAPTIVE NATIONS WEEK, 1959

(A proclamation by the President of the United States of America)

Whereas many nations throughout the world have been made captive by the imperialistic and aggressive policies of Soviet communism; and

Whereas the peoples of the Soviet-dominated nations have been deprived of their national independence and their individual liberties; and

Whereas the citizens of the United States are linked by bonds of family and principle to those who love freedom and justice on every continent; and

Whereas it is appropriate and proper to manifest to the peoples of the captive nations the support of the Government and the people of the United States of America for their just aspirations for freedom and national independence; and

Whereas by a joint resolution approved and requested the President of the United States of America to issue a proclamation designating the third week in July 1959 as Captive Nations Week and to issue a similar proclamation each year until such time as freedom and independence shall have been achieved for all the captive nations of the world;

Now, therefore, I, Dwight D. Eisenhower, President of the United States of America, do hereby designate the week beginning July 19, 1959, as "Captive Nations Week."

I invite the people of the United States of America to observe such week with appropriate ceremonies and activities and I urge them to study the plight of the Soviet-dominated nations and to recommit themselves to the support of the just aspirations of the peoples of those captive nations.

This 1959 captive nations proclamation marks the last of Presidential awareness and recognition of the menace of communism.

Now read President Kennedy's 1961 proclamation and consider if he might just as well have been referring to King George III of England. Could not his nebulous references to "freedom and independence" have been applied to numerous cases in history?

TEXT OF THE PRESIDENT'S PROCLAMATION ON CAPTIVE NATIONS WEEK, 1961

Whereas by a joint resolution approved July 17 1959 (73 Stat. 212), the Congress has authorized and requested the President of the United States of America to issue a proclamation designating the third week in July 1959 as "Captive Nations Week," and to issue a similar proclamation each year until such time as freedom and independence shall have been achieved for all the captive nations of the world; and

Whereas many of the roots of our society and our population lie in these countries; and

Whereas it is in keeping with our national tradition that the American people manifest its interest in the freedom of other nations;

Now, therefore, I, John F. Kennedy, President of the United States of America, do hereby designate the week beginning July 16, 1961, as "Captive Nations Week."

I invite the people of the United States of America to observe this week with appropriate ceremonies and activities, and I urge them to recommit themselves to the support of the just aspirations of all peoples for national independence and freedom.

Which of the two foregoing statements better reflect the sentiment and purpose of Captive Nations Week when compared with the original resolution? The 1961 Kennedy declaration marked a great victory for State Department appeasers who began their anti-Communist program which muzzled the military, blue penciled references to victory over communism and set us on our present disastrous course. The original resolution made it clear we were talking about Communist domination of free people:

CAPTIVE NATIONS WEEK—PUBLIC LAW NO. 86–90

S.J. RES. 111 AND H.J. RES. 454, 459

Whereas the greatness of the United States is in large part attributable to its having been able, through the democratic process, to achieve a harmonious national unity of its people, even though they stem from the most diverse of racial, religious, and ethnic backgrounds; and

Whereas this harmonious unification of the diverse elements of our free society has led the people of the United States to possess a warm understanding and sympathy for the aspirations of peoples everywhere and to recognize the natural interdependency of the peoples and nations of the world; and

Whereas the enslavement of a substantial part of the world's population by Communist imperialism makes a mockery of the idea of peaceful coexistence between nations and constitutes a detriment to the natural bonds of understanding between the people of the United States and other peoples; and

Whereas since 1918 the imperialistic and aggressive policies of Russian communism have resulted in the creation of a vast empire which poses a dire threat to the security of the United States and of all the free peoples of the world; and

Whereas the imperialistic policies of Communist Russia have led through direct and indirect aggression to the subjugation of the national independence of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, White Ruthenia, Rumania, East Germany, Bulgaria, mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Tibet, Cossackia, Turkestan, North Vietnam, and others; and

Whereas these submerged nations look to the United States, as the citadel of human freedom, for leadership in bringing about their liberation and independence and in restoring to them the enjoyment of their Christian, Jewish, Moslem, Buddhist, or other religious freedoms, and of their individual liberties; and

Whereas it is vital to the national security of the United States that the desire for liberty and independence on the part of the peoples of these conquered nations should be steadfastly kept alive; and

Whereas the desire for liberty and independence by the overwhelming majority of the people of these submerged nations constitutes a powerful deterrent to war and one of the best hopes for a just and lasting peace; and

Whereas it is fitting that we clearly manifest to such people through an appropriate and official means the historic fact that the people of the United States share with them their aspirations for the recovery of their freedom and independence: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the third week in July 1959 as "Captive Nations Week" and inviting the people of the United States to observe such week with appropriate ceremonies and activities. The President is further authorized and requested to issue a similar proclamation each year until such time as freedom and independence shall have been achieved for all the captive nations of the world.

On July 21, 1966, the proclamation of President Johnson for that year was matched with the original resolution in the CONGRESSIONAL RECORD and, not surprisingly, suffered in comparison. It was noted, at that time, that former President of the United Nations, Dr. Charles Malik, reflected most adequately the approach of our Founding Fathers in dealing with oppression. Dr. Malik stated in part in a 1961 speech:

It is most important, therefore, to develop and execute policies and actions that will put the Communists and their friends historically on the defensive. Those who believe in man and his freedom, who know truth, and who trust in God, the guarantee of all freedom and all truth, must therefore, pass to the offensive, not only in thought and conviction, but of that real, decisive, historical action which shall cause the Communists to take to their heels.

The only offensive President Johnson took in his 1966 proclamation was not to be offensive to the Soviets by mentioning the naughty word "communism":

CAPTIVE NATIONS WEEK, 1966—A PROCLAMATION BY THE PRESIDENT OF THE UUITED STATES OF AMERICA

Whereas the joint resolution approved July 17, 1959 (73 Stat. 212), authorizes and requests the President of the United States of America to issue a proclamation each year designating the third week in July as "Captive Nations Week" until such time as freedom and independence shall have been achieved for all the captive nations of the world; and

Whereas freedom and justice are the inalienable rights of all peoples; and

Whereas these basic rights are presently denied to many peoples throughout the world; and

Whereas the United States of America, from its founding as a nation, has firmly subscribed tc the principles of national independence and human liberty; and

Whereas, in keeping with this tradition, it remains an essential purpose and a fundamental policy of the United States of America to sustain these principles and to encourage their realization by all peoples:

Now, therefore, I, Lyndon B. Johnson, President of the United States of America, do hereby designate the week beginning July 17, 1966 as Captive Nations Week.

I invite the people of the United States of America to observe this week with appropriate ceremonies and activities, and I urge them to give renewed devotion to the just aspirations of all people for national independence and human liberty.

In witness whereof, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

Done at the City of Washington this 8th day of July in the year of our Lord nineteen hundred and sixty-six, and of the Independence of the United States of America the one hundred and ninety-first.

By the President:

SECRETARY OF STATE.

With the change of administrations in 1968 and as a strong supporter of President Nixon, I, at that time, hoped that we would see forceful and effective pronouncements in the field of foreign relations and a strategic shift in foreign policy. After waiting for 6 months, I had to concede that there was no basic change in our foreign policy or our approach to the captive nations problem. The opportunity of adopting Dr. Malik's firm and moral offensive was frittered away and, even worse, President Nixon's trip to Moscow and Peking tightened the chains of oppression through the aura of free world respectability.

As I noted then, the 1969 proclamation made no mention of Czechoslovakia which had been invaded months before by Soviet tanks, no mention of repressive Communist policies, no mention even of the word "Communist" or the Soviet Union:

CAPTIVE NATIONS WEEK, 1969

(A proclamation by the President of the United States of America)

By Joint Resolution on July 17, 1959, the Eighty-Sixth Congress authorized and requested the designation of the third week of July as Captive Nations Week. Ten years have passed and there have been many changes in international affairs. But one thing that has not changed is the desire for national independence in Eastern Europe.

Now, therefore, I, Richard Nixon, President of the United States of America, do hereby designate the week beginning July 13, 1969, as Capitive Nations Week.

I invite the people of the United States of America to observe this week with appropriate ceremonies and activities, and I urge them to renew their devotion to the high ideals on which our nation was founded and has prospered and to sustain with understanding and sympathy the just aspirations of the peoples of all nations for independence and human freedom.

In witness whereof, I have hereunto set my hand this eleventh day of July, in the year of our Lord nineteen hundred and sixty-nine, and of the Independence of the United States of America the one hundred and ninety-fourth.

RICHARD NIXON.

THE WHITE HOUSE.

President Ford's proclamation of June 27, 1975, continues this history of our captive nations policy and, sad to say, his misguided deference to peaceful coexistence and détente is reflected in his statement. Further demonstrating that the captive nations proclamation is a necessary pragmatic and political exercise with this administration as it has been in the past was the absence of any welcome to Alexandr Solzhenitsyn at the White House. Because of a crowded schedule and admittedly due to foreign policy considerations, the one international figure personifying both oppression and hope for the captive peoples was effectively snubbed by our leadership. Perhaps Mr. Solzhenitsyn would have said at the White House what he was quoted as stating at the AFL–CIO dinner last night in New York:

If you are born free, why do you help our slave owners? When they bury us in the ground alive, please do not send them shovels; please do not send them the most modern, the most contemporary earth-moving equipment.

And perhaps in response, Mr. Solzhenitsyn might have been handed this reassuring message:

CAPTIVE NATIONS WEEK, 1975

(A proclamation by the President of the United States of America, June 27, 1975)

The history of our Nation reminds us that the traditions of liberty must be protected and preserved by each generation. Let us, therefore, rededicate ourselves to the ideals of our own democratic heritage. In so doing, we manifest our belief that all men everywhere have the same inherent right to freedom that we enjoy today. In support of this sentiment, the Eighty-sixth Congress, by a joint resolution approved July 17, 1959 (73 Stat. 212), authorized and requested the President to proclaim the third week in July of each year as Captive Nations Week.

Now, therefore, I, Gerald R. Ford, President of the United States of America, do hereby designate the week beginning July 13, 1975, as Captive Nations Week.

I call upon the people of the United States to observe this week with appropriate ceremonies and activities, and I urge rededication to the aspirations of all peoples for self-determination and liberty.

In witness whereof, I have hereunto set my hand this twenty-seventh day of June, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the one hundred ninety-ninth.

GERALD R. FORD.

With the election of President Carter some of my captive nations friends may have thought that times would change and that the new President would issue a proclamation with some teeth which would fearlessly recognize the plight of the captive nations. This is not to be. The President's proclamation is as gutless as those of previous Presidents.

CAPTIVE NATIONS WEEK, 1977

(A proclamation)

Since 1959 the Congress by joint resolution (73 Stat 212) has authorized an requested the President to designate the third week in July as Captive Nations Week.

Our own country was established on a profound belief in national self-determination. Throughout our history we have sought to give meaning to this principle and to our belief in liberty and human rights.

In recognition of this commitment, now, therefore, I, Jimmy Carter, President of the United States of America, do hereby designate the week beginning July 17, 1977, as Captive Nations Week.

I call upon the people of the United States to observe this week with appropriate ceremonies and activities, demonstrating America's support for those who seek national independence, liberty and human rights.

In witness whereof, I have hereunto set my hand this 20th day of July, in the year of our Lord 1977, and of the Independence of the United States of America the two hundred second.

JIMMY CARTER.

Missing in the above statement is any recognition of what the captive nations resolution opposes—Communist imperialism that has enslaved millions of people throughout the world. Communist regimes ignore human rights, constantly practice torture and ignore basic concepts of justice. Absent in the President's proclamation is any mention of communism or of the specific enslaved nations.

While the Carter administration has no problem mentioning what it sees wrong in countries that want to be our friends, it seems to be retreating from using the same standard against the Communist countries which are no friends of ours nor of liberty. The old double standard is coming back. As has been said before, if you are an enemy of the United States, you will be treated well; if you are a friend, watch out.

Finally, it must be asked what benefit has accrued in ignoring the slaves while dealing with their slave owners. L. I. Brezhnev, unhampered in 1972 by a crowded schedule of foreign policy considerations in welcoming fellow slave owner, Fidel Castro, to the U.S.S.R., reiterated the "We-will-bury-you" promise of Khrushchev made years before. Quoted in Pravda of June 28, 1972, the Secretary-General, with reference to the Soviet-American summit talks of that year, stressed that—

While working for the affirmation of the principles of peaceful coexistence, we are fully aware that the successes in this important field in no way signify the possibility of relaxation of ideological struggle.

In unmistakable language he added:

On the contrary, we must be prepared for an intensification of this struggle, for it is becoming an increasingly acute form of confrontation between the two social systems. And we have no doubts about the outcome of this confrontation, for the truth of history and the objective laws of social development are on our side.

If one has trouble understanding Brezhnev's message, let him digest the statement of the Soviet's chief "ideologue," M. A. Suslov, before the 20th French Communist Party Congress in 1972:

The establishment of the principles of peaceful coexistence does not in the least mean a weakening of the class struggle on a world scale or "conciliation" between socialism and capitalism. They are irreconcilable.

The treatment of the captive nations issue is a valuable indicator of our Nation's moral and realistic approach to tyranny and oppression. It is possible that our Founding Fathers might have reached an accommodation with British tyranny by cutting out the accusations in the declaration, staying under British rule and issuing a proclamation entitled "A Declaration of Interdependence." That would certainly have brought about a détente or relaxation of tensions with King George but, of course, no freedom and independence.

The sad record of our Presidents since 1959, Democrat and Republican, is one of appeasement to the relentless, uncompromising masters of the Kremlin.

Ms. OAKAR. Mr. Speaker, this week across America is a time of great sorrow and great joy. It is a week that thousands of Americans have designated as Captive Nations Week.

It is a time of great sorrow because millions of people around the world are oppressed in their own countries. Oppressed by a foreign power that does not allow them the freedom that is their God-given right. A freedom to speak, a freedom to practice their religion, but most important a freedom to think and govern themselves.

And this, Mr. Speaker, this lack of self-determination cannot be tolerated, and is not tolerated by these people. On many occasions in the past, they have risen up against their oppressors knowing full well the consequences. Yet they were not and are not afraid. They are not afraid because fear is displaced when truth and justice are sought. And freedom loving people everywhere know, I repeat know, that in the end truth and justice are victorious.

This is why it is also a time of great joy, because this simple fact has not been forgotten, nor will it ever be forgotten until truth and justice have become a reality, not just words.

I thank these fine Americans, who have suffered under the yoke of oppression and have found freedom in America, for not letting us forget. For not letting us forget their families, their friends, and their fellow human beings that continue their struggle to live their lives as it should and must be lived as free men and free women.

This week in the great city of Cleveland, Ohio, hundreds of people will join in the commemoration of Captive Nations Week. I salute these great people, as I do salute all freedom-seeking people throughout the world.

Mr. EILBERG. Mr. Speaker, Captive Nations Week provides an opportunity to demonstrate this Nation's solidarity with the peoples of Eastern Europe, to express our repugnance for the political system that untiringly and deliberately frustrates their hopes, and to reaffirm the American commitment to those fundamental beliefs and ideals that hold paramount the self-evident rights of humankind.

Before the Russian Revolution, Lenin characterized czarist Russia as a "prisonhouse of nationalities." It is one of the great ironies of our time that this description fully fits the current condition of the national minorities in the Soviet Union. And it is tragic that this "prisonhouse" has been enlarged since World War II to embrace the nations of Eastern Europe.

We, in this country, enjoy the fruits of centuries of struggle for human dignity. Thus we find it difficult to imagine the unfree world of totalitarianism that today engulfs the nations of Eastern Europe.

The Soviets, of course, would like America to just unquestionably accept Moscow's assertion that there exists "free" alliance among the Communist-dominated nations of Eastern Europe and the Communist-suppressed nations within the Soviet Union. But conscience never permits easy acceptance of morally repugnant and hypocritical situations. The very promise of America is that right takes precedence over expediency, that some principles are worth more than all the benefits that a less ethical approach might bring. The Soviets tell us, for example, that trade relations and cultural exchange will * * * we abandon our commitment to human rights and if we bow to Soviet tyranny over all of Eastern Europe.

Whatever advantages that might accrue to America through an acceptance of the present human condition in Eastern Europe or through a conspiracy of silence would be inherently incompatible with our own Nation's moral foundation. The United States has an obligation to denounce the degradation of human and national rights all over the world, especially in Eastern Europe, from which millions of our citizens and ancestors came. Exposure and condemnation of the physical, mental, and moral atrocities that are committed in closed societies will help to breech the silence and secrecy on which the survival of closed societies depend.

The voices emanating from the Eastern bloc nations derive support and assistance from Western recognition. The human rights movement in the Soviet Union and Eastern Europe, given new impetus by the Helsinki accords, has been the target of massive suppression by the secret police and by the state-controlled media. Denial of employment, beatings, imprisonment, enslavement in labor camps, and incarceration in psychiatric hospitals are used to crush the human resolve that dares to defy the state.

The defiant rioting of the Polish workers, the courageous signatories of Charter '77 in Czechoslovakia, the uprisings in Hungary and East Germany, and the refusal of the Soviet nationalities to assimilate and forget their heritage and former liberty are sufficient proof of the inviolability of the human mind and the universality of the desire for freedom. These people need our assistance and assurance; we, in turn, need them to remind ourselves of the fragility of our freedom.

Mr. Speaker, the Soviet system of government and social order is the very antithesis of what we have developed in our country and in other Western nations over the last two centuries. The Soviets practice a theory of society that could rightly be labeled one of "counter-enlightenment." The Soviets have

brought back the Dark Ages to Eastern Europe.

Night has descended on half a continent. But if freedom sleeps, it also dreams. We must keep alive that dream; we must reaffirm our belief in the primacy of human dignity; we must provide an example that will continue to lift the aspirations and hopes of the humanity of Eastern Europe. Mr. Speaker, we must arouse freedom from its slumbers, so that the bright day of freedom will once again dawn in Eastern Europe and all over the world.

Mr. DELANEY. Mr. Speaker, this 19th observance of Captive Nations Week, as proclaimed by President Carter, is a most appropriate time to salute the courage and fortitude with which the captive peoples of the Marxist world have maintained their identity and independence of spirit despite all the vicissitudes and attempted dominance to which they have been subjected. It is a time for reflection, a time for thanksgiving for our own freedom, and a time for rededication to the cause of liberty.

Many of those who fought in our own Revolutionary War and helped us gain our independence are heroes of now captive nations—men as illustrious as Pulaski and Kosciusko.

A mockery is daily being made of the Helsinki agreements to which the Soviet Union is signatory. Communist barriers continue to separate the captive nations from the common cultural heritage of their neighbors. Babies die while their parents attempt to smuggle them across sealed borders to freedom. "Dissidents" in the Ukraine are sentenced to harsh camp and exile terms for speaking out on behalf of human rights. The hammer and sickle threatens to extend its shadow over the African continent, adding further to the list of captives.

I join with my colleagues today in praying that these valiant peoples who inspire us with their undying spirit will once again enjoy the liberty which is so rightly theirs.

Mr. MARKS. Mr. Speaker, this week marks the 19th annual observance of Captive Nations Week. Americans throughout the country are observing this anniversary which Congress commemorated in a resolution enacted in 1959, which proclaimed the third week in July as Captive Nations Week.

This historic resolution concentrates American moral and political attention on the captive nations under Communist domination and reasserts American determination to assist in every peaceful way those nations' efforts to achieve freedom and independence.

If détente between East and West is to have a real and lasting meaning, it is imperative that a unified West make clear to the countries of the Warsaw Pact our support for human rights. If these nations are to receive from us needed technology, agricultural products, and political and diplomatic concessions, there must be concomitant recognition on their part of fundamental human rights, national integrity, and independence. This is reaffirmed by the Helsinki accords signed in 1975.

Repressive governments throughout the world must understand that we do not look favorably upon continued enslavement of nations and minority groups. In observation of Captive Nations Week, the United States reiterates its firm stand against any government which prohibits freedom of movement, discourages the reunification of families, and refuses emigration visas to those wishing to leave a country.

Finally, many Americans have involved themselves in various aspects of the international effort for human rights. At this time, I would like to commend the officers and members of those national organizations which are especially active in the field and to the hundreds of devoted men and women who sacrifice their time and resources to carry on the struggle.

Let the people of the captive nations know that we share their legitimate aspirations for freedom and a better life. As the principal advocate for freedom in the world today, our Nation can do no less.

Mr. LENT. Mr. Speaker, after the jubilance of our Nation's birthday, our festive mood turns somber as we again recall the plight of people around the world who are denied the basic rights of self-determination and national sovereignty, two cornerstones upon which our Nation was founded and by which we continue to prosper. Indeed, for those Americans who emigrated from nations now suffering behind the iron bars of Communist imperialism and for those Americans who have families and friends trapped in these captive nations, the word "somber" is inadequate to describe the feelings of despair, loss, and anger. Nations which once chose their own path and their own allies are now forced to follow the path dictated to them by their Communist overlords who are concerned only with profitable exploitation for the benefit of the Communist system.

Since 1959 when the 86th Congress established National Captive Nations Week, the third week of July has been a time when we remind ourselves that the United States can never view with equanimity the oppression and denial of essential human liberties which have become a tragic way of life for millions of people in some two dozen countries under Communist rule.

Since 1940, in Albania, Bulgaria, Czechoslovakia, Estonia, Hungary, Latvia, Lithuania, Poland, and Rumania, the Government of the Soviet Union, with almost systematic thoroughness, has tyrannized subject peoples with mass deportations to control popular sentiment and has suppressed dissent with the callous deployment of Soviet military hardware.

Perhaps most tragic of all, those who dare speak out against oppression, spokesmen with acuity to see the truth and the courage to voice it, are torn from the midst of their people and exiled thousands of miles away to the frozen wastelands of Siberia, the dehumanizing prisons, or mental asylums which "cure" dissent.

Captive Nations Week reminds us that in contrast to the darkness shrouding the dictatorial regimes of the world, our democracy, in all its imperfections, stands as a beacon for the hearts and minds of millions of people for whom individual freedoms are only an aspiration. Just as the Statue of Liberty has welcomed millions to a new life and new hope, so does the vigorous championing of human rights around the world hold out the promise of a day when nations which guarantee the rights of the individual will be the norm in the world community, not the exception.

Mr. WYDLER. Mr. Speaker, once again we are observing Captive Nations Week, the 19th such annual observance since the Captive Nations Week resolution was signed into law by President Eisenhower back in 1959. None of the captive nations has yet been freed, and indeed the list of nations that have been enslaved by Communist tyranny continues to grow. Yet the picture is not entirely bleak, and the reason for this lies not in any softening or mellowing of the methods and objectives of the Communist oppressors, but rather, in the spirit of the peoples of the captive nations.

In the case of the Baltic nations and the satellite countries of Eastern Europe, it has now been a full generation since these nations lost their freedom and independence. And for many other captive nations, such as the Ukraine, it is closer to two generations since the Soviets came to power. It might be expected that, as the memories of freedom and independence fade, and the younger generation comes of age, having known nothing but the Soviet system, the desire for national independence, human rights, and freedom would diminish. But, in fact, the opposite seems to be the case. Despite all Communist attempts to destroy the sense of national identity, the religion and culture, the freedoms and human rights of the peoples of the captive nations, the desire for freedom and independence is still strong among these peoples.

Since the signing of the Helsinki Final Act, human rights committees have sprung up all over the Soviet empire, including the Ukraine, Lithuania, Poland, East Germany, Czechoslovakia, and Rumania. And let us not forget that, to belong to a human rights committee in these countries does not bring applause and commendation as it does in our own free land and the other democracies of the world. To belong to such a committee in the Communist countries is to jeopardize careers, opportunities for education, housing, and the amenities of life, if not personal liberty itself—not only for the individual who participates in such a human rights effort, but for family and friends as well. Nevertheless, the human rights groups are refusing to be silenced.

Basket Three of the Helsinki Final Act has received most attention, and this is understandable because most discussions of Communist tyranny focus on the violations of personal rights, such as the right to emigrate. But this week we are directing our attention to the subjuga-

tion of entire nations and cultures, and Basket One is particularly relevant to the examination of this aspect of Soviet oppression. Basket One of the Helsinki accords commits the signatories to respect the principle of national self-determination. Indeed, the statement on "equal rights and self-determination of peoples" contained under the "Declaration of Principles Guiding Relations Between Participating States" is so pertinent to the plight of the Captive Nations that I would like to guote this in full:

VIII. EQUAL RIGHTS AND SELF-DETERMINATION OF PEOPLES

The participating States will respect the equal rights of peoples and their right to self-determination, acting at all times in conformity with the purposes and principles of the Charter of the United Nations and with the relevant norms of international law, including those relating to territorial integrity of States.

By virtue of the principle of equal rights and self-determination of peoples, all peoples always have the right, in full freedom, to determine, when and as they wish, their internal and external political status, without external interference, and to pursue as they wish their political, economic, social and cultural development.

The participating States reaffirm the universal significance of respect for and effective exercise of equal rights and self-determination of peoples for the development of friendly relations among themselves as among all States; they also recall the importance of the elimination of any form of violation of this principle.

Of course, the Soviets did not allow any of the captive nations that have been incorporated directly into the U.S.S.R. to be "participating states" at Helsinki. The Baltic former Republics, Latvia, Lithuania, and Estonia, were not allowed to send representatives to Helsinki. For purposes of gaining two extra seats in the U.N., the Soviet Union is willing to say that the Ukraine and Byelorussia are nations. But the Ukraine and Byelorussia were not signatories to the Helsinki accords. Nor were any of the other captive nations that have been incorporated into the U.S.S.R. represented at Helsinki, although the Eastern European satellite countries attended.

According to reports, many of the political prisoners in Soviet labor camps are "guilty of bourgeois nationalism." It is because they will not give up their desire for freedom, their sense of national identity, their religion, and cultural heritage that the heroic "bourgeois nationalists" of the captive nations are being sent to the Soviet Gulags.

At present there is working in my office as an intern a fine young American, Erik Niedritis, whose parents fled their native Latvia when the Communists took over their homeland. Eventually making their way to the United States, they have, after much deprivation and hardship, made a life in the New World. Their son is justly proud of the courage of his parents, and he treasures his Latvian heritage. In this country he can study Latvian history and culture, and freely adhere to the religion of his fathers. In Latvia, similar values and enthusiasms might land him in a labor camp as a "bourgeois nationalist." America is the richer for having freedom-loving peoples from the captive nations in our midst. And today we salute those "bourgeois nationalists" in the captive nations who are continuing the struggle for freedom in the face of continuing oppression.

GENERAL LEAVE

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order on Captive Nations Week.

The SPEAKER pro tempore (Mr. GONZALEZ). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

HELSINKI'S UNFULFILLED PROMISE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LENT) is recognized for 5 minutes.

Mr. LENT. Mr. Speaker, I am pleased to participate today in the project initiated by my colleague from Massachusetts (Mr. DRINAN), to call attention to the indifference of the Soviet Government to the basic human rights of its Jewish population. This activity is especially important at this time, because of the Belgrade Conference now in progress to review the Helsinki Final Act.

In 1974, I was asked by the Long Island committee for Soviet Jews to work on behalf of a Soviet Jewish prisoner of conscience, Hillel Butman. For the past 3 years, I have been writing on a weekly basis to Hillel; to his wife, Eva, who resides in Israel with their two children; and to various Soviet authorities to urge that Hillel Butman be allowed to join his family in Israel.

The circumstances of Hillel Butman's case are especially tragic, and indicate how brutal the Soviet Government can be in its efforts to stifle the free will of its citizens.

On June 15, 1970, Hillel Butman was arrested while on holiday with his 4-year-old daughter and charged with taking part in the preparation of a plan to flee to Israel illegally by plane with a group of people. In all of these plans there was no actual violation of the law, and, although substantial evidence was presented at Hillel's trial to indicate that he was not an active participant in the plan and actually worked against it, he was convicted in 1971 and sentenced to 10 years in prison. His years in prison so far have been marked by poor health and poor treatment, yet an indomitable desire to survive his captivity. He has survived a year of imprisonment in the most notorious of all Soviet prisons, Vladimir, and several experiences in solitary confinement. Because of his unbreakable spirit, he continually risks a return to Vladimir.

In reality, Hillel Butman's crime was nothing more than a desire to live freely in a place of his choice—Israel. Since 1966, he had been active in a Zionist organization in Leningrad which had the sole aim of fighting against the assimilation of Jews and for the right of emigration to Israel for those Jews who, of their own free will, were interested in this idea.

Unless we continue to express concern for the plight of Hillel Butman and others in similar situations, their cause will be lost. I continue to hope that the Soviet Government, in the name of humanity, will begin to comply with the international agreements to which it is a party, and particularly the Helsinki accords.

TRIBUTE TO SCOTT BEAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. RAILSBACK) is recognized for 5 minutes.

Mr. RAILSBACK. Mr. Speaker, too many times we hear of the increase in juvenile crime and the lack of effect most of the programs have on this situation. Today, I would like to commend a youth who has shown that in some cases just the opposite is true. Scott Bear, 16, is on probation in my district in Illinois and is employed through the CETA program with the Rock Island Forest Preserve. Scott and another employee, Bernard Rossi, were involved in moving pipes when the pipes came in contact with 7,600 volts of electricity. Scott was thrown free of the pipes but Mr. Rossi was unable to free himself. Scott, at a great risk to his own life, pulled Mr. Rossi from the electrically charged pipes. Mr. Rossi has been in the hospital over 3 weeks but he is alive and according to the electric company less than 3 percent survive this ordeal. Scott suffered burns from the rescue. I would like to commend Scott and pay tribute to him for his brave actions.

A TRIBUTE TO ALICE PAUL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 20 minutes.

Mrs. HECKLER. Mr. Speaker, this morning the Washington Cathedral held a memorial service for Dr. Alice Paul, founder of the National Woman's Party and author of the equal rights amendment. Dr. Paul died on July 9 at the age of 92 having devoted her life to the women's rights movement. It is an honor to have this opportunity to salute this outstanding woman and to share the highlights of her lifelong dedication to the cause of women's equality.

A biographical sketch follows:

BIOGRAPHICAL SKETCH—ALICE PAUL

(By Elizabeth Chittick)

Alice Paul, best known as the founder of the National Woman's Party and author of the Equal Rights Amendment, devoted her entire life to the fight for equal rights for women.

She was born in Moorestown, New Jersey on January 11, 1885, daughter of Quaker parents, William Mickle and Tacy (Parry) Paul. Pursuing extensive education in both social work and law, by 1928 Alice Paul had earned her B.A. (1905 Swarthmore College), M.A. (1907 University of Pennsylvania), Ph.D. (1912 University of Pennsylvania), LL.B.

(1922 Washington College of Law), LL.M. and D.C.L. (1927–8 American University).

In 1907, after two years as a resident social worker in the New York College Settlement, Alice Paul went to England to study and work at the Woodbrooke Settlement for Social Work in Birmingham. It was during her stay in England that she met Emmeline and Christabel Pankhurst and began her life long advocacy for women's rights. Her connection with the suffrage campaigns led to her imprisonment twice in England and once in Scotland.

Following these experiences, she came to Washington, D.C., in 1912, bringing new life to the ebbing suffrage movement in the United States. The National American Woman Suffrage Association (NAWSA) was at an all time low. Alice Paul asked the NAWSA for authority to set up headquarters in Washington and with their permission did so. She immediately felt the need for some sanction stronger than a local committee. Therefore, she formed the Congressional Union for Woman Suffrage, the sole purpose of which was to work toward a suffrage amendment to the United States Constitution. A rift grew between the parent body (NAWSA) and the new organization stemming from the Congressional Union's decision under Alice Paul's direction, to hold the "party in power" responsible for passage of the national amendment while NAWSA chose to continue working through the states. Subsequently, the Congressional Union for Woman Suffrage became the National Woman's Party with Alice Paul serving as its national chairman until the conclusion of the suffrage campaign in 1921.

Alice Paul was an activist with a flair for the dramatic, organizing parades and demonstrations with banners and costumes. In 1913 a parade of some 5,000 women marched down Pennsylvania Avenue to the White House the night before President Wilson's inauguration. Alice Paul and several of her followers were jailed for their suffrage activities in 1917. While in jail, Alice Paul went on a hunger strike that lasted for over three weeks. As a result she was force-fed. Such severe treatment of the imprisoned women drew angry public response and national recognition of the suffrage issue. More hunger strikes followed and unceasing political pressure was brought to bear just before the 1920 election. Finally, in 1920 the 19th Amendment to the U.S. Constitution, the Susan B. Anthony Amendment guaranteeing equal suffrage, was passed and U.S. women had the right to vote.

In 1923, after winning the struggle for the right to vote and knowing that the struggle for equality was not yet over, the National Woman's Party held a commemoration of the 1948 Seneca Falls Equal Rights Convention. At this anniversary meeting the National Woman's Party passed a resolution to further the rights for women first demanded by Elizabeth Cady Stanton and Lucretia Mott 75 years earlier. The resolution of the National Woman's Party to work for the passage of the Equal Rights Amendment written by Alice Paul resulted in the introduction into Congress in 1923 of the first Equal Rights Amendment to the United States Constitution ever proposed for women. Alice Paul called this Lucretia Mott Amendment. The original version read: "Men and women shall have equal rights throughout the United States and in every place subject to its jurisdiction."

There was much opposition to the Equal Rights Amendment, not only from expected sources, but also from other women's organizations who felt satisfied with the victory that had been won granting the right to vote. These organizations were concerned that the Equal Rights Amendment would render invalid all of the protective state laws governing the rights of women, especially those regarding women's labor.

Alice Paul, who was ahead of her time in perceiving that most "protective legislation only furthered discrimination, worked relentlessly for the passage of the Equal Rights Amendment. Under her leadership, the valiant and courageous women of the National Woman's Party succeeded in getting this Amendment introduced in every Congress for the next 49 years, until its final passage in 1972. Over the years it was the National Woman's Party, led by Alice Paul, who diligently kept the fires burning for the Equal Rights Amendment, educating other organizations, publishing bulletins and maintaining an instant information bureau where anyone interested in the ERA could obtain the exact status of its progress and sponsors day or night.

To date thirty-five states have ratified the Equal Rights Amendment and only three more are required to make it the Twenty-seventh Amendment to the United States Constitution. Passage seems imminent. This Amendment will guarantee the legal rights of women in every respect. The women of the United States should certainly feel indebted to Alice Paul for her foresight and dedication to the cause of women and their rights.

Alice Paul's commitment to equal rights for women was not confined to the United States. In the 1930's she worked with women from many countries in bringing the concerns and status of women to the attention of the League of Nations. In 1938 Alice Paul founded the World Woman's Party for equal rights, which later sent delegates to the convention which drafted the United Nations Charter. These women successfully pressured for affirmation of the principle of equal rights between women and men in the preamble of the Charter and for an equal rights pledge in the United Nations Charter.

In 1928, a delegation from the National Woman's Party presented an Equal Rights Treaty written by Alice Paul to the Conference of American Republics at Havana. At the persistence of the National Woman's Party, the conference resolved to create the Inter-American Commission of Women to work to raise the position of women in the twenty-one American Republics. Throughout 1928 and 1929 Alice Paul worked to establish the Inter-American Commission of Women as an integral part of the Pan American Union (now known as the Organization of American States). The Inter-American Commission of Women is now an international organization of women representatives from South America, North America, and Caribbean countries, to which the United States has appointed a women delegate under our United States Ambassador to Latin-American countries.

Alice Paul, with single minded dedication to equal rights for women, organized women both nationally and internationally. The full impact of her lifelong efforts to secure equal rights for women in the United States Constitution, in the United Nations Charter, and throughout the world has yet to be felt.

EAST TIMOR HEARINGS— JULY 19, 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. BURKE) is recognized for 10 minutes.

Mr. BURKE of Florida. Mr. Speaker, I have asked to address the House today on a subject of concern to me because it has involved this body in the machinations of foreign, even hostile interests with regard to an important American ally in Asia. I refer Mr. Speaker to the events of the past several months in a remote corner of the Republic of Indonesia—East Timor, formerly Portuguese Timor. As this last outpost of Portugal's colonial empire finally slipped from Lisbon's weakening grasp, a local struggle erupted in which inevitably the Government of Indonesia had to involve itself. However, by the time matters were put to rights by the Indonesians and their supporters in East Timor the situation has become a catspaw of Communist conspiracy, designed to embarrass and weaken the Government of Indonesia, erode the necessary and peaceful ties between Indonesia and Australia, and finally, to embarrass the current conservative government in Australia. In this last effort, Mr. Speaker, this House of Representatives has been involved.

We have assisted, directly at the behest of the Australian opposition, in elevating the relatively insignificant question of East Timor to an attention it does not altogether deserve. To prove my point, Mr. Speaker, let me explain, briefly, a little history.

The East Timor question began, appropriately enough, with the leftist coup in Portugal in April 1974. Thereafter virulent Marxism, which had been spreading like a low-grade infection through the Portuguese military, expanded rapidly into the Portuguese garrisons in Mozambique, Angola, and Timor. Between April 1974, and December 1975, the Portuguese in effect abandoned East Timor to the armed factions which were emerging among the various village and tribal units. One of the local groups had been adopted by the Marxists in the Portuguese garrison, and under that influence became Marxist. This group, the Fretilin, or Frente Revolucionaria de Timor Leste Independente, enjoyed support of the Portuguese garrison to the extent that when the garrison withdrew it opened its arsenal to them. Armed with these weapons the Fretilin decimated its opponents, raising the prospect of a Marxist state in Timor. Indeed, the Fretilin called the government which they later proclaimed the "Democratic Republic of East Timor."

After considerable fratricidal conflict, during which many tribal and familial feuds were pursued in the name of political struggle, and unknown numbers of Timorese died, the Indonesian Government acted to gain control. On December 7, 1975, Indonesian—and, Jakarta claims, indigenous Timorese—elements invested the capital, Dili, and other coastal towns. In the course of the civil war and the Indonesian action, there were no doubt many casualties. This fact made the matter of Timor a political issue in Australia, and as such fit for exploitation in the press. I quote from a letter from an Australian, Mr. Anthony Staunton of Brunswick, Victoria, Australia:

War is an atrocity and atrocities always occur in war. One of the games played by certain groups is large-scale atrocity stories.

On 1 September 1976 a minor pro-Soviet paper the Socialist reported that 60,000 people had been murdered by Indonesia in East Timor. The story was picked up by the Melbourne daily, The Age, on 19 November 1976. The Age said it had a highly confidential report handed to the Australian Government. The Communist Tribune on 1 December 1976 reported that the document was sent to Australian Foreign Minister Peacock "two weeks

ago" by the church organization which received it and was leaked to The Age. It would seem that the story was planted. The Age repeated the story and anonymous source on 8 December 1976 and The Sun, the major daily in Melbourne, upped the figure to 100,000 on 1 January 1977.

In March of 1977 a group of Australian opposition members of Parliament wrote the chairman of the House Subcommittee on International Organizations, Mr. DONALD FRASER, asking him to hold hearings on human rights in East Timor. The hearings were held the same week, indeed, the same day, as the visit of Australian Foreign Minister Peacock to Washington. Among the witnesses was an Australian Government employee, Mr. James Dunn, a self-appointed publicist for the benighted Timorese, who had permitted himself to be quoted that 100,000 Timorese had died at Indonesian hands.

Over the past several months the opposition party in Australia has made at least two efforts to obtain votes of no confidence against Prime Minister Fraser on the Timor issue. Many interested parties, Mr. Speaker, have sought and still seek to make political and idealogical capital of the unfortunate situation which prevailed for a time in East Timor. There was even a case where Leftist Australians posing as representatives of an Australian philanthropic organization actually assisted the Fretilin to obtain weapons during the civil strife, which the Timorese have not forgotten. The Leftist Fretilin still obtain aid from Communist sources and Leftist sympathizers. How else could a handful of guerrillas maintain an information office in high-priced New York, and send their representatives around the world in search of sympathy and assistance?

Mr. Speaker, all this to me is clearly the result of an operation and I for one am not happy that by having hearings and suggesting the legitimacy of an independent East Timor, the remnants of the Fretilin forces are encouraged to continue killing other Timorese and Indonesians.

In addition, Mr. Speaker, I am also disturbed that this last hearing on the international status of East Timor clearly infringes the jurisdiction of the Subcommittee on Asian and Pacific Affairs. This issue is a case of the wrong hearing by the wrong subcommittee on the wrong subject. There is no right time for such a hearing.

In short, Mr. Speaker, the Congress has been manipulated to further the cause of groups whose purposes are sharply inimical to the interests of the United States. I regret that this has occurred.

Thank you Mr. Speaker.

ANNOUNCEMENT OF HEARINGS ON THE FEDERAL ROLE IN CRIMINAL JUSTICE AND CRIME RESEARCH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. SCHEUER) is recognized for 5 minutes.

Mr. SCHEUER. Mr. Speaker, in continuation of the joint hearings on the Federal role in criminal justice and crime research held by the Subcommittee on Domestic and International Scientific Planning, Analysis, and Cooperation—DISPAC—of the Committee on Science and Technology, and the Subcommittee on Crime of the Committee on the Judiciary, chaired by our distinguished colleague JOHN CONYERS of Michigan, the DISPAC Subcommittee will hold a final hearing on Thursday, July 21 1977 in room 2237 Rayburn House Office Building at 9 a.m. Witnesses appearing will be Martin Danziger former director of the National Institute of Law Enforcement; Peter J. Flaherty, Deputy Attorney General of the United States; James Gregg, Acting Administrator of the Law Enforcement Assistance Administration; Blair Ewing, Acting Director of the National Institute of Law Enforcement and Criminal Justice; and Paul Negelski, Assistant Attorney General of the United States. Those wishing additional information should contact the subcommittee offices in room 3253 House Office Building annex No. 2, phone 53479.

APPOINTING A SPECIAL PROSECUTOR IS NOT THE ANSWER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. CAVANAUGH) is recognized for 5 minutes.

Mr. CAVANAUGH. Mr. Speaker, within the last week the calls for the appointment of a Special Prosecutor to investigate the potential criminal violations arising out of South Korean influence buying in the Congress have intensified. Recently, two of my colleagues asked me to be a signatory on a letter to the President urging him to direct the Attorney General to make such an appointment. While I do want to see a thorough investigation and have written to both Mr. Bell and Chairman FLYNT imploring them to proceed with their respective probes vigorously, I do have serious reservations about appointing a Special Prosecutor.

In a letter to the drafters of the letter to the President I describe in detail my objections to the appointment of a Special Prosecutor. I would at this time like to include in the RECORD a copy of the letter that was sent to the President along with my letter to its initiators. I would also like to include in the RECORD the text of an editorial on the subject which appeared in today's New York Times.

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 20, 1977.

DEAR MR. PRESIDENT: It troubled us greatly to read recent news accounts that the special counsel for the House ethics committee criticized the pace of the committee's investigation of alleged South Korean influence-buying in Congress.

It was precisely our concern that this very thing might happen that led 51 members of Congress to sign a letter sent last April to Chairman John J. Flynt urging the investigation be accelerated and the committee issue status reports periodically to keep the Congress abreast of its activities.

Chairman Flynt replied that such would be the case. If recent news account are accurate, though, the foot-dragging many of us feared earlier this year seems to be occurring.

Similarly, in February, 34 members of Congress signed a letter to Attorney General Griffin Bell expressing some concern about the pace of the Justice Department investigation into the Korean affair. Again, assurances were given, but still that investigation headed up by Assistant Attorney General Benjamin R. Civiletti is being severely criticized by some Republicans in Congress and some news columnists.

Monitoring the developments and pace of these inquiries, we have come to the conclusion that perhaps this investigation is too sensitive to be carried out by the existing investigatory apparatus of the Congress and the Executive.

How can the American people have confidence in this inquiry when one day there are news accounts of the involvement of more than 115 present and past members of Congress in this scandal, and the next day the front page tells us the special counsel has gone to Europe on vacation and is frustrated with the committee and the pace of the inquiry?

We think it is time we had a special prosecutor look into this matter and we ask you, Mr. President, to direct the Attorney General to appoint one immediately.

In today's political atmosphere there is an urgent need that this investigation, because of the scope of possible involvement by so many elected officials, proceed openly to a just and fair conclusion. We now believe a special prosecutor can better achieve this goal rather than the current approach. We hope you and Judge Bell agree.

Sincerely,

_____ _____.

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 13, 1977.

Hon. PETER KOSTMAYER,
Longworth House Office Building.
Hon. RICHARD GEPHARDT,
Cannon House Office Building.

DEAR PETER AND DICK: Your letter of July 12, 1977, expressing your concern for the pace and credibility of the investigations of the House Committee on Standards of Official Conduct Conduct and the U.S. Department of Justice into the matter of the corruption of Members of the U.S. House of Representatives by agents of the government of South Korea is of great concern to me.

I commend you for your very sincere and vigorous pursuit of an expeditious and just resolution of this most erosive scandal. Clearly the most expeditious, exhaustive and comprehensive conclusion of this matter is essential to the honorable conduct of the Congress as well as to restoring the faith of the American people in their institutions of government. Since becoming a Member of the House of Representatives in January, I have actively sought to have the investigation of this matter by both the House Ethics Committee and the U.S. Department of Justice proceed with all possible speed. I have on many occasions joined with you and other of our colleagues in efforts to urge Chairman Flynt and the Attorney General to accelerate the pace and conclusion of the investigation. I am dismayed and disheartened as you are by the lack of diligence demonstrated by the House Ethics Committee to date. I am similarly distressed by the apparent inability of the Attorney General to bring his criminal investigation to a speedy and conclusive conclusion.

However, I cannot agree the solution to these two very real and distressing problems lies in the appointment of a Special Prosecutor by the President.

Two fundamental principles dictate against moving the investigative responsibility in this case from the Department of Justice and the Congress and placing it in the hands of a separate Special Prosecutor. The first principle which I feel would be violated by the appointment of a Special Prosecutor in this instance would be the abrogation of the fundamental responsibility of the Executive Branch through the Department of Justice for the enforcement of criminal laws without an appropriate institutional, political or circumstantial justification. It seems to me that this is a quite different case in circumstance and substance from the one we have recently witnessed in the Watergate scandals. There is a clear institutional weakness in our system when on those rare occasions allegations of criminal acts against the Chief Executive require investigation and enforcement of the laws by the direct institutional subordinate as well as a political ally and dependent. The case is clearly different when the Department of Justice is required to investigate and enforce the laws in regard to possible wrongdoings by Members of Congress. There is neither a structural or institutional subservience by the Attorney General to the Congress nor is there the practical political dependency of the Attorney General upon the Congress. In the instant case, the Attorney General is as free and independent to carry on his law enforcement responsibilities as would any Special Prosecutor.

While the Attorney General has not been successful in bringing his investigation to a swift and conclusive result as both you and I would wish I am not aware of any circumstances from which we could infer that he is either incapable or unwilling to fully, fairly, and thoroughly discharge his obligations of investigation and prosecution of this matter. In the absence of either an inherent structural or institutional impediment as arises in the case of impropriety on the part of the Chief Executive or some other extraneous circumstances which would render or appear to render the Attorney General incapable or indisposed to fully and fairly perform his law enforcement responsibilities I feel we run a clear risk of doing permanent damage to our institutions of justice by removing from them the obligation to exercise their proper responsibilities without just and significant cause.

The second significant principle which I believe would be jeopardized or obscured by the appointment of a Special Prosecutor in this case would be the responsibility of the House to investigate and discipline its members for violations of their constitutional obligations or transgressions against the standards of congressional ethics, regardless of any criminal determination or implication of their acts. While it is not my understanding that you would absolve the House of this responsibility through the appointment of a Special Prosecutor it seems to me that we would run the risk of that becoming the practical effect. As I understand your basic argument in favor of the appointment of a Special Prosecutor is that this is the only instrumentality in which the American people can at this point derive faith and confidence that the proper ends of justice would be pursued and met in the Korean matter.

I believe that this proposition leaves only the conclusion that the House is not willing or capable of dealing appropriately with the wrongful conduct of its members in their association with agents of foreign countries and tends to obscure rather than accentuate the focus of the public upon the obligation of the House of Representatives to demand and enforce the highest standards on its Members. While I am distressed at the pace and nature of the current inquiry being conducted by the House Ethics Committee, I feel it is premature to confess to the American people that their greatest legislative body is unwilling and unable to enforce the highest standards of ethics and constitutional responsibility upon its Members. It seems to me that if we are, indeed, at this point of confession and conclusion the future of this democracy will be gloomy and short.

It is imperative to the future health of this country that we not only reveal all of the relevant facts, and deal justly with the transgressions of the Constitution and Code of Ethics, among the Members of the House of Representatives, but that we do so in a manner and through a method which will for all time strengthen rather than weaken the institution. It is, therefore, essential that the Members of the House direct their energies and abilities in a concerted effort to assure that the House Committee on Standards of Official Conduct make a complete and accurate report to the full House.

I must, therefore, decline your invitation to join with you in urging the President to appoint a Special Prosecutor in this case. I will, however, join with you in redoubling my efforts of putting pressure upon both the House Committee on Ethics as well as the Attorney General to improve and increase their efforts in this investigation.

JOHN J. CAVANAUGH,
Member of Congress.

[From the New York Times, July 20, 1977]

NO SPECIAL PROSECUTOR THIS TIME

In the late 1960's, South Korea devised a perpetual motion machine. It was started with food aid and other assistance to Korea voted by the United States Congress. The Koreans would deal only with American rice merchants who agreed to pay commissions to a chosen agent. The agent, in turn, would use the funds, energetically, to ingratiate himself with members of Congress. And they, in turn, would vote to continue sending assistance to Korea.

For months now, the question of how—and with whom—the agent ingratiated himself over the years has cast a shadow on Capitol Hill. Which Congressmen accepted, unwisely but not unlawfully, entertainment, travel or gifts? Which accepted campaign contributions of questionable propriety? Which accepted payments that were unquestionably illegal bribes? But for the moment, at least, the question of what is the truth has been superseded by the secondary question of how to seek it.

Partison doubts about the investigation undertaken by the House Ethics Committee have been intensified by the resignation of the committee's special counsel, Philip Lacovara, who earned high regard as a member of the Watergate special prosecutor's staff. Many think it has damaged the committee's credibility beyond repair; they now clamor, a la Watergate, for the appointment of another special prosecutor, or of a special House investigating committee. Both proposals are hasty and unwise.

To appoint a special prosecutor is to prescribe strong medicine for the wrong disease. Some of the offenses evidently involved in the Korean affairs will, indeed, require prosecution. Prosecution is not, in any case, a job for Congress but for the Justice Department. A special prosecutor might be in order were there a showing of limpness at Justice, as there was during Watergate. But there has been no such showing about the Justice investigation, run by another former member of the Watergate special prosecuting team. Until and unless there is, the Administration is right to say no.

Meanwhile, there remains a valid, necessary investigative job for Congress. Prosecutors can deal only with the illegal. It is up to the House to deal with the questionable and the unwise—to enforce and inspect its own rules of ethical behavior. The logical place for that is in its Ethics Committee. The damage done there this week is real, but it seems reparable.

The chairman, John Flynt of Georgia, seems to have regarded Mr. Lacovara's behavior as unacceptably impudent for a committee employee. That reflects a serious misunderstanding. Mr. Lacovara was not just an employee. The committee was not just buying his work. It was buying his credibility, his independent judgment, his Watergate reputation for integrity. To attract a successor of equivalent stature, Chairman Flynt will now have to guarantee at least as much independence as he failed to grant Mr. Lacovara. If he does—and that now appears likely—it should substantially reassure the skeptics. And then the notion of starting all over again with a new, special investigating committee would turn sour: What was intended as a demonstration of Congressional virtue would end up looking like just another stall.

WOMEN'S EQUALITY DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. HOLTZMAN) is recognized for 30 minutes.

Ms. HOLTZMAN. Mr. Speaker, on August 26, 1920, the 19th amendment to the U.S. Constitution was ratified. On that historic day, the women of America were granted the right to vote.

I have introduced a resolution calling on the President of the United States to issue a proclamation commemorating August 26, 1977 as Women's Equality Day in commemoration of the granting of suffrage to women.

The ratification of the 19th amendment was an important step in the realization of our country's promise of human dignity and equality for all people. It is important to pay tribute to those women who struggled long and hard for the right to vote and to rededicate ourselves to the objective of full equality under the law.

I urge the speedy passage of this resolution.

The text follows:

H.J. RES. 550

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That August 26, 1977, is designated as "Women's Equality Day", and the President is authorized and requested to issue a proclamation in commemoration of that day in 1920 on which the women of America were first guaranteed the right to vote.

BUSINESS BELIEVES IN JUSTICE FOR ITSELF BUT NOT FOR CONSUMERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ECKHARDT) is recognized for 5 minutes.

Mr. ECKHARDT. Mr. Speaker, I would like to continue today discussing the kind of flip-flopping big business is engaging in to defeat the consumer action provision of H.R. 3816. In the past few days I have discussed how lobbyists for Sears, Penney's, NAM, and the Business Roundtable take one position when they are talking about H.R. 3816 and then take a totally different stand when they are discussing other legislation.

The group I would like to discuss today, the Chamber of Commerce, surpasses even these other groups in rhetorical gymnastics. The chamber does not even bother to switch legislation before it flip-flops from one position to another.

In a letter sent to Members earlier this month, the chamber urged opposition to the consumer action provision of H.R. 3816. This section gives consumers cheated by violations of FTC rules and orders the right to go into court, either individually or as a class, to get their money back. The chamber, of course, finds such a prospect unthinkable.

However, in discussing a later section of the bill, the chamber in the same letter claims that—

A day in court is something more than a technical privilege; it is a guaranteed practical right.

I happen to agree with the chamber's statement. I only wish the chamber did. If they did, they would not be working so hard to defeat the consumer action provision of H.R. 3816, for section 7 gives consumers a day in court, no more no less.

Throughout my legislative career, I have consistently worked to see that persons with grievances have an opportunity to redress those grievances. Unlike the chamber, I happen to believe that this right belongs to everyone. I do not think that such a right is the exclusive province of the business community.

There is nothing in H.R. 3816 which denies businesses a fair day in court. Unfortunately, under present law consumers are denied any day in court. This obviously does not bother the chamber. It does bother me, and I think it should bother every fair-minded person in the House of Representatives.

THE IMPACT AND OPPORTUNITIES OF THE PRESIDENT'S ENERGY PROPOSALS FOR BLACK AMERICANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. DIGGS) is recognized for 10 minutes.

Mr. DIGGS. Mr. Speaker, recently, at a conference held in Denver, Colo., on energy needs today and in the future, a thought-provoking and insightful analysis was given of the impact of the President's energy proposals on black Americans. This speech, given by Hobart Taylor, Jr., director of the Standard Oil Co. of Ohio, deals with the problem of energy use and planning, critiques our present system of dealing with energy problems, and goes on to suggest the most effective and innovative ways of coping with the problem in the future.

Mr. Speaker, I would like to share with my colleagues Mr. Taylor's remarks, and include them herein for that purpose:

THE IMPACT AND OPPORTUNITIES OF THE PRESIDENT'S ENERGY PROPOSALS FOR BLACK AMERICANS

(Address by Hobart Taylor, Jr.)

Before getting into my specific comments on President Carter's energy proposals, I'd like to take this opportunity to applaud Congressperson Patricia Schroeder, State Senator Regis Groff, Clarke Watson—and the other sponsors of this energy conference. I sincerely hope the rest of the country takes proper note of what you are doing here in Denver to acquaint all of us with the real issues surrounding our energy problem in the United States.

I am particularly pleased to be a participant—not so much because of my activity with The Standard Oil Company (Ohio)—although I view my involvement and association with Sohio with personal pride. No, I'm happy to be here today because of a deep personal concern for what's happening in Washington—and how governmental action affects the very lives of all Americans—including minorities—in Colorado—and in every other state of this nation . . . positively—or negatively.

Ladies and Gentlemen:

We desperately need an energy policy in this country that works!

You've heard a lot of people say that we need an energy policy in this country—giving the implication that we have not had an energy policy until President Carter's proposals a couple of months ago. I don't agree with that We have had an energy policy in this country. It's been an energy policy of high consumption and declining energy reserves.

I don't think it's been written any place—in just those words. But it's existed!

It's an energy policy that has been piecemeal—in many instances—in the indirect result of laws and regulations passed—with good intentions—in other subject areas—and in some cases, because of our failure to pass laws.

In a recent analysis, Sohio found over 100 different Federal laws and regulations which have a "fall-out" effect on energy policy—but which were usually not thought out from an energy standpoint when they were put on the books. In other words Ladies and Gentlemen, our national energy policy for at least 25 years has been, in large part, the result of sporadic decisions on a number of other issues.

The hodge-podge won't work!

What we need now is a national energy policy that will work! We need an energy policy that will cause new supplies to come to market. We need an energy policy that will keep our economy growing so that there will be jobs for all Americans—including Black Americans and other minorities, if we really mean to do something about economic impoverishment. We need an energy policy in this country that will provide for the human needs of all its citizens.

Our United States economy is energy-intensive! It has to be—it is run on machines, and not by animal energy. We can debate at length whether that is good or bad—but it's a fact—and it's not likely to change much and it is the trend in the rest of the world. Business and industry—which employ most of our working population—will continue to be dependent on all kinds of energy to maintain and expand their operations, to meet the needs of the consumer, and to continue and improve our standard of living.

Much has been said about the U.S. consuming the lion's share of world energy. And wasteful though we are, we may not be as bad in this as a first impression might suggest.

While the U.S., with 5 percent of the world's population, does account for 32 percent of the worldwide energy consumption—it also accounts for 31 percent of the world's gross national product. That's nearly one third of the world's total goods. There is, of course, still a need for conservation and for the use of the cleanest possible energy.

Our dependence on energy underlies our very complex society, and—according to government data—there is a very close correlation between our gross national product . . . energy consumption . . . and jobs.

Because of our dependence on energy, and the growth in energy consumption, we no longer produce all the energy we need. The amount we import from other countries gets larger each year. In January and February 1977, the United States imported 9-million barrels of oil per day, half of our domestic consumption. By 1985, that figure could grow to 16-million barrels per day, according to government estimates. Leaving aside the question of how we could pay for all that oil at ever increasing prices, it is clear that there are physical limits to the world supply of this non-renewable resource.

So all Americans should be grateful to President Carter for making us painfully aware of the overall problem. Now let's take a look at some of his specific energy proposals and the impact of his national energy plan.

The President's plan, although complex, is aimed at three objectives—to reduce dependence on foreign oil and the risk of supply interruptions, to reduce the U.S. consumption of oil through a series of conservation measures and, finally, to develop renewable, clean and virtually inexhaustible sources of energy in the long term.

In the short term, the hub of his plan is conservation. Conservation of energy and our natural resources is important—and was badly needed to be emphasized for his program to be a complete—a total energy plan. But conservation, important as it is, is not the total answer to our dilemma—even in short term.

For—important as it is—conservation is not an energy source!

Conservation can help buy us some time . . . time which may be critical. But today, tomorrow, and next year, we need to develop new energy sources, and because most of our equipment is designed to use oil and gas, we especially need to find new oil and gas deposits.

From the standpoint of Sohio, the principal problem with the President's energy proposal—as it now stands—is its implicit assumption that there are no major oil and gas resources still to be found to help solve the problem.

However, a review of Federal forecasts during the last 70 years, reveals that some government agencies on occasion may not have had adequate information . . . or were much too conservative in translating the raw data into fact. For instance, in 1908, officials of the U.S. Geological Survey declared that our "maximum future supply of petroleum is 22.5 billion barrels." The fact is that more than 110 billion barrels have been produced.

In 1939, the Interior Department predicted only 13 years' of U.S. oil supplies; and similar shortages were predicted in 1947 and again in 1949—and in 1977.

Not everyone accepts the idea that we have found all of the oil and gas there is to be found. An analysis of several current studies shows that there is at least another 130 billion—that's right, billion—barrels of undiscovered oil in the United States. That's about 14 times the size of the discovery at Alaska's Prudhoe Bay.

The same case can be made for natural gas. The studies estimate that about 700 trillion cubic feet of natural gas are yet to be discovered in the United States—in addition to the 240 trillion cubic feet of proven reserves.

These undiscovered oil and gas reserves amount to about 60 times the total United States oil and gas production during 1975.

Any national energy plan for this country must have as its central theme the development of adequate oil and gas which account for about 75 percent of our nation's energy requirements and which will continue to be the major source of our energy for the remainder of this century. The Federal Energy Administration estimates that oil and gas will have to supply about 60 percent of our energy needs through 1985.

And so I hope that the plan will provide enough incentives to strongly stimulate this development of our own natural resources. In its present form, I'm not sure that it will. It's a good start, but there is still more to be done.

The national energy plan as it is presently drawn, will work to put a supporting floor under the price of foreign oil. It will do so by imposing a new tax on domestic crude oil that will adjust the market price of that oil here in the United States upward to the present level of foreign oil. My concerns are that the tax provision of the national energy plan will not stimulate all the development of new oil resources in this country that it should, and that it makes no provision to reduce or eliminate this new tax if increased supplies of oil and other forms of energy would normally result in a competitive reduction in prices. This is to say there is no incentive to reduce the price of oil by offering more profit to the more efficient, imaginative, or inventive producer. The entire thrust of this section of the plan at present is to discourage—through prices—the use of a product essential to industrial production and decent living. It deserves further study for, unless major new supplies are brought to market, all of the oil that we use will likely be the subject of round after round of increases in prices.

Even though oil and gas will provide the major portion of our energy supplies for the foreseeable future, the development of our coal reserves should also be an important part of our long-range energy game plan—as President Carter has suggested. There are abundant resources of coal in this country. Certainly the expected growth in this industry provides plenty of opportunities for new jobs and an improved standard of living for all.

However, getting this coal out of the ground and being able to use it in our factories will not be an easy job. The President himself recognizes this problem. He has called for the further development of our coal resources—and he is right to do so. He also has asked for tougher environmental controls on the mining and burning of much of this nation's coal—and, again, he is right to do so. Both are important considerations. In order to move forward on both issues, some middle ground must be reached. The choices are not easy. I suggest to you that where there are tough choices, people needs—jobs and employment—are at least as important as other considerations. And I speak now primarily of the environment. This growing industry must be able to mine coal, transport it to where it can be used, and be allowed to burn it to heat our schools, our factories, and our industrial boilers. And there is no use deceiving ourselves—it is difficult and costly to burn coal cleanly and without any environmental effects.

Please don't misunderstand me. The protection of our environment is very important—and we need to do all that we can to have clear water, clean air, and maintain the natural beauty of our valleys, our plains, and our mountains. And we all share in the dollar cost of protecting and improving the environment.

Since we share in the cost, we need to take a close look at the costs of our environmental programs relative to the benefits received. What I mean is that the money required to get a particular area 98 percent pollution-free may be necessary, worthwhile, and affordable. But that last 2 percent may not be achieved without overtaxing the consumer's ability to pay. Achieving that final 2 percent may just take too much money out of our pocketbooks—money that may be needed for some other necessity. It may defer too long the energy we need—and the jobs that energy development will provide.

There is one other aspect of the President's energy proposal which often gets lost in the discussion. It cuts across all kinds of energy development. If our energy companies are going to be able to find, and develop, and produce new and additional energy sources, they need to be able to have access to those energy deposits. Whether they be coal deposits in some of our western states or oil and gas in our outer continental shelf or the arctic regions of Alaska.

Much of the land and water that contains our energy sources is controlled by our Federal government. In order to have a national energy plan that works, that plan must contain a stepped-up program for leasing these lands to those who are willing to risk the time and money needed to develop additional resources. This needs to be encouraged by all of us.

It will also take large sums of money to find . . . develop . . . and produce the energy we use. Do you know that the cost of finding oil has risen 290 percent in the last ten years? How many people know that if we are to meet President Carter's goal of just maintaining our current level of crude oil production, it will cost at least $180-billion to replace the oil produced during the seven-year period—1978–1985? That's based on 1976 dollars—without considering anything for inflation. If the costs to find oil increase at the same rate they have during the past ten years—then that replacement cost figure will be nearly $400 billion! This figure is especially significant when it's compared with the $14.4 billion spent in 1976—by our entire industry.

I hope that these figures demonstrate the magnitude of the money that's needed for energy investments—money that is assumed to be there, but which won't appear if too many restrictions are placed on those who have to do the work. We need to put them to work—and encourage them to do more. But they can't do it without a fair return on their investment.

Alaskan oil—which is now flowing through the trans-Alaska pipeline—will help to reduce the amount of oil the United States is required to import. But it's expected that the refineries on the West Coast will be unable to handle all of the Alaskan oil, when production is at full capacity. This situation presents some short-term transportation cost problems.

Keeping the oil in the ground is no choice at all, as far as a probable solution.

Approval of a short-term exchange of oil with Japan would reduce the transportation costs of bringing Alaskan oil to market, as opposed to the higher transportation costs involved in shipping any oil to our Gulf Coast markets here in the "lower 48."

It's in the economic interests of the United States to minimize our costs as much as possible, and Sohio has been working for some time on a long-term solution to bring Alaskan oil to markets in the Midwest via a Long Beach-to-Midland, Texas pipeline.

We know that high costs—such as higher costs involved in the transportation of Alaskan oil—have a tendency to be passed on to the consumer over the long haul. Sohio supports any alternative which would reduce costs to the consumer.

What is the impact of what we have been talking about for Black Americans? Here are some of my observations as a director of one major oil company:

First, the energy industry is growing, and considering our country's needs, I think that's healthy. In addition to the continuing major role that oil and gas will play in providing energy for this country—coal, nuclear energy, uranium, oil from shale, and solar energy will all be developed to varying extents in order to satisfy our need for energy. And as each segment grows, I believe there will be plenty of opportunity for Black Americans to be involved at all levels—but probably mostly for those who have some kind of technical background, education, and experience.

At Sohio we've recognized that the greatest employment opportunities are in the areas of engineering. And to help attract Blacks and other minorities to this technical field, Sohio sponsors summer programs and cooperates with industry-sponsored training programs to interest Blacks in engineering careers.

I'm sure that other companies do—or will be doing—the same; and will encourage men and women of all colors to consider these opportunities.

Of course, there are opportunities at all levels. At Sohio 44 percent of the Blacks employed are in sales, 10 percent are officials and managers, and 19 percent are in skilled or semiskilled occupations. Minorities constitute 10 percent of all employees at Sohio. And this figure is growing every day.

It's growing because the energy industry in general and Sohio in particular is involved. The industry is consumer-oriented and that means that every citizen is an important customer. These companies understand that they should and must be socially aware.

This is one aspect of the situation. There is also a negative factor we must understand. I like to think about the positive . . . but we cannot forget the negative aspects.

Blacks are, today, disproportionately employed as hourly industrial workers. This means that they are soldiers on the front lines of an energy crisis. It means that when a company is forced to shut down or to cut down through lack of energy supplies, they are more seriously affected than the general population—and this is not mere speculation. We recall that over a million people were out of work earlier this year due to energy shortages caused by one of the coldest winters on record. We know—from Department of Labor statistics—that there is an approximate 2-to-1 unemployment ratio of Blacks and other minorities to Whites. May 1977 figures show that while only 6.2 percent of the White work force was unemployed; 13 percent of the Black work force was on the unemployment rolls.

If an energy shortage leads to substantial unemployment, minorities tend to lose their jobs at a rate at least double that of the national rate. Likewise. when increased economic activity leads to a substantial growth in the work force, Blacks and other minorities find employment at a rate greater than the national average.

But our basic energy problem is still everybody's problem.

And when we consider the vulnerability of our supply line down the Indian Ocean, around the Cape of Good Hope and all the way across the Atlantic, you can see that we have every right to be concerned for the development of a policy which could lead to energy independence for the United States. And this cannot be done simply through conservation or through policies, which I honestly believe are inadequate to encourage the activity which will insure our national prosperity and viability as we search for new forms of energy.

In conclusion, let me restate what I feel to be the impact and opportunities of President Carter's energy proposals for Black Americans.

A sound energy policy leads to economic growth and increased employment. It is this growth that not only enables people to move up in our society but also enables businesses to furnish real support to those organizations whose purpose is to help blacks and other minorities to take up leadership positions in this country. Groups such as the United Negro Fund, The Urban League and the NAACP are among several that have been supported by Sohio.

It is only in this way these benefits are achieved. The failure to provide for growth condemns the less fortunate to a continuation of their present status.

Shortages of energy will impact the greatest on minorities and on the poor. This is because of the nature of their jobs, their lack of capital and reserves, and the social and economic configuration of our society. Therefore, Black leaders and other interested Americans have a very special need to help work out an effective energy plan which takes into consideration our needs for economic

growth, sufficient energy, and plenty of employment.

Energy is a growing industry and the opportunities to be vitally involved are waiting.

Minorities need to take hold of the opportunities to help make these policies—because they have the most to lose if the wrong decisions regarding an energy plan are made. And the most to gain from a national energy policy that works!

Thank you, very much.

PERSONAL STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Miss JORDAN) is recognized for 5 minutes.

Miss JORDAN. Mr. Speaker, I was unable to be present during the week of July 11 because of illness. Had I been present, I would have cast the following votes:

ROLLCALL NUMBER, DESCRIPTION, HOUSE VOTE, AND JORDAN VOTE

MONDAY, JULY 11, 1977

No. 403; passage of House Joint Resolution 24 to provide for the designation of a week as "National Lupus Week"; 297–3; yes.

No. 404; passage of H.R. 2960, memorial in honor of the signers of the Declaration of Independence; 301–3; yes.

No. 405; House Resolution 642, the rule for consideration of H.R. 5023; 299–0; yes.

TUESDAY, JULY 12, 1977

No. 406; passage of H.R. 7658, veterans housing; 403–0; yes.

No. 407; passage of H.R. 7345, veterans pensions; 403–0; yes.

No. 408; passage of H.R. 5023, to amend the statute of limitations relating to Indian claims; 331–69; yes.

WEDNESDAY, JULY 13, 1977

No. 409; conference report on H.R. 5970, authorizing appropriations for the Department of Defense for fiscal year 1978; 350–40; yes.

No. 410; amendment to H.R. 4963 (Maritime Authorization) that sought to prohibit the use of operating subsidies for the carriage of grain to the Soviet Union; 143–251; no.

No. 411; passage of H.R. 4963, fiscal year 1978 authorization for certain maritime programs; 355–40; yes.

No. 412; House Resolution 638, rule for the consideration of H.R. 2777, National Consumer Cooperative Bank; 339–55; yes.

THURSDAY, JULY 14, 1977

No. 413; motion that the House resolve into Committee of the Whole to consider H.R. 2777; 349–1; yes.

No. 414; substitute amendment to H.R. 2777 establishing a study of consumer cooperatives; 170–228; no.

No. 415; amendment to H.R. 2777 that terminates all authority under the act on December 31, 1982; 203–196; no.

No. 416; passage of H.R. 2777, National Consumer Cooperative Bank Act; 199–198; yes.

No. 417; passage of House Resolution 658, establishing a Permanent Select Committee on Intelligence; 227–171; yes.

No. 418; House Resolution 682, rule for consideration of H.R. 4287, Mine Safety and Health Act; 358–11; yes.

FRIDAY, JULY 15, 1977

No. 419; motion that House resolve into Committee of the Whole to consider H.R. 4287, Mine Safety and Health Act; 298–3; yes.

No. 420; amendment to H.R. 4287 which sought to transfer administrative authority from Secretary of Labor to Secretary of Interior; 112–227; no.

No. 421; substitute amendment to H.R. 4287 to provide separate administration for coal and noncoal mines; 151–188; no.

No. 422; amendment to H.R. 4287 to allow the States to administer Federal regulations and programs; 165–169; no.

No. 423; passage of H.R. 4287, Mine Safety and Health Act; 244–88; yes.

HEARINGS BEFORE THE SUBCOMMITTEE ON CRIME OF THE HOUSE COMMITTEE ON THE JUDICIARY ON THE TASK FORCE REPORT TO RESTRUCTURE THE LAW ENFORCEMENT ASSISTANCE ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

Mr. CONYERS. Mr. Speaker, I am pleased to announce that the Subcommittee on Crime, which I chair, of the House Committee on the Judiciary will hold 2 days of hearings to review the recent report to the Attorney General generated by a study group appointed by the Attorney General, which recommends the restructuring of the Law Enforcement Assistance Administration.

The first day of hearings, August 1, 1977, will begin at 10 a.m. in room 2226 Rayburn House Office Building. The hearings will continue on August 4, 1977, at 1:30 p.m. in room 2237, Rayburn House Office Building. We may complete consideration of the subject at a hearing after the district work period. The witnesses for the 2 days of hearings will be members of the study group, Deputy Attorney General Peter Flaherty, Walter M. Fiederowicz, Blair C. Ewing, Ronald L. Gainer, James M. H. Gregg, Thomas J. Madden, Paul A. Nejelski, and Patricia M. Wald.

Those wishing to testify or submit a statement for the record should address their requests to the Committee on the Judiciary, 2137 Rayburn House Office Building, Washington, D.C. 20515.

UNIVERSAL VOTER REGISTRATION ACT AMENDMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AUCOIN) is recognized for 5 minutes.

Mr. AUCOIN. Mr. Speaker, when the Universal Voter Registration Act, H.R. 5400, comes to the House floor next Tuesday, I intend to offer two essentially technical amendments that I believe will strengthen this legislation by avoiding potential problems and confusion.

The first amendment would delete section 12 which deals with voter lists. The effect of this amendment will be to preserve the status quo, allowing States and units of local government to continue to make voter registration lists available for those purposes permitted under applicable State and local laws. The reason for the amendment is that in its present form, section 12 restricts the use of registration lists for Federal elections to essentially only political purposes. The committee's intent in section 12 was to cut out commercial uses of these lists. But the committee failed to recognize other valid uses of these lists. In my home State of Oregon, lists are available to nonprofit groups such as the League of Women Voters, Red Cross, and the Oregon Historical Society. In the final analysis, States are capable of passing laws that meet their peculiar needs. This intrusion by Federal law is unwarranted and unnecessary.

My second amendment seeks to clarify the definition of "chief election official" by providing a general description of the duties of such an official. This language would replace language that I believe is subject to misinterpretation. The reference to "primary and immediate responsibility with respect to the "registration of qualified voters" could be seen as meaning election officials or boards in home rule counties. Clearly that is not what is intended and all my substitute language does is to remove that potential ambiguity.

MOSCOW'S MAN IN LUSAKA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. ICHORD) is recognized for 5 minutes.

Mr. ICHORD. Mr. Speaker, for months I have attempted to warn the administration of the folly of our African policy with regard to Zimbabwe. Now I find even the Washington Post has taken up the call. A recent Evans and Novak article, titled "Moscow's Man in Lusaka" describes how the Soviet's are orchestrating the guerrilla operations against Zimbabwe from their embassy in Zambia and how Kaunda has changed his position regarding Zimbabwe from one of moderation to one of radicalism to include favoring Cuban intervention in Rhodesia. It also points out how Kaunda shares the Soviet commitment to Nkomo's military force, a force responsible for the day to day killing of black and white Rhodesians.

Last month this Congress appropriated $100 million in a South African special requirements fund—funds destined to go in part to Zambia and ultimately to finance the guerrilla movement which will force an Idi Amin or Marxist form of government on the citizens of Zimbabwe.

I find it incomprehensible that we are so willing to turn the future of the black Rhodesians and all of the critical resources of that country over to a Marxist government dominated by the Soviet Union.

While my warnings have not been heeded by the administration nor the Congress, I feel compelled to insert in the RECORD the Evans and Novak article

and an editorial "Footnote on Rhodesia" for your edification. Hopefully, at some point before it is too late the true folly of our policy will be understood and that policy changed to conform to our true objectives of peace and stability in South Africa.

MOSCOW'S MAN IN LUSAKA

(By Rowland Evans and Robert Novak)

LUSAKA, ZAMBIA.—The fortress-like Soviet embassy here has become the nerve center for guerrilla operations against Rhodesia (Zimbabwe) and South West Africa (Namibia), undermining persistent Western hopes that Zambia's President Kenneth Kaunda would become the peacemaking moderate for southern Africa.

Behind the embassy's high, heavily guarded walls, a short walk from the Zambian foreign ministry, Ambassador Vasily Solodovnikov is intimately involved in training, supplying and even deploying guerrillas. Moreover, old diplomatic hands see him doing his best to scuttle Western efforts for negotiated settlements in Rhodesia and Namibia. For the Kremlin to cash in on its heavy investment, the guerrillas must win; a genuine free election might well install a non-guerrilla government.

The Soviet aim thus conflicts with popular sentiment in Zambia, possibly shared at heart by Kaunda himself, for a quick, negotiated peace in Rhodesia. Nevertheless, Kaunda publicly takes the hard line and may be trapped in positions not in his nation's best interest. Having mounted the Russia bear, Kaunda cannot easily get off.

Solodovnikov has impressive credentials. An expert at the Soviet Africa Institute with intimate links to the KGB, he was architect of the Kremlin's successful strategy for southern Africa. But the pudgy, smiling Russian is no KGB heavy, frightening off diplomatic colleagues. Rather, he assures everybody of his sincere best wishes for the Anglo-American initiative on Rhodesia.

Veteran diplomats don't believe a word of it. Solodovnikov supervised the quick build-up of Joshua Nkomo's new 3,000-man guerrilla army based in Zambia. Having put their money on this new military factor, the last thing the Russians want is a quick settlement.

Indeed, Solodovnikov has made Zambia a hub of military activity. It is a base for guerrilla raids against both Rhodesia and the long sliver of South West Africa called the Caprive strip. Aeroflot passenger planes land regularly at Lusaka, ferrying Nkomo's guerrillas to and from training in Angola.

But in typical Russian style, Solodovnikov is no gracious guest. While using Zambia as a base for military operations elsewhere, he is not beyond attempting a little subversion here. Some 250 Russian technicians, mainly teachers, are suspected by Zambian officials of proselytizing student radicals against Kaunda as an old fuddy-duddy with insufficient revolutionary fervor.

The matter surfaced when the Zambian government accused a Novosti press representative (undoubtedly a KGB man) of subversive activities and told Solodovnikov there would be no publicity if the agent were quietly returned home. The ambassador refused. The Zambian government then kicked out the Novosti man, announcing it in a brief item buried in Lusaka's government-controlled newspapers.

The Novosti incident is seized upon by Western diplomats as proof that Kaunda runs his own house, but it actually reveals Solodovnikov's arrogance and Kaunda's caution. Certainly, Kaunda is no free agent capable of throwing out the Russians in Egyptian-Sudanese fashion. Besides reliance on Soviet arms by the Zambian army (now deployed on the Rhodesian border), Kaunda is constrained by fellow "frontline" states (Mozambique, Angola, Tanzania) more radical than Zambia.

So, Kaunda's posture has hardened. The agent for Angola's anti-Communist Unita guerrillas, backed by Kaunda in the Angolan civil war, has been thrown out of Lusaka. Although Kaunda once condemned Cuban intervention in Angola, he recently suggested Cuban troops might be used in Rhodesia.

Kaunda's switch from moderate to hawkish rhetoric on Rhodesia is attributed by Western apologists to disillusionment over past failures in negotiations. But beyond rhetoric, he single-handedly pushed the African summit meeting in Gabon to a resolution demanding a military solution in Rhodesia. Western diplomats suspect a recent editorial in the Zambia Daily Mail, criticizing a suggested British Commonwealth peace-keeping force for Rhodesia, was written at the presidential palace. Above all, Kaunda is as committed to Nkomo's military force as are the Russians.

Kaunda's militancy does not fit the national mood, which greeted war posters slapped all over Lusaka with ennui. Although depressed copper prices are mainly responsible for Zambia's economic hard times, closing the border with Rhodesia also hurt. Apart from student radicals, Zambians would rather spend money on Lusaka's wretched shanty-town slums than for more Soviet military hardware. Even back-benchers in parliament are privately cool to the war effort.

Kaunda cannot change course to satisfy public opinion. He will ride the Russian bear until Soviet-backed guerrillas take over Rhodesia. Whether he dismounts at that point, nearly surrounded by leftist neighbors, is something Solodovnikov will have much to say about.

FOOTNOTE ON RHODESIA

With apologies for tardiness, we come forward today in protest against the Carter administration's misguided effort to close down the Rhodesian Information Office in Washington. The effort was undertaken to put pressure on the white-minority government of Ian Smith. But it is an affront to the American belief in the free international flow of information and to the whole idea of fairness, and it conveys to the Third World that the United States shares its conviction that information is properly the servant of politics.

The issue arose late in May when the United States joined a Security Council resolution closing the window by which Rhodesia funds its Washington office (and lesser ones in France and Australia). On Capitol Hill and elsewhere, among critics of Ian Smith as well as among his sympathizers, a clamor arose, but the State Department stuck to its guns. Sens. Clifford Case (R-N.J.) and Dick Clark (D-Iowa) then introduced a resolution saying that "any foreign country should be allowed to maintain an information office in the United States." So Mr. Carter, savvy in tactic if not sound in principle, backed off and decided to suspend putting the U.N. resolution into effect.

Important as is the issue of information, there may be more at stake. The United States is trying to make Mr. Smith form a new democratic government with the black majority of Zimababwe. But it maintains contact with him only through occasional vists to Salisbury by the American ambassador to Zambia. Such calculated detachment is appreciated by the other African states, but does it serve the process of diplomatic communication? Just as it is only fair to let the Rhodesian government, and its rivals, offer their views to the American public, so it could be useful to keep the (professionally staffed) Information Office here open and available for diplomatic exchanges.

SEABROOK: NUCLEAR POWER DELAYS CONTINUE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 5 minutes.

Mr. CLEVELAND. Mr. Speaker, more than 4 weeks ago the U.S. Environmental Protection Agency Administrator, Douglas Costle, reversed an earlier decision by his Boston Regional Office which had the effect of stopping construction of the Seabrook Nuclear Power Plant.

Despite the fact that the Nuclear Regulatory Commission had previously granted a construction permit, and had revoked it only because of the Boston EPA Regional Office decision, that permit has not been restored despite the passage of more than a month. This unending series of Washington bureaucratic delays is a perfect example of why this country is in the middle of an energy crisis. It is incredible that these agencies are so insensitive to the needs of American working men and women for jobs; the need of this country for electricity; and the need of our people for electric rates that are not pushed up by constant delays and redtape.

There recently was an editorial in the Nashua, N.H., Telegraph on this subject, which states the subject quite well and I commend it to the attention of the House. The article follows:

SEABROOK AND BUREAUCRACY

Any reasonable person might have thought that the recent decision by Environmental Protection Agency Administrator Douglas Costle would have resulted in a prompt action by the Nuclear Regulatory Commission (NRC) to restore the construction permit for the Seabrook generating station. We should have known better.

The Atomic Safety and Licensing Appeals Board of the NRC will consider the issue of alternate sites before any further action is taken on the Seabrook permit. The NRC's memorandum to its Licensing Board is guaranteed to further delay construction at the badly needed Seabrook facility.

Owing to the fact that the federal bureaucracy has become so complex, Public Service Company of New Hampshire (PSCoNH) filed its motion for resumption of construction with three agencies within NRC. Now NRC officials say that the triple filing will further confuse matters. Apparently, it's reached the point where the bureaucracy itself is admitting that it doesn't know what it's doing—something many of us have suspected for years.

And while the bureaucracy plays with its redtape, the cost of construction at Seabrook continues to mount.

Blessed be they who run in circles, for they shall be known as wheels.

CHINA BEHIND THE GUIDED TOUR

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, many of America's top officials and a goodly number of Members of the Senate and House have been to Communist China since President Nixon broke the ice and initiated efforts to "normalize" relations between the two countries. The reports which are made available to the public

after those trips follow a uniform pattern. The visitors generally are impressed with the progress made in China under the Communist government. Everybody works. There appears to be food and clothing for all. There are no signs of discontent. Regimentation is complete and thoroughly applied from the cradle to the grave.

One of the few indications that the tours are just as regimented as the people of China was brought out by Edward N. Luttwak in the April 1977 issue of Reader's Digest. His commentary is entitled, "China Behind the Guided Tour." It gives a glimpse of what the real Red China may be like, and I am pleased to submit it for reprinting in the CONGRESSIONAL RECORD.

CHINA BEHIND THE GUIDED TOUR

(By Edward N. Luttwak)

It was not until we reached the "Sinkiang Uighur autonomous region" in the far northwest corner of China that the elegant stage management of our journey finally broke down. Given the formal character of our tour, which was led by former Secretary of Defense James R. Schlesinger, it seemed natural enough that every detail would be carefully prepared. Riding each in our own car, with an interpreter and a personal escort assigned in strict order of seniority, we would arrive at village, workshop, army base or hospital to be met by the local dignitaries. First came the briefing, given in a reception room decorated with portraits of Marx, Engels, Stalin and Mao. Then we would walk around to observe "the work in progress."

As simulations of real life, these controlled glimpses were comparable to inspection parades by top army brass; except that, in our case, it was not only the shine on the boots and the gleam of rifle barrels that were suspect, but the boots and barrels themselves—as normal issue items, that is. When shown a computer in Tsinghua University, were we seeing the only computer, or one of many, as our guides insisted? But a single item can be revealing. Processions of uncritical Americans had spoiled our hosts, and they had become careless. In the very hospital that an American reporter had praised with such abandon a few years ago, we were all X-rayed by a machine which was recognized by one of our group as dangerously unshielded; another in our party recognized a primitive analog calculator when shown the university's "computer."

RIGGED SHOW

With a population fully controlled, and with very experienced briefing dignitaries who had already performed for dozens of Western delegations, there was a tendency to accept the stage management as part of the stately formalities of our tour. In Sinkiang, however, the stage management could not survive the intrusion of reality. Here, half of the locals are not Chinese; many are Kazak Turkic—proud, tough, and by no means cowed. One day, for example, we flew to the Ili Valley, the remotest corner of this region, quite near the Soviet Union and very far from Peking and China proper. Now all pretense was finally abandoned as our hosts resorted to a nakedly physical insulation to keep us from local contact.

In Kuldja, the only sizable town in the area, newly settled Chinese amount to half the population, but it was not Chinese who lined the streets as we drove around. The local Kazaks, who look much like southern Italians, left their workshops, homes and farms to see the unique sight of people who looked like themselves riding in cars. Normally only high Chinese officials ride in cars. They cheered as no Chinese crowd would do, and their behavior was obviously unauthorized. Our Chinese escorts were soon in a state of panic, as more and more of the locals appeared in the streets during hours in which all were supposed to be at work.

We never did see Kuldja except through the windows of our cars. We went from the airport compound to carpet factory, shoe workshop, and local government compounds. When we said we wanted to go in the streets and photograph the people, our escorts became hysterical, and soon announced that "because of weather conditions," we would have to leave Kuldja at once.

Our one open-air visit to a Kazak horse-raising commune was farcical in the crudity of the simulation. After driving for many miles across the steppe, after passing several genuine nomad camps, we stopped near a meadow in which there stood three multicolored tents. That, we were told, was the commune. Inside, pretty Kazak girls served us food, while we were given a briefing on the commune, of which no evidence was in sight, neither tents nor horses nor barns. Then, someone in our group lifted one edge of the carpet in the polychrome tent (all the many tents we had passed on the road were dirty-brown) and found the grass quite green. The show had been rigged for us.

That night, I read an account of an American journalist who had visited the same commune. The article was written as if the whole thing were real—pretty tents and all. But then the same journalist had taken on faith much more, particularly about the status of women.

Everywhere we went in China, women were part of the reception committees and revolutionary councils of town, province, commune and factory. Hardly ever did we hear one say a word; they smiled and nodded, but did not speak. When asked whether all announcers on Chinese radio were women, one of our senior escorts said that most were, but "important announcements are made by men, of course."

CARDIN AND MAO

Actually, for all the disappointment of our Sinkiang visit, by then we had already seen a great deal of the real China, much more than is normally accessible. In Peking and Shanghai, though the visitor is housed in the center of town, he is part of a very crowded program which normally keeps him from seeing those cities for himself as they really are. In our case, however, things were different: Mao had just died, and our hosts were forced to cancel all tour programs. We were free to explore Peking at our leisure for three days.

Immediately, we discovered that the broad boulevards through which we had driven back and forth and the shopping street near our hotel were utterly different from the rest of the city. Instead of asphalt and concrete, the real Peking was made of mud and sun-dried brick, its people working in narrow, unpaved alleys lined with low buildings. Instead of the neat factories of the tour circuit, we saw that much of urban China really works in miserably ill-equipped shanties. Many are classic sweatshops out of New York in the 1890s, with a roomful of women working elbow to elbow on sewing machines of ancient design.

We could also see how the Chinese lived: one evening, I passed a typical room, illuminated by a naked 30-watt bulb dangling from the ceiling. About six people were preparing to go to bed; there were two wide beds in the room and not much space in between. The only other furniture was a trunk-box, and a large 1930s-style radio.

We were, of course, never invited home by any of the officials we dealt with. But from the apartment of a diplomat friend one could look directly into an apartment house reserved for middle-ranking cadres: they, too, lived in standard three-room apartments, but each housed only a single family. More senior cadres have their own small houses with a bit of garden around, but nobody has ever seen how the top echelon lives, for their housing is hidden behind the high walls of the elite residential compounds.

Perhaps the most transparent of all the simulations of social equality one sees in China is the mock equality of dress. Almost everybody wears the standard boiler suit, the Mao uniform. But some are made of rough cotton and others of delicate gabardine, and still others of good-quality wool. Senior party men would wear their equality in carefully tailored worsted wool, and their Mao suits had much more in common with Pierre Cardin than with the blue-cotton outfits of ordinary people. And yet, in the post-1972 reports on China, it is the theme of visible equality that is most insistently advanced.

"POSITIVE" CONTROL

Why have American journalists failed to convey to us such fundamental Chinese realities? After all, the miserable poverty of the country is everywhere in evidence. Why, moreover, have previous visitors not been revolted by the schoolrooms where children are taught from booklets replete with the brutal images of harsh classwar propaganda? Why have our "Asia scholars" failed to denounce the militarism of a system where the cheapest suit of clothing for little boys is a mini-uniform complete with toy rifle?

And, above all, how could they have missed the central phenomenon of Chinese life: its unique, almost pure totalitarianism? Indeed, the transparency of personal life to the party apparatus in every house and street is total and inescapable. For example, in our walks through Peking, during which we were followed only at a distance, if at all, we did not manage to have even one spontaneous street conversation, however casual. It became evident that in the capital even old women and young boys knew that it was forbidden to speak to any foreigner.

With all the petty martinets and authoritarian characters enrolled in the party, an incredible degree of control can be maintained. In essence, it is a new departure in the totalitarian experience, a system of positive instead of negative control. In the Soviet Union, one can do anything, except for the very long list of forbidden things. In China, there is no forbidden list at all. Instead, all activity is forbidden except that which is specifically permitted and promoted by the party.

ECONOMIC IRRATIONALITY

One would have thought that the total harnessing of popular energies in China would at least result in a high degree of economic effectiveness. But the statistics tell a different story, and even casual travel observation confirms the statistics. It is true that the Chinese economy does not waste resources on automobiles and television sets. But the Chinese have their own forms of waste.

In farm communes, or even in the smaller factories, the Chinese tradition of hard work results in high efficiency. But as soon as the resources are extracted from commune or local industry for investment under the provincial authorities, gross inefficiency and massive waste are commonplace.

One manifestation of the pervasive irrationality of the Chinese system was in evidence at the modern factory we visited in Shanghai. The factory made precision machine tools. Much of its equipment consisted of very elaborate precision machines which had been made in the plant itself, and were being used even for rough work because the factory could not exchange them for cheaper and simpler ones elsewhere. Hence a machine worth, say, $100,000 was doing the work of a machine worth, say, $20,000.

The Chinese consumer pays for economic irrationality by being poor, but China also pays by being militarily weak. Over the last ten years, while the Soviet Union has been modernizing its forces, the Chinese have fallen behind. Again, even the most casual exposure to China is sufficient to disprove the notion that one is dealing with an emergent superpower. China is, of course, a nuclear power in a small way (with less capability than Britain or France), but otherwise it has none of the attributes of a superpower; far from being able to project its military power on the global scene, it could not even defend its own borders. Nor is there anything to suggest that China will become a superpower in 10, 20 or even 30 years. Hence, the right-wing Sinophilia of those who abhor the Chinese system, but who see virtue in Chinese power as a counterweight to Russia, is as flawed as the left-wing Sinophilia of those who see virtue in a society which combines a maximum of unfreedom with a minimum of efficiecny.

NO SECOND VISA

How could so much of this pass unobserved when all the signs are in evidence? Is it perhaps that too many of our scholars and journalists can only recognize repression when it is crude and requires the visible presence of armed men in the streets? Is it that they can recognize inefficiency and weakness only in liberal democracies? How could so many of those who have visited China fail to highlight the fact that they were denied contact with Chinese not specifically instructed to speak to them? Was it because their overriding professional need is to be re-invited?

Perhaps so. After all, that is how the Chinese try to control journalists who have fed us much of what we think we know about China. Resident Peking correspondents rarely file stories offensive to the Chinese because their jobs depend on their visas. Visiting correspondents and academics like to have periodic access. And so it is the newspaperman who makes his own prior decision that he will seek no second visa who can be most counted upon to serve us, and not the Chinese.

STATEMENT OF JAMES H. SCHEUER BEFORE THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY

(Mr. SCHEUER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SCHEUER. Mr. Speaker, 2 weeks ago I testified before the Port Authority of New York and New Jersey on the question of public acceptance of the Concorde landing at John F. Kennedy International Airport in the heart of my congressional district.

Printed below is a full text of my remarks before the port authority including an extensive legislative history on noise pollution.

Mr. Chairman and Members of the Panel: Thank you for the invitation to appear before you on the question of public acceptance of Concorde supersonic aircraft operations at John F. Kennedy International Airport.

Kennedy Airport lies in the heart of my Congressional District and many of the small communities perched on the edge of the airport—Howard Beach, Rosedale, Laurelton, Broad Channel, Starret City, and the Rockaways to name a few—are also parts of my Congressional District.

Three burning issues illuminate this long standing controversy:

First, the noise, environmental, fuel efficiency, and safety criticisms of the Anglo-French Concorde;

Second, the various steps proposed by the British and French to meet the noise criticisms; and

Third, the question of discrimination on the part of the Port Authority raised by the Federal Government in its brief to the Circuit Court of Appeals.

I hope to make a compelling case that the British and French should fly their Edsel elsewhere!

BASIC CRITICISMS OF THE CONCORDE

Noise.—The oldest and most basic of the criticisms leveled against Concorde is that it is two to eight times noisier than jet aircraft now in service. Furthermore, the low frequency character of the Concorde's noise allows the sound waves to penetrate buildings more than the noise of other aircraft. I have visited Dulles International Airport and stood outside during takeoffs and landings of the Concorde and, subjectively, I can assure anyone who has not heard the Concorde that the noise it makes is louder and more penetrating than any noise you have ever personally experienced.

In July of 1975 the British released their own Environmental Impact Statement on Concorde. This report concluded that the Concorde was much noisier than the Boeing 707 and that the noise affected people and communities 20 to 30 miles from the airport. Three months later, the British Board of Trade released tests which showed that the Concorde's noise levels exceeded limits now in effect at Kennedy Airport by an average of 800%.

Another British study, by the University of Salford, concluded after reviewing Concorde noise data that "there could well be a significant hazard to the hearing of people living near to Heathrow Airport from the noise of the Concorde." This study continued: "The maximum allowable daily exposure to noise could be reached in one to two hours if the exposed persons were out-of-doors. Young children playing outside their homes will be at risk."

The British studies uniformly denounce the Concorde with respect to its noise problems. Thus, no one should have been surprised when the United States' Federal Aviation Administration Environmental Impact Statement also deounced the Concorde. This 1976 study found that the noise levels of the Concorde would be at least twice as loud as the noise emitted by long range jets such as the Boeing 707 and roughly four times as loud as noise emissions of our newer long range jets such as the Boeing 747.

Additionally, the American studies pointed to the Concorde's emission of low level frequency noise resulting in structural vibrations in buildings five times as great as the vibrations caused by current subsonic jets. In the Port Authority brief to Judge Pollock it was pointed out that the area exposed to noise of the Concorde is much larger than the area exposed to noise by subsonic jets. The area exposed to the noise of a Concorde takeoff is 47.6 square miles, six times the area exposed to a Boeing 707's takeoff and 15 times the area exposed to a Boeing 747's takeoff.

For the past 14 months the Anglo-French Concorde has been flying in and out of Dulles International Airport in Washington. It is safe to say that the noise levels have lived up to their past billing. The 12 month averages from May, 1976 through April, 1977 were as follows:

119.4 EPNdB for takeoff

116.8 EPNdB for landing

These figures are roughly one and a half to two and a half times greater than the 112 EPNdB standard allowed by the Port Authority. Furthermore, the structural vibrations caused by the Concorde have been found to be greater than the vibrations caused by subsonic jets.

In conclusion, the case against Concorde with respect to noise is tough to debate.

In conclusion, the case against Concorde (under normal flight procedures) does exceed the legal limitations on noise for Kennedy Airport.

Energy Efficiency.—But the case against Concorde does not end with noise. The facts of the matter are that Concorde is a massive fuel guzzler. A Concorde uses .065 gallons per seat mile for a trans-Atlantic flight while a Boeing 747 uses only .016 gallons per seat mile, a difference of more than four to one.

Viewed in a different perspective, the Concorde uses 218 gallons of jet fuel for each passenger for a flight between Kennedy Airport in New York and London. The Boeing 747 uses only 63 gallons of jet fuel per passenger. Projected through the eight year life of the Concorde aircraft, each plane would use 100 million more gallons of jet fuel than slower and quieter aircraft. A fleet of 16 Concordes would thus use 1.6 billion more gallons of jet fuel than subsonic jets.

Environmental Effects.—We needn't stop with the two observations that the Concorde is a raucous gas guzzling flying fiasco; studies have also demonstrated that it is an environmental disaster. A 1972 National Academy of Sciences study argued that if a large fleet of SST's were in use 8,000 additional annual cases of skin cancer would result in 300 deaths owing to the ozone depletion caused by supersonic transport.

The FAA Environmental Impact Study assured us that the ozone depletion caused by six daily takeoffs and six daily landings of the Concorde would result in "only" 200 new cases of skin cancer yearly.

Finally, the testing at Dulles has demonstrated that the Concorde emits more carbon monoxide, more hydrocarbons, more nitrogen oxide, more nitrogen dioxide, and more particulate pollution than do normal subsonic jets.

Safety.—As if all of these criticisms were not enough, it turns out that the Concorde is not a very safe plane to fly on. There are at least two major safety issues involved with the Concorde: the fuel inerting problem and the cabin depressurization problem.

For about 12 years the British and French have been trying to get the FAA to certify the Concorde as safe to that it can be sold to American carriers. The FAA's reluctance to classify the plane as safe is based on the fuel inerting problem. Concorde's fuel is kept at extraordinarily high temperatures during flight with an increased risk of fire or explosion. Apparently, the only technology available to make the plane safe in the FAA's eyes is something called a nitrogen inerting fuel system which the Concorde does not have.

The British themselves admit that the Concorde must fly at 60,000 feet (above weather conditions) to operate economically. A depressurization of the cabin at this altitude would render the passengers and crew unconscious within 15 seconds even with 100% oxygen. The maximum height for safety is 44,000 feet. Thus, the Concorde would have to plan to descend 16,000 feet in less than 15 seconds in the event of a sudden cabin depressurization. Experts tell me that this is impossible.

Summary.—The original criticisms of the Concorde remain compelling arguments. Although the noise arguments are the most important, the energy efficiency, environmental, and safety arguments, cannot be ignored.

THE NEW BRITISH AND FRENCH PROPOSALS

The new British and French proposals concern themselves entirely with the noise problems and do not concern themselves at all with the energy efficiency, environmental, or safety problems of the Concorde.

The basic British-French package provides that:

(1) Takeoffs would be limited to two runways at Kennedy Airport which have departure routes mostly over water to reduce noise impact on inhabited areas.

(2) On takeoffs new procedures would be used including steep banked turns at low altitudes and power cutbacks to reduce the noise impact.

(3) On landings approach speeds will be kept very high over inhabited areas to reduce noise impact. This will necessitate very rapid deceleration once the airport is reached.

(4) The Concorde will not travel with full plane loads and will takeoff with 25% less fuel than was originally planned to reduce the weight of the plane and reduce noise.

My basic questions are also probably best presented in list form:

(1) What happens when backlogs exist at the two runways selected for Concorde use? Will a plane designed to cut hours off of a trans-Atlantic flight actually wait hours in a line to take off?

(2) The 25 degree bank turn at 100 feet has been characterized by a pilot in the New York Times as "nothing less than low level acrobatics." Are the new flight procedures as safe as normally used flight procedures?

(3) Once the plane is taxiing down the runway doesn't the pilot have final choice as to what maneuver he will use? If in bad weather (or in good weather for that matter) a pilot refuses to make this sharp turn or refuses to cut back power, what happens? And who monitors the pilots to ensure that they engage in these "acrobatic maneuvers."

(4) Even with some of this pilot gimmickry being used at Dulles on May 25, 1976, why did the Concorde still exceed Kennedy noise standards by 250%?

(5) The British and French acknowledge that air traffic speed requirements will not allow them to keep up speeds over all of the communities. How will this affect their new noise estimates?

(6) What effect will the 25% reduction in fuel load have on the fuel safety margin of the Concorde?

(7) Since many of these proposed adjustments in procedure rely on less than full utilization of the Concorde, who will monitor the adherence to these procedures? Who will count the number of passengers? Who will monitor fuel and cargo weight?

Even when all of these questions are answered there remains a critical question: Why should the Concorde be tested at John F. Kennedy International Airport? What can we learn about the Concorde at Kennedy that we cannot learn at Dulles?

Then Secretary of Transportation William Coleman decided that the subjective characteristics of Concorde noise could best be evaluated through a controlled test. He therefore directed the FAA, as proprieters of Dulles Airport, to permit the Concorde to operate at that airport. At Dulles, less than 1000 residents are included within the noise exposure forecast (NEF) 30 noise impact area and no one resides within the NEF 40 severe noise impact area. The NEF 40 area around airports is ineligible for Department of Housing and Urban Development mortgage loans on the grounds that the land there is unfit for human habitation.

Compare the Dulles figures for noise exposure with the Kennedy figures. The number of people residing within the NEF 30 noise impact area is 485,000 and the number of people residing within the NEF 40 severe noise impact area is 112,000. Just using common sense, why expose hundreds of thousands of people to the Concorde when less than a thousand have to be exposed?

Moving beyond common sense to the legal environment, why should the Port Authority risk damage suits from hundreds of thousands of residents of New York City when they can simply use the test results from Dulles Airport where less than a thousand impacted people live?

I am not the first person to ask these questions. Secretary Coleman himself admitted that the elimination of Kennedy Airport from the test "would greatly diminish but . . . would not destroy the validity of the demonstration . . ." Russell Train, then Administrator of the Federal Environmental Protection Agency remarked in December, 1976 that the arrival of the Concorde at Kennedy Airport would be "undesirable." And most recently, on May 6, 1977, Mr. William Morgan, Region II Director of the FAA (Region II includes Kennedy Airport) under questioning by Congressman Leo Ryan (California) and myself admitted that the test at Kennedy could serve no useful purpose at all. Keep in mind that all three of these men were supporters of the Concorde position.

My position is simple. I do not believe that the new proposals of the British and French solve the noise criticisms. I know they fail to address the environmental, fuel efficiency, and safety criticisms. If the British and French would like to try to convince me of the validity of their position then they can do so at Dulles International Airport. And, from your point of view, there is no reason why the British and French must experiment with their new procedures at your airport where you would be liable for all damage suits.

THE QUESTION OF DISCRIMINATION

The Port Authority has been charged with discrimination in barring the Concorde from Kennedy Airport even though planes like the Boeing 707, which also violate Kennedy Airport noise standards, are allowed to land. This charge was raised in the brief of the Federal Government to the Circuit Court of Appeals last month.

However, the comparison of the Concorde to the Boeing 707 is not valid. The figures upon which the British and French base their comparison are new figures based on the new flight procedures. I have already voiced my doubts as to the validity of these highly speculative and unproven figures. However, even more importantly, the Boeing 707's and indeed all of our older fleet of subsonic jets, are under orders of the Department of Transportation to retrofit so that they can meet the standards promulgated in Federal Air Regulation (FAR) 36 and accepted by Kennedy Airport. Thus, why should we allow the Concorde, a plane we know can never be retrofitted to meet FAR 36 noise standards, to fly into Kennedy Airport when at the same time we are forcing our domestic air carriers to pay billions of dollars to bring the domestic air fleet into conformity with FAR 36?

The British and French may answer that FAR 36 was promulgated in 1969, four years after the manufacturers of the Concorde had received their certification. But the Boeing 707 was also certified prior to the promulgation of FAR 36 and we are forcing that plane to conform. Further, the Concorde was not into mass production until after 1969. And, the prototype Concorde flights in 1974 were with planes which had only 32 seats and which had other load carrying refinements that did not approach the capacities of the commercially produced Concorde. Even this scaled down model did not pass the 112 PNdB requirement of FAR 36. Thus, in 1974, prior to mass production, during prototype testing, and for five years following the promulgation of FAR 36, the British and French knew that they were making a plane that could not meet our noise standards.

In point of fact, the Concorde did not meet British noise standards either. But the British own Heathrow Airport and they decided to allow the plane to land there. And the Federal Government owns Dulles Airport and they decided to allow the Concorde to land there. But the Port Authority operates Kennedy Airport and there is no reason for us to allow the Concorde to land here.

From this perspective, a decision by the Port Authority to ban the Concorde cannot be discriminatory: the British and French knew from the beginning that they were violating United States noise regulations and had no right to expect that they would be allowed to land here in New York.

But there is another perspective as well. This is the perspective I see as a United States Congressman. I see national policies against noise pollution, national policies against environmental degradation, national policies against fuel inefficiency, and national policies towards improving air safety. And then I see the Concorde which flouts each and every one of these national policies.

At the end of the 92nd Congress the Noise Control Act of 1972 was enacted into law. It called for a coordinated attack by the Federal Government on the problems of noise pollution. The Congressional intent is summarized in the Act as follows: "to promote an environment for all Americans free from noise that jeopardizes their health and welfare. . . ."

In the 93rd Congress, four committees held hearings to monitor the implementation of the Noise Control Act. And since 1972 at least six distinct categories of legislation have been proposed to augment the authority of the basic Noise Control Act to achieve the Congressional intent: reduction of noise pollution.

Airport Curfews.—In the 93rd and 94th Congresses, Congressman Benjamin Rosenthal (New York) introduced legislation to establish an Airport Noise Curfew Commission to study the establishment of curfews for non-military aircraft operations over populated areas of the United States during normal sleeping hours. I co-sponsored that legislation.

Retrofit.—Congressmen Charles Wilson (California), Lester Wolff (New York) and myself sponsored legislation and spearheaded efforts to require the retrofitting of the entire domestic fleet so that all planes would meet the noise standards of FAR 36. My basic legislation was followed up by hearings and by a series of letters signed by over 100 of my colleagues in Congress in September of 1975 through April of 1976 to the Federal Aviation Administration and to the Department of Transportation demanding that the FAA promulgate a rule requiring retrofit.

Ironically, in one letter to Secretary Coleman in April, 1976, I commented that the Secretary should require retrofit "to demonstrate to England and France that treatment (of the Concorde) was even-handed and consistent with domestic aircraft noise policy." Finally, late in 1976, our efforts were rewarded as President Gerald Ford and Secretary Coleman promulgated regulations requiring the retrofitting of our planes that were in violation of FAR 36. That rule would apply to 77% of our domestic fleet or 1654 jets. Although we were a little disturbed by the time table proposed (eight years) we were gratified to see another example of the federal intent: reduction of noise pollution.

Sonic Boom.—Representative Benjamin Rosenthal and I separately introduced legislation to prohibit sonic booms by civilian aircraft within the navigable airspace of the United States. The FAA, under prodding by Congress, subsequently promulgated a regulation which accomplished the purpose of this bill.

Local jurisdiction over aircraft noise.—I joined in efforts with Congressmen John Wydler (New York), Teno Roncalio (Wyoming) and Lester Wolff (New York) to ensure that state and local governments could prescribe curfews and other airport noise regulations in their own jurisdictions. This

legislation grew out of the large volume of damage suits being filed against airport proprietors who in many cases were simply bound by federal regulations. The recent Circuit Court of Appeals decision seems to concur with the intent of this legislation.

Sources of noise other than aircraft.—The Congressional battle against noise was not confined to aircraft noise. Ten bills have been introduced in the past five years to combat other types of noise. These proposals include a bill to curb highway noise, a bill to set up an Office of Noise Abatement and Control under the Environmental Protection Agency, and a bill to increase disclosure of noise levels of cars and machinery.

Supersonic Transport.—The final area of legislation deals with Congressional efforts —after 1972—to control noise levels of supersonic aircraft.

An amendment by Senator Alan Cranston to the Noise Control Act of 1972 forbidding the landing of supersonic aircraft in the United States unless they met the requirements of FAR 36 passed the Senate by a vote of 60 to 17 in October of 1972. However, the House floor managers would not accept the amendment and rather than risk a conference committee that late in the session the amendment was killed.

Attempts were made in the 94th Congress to affix similar language to the Department of Transportation Appropriations Bill in 1975. One amendment was defeated narrowly in both the House and the Senate (by margins of 196 to 214 and 44 to 46). Later in the session, the House managed to tack the same language onto the Airport and Airways Development Bill by a vote of 199 to 188. However, the Senate rejected this amendment by a vote of 31 to 50.

Congressman Edward Koch attempted in both 1976 and 1977 to amend the Department of Transportation Appropriations Bill to prohibit any funds for air traffic control to be spent in landing the Concorde in New York. Although his amendment received strong support both years, it failed to pass either time.

In January, 1976 I circulated a letter to Secretary Coleman co-signed by 79 colleagues in Congress arguing that the Concorde was too loud, it degraded the environment, and had too high a level of fuel consumption. The letter argued for banning the Concorde on the grounds that it violated national policies mandating less noise pollution, less air pollution, and more fuel economy.

In the past few years more than 25 bills have been introduced in Congress designed to limit supersonic travel until such aircraft can meet American noise standards. I myself am the sponsor of four of these bills. Add to these pending pieces of legislation the dozens of statements and letters my colleagues and I have produced and the successful legislative initiatives of the 92nd, 93rd, and 94th Congresses and the Congressional intent on this matter is crystal clear. No plane, whether British, French, or American, shall be permitted to fly in the United States unless it can meet our noise standards.

CONCLUSION

In the past I have called the Concorde a flying Edsel and a flying fiasco. The original arguments against Concorde are powerful enough to speak for themselves. If the FAA has the need for esoteric testing, let them use Dulles Airport. You don't have to take my word for that: just ask William Coleman, Russell Train, or William Morgan all of whom happen to be supporters of the Concorde and all of whom happen to believe that testing at Kennedy is not essential.

Finally, on the question of discrimination, the Port Authority should sit tight right where it is. Their original decision was supported by the facts. That position is totally and completely consistent with the intent of the United States Congress. In fact, as the Environmental Protection Agency noted, "permitting the introduction of the Concorde, or any other new aircraft that is noisier than FAR 36, is counter to the thrust of the national noise abatement effort."

Thus, as a member of the Kennedy Airport community and a resident of the NEF 30 noise impact area, and as an elected leader of the Kennedy Airport community, I urge you to keep the Concorde out of our neighborhood.

CONFERENCE REPORT ON H.R. 7932

Mr. SHIPLEY submitted the following conference report and statement on the bill (H.R. 7932) "making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–506)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7932) "making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 85.

That the House recede from its disagreement to the amendments of the Senate numbered 59, 62, 63, 64, 65, 66, 68, 72, 73, 77, 81, 83, 84, 86, 88, 89, 90, and 91, and agree to the same.

Amendment numbered 69: That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment insert: "130"; and the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$21,795,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 60, 61, 67, 70, 71, 74, 75, 78, 79, 80, 82, 87, 92, 93, 94, 95, 96, 97, 98, and 99.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7932) making appropriations for the Legislative Branch for the fiscal year ending September 30, 1978, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I—CONGRESSIONAL OPERATIONS

Senate

Amendments Nos. 1 through 58: Reported in technical disagreement. Inasmuch as these amendments relate solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs therein without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments Nos. 1 through 58.

House of Representatives

Administrative Provisions

Amendment No. 59: Changes section number as proposed by the Senate.

Joint Items

Contingent Expenses of the Senate
Joint Committee on Printing

Amendment No. 60: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate inserting language that provides that no part of the appropriation for salaries and expenses shall be used to prepare a Congressional Directory for the second regular session of the 95th Congress other than a pamphlet supplement to the Congressional Directory for the first session of such Congress.

Joint Committee on Defense Production

Amendment No. 61: Reported in disagreement. The managers on the part of the House will offer a motion to insist on their disagreement to the amendment of the Senate.

Capitol Police

Capitol Police Board

Amendment No. 62: Appropriates $1,572,000 as proposed by the Senate instead of $1,701,400 as proposed by the House.

Amendments Nos. 63, 64, 65, and 66: Delete sections of language relating to the rank and salary of Metropolitan Police officers detailed to the Capitol force proposed by the House and stricken by the Senate reflecting the retirement of the incumbents referred to.

Capitol Guide Service

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which deletes the language proposed by the House and stricken by the Senate providing that none of these funds may be used to employ more than twenty-eight individuals and that the Capitol Guide Board shall be authorized to hire, on a temporary basis, employees to fill temporary vacancies for a period of not to exceed ninety days for any one position, and inserts language proposed by the Senate to reclassify one position as "Deputy Chief Guide", reinstates the employment ceiling of twenty-eight individuals, and enables the Capitol Guide Board to temporarily employ not more than two additional individuals for not more than one hundred twenty days each.

Office of Technology Assessment

Amendment No. 68: Increases the limitation on the amount of 1977 funds which shall remain available until expended from $600,000 as proposed by the House to $900,000 as proposed by the Senate.

Amendment No 69: Increases the limitation on staff employment to 130 instead of 100 as proposed by the House and 150 as proposed by the Senate.

Amendments Nos. 70 and 71: Reported in technical disagreement. The managers on the part of the House will offer motions to recede

and concur in the amendments of the Senate providing that the limitation on staff employment shall not prevent staff appointments necessary to maintain an operating balance between professional staff skills and support staff, or prevent filling the position of Deputy Director should it become vacant. The Conferees are agreed that this provision does not permit an exception to the limitation of 130 employees, rather it provides flexibility to the Office of Technology Assessment in implementing the staff limitation.

Congressional Budget Office

Amendment No. 72: Appropriates $10,400,000 for salaries and expenses as proposed by the Senate instead of $10,459,000 as proposed by the House.

Architect of the Capitol

Capitol Buildings

Amendment No. 73: Increases the amount to remain available until expended from $24,000 as proposed by the House to $57,500 as proposed by the Senate to cover the cost of replacing certain equipment in the Senate restaurant.

Senate Office Buildings

Amendment No. 74: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $9,102,000 for Senate Office Buildings for fiscal year 1978, of which $200,000 shall remain available until expended, and language increasing the amount made available until expended in the regular 1977 Act from $980,000 to $1,208,000, as well as language relating to the compensation of the Assistant Superintendent, Senate Office Buildings; and appropriating $380,000 for fiscal year 1977 for preliminary planning for modifications and alterations to the Russell and Dirksen Buildings, to remain available until September 30, 1979.

Senate Garage

Amendment No. 75: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $153,500 for the Senate Garage.

Library of Congress

Congressional Research Service

Amendment No. 76: Appropriates $21,795,000 for salaries and expenses instead of $21,745,000 as proposed by the House and $21,845,000 as proposed by the Senate. The conference agreement provides an increase of $50,000 and four additional positions over the House allowance to improve and strengthen the administration and management of CRS staff.

Government Printing Office

Congressional Printing and Binding

Amendment No. 77: Appropriates $71,674,000 as proposed by the Senate instead of $72,102,000 as proposed by the House.

Amendment No. 78: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate inserting language that provides that no part of this appropriation shall be used to print a Congressional Directory for the second regular session of the 95th Congress other than a pamphlet supplement to the Congressional Directory for the first session of such Congress.

Title II—Related Agencies

Library of Congress

Salaries and expenses

Amendment No. 79: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $81,295,000 for salaries and expenses instead of $87,095,300 as proposed by the House and $81,995,300 as proposed by the Senate. The conference agreement provides an increase of $200,000 and 25 positions over the House allowance for automating the cataloging process instead of an increase of $400,000 and 49 positions as proposed by the Senate; an increase of $500,000 over the House allowance for the rental of computer equipment instead of $1,000,000 as proposed by the Senate; and a reduction of $6,500,000 in the House allowance as proposed by the Senate reflecting the inclusion of a provision in the bill making receipts from the sale of catalog cards and other Library publications available for the necessary expenses of the preparation and distribution of this material.

The managers on the part of the Senate will offer a motion to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 80: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that not to exceed $6,500,000 of the funds credited to the salaries and expenses appropriation during fiscal year 1978 under the Act of June 28, 1902 (2 U.S.C. 150) shall be available for obligation during such fiscal year.

Copyright Office

Amendment No. 81: Appropriates $7,945,500 for salaries and expenses as proposed by the Senate instead of $10,945,500 as proposed by the House.

Amendment No. 82: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that not to exceed $3,000,000 of the funds credited to the salaries and expenses appropriation during fiscal year 1978 under section 203 of title 17, United States Code (as in effect prior to January 1, 1978), and under section 708(c) of such title (as in effect on and after January 1, 1978) shall be available for obligation during such fiscal year.

Furniture and furnishings

Amendments Nos. 83 and 84: Appropriate $7,030,700, of which $6,214,000 shall be available for the initial outfitting of the James Madison Memorial Building as proposed by the Senate instead of $8,030,700, of which $7,214,000 was for the Madison Building as proposed by the House.

Architect of the Capitol

Congressional Cemetery

Amendment No. 85: Deletes appropriation of $225,000 for maintenance and preservation proposed by the Senate. The Conferees are not unsympathetic to the plight of the Congressional Cemetery. However, under the provisions of the National Cemeteries Act of 1973, the responsibility for maintenance of the Congressional Cemetery comes under the jurisdiction of the Veterans' Administration.

The Conferees believe the Veterans Administration could and should become more active in fulfilling its responsibilities regarding the maintenance of the Cemetery. Last year the Veterans Administration expended only $2,000 for maintenance of the Congressional Cemetery out of a total $26 million budget for National Cemeteries. The Conferees strongly believe that the Veterans Administration should greatly improve its maintenance activities at the Cemetery.

The Conferees are also agreed that the restoration and upkeep of the Congressional Cemetery is not a matter that should be funded in the Legislative Branch Appropriation bill and has denied the request without prejudice.

Government Printing Office

Printing and Binding

Amendment No. 86: Appropriates $12,952,500 as proposed by the Senate instead of $30,127,500 as proposed by the House. The conference agreement reflects savings of $275,000 resulting from the limitation on the number of transferable copies of the Congressional Record available to Senators as well as a reduction of $16,900,000 related to a general provision in the bill requiring agencies to pay the Government Printing Office for the printing and binding costs of the Federal Register program, as proposed by the Senate.

Amendment No. 87. Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which will read as follows:

": *Provided further*, That no part of this appropriation shall be used to furnish more than fifty transferable copies of the daily edition of the Congressional Record to each Senator under section 906 of title 44, United States Code, nor to furnish any such copy to a Senator for transfer other than to a public agency or institution. On or before September 1, 1977, or as soon thereafter as practicable, the Public Printer shall notify each Member of the Senate and House of Representatives of the names and addresses of all those receiving the Congressional Record that are charged to such Member of the Senate and House of Representatives"

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Office of Superintendent of Documents

Amendment No. 88: Appropriates $21,751,000 for salaries and expenses as proposed by the Senate instead of $46,976,000 as proposed by the House.

Amendment No. 89: Appropriates $900,000 for fiscal year 1977 for salaries and expenses for additional expenses of the Consumer Information Publications free distribution program as proposed by the Senate.

General Accounting Office

Amendment No. 90: Appropriates $167,000,000 for salaries and expenses as proposed by the Senate instead of $160,000,000 as proposed by the House.

Title III—Capital Improvements

Architect of the Capitol

Extension of the Capitol

Amendment No. 91: Changes heading to West Central Front of the Capitol as proposed by the Senate instead of extension of the Capitol as proposed by the House.

Amendment No. 92: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment deleting the appropriation of $55,000,000 for extension of the West Central Front of the Capitol as proposed by the House and stricken by the Senate and inserting language proposed by the Senate relating to the conduct of a study of space utilization in the United States Capitol and the preparation of drawings and specifications for restoration of the West Central Front of the Capitol amended to include the preparation of plans and specifications for extension in accordance with the modified plans for extension of the West Central Front approved by the Commission for Extension of the United States Capitol on April 7, 1977, and making unexpended balances under the heading "Extension of the Capitol" available for such study and preparation of such drawings and specifications under the direction of the Commission on the West Central Front of the United States Capitol. The motion to be offered by the House managers is as follows:

The Architect of the Capitol is authorized and directed (1) to conduct a study of the utilization of space in the United States Capitol for the purpose of recommending and reporting to the Speaker of the House of Representatives and the President of the Senate and to the Committees on Appropriations of both Houses, and the Senate Committee on Rules and Administration, those offices which, by virtue of the functions performed therein, should be located in the

Capitol and those offices which could be relocated to the House and Senate Office Buildings and Annexes; (2) to prepare drawings and specifications for restoration of the West Central Front of the United States Capitol in accordance with each of the various plans and alternatives proposed to the Committees on Appropriations during hearings on Legislative Branch Appropriations for 1978; and (3) to prepare drawings and specifications for extension of the West Central Front of the United States Capitol in accordance with the modified plan for extension of the West Central Front approved by the Commission for Extension of the United States Capitol on April 7, 1977; the drawings and specifications to be prepared in such detail as will enable the cost of such restoration proposals and extension proposal to be ascertained. The unexpended balance of appropriations heretofore appropriated under the heading, "EXTENSION OF THE CAPITOL" shall be transferred immediately upon approval of this Act to a Commission on the West Central Front of the United States Capitol which shall be composed of the following: the Vice President of the United States, who shall be the Chairman, the Speaker of the House of Representatives, the Majority and Minority Leaders of the House of Representatives, and the Majority and Minority Leaders of the Senate. Such unexpended balances shall be available for (1) the conduct of such study and (2) the preparation of such drawings and specifications under the direction of the Commission on the West Central Front of the United States Capitol. The drawings and specifications shall be completed by March 1, 1978, and submitted for the approval of the Committees on Appropriations of the Senate and House of Representatives and the Commission on the West Central Front of the United States Capitol prior to the issuance of invitations to bid on the restoration or extension of the West Central Front of the United States Capitol.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Title IV—General Provisions

Amendment No. 93: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment amending 44 U.S.C. 721 to provide for the publication of the Congressional Directory for each new Congress with a supplement printed for the second session instead of reprinting the entire Directory the second session. The provision also restricts the number of hard bound copies and eliminates individual name stamping on covers with certain exceptions.

Amendment No. 94: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amending 2 U.S.C. 150 to permit receipts from the sale of catalog cards and other publications to be credited to the Library of Congress salaries and expenses appropriation for necessary expenses for the preparation and distribution of catalog cards and other publications of the Library rather than being deposited as miscellaneous receipts in the Treasury.

Amendment No. 95: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amending 17 U.S.C. 203 to permit receipts from copyright fees and services to be credited to the appropriation account for the Copyright Office rather than to miscellaneous receipts of the Treasury.

Amendment No. 96: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment amending 44 U.S.C. 906 reducing the number of copies of the daily edition of the Congressional Record available to Senators from 100 to 50 (which may be transferred only to public agencies and institutions) as proposed by the Senate, and reducing the number available to Members of the House from 68 to 34 (which may be transferred only to public agencies and institutions). The amendment which will be offered by the House managers reads as follows:

SEC. 407. (a) The first paragraph of section 906 of title 44, United States Code, is amended

(1) by striking out

"to the Vice President and each Senator, one hundred copies;"

and inserting in lieu thereof

"to the Vice President, one hundred copies; "to each Senator, fifty copies (which may be transferred only to public agencies and institutions);"

(2) by striking out

"to each Representative, and Resident Commissioner in Congress, sixty-eight copies;"

and inserting in lieu thereof

"to each Member of the House of Representatives, the Resident Commissioner from Puerto Rico, the Delegate from the District of Columbia, the Delegate from Guam, and the Delegate from the Virgin Islands, thirty-four copies (which may be transferred only to public agencies and institutions);".

(b) The amendment made by subsection (a) shall take effect on October 1, 1977.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 97: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amending 44 U.S.C. 1509 providing for financing the costs of the Federal Register and the Code of Federal Regulations through the existing Government Printing Office revolving fund and requiring agencies to pay the Government Printing Office for these services as they now do for other printing and binding.

Amendment No. 98: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amending 44 U.S.C. 1708 to allow the Government Printing Office to keep receipts from the sales of publications and apply them to the costs of publication and sale of documents rather than depositing them in the Treasury to the credit of miscellaneous receipts. In agreeing to the change in financing arrangements proposed by the Senate, the conferees are agreed that the amount of additional receipts to be retained by the Government Printing Office shall not exceed $25,000,000 unless prior approval is secured from the Committees on Appropriations of the Senate and House of Representatives.

Amendment No. 99: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that each Senator, Member of the House, and other individual who is authorized by law to be issued a congressional tag for his automobile shall, upon application therefor, be issued a duplicate tag bearing the same number.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for fiscal years 1977 and 1978 recommended by the Committee of Conference, with comparisons to the fiscal year 1977 amount enacted to date, the 1978 budget estimates (as amended), the 1977 supplemental budget estimates, and the House and Senate bills for 1978 follows:

New budget (obligational) authority, fiscal year 1977 (enacted to date)	$976,255,715
Budget estimates of new (obligational) authority (as amended), fiscal year 1978	1,134,721,600
1977 supplemental	23,226,600
House bill, fiscal year 1978	928,335,800
1977 supplemental	10,919,400
Senate bill, fiscal year 1978	[1] 991,268,100
1977 supplemental	[1] 20,520,700
Conference agreement	[1] 990,067,800
1977 supplemental	[1] 20,520,700
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1977 (enacted to date)	+13,812,085
Budget estimates of new (obligational) authority (as amended), fiscal year 1978	−144,653,800
1977 supplemental	−2,705,900
House bill, fiscal year 1978	+61,732,000
1977 supplemental	+9,601,300
Senate bill, fiscal year 1978	−1,200,300
1977 supplemental	−1,200,300

[1] Includes $175,299,500 for fiscal year 1978 and $8,701,300 for fiscal year 1977 for Senate items not considered by the House. Conforming to long practice, funds exclusively for operations and activities of the Senate—including two items jurisdictionally under the Architect of the Capitol—are left for decision and insertion by that body.

CONFERENCE REPORT ON H.R. 7553

Mr. BEVILL submitted the following conference report and statement on the bill (H.R. 7553) "making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1978, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95-507)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7553) "making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1978, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 4, and 17.

That the House recede from its disagreement to the amendments of the Senate numbered 9, 10, 11, 13, 14, 16, 19, 20, 21, 22, 29, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 50, 51, 52, 55, 56, 57, 58, 59, 60, 61, 62, 63, and 64, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$15,000"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$4,359,806,000"; and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,601,849,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$21,525,000"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$351,600,000"; and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$25,106,000"; and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$362,835,000"; and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$71,066,000"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$67,051,000"; and the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$211,300,000"; and the Senate agree to the same.

Amendment numbered 53: That the House recede from its disagreement to the amendment of the Senate numbered 53, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$53,000"; and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$281,423,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 5, 6, 7, 12, 15, 26, and 30.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The Managers on the part of the House and the Senate at the Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7553) making appropriations for Public Works for Water and Power Development and Energy Research for the fiscal year ending September 30, 1978, and for other purposes, submit the following Joint Statement of the House and the Senate in explanation of the effects of the action agreed upon by the Managers and recommended in the accompanying conference report.

TITLE I—ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

Operating expenses

Amendment No. 1: Provides limitation of $15,000 for official entertainment expenses instead of $10,000 as proposed by the House and $25,000 as proposed by the Senate.

Amendment No. 2: Deletes language for the purchase of 10 vehicles.

Amendment No. 3: Appropriates $4,359,806,000 for Operating expenses instead of $4,237,057,000 as proposed by the House and $4,441,516,000 as proposed by the Senate.

The funds appropriated for Operating expenses are allocated as shown in the following table:

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

FISCAL YEAR 1978 OPERATING EXPENSES—BUDGET AUTHORITY

Program	Fiscal year 1978 Budget estimate	Fiscal year 1978 Conference allowance
Conservation:		
Electric energy systems	$36,700,000	$36,700,000
Energy storage	48,400,000	48,500,000
Total conservation	85,100,000	85,200,000
Solar energy development:		
Thermal applications:		
Heating and cooling of buildings	93,900,000	93,900,000
Agricultural and industrial process heating	10,300,000	10,300,000
Total thermal applications	104,200,000	104,200,000
Technical support and utilization	9,000,000	9,000,000
Solar electric applications:		
Solar thermal	55,600,000	60,100,000
Photovoltaics	57,200,000	57,200,000
Wind energy	28,300,000	33,300,000
Ocean thermal	25,300,000	35,300,000
Total solar electric applications	166,400,000	185,900,000
Fuels from biomass	19,500,000	20,250,000
Total solar energy development	299,100,000	319,350,000
Geothermal energy development:		
Engineering research and development	15,500,000	15,500,000
Resource exploration and assessment	17,600,000	17,600,000
Hydrothermal technology applications	24,900,000	28,000,000
Advanced technology applications	20,400,000	22,500,000
Utilization experiments	12,000,000	12,000,000
Environmental control and institutional studies	8,100,000	8,100,000
Hydroelectric power program		10,000,000
Total geothermal	98,500,000	113,700,000
Fusion power research and development:		
Magnetic fusion	196,900,000	203,900,000
Laser fusion	101,000,000	104,000,000
Total fusion power research and development	297,900,000	307,900,000
Fuel cycle research and development:		
Uranium resource assessment	59,485,000	59,485,000
Support of nuclear fuel cycle	92,400,000	92,400,000
Waste management (commercial)	153,000,000	158,500,000
Total fuel cycle research and development	304,885,000	310,385,000
Breeder reactor:		
Base program	$304,200,000	$304,200,000
Clinch river breeder reactor	33,000,000	0
Total breeder reactor	337,200,000	304,200,000
Nuclear research and applications:		
Water cooled breeder reactor	38,500,000	38,500,000
Gas cooled thermal reactor	16,000,000	31,000,000
Gas cooled fast breeder reactor	14,670,000	14,670,000
Light water reactor technology	18,800,000	18,800,000
Technology development and special projects	14,842,000	14,842,000
Space applications	31,700,000	31,000,000
Advanced isotope separation technology	43,617,000	43,617,000
Nuclear energy assessments	23,100,000	23,100,000
Total nuclear research and applications	201,229,000	215,529,000
Light water reactor safety facilities and fuel storage	44,000,000	29,000,000
Environmental research and development	186,980,000	191,980,000
Life sciences research and biomedical applications	38,113,000	38,113,000
High energy physics	187,950,000	187,950,000
Nuclear physics	68,444,000	68,444,000
Basic energy sciences	147,060,000	150,000,000
Nuclear materials security and safeguards	37,906,000	37,906,000
Naval reactor development	211,700,000	211,700,000
Uranium enrichment	987,685,000	960,585,000
National security:		
Weapons:		
Research and development	369,800,000	365,000,000
Testing of atomic weapons	229,100,000	229,100,000
Special test detection	17,700,000	17,700,000
Production and surveillance	566,600,000	535,000,000
Total weapons	1,183,200,000	1,146,800,000
Special materials production	416,400,000	405,000,000
Total national security	1,599,600,000	1,551,800,000
Program management and support:		
Program direction	257,100,000	254,100,000
Institutional relations	24,341,000	28,379,000
Supporting activities	54,460,000	51,360,000
International cooperation	5,000,000	3,500,000
Cost of work for others	18,265,000	18,265,000
Total program management and support	359,166,000	355,604,000

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION—Continued

FISCAL YEAR 1978 OPERATING EXPENSES—BUDGET AUTHORITY—Continued

Program	Fiscal year 1978 Budget estimate	Fiscal year 1978 Conference allowance
Change in working capital and inventories	$126,300,000	$111,300,000
Subtotal budget authority	5,618,818,000	5,550,646,000
Revenues applied:		
Enrichment revenues	−845,820,000	−965,820,000
Miscellaneous revenues	−100,720,000	−100,720,000
Total revenues applied	−$946,540,000	−$1,066,540,000
Net budget authority	4,672,278,000	4,484,106,000
Appropriation transfer	500,000	500,000
Change in unobligated balances	−59,300,000	−59,300,000
Net transfers to plant and capital equipment	9,500,000	
Unobligated balance carried forward		−65,500,000
Total operating budget authority	4,622,978,000	4,359,806,000

The following table summarizes the Conferees' recommendations in comparison to the budget estimate on a cost basis:

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION—FISCAL YEAR 1978

OPERATING EXPENSES—COST BASIS

Program	Fiscal year 1978 Budget estimate	Fiscal year 1978 Conference allowance
Conservation:		
Electric energy systems	$32,100,000	$32,100,000
Energy storage	39,900,000	39,975,000
Total conservation	72,000,000	72,075,000
Solar energy development:		
Thermal applications:		
Heating and cooling of buildings	88,000,000	88,000,000
Agricultural and industrial process heating	7,600,000	7,600,000
Total thermal applications	95,600,000	95,600,000
Technical support and utilization	6,000,000	6,000,000
Solar electric applications:		
Solar thermal	45,700,000	49,100,000
Photovoltaics	45,000,000	45,000,000
Wind energy	20,800,000	24,500,000
Ocean thermal	17,000,000	24,500,000
Total solar electric applications	128,500,000	143,100,000
Fuels from biomass	11,300,000	11,900,000
Total solar energy development	241,400,000	256,600,000
Geothermal energy development:		
Engineering research and development	13,600,000	13,600,000
Resource exploration and assessment	15,800,000	15,800,000
Hydrothermal technology applications	19,700,000	22,025,000
Advanced technology applications	16,100,000	17,700,000
Utilization experiments	3,500,000	3,500,000
Environmental control and institutional studies	7,100,000	7,100,000
Hydroelectric power program		7,500,000
Total geothermal	75,800,000	87,225,000
Fusion power research and development:		
Magnetic fusion	188,000,000	193,200,000
Laser fusion	94,000,000	96,300,000
Total fusion power research and development	282,000,000	289,500,000
Fuel cycle research and development:		
Uranium resource assessment	51,300,000	51,300,000
Support of nuclear fuel cycle	80,200,000	80,200,000
Waste management (commercial)	113,050,000	117,175,000
Total fuel cycle research and development	244,550,000	248,675,000
Breeder reactor:		
Base program	300,100,000	300,100,000
Clinch River breeder reactor	[1] 162,000,000	[1] 145,000,000
Total breeder reactor	462,100,000	445,100,000
Nuclear research and applications:		
Water cooled breeder reactor	37,600,000	37,600,000
Gas cooled thermal reactor	15,200,000	26,500,000
Gas cooled fast breeder reactor	12,800,000	12,800,000
Light water reactor technology	16,800,000	16,800,000
Technology development and special projects	$13,478,000	$13,478,000
Space applications	26,500,000	25,975,000
Advanced isotope separation technology	40,000,000	40,000,000
Nuclear energy assessments	18,600,000	18,600,000
Total nuclear research and applications	180,978,000	191,753,000
Light water reactor safety facilities and fuel storage	31,600,000	26,600,000
Environmental research and development	175,695,000	179,450,000
Life sciences research and biomedical applications	36,854,000	36,854,000
High energy physics	185,550,000	185,550,000
Nuclear physics	65,840,000	65,840,000
Basic energy sciences	138,397,000	140,597,000
Nuclear materials security and safeguards	33,500,000	33,500,000
Naval reactor development	220,000,000	220,000,000
Uranium enrichment	980,000,000	952,200,000
National security:		
Weapons:		
Research and development	357,800,000	354,200,000
Testing of atomic weapons	225,200,000	225,200,000
Special test detection	16,900,000	16,900,000
Production and surveillance	518,500,000	494,800,000
Total weapons	1,118,400,000	1,091,100,000
Special materials production	394,600,000	386,100,000
Total national security	1,513,000,000	1,477,200,000
Program management and support:		
Program direction	257,100,000	254,100,000
Instutional relations	24,741,000	28,779,000
Supporting activities	51,994,000	49,044,000
International cooperation	4,000,000	2,600,000
Cost of work for others	18,255,000	18,255,000
Total program management and support	356,090,000	352,778,000
Total program	5,295,354,000	5,261,497,000
Increase or decrease in selected resources:		
Goods and services on order	197,164,000	177,849,000
Changes in inventory and working capital	126,300,000	111,300,000
Total, increase or decrease in selected resources	323,464,000	289,149,000
Total gross obligations	5,618,818,000	5,550,646,000
Revenues applied:		
Enrichment revenues	−845,820,000	−965,820,000
Miscellaneous revenues	−100,720,000	−100,720,000
Total, revenues applied	−946,540,000	−1,066,540,000
Total, net obligations	4,672,278,000	4,484,106,000
Appropriation transfer	500,000	500,000
Change in unobligated balances	−59,300,000	−59,300,000
Net transfers to plant and capital equipment	9,500,000	0
Unobligated balance carried forward	0	−65,500,000
Total operating budget authority	4,622,978,000	4,359,806,000

[1] Costs are related to obligations incurred in previous years and in the case of the breeder reactor the costs are higher than the budget authority.

The Conferees agree that within the funds appropriated for Solar Heating and Cooling of Buildings, an additional $1,500,000 and $1,000,000, respectively, are provided over the budget request for high temperature solar collector demonstration and solar retrofit projects.

The Conferees agree that $8,000,000 of the increase is to accelerate near-term OTEC technology which has as its objective the development of a seaborne plant which would produce materials such as ammonia, utilizing OTEC as a power source and that $2,000,000 of the increase is for longer range OTEC programs.

The Conferees are in agreement that the reduction in the research and development program under weapons activities is a general reduction and is not earmarked for any specific research and development item.

The Conferees agree that within the Supporting Activities program, $12,150,000 is for Security Investigations; $14,000,000 is for General Systems Studies and a $1,000,000 increase in the Decontamination and Decommissioning subprogram is for evaluation of the options for the West Valley, New York nuclear reprocessing plant.

The Conferees agree with the Senate Report Language with regard to the Congressional Relations Office of the Energy Research and Development Administration.

The Conferees have fully restored the positions requested by ERDA for 1978.

Amendment No. 4: Deletes earmarking for the Clinch River Breeder Reactor Project.

The Committees on Appropriations have consistently supported the Clinch River Breeder Reactor Demonstration; however,

due to lack of enactment of authorizing legislation the conferees have deleted funding for this item without prejudice with the understanding that funding will be forthcoming by way of a supplemental immediately following enactment of the appropriate authorizing legislation.

Amendment No. 5: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate earmarking $14,000,000 to conduct a study of the Barnwell nuclear fuels plant.

Amendment No. 6: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate earmarking $1,800,000 for financial awards to independent inventors.

Amendment No. 7: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate relating to enhanced radiation weapons.

Plant and Capital Equipment

Amendment No. 8: Appropriates $1,601,849,000 for Plant and Capital equipment instead of $1,615,452,000 as proposed by the House and $1,583,249,000 as proposed by the Senate.

The funds appropriated for Plant and Capital equipment are allocated as shown in the following table:

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

PLANT AND CAPITAL EQUIPMENT, FISCAL YEAR 1978—CONSTRUCTION PROJECTS

Project No.	Project title	Fiscal year 1978 budget estimate	Conference allowance
78-1-a	Conservation research and development: High bay addition, Los Alamos Scientific Laboratory, New Mexico.	$800,000	$800,000
78-3-a	Magnetic fusion: Mirror fusion test facility, Lawrence Livermore Laboratory, California.	14,000,000	14,000,000
78-3-b	Fusion materials irradiation test facility, Hanford, Wash.	0	7,500,000
78-4-a	Laser fusion: High energy laser facility (NOVA) Lawrence Livermore Laboratory, California (A-E only).	3,000,000	3,000,000
	Fuel cycle research and development:		
78-5-a	Facilities for the national waste terminal storage program, site undetermined (land acquisition, A-E and long-lead procurement only).	10,000,000	10,000,000
78-5-b	Breeder fuel recycle integrated prototype equipment test facility, Oak Ridge National Laboratory, Oak Ridge, Tenn. (A-E) and long-lead procurement only).	3,000,000	3,000,000
	Breeder reactor:		
78-6-a	Modifications to reactors	8,700,000	8,700,000
78-6-b	Safeguards and security upgrading, Idaho Falls, Idaho and Chicago, Ill.	4,935,000	4,935,000
78-6-c	Safety research experimental facility, Idaho National Engineering Laboratory, Idaho (A-E, long-lead procurement and limited construction only).	8,000,000	14,050,000
78-6-d	Experimental breeder reactor II modification, Idaho Falls, Idaho (A-E and selected long-lead procurement only).	1,500,000	1,500,000
78-6-e	Modifications to facilities, Liquid Metal Engineering Center, Santa Susanna, Calif. (A-E only).	1,600,000	1,600,000
78-6-f	Fuels and materials examination facility, Hanford Engineering Development Laboratory, Washington.	5,200,000	5,200,000
78-7-a	Modifications to utility system 300 area, Hanford Engineering Development Laboratory, Washington.	2,700,000	2,700,000
78-7-b	Test reactor area steam distribution system upgrade, Idaho National Engineering Laboratory, Idaho.	500,000	500,000
78-8-a	Light water reactor safety facilities: Upgrade test area north hot shop facility, Idaho National Engineering Laboratory, Idaho.	3,000,000	3,000,000
78-9-a	Environmental research and development: Modifications and additions to biomedical and environmental research facilities, various locations.	6,000,000	5,000,000
	High energy physics:		
78-10-a	Accelerator improvements and modifications, various locations.	4,500,000	4,500,000
78-10-b	Proton-proton intersecting storage facility, Brookhaven National Laboratory, New York (Isabelle) (A/E only).	0	5,000,000
78-11-a	Master substation reliability and capacity improvements, Stanford Linear Accelerator Center, California.	1,700,000	1,700,000
	Nuclear Physics:		
78-12-a	Accelerator and reactor improvements and modifications, various locations.	1,900,000	1,900,000
78-12-b	High intensity uranium beams, Lawrence Berkeley Laboratory, California.	6,000,000	0
	Basic energy sciences:		
78-13-a	National synchrotron light source, Brookhaven National Laboratory, New York.	5,000,000	5,000,000
78-13-b	Combustion research facility, Sandia Laboratories, Livermore, Calif.	6,000,000	6,000,000
	Uranium enrichment:		
78-14-a	Centrifuge facilities modifications, various locations.	14,000,000	14,000,000
78-14-b	Process control modifications, gaseous diffusion plants, various locations.	12,900,000	12,900,000
78-15-a	Water system improvements, gaseous diffusion plant, Paducah, Ky.	2,500,000	2,500,000
	Weapons activities:		
78-16-a	Cruise missile production facilities, various locations.	18,100,000	18,100,000
78-16-b	Full fuzing option (FUFO) bomb production facilities, various locations.	23,500,000	23,500,000
78-16-c	High explosive flash radiography facility, Lawrence Livermore Laboratory, Calif. (A/E only).	10,900,000	3,000,000
78-16-d	Weapons safeguards, various locations	17,000,000	17,000,000
78-16-e	New weapons production installations, various locations.	5,000,000	2,000,000
78-16-f	Replace 10-inch water main, Bendix Plant, Kansas City, Mo.	2,000,000	2,000,000
78-16-g	Radioactive liquid waste improvement, Los Alamos Scientific Laboratory, New Mexico.	6,800,000	2,800,000
78-16-h	Tonopah Test Range upgrade, Sandia Laboratories, Albuquerque, N. Mex.	$4,000,000	$4,000,000
78-16-i	Laboratory support complex, Los Alamos Scientific Laboratory, New Mexico (A-E only).	2,000,000	2,000,000
78-17-a	Production component warehouse, Pantex Plant, Amarillo, Tex.	4,000,000	2,000,000
78-17-b	Surface water control system, Rocky Flats Plant, Colorado.	2,800,000	2,800,000
78-17-c	Core facilities office building, utilities and roads, Lawrence Livermore Laboratory, California.	12,300,000	3,000,000
78-17-d	Steam plant improvements, Y-12 Plant, Oak Ridge, Tenn.	10,000,000	5,000,000
78-17-e	High explosive machining facility, Pantex Plant, Amarillo, Texas.		5,000,000
	Special materials production:		
78-18-a	High level waste storage and waste management facilities, Richland, Wash.	18,000,000	18,000,000
78-18-b	High level waste storage facilities, Savannah River, S.C.	16,000,000	16,000,000
78-18-c	Fifth set of calcined solids storage bins, Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho.	12,500,000	12,500,000
78-18-d	New hydrofracture facility, Oak Ridge National Laboratory, Oak Ridge, Tenn.	5,400,000	5,400,000
78-18-e	Environmental, safety and security improvements to waste management and materials processing facilities, Richland, Wash.	10,000,000	10,000,000
78-18-f	Powerhouse emission control improvements, Richland, Wash.	6,500,000	6,500,000
78-18-g	Fan-house and increased fan capacity, H chemical separations area, Savannah River, S.C.	3,400,000	3,400,000
78-18-h	Plantwide fire protection, Savannah River, S.C.	6,300,000	6,300,000
78-18-i	Improved emergency coolant supply in reactor areas, Savannah River, S.C.	3,500,000	3,500,000
78-18-j	N-Reactor environmental improvements, Richland, Wash.	7,500,000	7,500,000
	Program management and support:		
78-1-b	Chiller modifications for energy conservation, Bendix Plant, Kansas City, Mo.	830,000	830,000
78-1-c	Process waste heat utilization, gaseous diffusion plant, Paducah, Ky.	900,000	900,000
78-19-a	Program support facility, Argonne National Laboratory, Illinois (A-E and long-lead procurement only).	5,000,000	5,000,000
78-21	General plant projects	83,065,000	80,065,000
78-22	Construction planning and design	10,000,000	9,000,000
	Prior-year projects:		
77-3-a	Electron beam fusion facilities, Sandia Laboratories, Albuquerque, N. Mex.	1,900,000	4,400,000
77-4-c	High performance fuel laboratory, Richland, Wash. (A-E only).	5,000,000	5,000,000
77-4-d	Fuel storage facility, Richland, Wash	16,200,000	16,200,000
77-8-d	Conversion of steamplant facility, Oak Ridge National Laboratory, Tennessee.	2,000,000	2,000,000
77-9-a	Expansion of feed vaporization and sampling facilities, gaseous diffusion plants, multiple sites.	19,000,000	18,000,000
77-9-d	Centrifuge plant demonstration facility, Oak Ridge, Tenn.	35,000,000	35,000,000
77-11-a	Safeguards and research and development laboratory facility, Sandia Laboratories, Albuquerque, N. Mex.	4,300,000	4,300,000
77-11-b	Safeguards and site security improvements, various locations.	7,800,000	7,800,000
77-11-c	8-inch artillery fired atomic projectile production facilities, various locations.	12,600,000	12,600,000
77-13-a	Fluroinel dissolution process and fuel receiving improvements, Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho (A-E and long-lead procurement).	5,000,000	5,000,000
77-13-d	High level waste storage and waste management facilities, Savannah River, S.C.	27,000,000	27,000,000
77-13-e	High level waste storage and handling facilities, Richland, Wash.	22,000,000	22,000,000
77-13-f	Waste isolation pilot plant, Delaware Basin, Southeast New Mexico (A-E, land acquisition, and long-lead procurement).	22,000,000	22,000,000
77-13-g	Safeguards and security upgrading, production facilities, multiple sites.	8,700,000	8,700,000
76-2-a	5-megawatt solar thermal test facility	3,000,000	0
76-2-b	10-megawatt central receiver solar thermal powerplant, Barstow, Calif. (A-E and long-lead procurement).	10,000,000	41,000,000
76-5-a	Tokamak fusion test reactor, Princeton Plasma Physics Laboratory, Plainsboro, N.J.	71,000,000	71,000,000

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION—Continued

PLANT AND CAPITAL EQUIPMENT, FISCAL YEAR 1978—CONSTRUCTION PROJECTS—Continued

Project No.	Project title	Fiscal year 1978 budget estimate	Conference allowance
76-8-a	Additional facilities, high level waste storage, Savannah River, S.C.	$10,000,000	$10,000,000
76-8-b	Additional high level waste storage facilities, Richland, Wash.	4,000,000	4,000,000
76-8-e	Conversion of existing steam plants to coal capability, gaseous diffusion plants and Feed Materials Production Center, Fernald, Ohio.	2,950,000	2,950,000
76-8-g	Enriched uranium production facility, site undesignated.	180,000,000	150,000,000
75-1-c	New waste calcining facility, Idaho Chemical Processing Plant, National Reactor Testing Station, Idaho.	18,500,000	18,500,000
75-3-b	High energy laser facility, Los Alamos Scientific Laboratory, New Mexico.	2,900,000	5,000,000
75-6-c	Position-electron joint project, Lawrence Berkeley Laboratory and Stanford Linear Accelerator Center.	29,400,000	29,400,000
74-1-g	Cascade uprating program, gaseous diffusion plants.	$63,900,000	$63,900,000
73-5-h	S8G prototype nuclear propulsion plant, West Milton, N.Y.	13,000,000	13,000,000
71-1-f	Process equipment modifications, gaseous diffusion plants.	143,800,000	143,800,000
71-9	Fire, safety, and adequacy of operating conditions projects, various locations.	37,000,000	37,000,000
67-3-a	Fast flux test facility	45,000,000	45,000,000
	Subtotal, construction budget authority	1,257,680,000	1,240,630,000
	Transfers from operating expenses	−9,000,000	0
	Unobligated balance carried forward from prior year.	0	−4,500,000
	Total, construction budget authority	1,248,680,000	1,236,130,000

U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

CAPITAL EQUIPMENT—BUDGET AUTHORITY

	Fiscal year 1978 budget estimate	Conference allowance
Conservation:		
Electric energy systems	$2,800,000	$2,800,000
Energy storage	1,700,000	1,700,000
Total, electric energy systems and energy storage	4,500,000	4,500,000
Solar energy development	7,900,000	7,900,000
Geothermal energy development	2,500,000	2,500,000
Fusion power research and development:		
Magnetic fusion	27,600,000	27,600,000
Laser fusion	13,200,000	13,200,000
Total, fusion power research and development	40,800,000	40,800,000
Fuel cycle research and development	25,300,000	25,300,000
Breeder reactor	29,950,000	29,950,000
Nuclear research and applications:		
Water cooled breeder reactor	3,100,000	3,100,000
Gas cooled thermal reactor	1,000,000	1,000,000
Gas cooled fast breeder reactor	1,330,000	1,330,000
Technology development and special projects	1,280,000	1,280,000
Space applications	3,400,000	3,400,000
Advanced isotope separation technology	8,485,000	8,485,000
Total, nuclear research and applications	18,595,000	18,595,000
Light water reactor safety facilities	800,000	800,000
Environmental research and development	$17,825,000	$17,802,500
Life sciences research and biomedical applications	1,000,000	1,000,000
High energy physics	42,000,000	42,000,000
Nuclear physics	6,725,000	6,725,000
Basic energy sciences	12,075,000	12,075,000
Nuclear materials security and safeguards	2,794,000	2,794,000
Naval reactor development	15,150,000	15,150,000
Uranium enrichment	19,000,000	19,000,000
National security:		
Weapons	81,000,000	79,000,000
Special materials production	36,700,000	36,000,000
Total, national security	117,700,000	115,000,000
Program management and support:		
Program direction	4,000,000	3,150,000
Insitutional relations	755,000	755,000
Supporting activities	400,000	400,000
Total, program management and support	5,155,000	4,305,000
Total, capital equipment obligations	369,769,000	366,219,000
Transfers from operating expenses	−500,000	0
Unobligated balance	0	−500,000
Total, capital equipment budget authority	369,269,000	365,719,000
Grand total, plant and capital equipment	1,617,949,000	1,601,849,000

Geothermal Resources Development Fund

Amendment No. 9: Appropriates $15,000,000 for the Geothermal resources development fund as proposed by the Senate instead of $29,100,000 as proposed by the House.

Amendment No. 10: Provides limitation of $300,000,000 on the indebtedness of the fund as proposed by the Senate instead of $400,000,000 as proposed by the House.

Special Foreign Currency Program

Amendment No. 11: Appropriates $1,500,000 for the Special foreign currency program as proposed by the Senate instead of $1,455,000 as proposed by the House.

TITLE II—DEPARTMENT OF DEFENSE—CIVIL, DEPARTMENT OF THE ARMY, CORPS OF ENGINEERS—CIVIL

General Investigations

Amendment No. 12: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $103,646,000 instead of $100,073,000 as proposed by the House and $88,206,000 as proposed by the Senate.

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The funds appropriated are to be allocated as shown in the following table:

CORPS OF ENGINEERS—GENERAL INVESTIGATIONS

State and project	Budget estimate, fiscal year 1978	Conference allowance, fiscal year 1978
ALABAMA		
(FC) Brewton and East Brewton	$60,000	$100,000
(N) Little Lagoon at Gulf Shores		50,000
(SPEC) Tennessee Tombigbee Waterway urban study	200,000	200,000
(FC) Village Creek	50,000	50,000
ALASKA		
(N) Homer Harbor		70,000
(FC) Metropolitan Anchorage	325,000	325,000
(FC) Rivers and harbors in Alaska (hydro interim)	198,000	198,000
(N) Seward Harbor	50,000	50,000
(FC) Southcentral Railbelt Area	200,000	200,000
(N) Southcentral Region (deep draft)	120,000	120,000
AMERICAN SAMOA		
(N) Harbors and rivers in American Samoa	215,000	215,000
ARIZONA		
(FC) Gila River and tributaries (Gila Drain), Ariz. and N. Mex	50,000	50,000
(FC) Metropolitan area of Tucson		100,000
(FC) Phoenix metropolitan area	750,000	900,000
ARKANSAS		
(FC) Little Rock metropolitan area	$399,000	$399,000
(FC) Ouachita River Basin	250,000	250,000
(FC) Pine Bluff metropolitan area	334,000	334,000
(COMP) Red River below Denison Dam (Auth. Rpt.), Arkansas, Louisiana, Oklahoma, Texas	95,000	95,000
(N) St. Francis River navigation		25,000
(COMP) White River Basin, Ark. and Mo. (Auth. Rpt)	193,000	193,000
(FC) White River Basin County Line Lake		100,000
(FC) White River Basin Reservoirs	218,000	300,000
CALIFORNIA		
(FC) Alameda Creek Upper Basin	275,000	275,000
(FC) Antelope Valley	170,000	170,000
(N) Bolinas Lagoon		80,000
(N) Coast of northern California	50,000	50,000
(FC) Eel River	85,000	85,000
(FC) Guadalupe River	151,000	151,000
(N) Humboldt Harbor and Bay	130,000	130,000
(FC) Los Angeles County drainage area review	375,000	375,000
(N) Los Angeles-Long Beach Harbors (including San Pedro model)	270,000	270,000

State and project	Budget estimate, fiscal year 1978	Conference allowance, fiscal year 1978
(FC) Northern California streams	$199,000	$199,000
(FC) Novato Creek and tributaries		30,000
(N) Oceanside Harbor	66,000	66,000
(FC) Sacramento River and tributaries bank protection and erosion control	285,000	285,000
(N) Sacramento River deepwater ship channel	20,000	20,000
(FC) Sacramento River-San Joaquin Delta	265,000	265,000
(N) Sacramento Valley navigation	70,000	70,000
(FC) Salinas River including part of Salinas-Monterey metropolitan area	370,000	370,000
(FC) San Diego County streams flowing into the Pacific Ocean	50,000	50,000
(BE) San Diego County, vicinity of Oceanside	50,000	350,000
(N) San Diego Harbor, Sweetwater River (2d entrance)		75,000
(FC) San Francisco Bay and Sac-San Joaquin Delta	50,000	150,000
(N) San Francisco Bay area (in-depth study)	140,000	140,000
(N) San Francisco Harbor and Bay (coll. and disp. debris)	20,000	20,000
(FC) San Joaquin River Basin	310,000	310,000
(FC) San Luis Obispo County	100,000	100,000

Research and development	17,400,000	16,600,000
Total, general investigations	81,200,000	103,646,000

The Conferees direct that none of the funds be spent for additional diversion of Lake Michigan waters until a plan is submitted by the Chief of Engineers on the use of the funds provided in FY 1978 and approved by the respective subcommittees.

Amendment No. 13: Appropriates $1,523,820,000 for Construction, general as proposed by the Senate instead of $1,510,572,000 as proposed by the House.

The funds appropriated are to be allocated as shown in the following table:

Construction, general—State and project	Budget estimate, Fiscal year 1978		Conference allowance, Fiscal year 1978	
	Construction	Planning	Construction	Planning
ALABAMA				
(N) John Hollis Bankhead Lock and dam (rehab)	$800,000		$800,000	
(MP) Jones Bluff lock and dam	4,700,000		3,700,000	
(N) Mobile Harbor (Theodore Channel)	4,000,000		4,000,000	
(N) Montgomery to Gadsden Coosa River channel				$500,000
(N) Tennessee-Tombigbee Waterway, Ala. and Miss	157,000,000		172,000,000	
ALASKA				
(FC) Chena River lakes	27,000,000		27,000,000	
ARIZONA				
(FC) Indian Bend Wash	5,950,000		5,950,000	
(FC) Phoenix and vicinity (including new river) Stage 1	7,000,000		7,000,000	
(FC) Phoenix and vicinity (Stage 2 and remaining work)		$1,100,000		1,100,000
ARKANSAS				
(MP) Degray Lake	3,100,000		3,100,000	
(N) McClellan-Kerr Arkansas River Navigation system, locks and dams, Arkansas and Oklahoma	5,000,000		5,000,000

Total, construction, general	1,414,285,000		1,523,820,000	

The conferees are agreed that the Congress retains the right to select water resource projects for funding.

All authorized water resource projects will be considered on their merits and each and every authorized project will be considered by the Committees in the deliberations on the 1979 Appropriation bill.

The elimination of funding for certain ongoing projects and the issue of no new construction starts is a policy applied only to the 1978 appropriation.

The purpose of Section 101(c) of the Water Resources Development Act of 1976 (Public Law 94–587) is to expedite the Phase I planning of projects. The conferees therefore believe that the authorization of any project eligible for Sec. 101(c) funds shall not preclude funding under the same section.

The managers are agreed that funding for the proposed Buena Vista Flood Control Project in Virginia was passed over without prejudice because sufficient fiscal year 1977 funding is available to begin Phase II advanced engineering and design of the project in fiscal year 1978.

The conferees are in agreement with the Senate Report language with respect to the Baltimore Harbor and Channels, Md. and Va. project and the Recreation Facilities at Completed Projects item.

Amendment No. 14: Deletes language in House bill regarding the Trexler Lake Project in Pennsylvania.

Construction, General

(Rescission)

Amendment No. 15: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate rescinding $6,550,000 of the 1977 Appropriation for Construction, general as proposed by the Senate.

Flood Control, Mississippi River and Tributaries

Amendment No. 16: Appropriates $253,081,000 for Flood control, Mississippi River and tributaries as proposed by the Senate instead of $246,246,000 as proposed by the House.

The Managers are agreed that the change from the Senate report includes restoration, within available funds, of $700,000 for the West Tennessee Tributaries, Tennessee project.

Alaska Hydroelectric Power Development Fund

Amendment No. 17: Deletes Alaska hydroelectric power development fund proposed by the Senate.

The House Committee has not heretofore considered or had hearings on this item and the Senate conferees reluctantly receded. The Conferees recognize the potential of this proposed new financing mechanism and agree that it is an idea which should be fully pursued. Early hearings and consideration will be given to this proposal in the upcoming budget cycle.

Revolving Fund

Amendment No. 18: Appropriates $21,525,000 for the Revolving fund instead of $2,425,000 as proposed by the House and $22,925,000 as proposed by the Senate.

The conferees direct that none of the $10,100,000 appropriated for the medium class hopper dredge shall be available for obligation before March 31, 1978. These funds shall be available for obligation if the dredging industry has not entered into a contract for construction of a medium class hopper dredge by March 31, 1978.

The Committee of Conference continues to support a public and private mixture of hopper dredges. The Committee wants to encourage and not impede the continued development of industry's new hopper dredging capability. The Committee expects industry to move ahead as rapidly as possible to develop additional capability.

The principal role of the Corps of Engineers should be to manage the dredging program and to maintain and keep fully operational a Government fleet sufficient to provide for immediate response to national defense and emergency requirements and to supplement shortages of industry capability.

Therefore, the Committee endorses the goal of principal reliance on private industry to perform required Federal dredging and agrees with the Corps' intention gradually to reduce the Government fleet toward the minimum size and composition needed to respond in a timely and effective manner to emergency and national defense requirements. This reduction should take place by laying up the older, less efficient Government dredges one by one as it is demonstrated in competitive industry and Government-plant bidding over a reasonable period of time that there is adequate industry capability to perform the same work at reasonable prices and in a responsive manner. However, as this policy is intended to achieve a net increase in the total number of hopper dredges in the combined Government and industry fleets, the retirement of the older Government hopper dredges should be paced so as to achieve this objective.

It is imperative that the Corps retain at least a minimum fleet of technologically modern vessels for emergency and national defense needs. The Committee supports the Corps program, currently underway, to refit or replace necessary plant and equipment so the residual fleet will be as modern as possible.

Flood Control and Coastal Emergencies

Amendment No. 19: Appropriates $18,000,000 for Flood control and coastal emergencies as proposed by the Senate instead of $19,564,000 as proposed by the House.

General Expenses

Amendment No. 20: Appropriates $56,800,000 for General expenses as proposed by the Senate instead of $54,902,000 as proposed by the House.

Special Recreation Use Fees

Amendment No. 21: Appropriates $6,000,000 for Special recreation use fees as proposed by the Senate instead of $5,820,000 as proposed by the House.

Administrative Provisions

Amendment No. 22: Deletes language proposed by the House which would have allowed the purchase of one aircraft for replacement only.

Amendment No. 23: Provides limitation on the total capital of the revolving fund of $351,600,000 instead of $330,500,000 as proposed by the House and $353,000,000 as proposed by the Senate.

TITLE III—DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

General Investigations

Amendment No. 24: Appropriates $25,106,000 for General investigations instead of $25,154,000 as proposed by the House and $24,340,000 as proposed by the Senate.

The funds appropriated are to be allocated as shown on the following table:

Construction and Rehabilitation

(Rescission)

Amendment No. 26: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate rescinding $2,200,000 appropriated for Construction and rehabilitation in fiscal year 1977.

Upper Colorado River Storage Project

Amendment No. 27: Appropriates $71,066,000 instead of $84,303,000 for the Upper Colorado River Storage Project as proposed by the House and $70,066,000 as proposed by the Senate.

The Managers are agreed that the change from the Senate allowance includes an increase of $1,000,000 for the Bonneville Unit of the Central Utah project.

Amendment No. 28: Earmarks $67,051,000 for the Upper Colorado River Basin Fund instead of $80,408,000 as proposed by the House and $66,051,000 as proposed by the Senate.

Amendment No. 29: Earmarks $4,015,000 for construction of recreational and fish and wildlife facilities as proposed by the Senate instead of $3,895,000 as proposed by the House.

Upper Colorado River Storage Project

(Rescission)

Amendment No. 30: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate rescinding $3,000,000 appropriated for the Upper Colorado River Storage Project in 1977.

Colorado River Basin Project

Amendment No. 31: Appropriates $78,145,000 for the Colorado River basin project as proposed by the Senate instead of $100,051,000 as proposed by the House.

Colorado River Basin Salinity Control Projects

Amendment No. 32: Appropriates $22,675,000 for the Colorado River basin salinity control projects as proposed by the Senate instead of $22,189,000 as proposed by the House.

Operation and Maintenance

Amendment No. 33: Appropriates $157,400,000 for Operation and maintenance as proposed by the Senate instead of $152,678,000 as proposed by the House.

Amendment No. 34: Earmarks $5,327,000 to be derived from the Colorado River Dam fund as proposed by the Senate instead of $5,168,000 as proposed by the House.

Loan Program

Amendment No. 35: Appropriates $27,753,000 for the Loan program as proposed by the Senate instead of $26,924,000 as proposed by the House.

Emergency Fund

Amendment No. 36: Deletes appropriation for the Emergency fund.

General Administrative Expenses

Amendment No. 37: Appropriates $24,445,000 for General administrative expenses as proposed by the Senate instead of $23,712,000 as proposed by the House.

Administrative Provisions

Amendment No. 38: Adds limitation not to exceed $65,000 for services authorized by 5 U.S.C. 3109 as proposed by the Senate.

Alaska Power Administration

General Investigations

Amendment No. 39: Appropriates $864,000 for General investigations as proposed by the Senate instead of $809,000 as proposed by the House.

Amendment No. 40: Earmarks $20,000 for transfer to the Fish and Wildlife Service as proposed by the Senate instead of $19,000 as proposed by the House.

The Conferees are concerned with the significant increase in the rent charged by the General Services Administration and further agree that payment to GSA for standard level user charges should not exceed 70 percent of the GSA bill.

Operation and Maintenance

Amendment No. 41: Appropriates $1,231,000 for Operation and maintenance as proposed by the Senate instead of $1,173,000 as proposed by the House.

Bonneville Power Administration Fund

Amendment No. 42: Makes technical correction.

Southeastern Power Administration

Operation and Maintenance

Amendment No. 43: Appropriates $1,143,000 for Operation and maintenance as proposed by the Senate instead of $1,085,000 as proposed by the House.

Southwestern Power Administration

Construction

Amendment No. 44: Appropriates $4,312,000 for Construction as proposed by the Senate instead of $4,018,000 as proposed by the House.

Operation and Maintenance

Amendment No. 45: Appropriates $8,193,000 for Operation and maintenance as proposed by the Senate instead of $7,831,000 as proposed by the House.

General Provisions, Department of the Interior

Amendment No. 46: Limits services authorized by 5 U.S.C. 3109 to not to exceed $100,000 as proposed by the Senate.

TITLE IV—INDEPENDENT OFFICES

Appalachian Regional Commission

Salaries and Expenses

Amendment No. 47: Appropriates $2,075,000 for Salaries and expenses as proposed by the Senate instead of $2,013,000 as proposed by the House.

Funds Appropriated to the President

Appalachian Regional Development Programs

Amendment No. 48: Appropriates $323,700,000 for the Appalachian regional development programs as proposed by the Senate instead of $318,354,000 as proposed by the House.

Amendment No. 49: Earmarks $211,300,000 for the Appalachian development highway system instead of $211,751,000 as proposed by the House and $211,000,000 as proposed by the Senate.

The Conferees are agreed that the following sums are allocated to the various Appalachian regional development programs:

Area Development	$105,000,000
Research and local development districts	7,400,000
Highways	211,300,000

Delaware River Basin Commission

Salaries and Expenses

Amendment No. 50: Appropriates $87,000 for Salaries and expenses as proposed by the Senate instead of $85,000 as proposed by the House.

Contribution to Delaware River Basin Commission

Amendment No. 51: Appropriates $232,000 for the Contribution to Delaware River Basin Commission as proposed by the Senate instead of $226,000 as proposed by the House.

Federal Power Commission

Salaries and Expenses

Amendment No. 52: Appropriates $42,785,000 for Salaries and expenses as proposed by the Senate instead of $41,502,000 as proposed by the House.

Interstate Commission on the Potomac River Basin

Contribution to Interstate Commission on the Potomac River Basin

Amendment No. 53: Appropriates $53,000 for Contribution to Interstate Commission on the Potomac River Basin instead of $54,000 proposed by the House and $52,000 as proposed by the Senate.

Nuclear Regulatory Commission

Salaries and Expenses

Amendment No. 54: Appropriates $281,423,000 for Salaries and expenses instead of $277,696,000 as proposed by the House and $285,150,000 as proposed by the Senate.

The Conferees agree that not to exceed 133 new full time permanent positions for a total of 2,662 are included for the Nuclear Regulatory Commission.

Susquehanna River Basin Commission

Salaries and Expenses

Amendment No. 55: Appropriates $88,000 for Salaries and expenses as proposed by the Senate instead of $86,000 as proposed by the House.

Contribution to Susquehanna River Basin Commission.

Amendment No. 56: Appropriates $200,000 for Contribution to Susquehanna River Basin Commission as proposed by the Senate instead of $194,000 as proposed by the House.

Tennessee Valley Authority

Payment to Tennessee Valley Authority Fund

Amendment No. 57: Appropriates $138,510,000 for Payment to Tennessee Valley Authority fund as proposed by the Senate instead of $131,823,000 as proposed by the House.

Water Resources Council

Water Resources Planning

Amendment No. 58: Appropriates $13,696,000 for Water resources planning as proposed by the Senate instead of $11,664,000 as proposed by the House.

Amendment No. 59: Earmarks $1,158,000 for expenses to administer the act as proposed by the Senate instead of $1,940,000 as proposed by the House.

Amendment No. 60: Earmarks $3,631,000 for preparation of assessments and plans as proposed by the Senate.

Amendment No. 61: Earmarks $3,006,000 for preparation of plans as proposed by the Senate instead of $3,806,000 as proposed by the House.

Amendment No. 62: Earmarks $2,901,000 for expenses of river basin commissions as proposed by the Senate instead of $3,008,000 as proposed by the House.

Amendment No. 63: Earmarks $3,000,000 for Title III grants to states as proposed by the Senate instead of $2,910,000 as proposed by the House.

The Conferees point out that the Administration has not yet forwarded a proposal for new principles and standards criteria for planning and evaluating water projects to the Congress for consideration.

Section 80 of P.L. 93-251 requires that such a proposal be forthcoming. The report is long overdue.

The Conferees urge the President to transmit his proposals to Congress for consideration at the earliest possible time so that the problems which have arisen on the water projects this year will not occur in the future.

TITLE V—GENERAL PROVISIONS

Amendment No. 64: Deletes Sec. 502 proposed by the House which restricted the application of a general three percent reduction.

Conference total—With comparisons

The total new budget (obligational) authority for the fiscal year 1978 recommended by the Committee of Conference, with comparisons to the fiscal year 1977 amount, the 1978 budget estimates, and the House and Senate bills for 1978 follow:

New budget (obligational) authority, fiscal year 1977	$10,081,453,000
Budget estimates of new (obligational) authority, fiscal year 1978	[1] 10,368,111,000
House bill, fiscal year 1978	10,186,746,000
Senate bill, fiscal year 1978	10,350,669,000
Conference agreement	10,294,414,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1977	+212,961,000
Budget estimates of new (obligational) authority, fiscal year 1978	−73,697,000
House bill, fiscal year 1978	+107,668,000
Senate bill, fiscal year 1978	−56,255,000

[1] Includes $10,000,000 of budget estimates not considered by the House.

HENRY BELLMON,
Managers on the Part of the Senate.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. GUYER (at the request of Mr. RHODES), for July 21, 1977, on account of death of a personal friend.

Mr. MCCLORY (at the request of Mr. RHODES), after 4 p.m. today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CORCORAN of Illinois) and to revise and extend their remarks and include extraneous matter:)

Mr. LENT, for 5 minutes, today.
Mr. RAILSBACK, for 5 minutes, today.
Mr. KEMP, for 20 minutes, today.
Mrs. HECKLER, for 20 minutes, today.
Mr. ASHBROOK, for 45 minutes, today.
Mr. BURKE of Florida, for 10 minutes, today.

(The following Members (at the request of Ms. OAKAR) to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. SCHEUER, for 5 minutes, today.
Mr. CORNELL, for 5 minutes, today.
Mr. CAVANAUGH, for 5 minutes, today.
Ms. HOLTZMAN, for 30 minutes, today.
Mr. ECKHARDT, for 5 minutes, today.
Mr. DIGGS, for 10 minutes, today.
Miss JORDAN, for 5 minutes, today.
Mr. CONYERS, for 5 minutes, today.
Mr. AUCOIN, for 5 minutes, today.
Mr. ICHORD, for 5 minutes, today.
Mr. LEGGETT, for 60 minutes, July 21.
Mr. CARR, for 5 minutes, July 21.
Mr. BOLAND, for 5 minutes, July 21.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. RHODES, to revise and extend his remarks immediately following those of Mr. THONE.

Mr. CONTE, to insert his remarks just prior to the vote on the Findley amendment in the Committee of the Whole today.

Mr. GIAIMO, to include extraneous matter in the Committee of the Whole today.

Mr. HAGEDORN, to extend his remarks on H.R. 7171 today during general debate and preceding the vote on the Findley amendment.

Mr. MAHON, to include extraneous matter, in his remarks made today on H.R. 7171.

Mr. SCHEUER, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $805.

(The following Members (at the request of Mr. CORCORAN of Illinois) and to include extraneous matter:)

Mr. SHUSTER.
Mr. KASTEN.
Mr. GRADISON.
Mr. STANGELAND.
Mr. KEMP in two instances.
Mr. COLLINS of Texas in four instances.
Mr. RHODES.
Mr. MADIGAN in two instances.
Mrs. HOLT in two instances.
Mr. BURKE of Florida.
Mr. PRESSLER.
Mr. DORNAN.
Mr. LAGOMARSINO.
Mr. STEIGER.
Mr. ARMSTRONG.
Mr. ASHBROOK in four instances.

(The following Members (at the request of Ms. OAKAR) and to include extraneous matter:)

Mr. EDGAR.
Mr. MINISH.
Mr. VENTO.
Mr. EVANS of Indiana.
Mr. ANDERSON of California in three instances.

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 4088. An act to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes;

H.R. 4975. An act to amend the Public Health Service Act to extend through the fiscal year ending September 30, 1978, the assistance programs for health services research; health statistics; comprehensive public health services; hypertension programs; migrant health; community health centers; medical libraries; cancer control programs; the National Cancer Institute; heart, blood vessel, lung, and blood disease prevention and control programs; the National Heart, Lung, and Blood Institute; National Research Service Awards; population research and voluntary family planning programs; sudden infant death syndrome; hemophilia; national health planning and development; and health resources development; to amend the Community Mental Health Centers Act to extend it through the fiscal year ending September 30, 1978; to extend the assistance programs for home health services; and for other purposes; and

H.R. 7556. An act making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1978, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following title:

H.R. 2502. To extend certain oil and gas leases by a period sufficient to allow the drilling of an ultradeep well;

H.R. 5970. To authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, to authorize the military training student loads, and to authorize appropriations for civil defense, and for other purposes; and

H.R. 7552. Making appropriations for the Treasury Department, the United States Postal Service, the Executive Office, of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1978, and for other purposes.

ADJOURNMENT

Ms. OAKAR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 56 minutes p.m.), the House adjourned until tomorrow, Thursday, July 21, 1977, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1977. A letter from the Assistant Secretary of Defense, transmitting notice of the intention of the Department to transfer appropriated funds within the Department, pursuant to section 733 of Public Law 94–419; to the Committee on Appropriations.

1978. A letter from the Deputy Director of the Office of Management and Budget, Executive Office of the President, transmitting a report on actions taken on recommendations contained in the 1975 annual report of the National Advisory Council on Vocational Education, dated March 1976, pursuant to section 6(b) of the Federal Advisory Committee Act; to the Committee on Government Operations.

1979. A letter from the Chairman, Indian Claims Commission, transmitting the Commission's final determination in docket No. 364, the *Ottawa-Chippewa Tribe of Michigan, plaintiff, v. The United States of America, defendant*, pursuant to section 21 of the Indian Claims Commission Act (25 U.S.C. 70t., 60 Stat. 1055); to the Committee on Interior and Insular Affairs.

1980. A letter from the Assistant Secretary of State for Congressional Relations transmitting a report on political contributions made by Ambassador-designate Allard K. Lowenstein, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

1981. A letter from the Atttorney General, transmitting a draft of proposed legislation to remove the limitation on payments for consultant services in the Community Rela-

tions Service; to the Committee on the Judiciary.

1982. A letter from the Attorney General, transmitting a draft of proposed legislation to establish fees for services performed by U.S. marshals; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. TEAGUE: Committee of conference. Conference report on H.R. 4991 (Rept. 95–504). Ordered to be printed.

Mr. DANIELSON: Committee of conference. Conference report on S. 1377 (Rept. No. 95–505). Ordered to be printed.

Mr. SHIPLEY: Committee of conference. Conference report on H.R. 7932 (Rept. No. 95–506). Ordered to be printed.

Mr. BEVILL: Committee of conference. Conference report on H.R. 7553 (Rept. No. 95–507). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DRINAN:

H.R. 8429. A bill to amend title VII of the Civil Rights Act of 1964 to provide increased protection to employees' religious observances and practices; to the Committee on Education and Labor.

By Mr. DRINAN (for himself, Mr. BONKER, Mr. D'AMOURS, Mr. FRASER, Mr. JENRETTE, Mr. LUNDINE, Mr. MOAKLEY, Mr. MOFFETT, Mr. MURPHY of Pennsylvania, Mr. PATTERSON of California, Ms. SPELLMAN, and Mr. VENTO):

H.R. 8430. A bill to provide for certain research and demonstration respecting the disposal of sludge, the reclamation of waters damaged by sludge and sewage, assistance to State and local governments for the removal of sludge and other solid waste from waters and shoreline areas, and to provide that grants for waste treatment works shall be made only if such works provide for environmentally sound sludge management; to the Committee on Public Works and Transportation.

By Mr. GOLDWATER:

H.R. 8431. A bill to amend title II of the Social Security Act to repeal the earnings limitation, to provide benefits for husbands, widowers, and fathers on the same basis as wives, widows, and mothers, to eliminate the 5-month waiting period for disability benefits, to provide for the payment of benefits to an individual through the month of his or her death, to provide an optional exemption from coverage for individuals 65 years of age or over, and to provide that a beneficiary's marriage or remarriage will not affect his or her benefits; and to amend title XVIII of such act to authorize direct payments to physicians and other providers at their option under the supplementary medical insurance program; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. GOLDWATER (for himself and Mr. HANSEN):

H.R. 8432. A bill to amend chapter 117 of title 18 of the United States Code, commonly referred to as the Mann Act, to make its prohibitions apply equally with respect to males and females, and to increase the penalties for violations; to the Committee on the Judiciary.

By Mr. HANNAFORD (for himself, Mr. PRITCHARD, and Mr. RYAN):

H.R. 8433. A bill to allow service performed by women as members of telephone operating units of the Army Signal Corps during World War I to be considered active duty in the Army for purposes of all laws administered by the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. KEMP:

H.R. 8434. A bill to establish the Federal Protective Service police force within the General Services Administration, provide minimum training, pay, and other benefits for such police force, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. LAGOMARSINO (for himself, Mr. ROUSSELOT, and Mr. GILMAN):

H.R. 8435. A bill to amend the Tariff Schedules of the United States to increase the value at which personal articles may be entered duty-free by U.S. residents returning from Mexico; to the Committee on Ways and Means.

By Mr. McDADE:

H.R. 8436. A bill to repeal the Postal Reorganization Act, to reenact the provisions of former title 39, United States Code, and to make certain amendments to such provisions relating to employee-management agreements; to the Committee on Post Office and Civil Service.

By Mr. MOSS:

H.R. 8437. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to strengthen the provisions relating to remedy of defects and failure to comply with Federal motor vehicle safety standards; to the Committee on Interstate and Foreign Commerce.

By Mr. NOLAN (for himself, Mr. DERWINSKI, Mr. FAUNTROY, Mr. MILLER of California, Mr. ERTEL, Mr. MURPHY of Pennsylvania, Mr. HOLLENBECK, Mr. BOLAND, Mr. BLOUIN, Mrs. HECKLER, Mr. GEPHARDT, Mr. MAZZOLI, Mr. TRAXLER, Mr. VENTO, Mr. HANNAFORD, Mr. WALGREN, and Mr. PATTISON of New York):

H.R. 8438. A bill to enact the National School-Age Mother and Child Health Act of 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. ROGERS (for himself, Mr. PREYER, Mr. CARTER, Mr. MARTIN, Mr. BURGENER, Mrs. BURKE of California, Mr. CEDERBERG, Mr. EVANS of Delaware, Mr. FISH, Mr. GEPHARDT, Mr. GILMAN, Mr. MANN, Mr. MARLENEE, Mr. MCCLORY, Mr. MOORHEAD of California, Mr. MURPHY of New York, Mr. ROUSSELOT, Ms. SPELLMAN, Mr. STUDDS, Mr. TSONGAS, Mr. WIRTH, and Mr. ZEFERETTI):

H.R. 8439. A bill to direct the Institute of Medicine of the National Academy of Sciences to conduct a 1-year review and evaluation of all available information respecting the toxicity and carcinogenicity of food additives, including information respecting the ability to predict the effect on humans of food additives found to cause cancer in animals and whether there should be a weighing of risks and benefits in making regulatory decisions respecting such additives, and to direct the Secretary of Health, Education, and Welfare to permit the continued use of saccharin as a food, food additive, drug, and cosmetic for 18 months; to the Committee on Interstate and Foreign Commerce.

By Mr. ROYBAL (for himself, Mr. AKAKA, Mr. ANDERSON of California, Mr. BADILLO, Mr. BEDELL, Mr. BURGENER, Mrs. BURKE of California, Mr. DELLUMS, Mr. DRINAN, Mr. FORSYTHE, Mr. HANNAFORD, Mr. HEFTEL, Ms. HOLTZMAN, Mr. KASTENMEIER, Mr. KREBS, Mr. LEHMAN, Mr. LLOYD of California, Mr. MITCHELL of Maryland, Mr. PANETTA, Mr. RYAN, Mr. SIMON, Mr. SISK, Mr. WAXMAN, and Mr. BOB WILSON):

H.R. 8440. A bill to provide for payment by the United States for certain medical services and treatment provided to U.S. citizens and permanent residents suffering from physical injuries attributable to the atomic bomb explosions on Hiroshima and Nagasaki, Japan, in August 1945; to the Committee on the Judiciary.

By Mr. THOMPSON:

H.R. 8441. A bill to amend the National Labor Relations Act to give to employers and performers in the performing arts rights given by section 8(e) of such act to employers and employees in similarly situated industries; to the Committee on Education and Labor.

By Mr. VANIK (for himself and Mr. GIBBONS):

H.R. 8442. A bill to improve the operation of the adjustment assistance programs for workers, firms, and communities under the Trade Act of 1974; jointly, to the Committees on Ways and Means, Education and Labor, and Interstate and Foreign Commerce.

By Mr. WON PAT:

H.R. 8443. A bill to require the payment of prevailing rates of wages on Federal public works in Guam; to the Committee on Education and Labor.

By Mr. ASHLEY:

H.R. 8444. A bill to establish a comprehensive national energy policy; to the ad hoc Committee on Energy for a period ending not later than July 27, 1977.

By Mr. FORSYTHE:

H.R. 8445. A bill to amend title 28 of the United States Code, to provide a civil action for damages against the United States and the U.S. Postal Service with respect to tortious conduct of the U.S. Postal Service in the delivery of mail matters, and for other purposes; to the Committee on the Judiciary.

By Mr. SKUBITZ:

H.R. 8446. A bill to provide a punishment of death or life imprisonment for persons who sabotage nuclear facilities, hijack or sabotage vehicles transporting nuclear material, or who coerce others by threatening exposure to atomic radiation, and to provide a procedure for the sentencing of such persons; to the Committee on the Judiciary.

By Mr. WIRTH (for himself, Ms. FENWICK, Ms. HOLTZMAN, Mr. RYAN, and Mr. GORE):

H.R. 8447. A bill to prohibit the use of Federal funds for certain activities designed to support or defeat any legislation or legislative issue on the ballot in any State; to the Committee on the Judiciary.

By Ms. HOLTZMAN:

H.J. Res. 550. Joint resolution designating August 26, 1977, as Women's Equality Day; to the Committee on Post Office and Civil Service.

By Mr. FORSYTHE:

H.J. Res. 551. Joint resolution to authorize the President to proclaim the last Friday of April each year as National Arbor Day; to the Committee on Post Office and Civil Service.

By Mr. CARNEY:

H. Con. Res. 294. Concurrent resolution calling for full freedom and independence for the Baltic States; to the Committee on International Relations.

By Mr. McDADE:

H. Con. Res. 295. Concurrent resolution expressing the sense of the Congress that the U.S. Postal Service should not reduce the frequency of mail delivery service; to the Committee on Post Office and Civil Service.

By Mr. SHUSTER (for himself, Mr. BROOMFIELD, Mr. WHITEHURST, Mr. MURPHY of Pennsylvania, Mr. LUJAN, Mr. HALL, Mr. KINDNESS, Mr. CHARLES H. WILSON of California, Mr. NIX, Mr. MCCLORY, Mr. THONE, Mr. ROBERT W. DANIEL, Jr., Mr. BADHAM, Mr.

WAGGONNER, Mr. WHITLEY, Mr. SEBELIUS, Mr. TEAGUE, Mr. RUNNELS, Mr. D'AMOURS, Mr. APPLEGATE, Mr. MILLER of Ohio, Mr. BOB WILSON, Mr. COCHRAN of Mississippi, Mr. STUMP and Mr. SYMMS):

H. Con. Res. 296. Concurrent resolution to disapprove Federal motor vehicle safety standard 208 transmitted June 30, 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. SHUSTER (for himself, Mr. ALEXANDER, Mr. HAGEDORN, Mr. LAGOMARSINO, Mr. KEMP, Mr. DEVINE, Mr. DUNCAN of Tennessee, Mr. GUYER, Mr. TRAXLER, Mr. ICHORD, Mr. WALSH, Mr. WALKER, Mr. SNYDER, Mr. BURGENER, Mr. MARTIN, Mr. DAN DANIEL, Mr. CORCORAN of Illinois, Mr. ABDNOR, Mr. ASHBROOK, Mr. BAFALIS, Mr. BROWN of Michigan, Mr. DEL CLAWSON, Mr. EDWARDS of Oklahoma, Mr. FINDLEY, and Mr. HANSEN):

H. Con. Res. 297. Concurrent resolution to disapprove Federal motor vehicle safety standard 208 transmitted June 30, 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. SHUSTER (for himself, Mr. HYDE, Mr. KETCHUM, Mr. LOTT, Mr. MARRIOTT, Mr. MITCHELL of New York, Mr. JOHN T. MYERS, Mr. QUAYLE, Mr. QUILLEN, Mr. RAILSBACK, Mr. RHODES, Mr. ROUSSELOT, Mr. TAYLOR, Mr. ANDREWS of North Dakota, Mr. ARMSTRONG, Mr. COLLINS of Texas, Mrs. HOLT, Mr. LEACH, Mr. MARLENEE, Mr. SCHULZE, Mrs. SMITH of Nebraska, Mr. STANTON, Mr. STOCKMAN, Mr. TREEN, and Mr. MILFORD):

H. Con. Res. 298. Concurrent resolution to disapprove Federal motor vehicle safety standard 208 transmitted June 30, 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. SHUSTER (for himself, Mr. BURLESON of Texas, Mr. DAVIS, Mr. SATTERFIELD, Mr. CONABLE, Mr. ROBINSON, Mr. MCEWEN, Mr. MICHEL, Mr. RUDD, Mr. DERWINSKI, Mr. EMERY, Mr. BUCHANAN, Mr. GRASSLEY, Mr. COUGHLIN, Mr. CEDERBERG, Mr. CRANE, Mr. DORNAN, Mr. DICKINSON, Mr. HAMMERSCHMIDT, Mr. QUIE, Mr. MCDONALD, Mr. BAUMAN, Mr. KASTEN, Mr. GARY A. MYERS, and Mr. LATTA):

H. Con. Res. 299. Concurrent resolution to disapprove Federal motor vehicle safety standard 208 transmitted June 30, 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. SHUSTER (for himself, Mr. KELLY, Mr. CHAPPELL, Mr. ARCHER, Mr. GOLDWATER, Mr. STEED, Mr. MATHIS, Mr. SIKES, Mr. NICHOLS, Mr. MOORHEAD of California, Mr. STANGELAND, Mr. ENGLISH, Mr. MONTGOMERY, Mr. JONES of North Carolina, Mr. FOUNTAIN, Mr. JENRETTE, Mr. HIGHTOWER, Mr. BEDELL, Mr. JACOBS, Mr. VANDER JAGT, Mr. BROWN of Ohio, Mr. FRENZEL, Mr. FISH, Mr. BEARD of Tennessee, and Mr. SPENCE):

H. Con. Res. 300. Concurrent resolution to disapprove Federal motor vehicle safety standard 208 transmitted June 30, 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. SHUSTER (for himself, Mr. EVANS of Delaware, Mr. WAMPLER, Mr. RUPPE, Mr. RINALDO, Mr. BYRON, Mr. YOUNG of Alaska, Mr. HORTON, Mrs. PETTIS, Mr. JONES of Tennessee, Mr. YOUNG of Missouri, Mr. HUBBARD, Mr. MANN, Mr. LENT, Mr. SAWYER, Mr. BRINKLEY, Mr. GILMAN, Mr. MOORE, Mr. ANDERSON of Illinois, Mr. WIGGINS, Mr. SKUBITZ, Mr. EVANS of Georgia, Mr. BARNARD, Mr. JONES of Oklahoma, and Mr. WATKINS):

H. Con. Res. 301. Concurrent resolution to disapprove Federal motor vehicle safety standard 208 transmitted June 30, 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. SHUSTER (for himself, Mr. DERRICK, Mr. ANDREWS of North Carolina, Mr. RONCALIO, Mr. GOODLING, Mr. RISENHOOVER, Mr. GINN, Mr. CLEVELAND, Mr. HOLLAND, and Mr. HARSHA):

H. Con. Res. 302. Concurrent resolution to disapprove Federal motor vehicle safety standard 208 transmitted June 30, 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. FOUNTAIN:

H. Res. 698. Resolution insisting upon retention of undiluted U.S. sovereignty over the Canal Zone and the Panama Canal; to the Committee on International Relations.

By Mr. KEMP:

H. Res. 699. Resolution: a strategy for freedom—an outline for human rights; to the Committee on International Relations.

By Mr. MURPHY of New York (for himself, Mr. FLOWERS, Mr. CORNWELL, Mr. CUNNINGHAM, Mr. WATKINS, Mr. EVANS of Delaware, Mr. GILMAN, Mr. CARNEY, Mr. WHITEHURST, Mr. SIKES, Mr. WHITLEY, Mr. COLLINS of Texas, Mr. HANNAFORD, Mr. PRICE, Mr. BENNETT, Mr. DAVIS, and Mr. EILBERG):

H. Res. 700. Resolution relative to the U.S. retention of the Panama Canal; to the Committee on International Relations.

By Ms. OAKAR:

H. Res. 701. Resolution to provide for a procedural and financial review of the financial services offered to Members of the House of Representatives by the Office of the Sergeant-at-Arms; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

232. By the SPEAKER: Memorial of the Legislature of the State of California, relative to marine mammal protection; to the Committee on Merchant Marine and Fisheries.

233. Also, memorial of the Legislature of the State of Florida, relative to commercial airline regulations; to the Committee on Public Works and Transportation.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEARD of Rhode Island:

H.R. 8448. A bill for the relief of Jonathan Joseph Devaux, Donna Marie Devaux, Danielle Jeanne Devaux, Christian Neveda Devaux, Damian Jonathan Devaux; to the Committee on the Judiciary.

By Mr. WRIGHT:

H.R. 8449. A bill for the relief of Lourdes Marie Hudson; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

156. The SPEAKER presented a petition of the Massachusetts Town Clerks' Association, Inc., Chatham, Mass., relative to instant voter registration; to the Committee on House Administration.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5400

By Mr. AUCOIN:

Page 44, strike out lines 17 and all that follows down through page 45, line 3.

And redesignated the following sections accordingly.

Page 25, line 26, strike out "section 13" and insert in lieu thereof "section 12".

Page 26, line 5, strike out "section 17" and insert in lieu thereof "section 16".

Page 38, line 14, strike out "section 17" and insert in lieu thereof "section 16".

Page 39, beginning on line 19, strike out "section 12(a) or under".

Page 22, line 3, strike out "the registration of qualified voters or" and insert in lieu thereof the following: "obtaining and maintaining uniformity in the application, operation, and interpretation of the election laws of any State and".

By Mr. COHEN:

Page 22, after line 8, insert the following new paragraph:

(4) the term "elderly individual" means an individual 65 years of age or older;

Page 22, line 9, strike out "(4)" and insert in lieu thereof "(5)".

Page 22, line 14, strike out "(5)" and insert in lieu thereof "(6)".

Page 22, line 19, strike out "(6)" and insert in lieu thereof "(7)".

Page 22, after line 22, insert the following:

(8) the term "physically handicapped individual" means an individual who needs mechanical or personal assistance to provide for the safety and mobility of such individual;

Page 23, line 3, strike out "(8)" and insert in lieu thereof "(10)".

Page 23, line 6, strike out "(9)" and insert in lieu thereof "(11)".

Page 23, line 13, strike out "and".

Page 23, line 14, strike out "(10)" and insert in lieu thereof "(12)".

Page 23, line 16, strike out the period and insert in lieu thereof "; and".

Page 23, after line 16, insert the following new paragraph;

(13) the term "voting precinct" means the area inhabited by all individuals assigned to one polling place for a Federal election.

Page 31, line 13, insert "and section 6(e)" after "paragraph (2)".

Page 39, line 3, insert "subsections (a) through (d) of" after "provisions of".

Page 39, line 5, insert "if such State is in compliance with the provisions of section 6(e)" before the period.

Page 39, line 9, insert "if such State is in compliance with the provisions of section 6(e)" before the period.

Page 20, line 19, insert ", place," after "time".

Page 21, line 5, insert ", place," after "time".

Page 21, line 10, insert before the semicolon the following: ", and practices which provide physically handicapped and elderly individuals with access to registration and polling places used in Federal elections".

By Mr. VOLKMER:

Page 28, line 19 strike the word "approval" and insert in lieu thereof "review and disapproval".

Page 30, strike out lines 13 through 17 and insert in lieu thereof "(B) The chief election official of any state may exempt any unit or part of a unit of local government from the application of subparagraph (A) with respect to any polling place in said unit of local government at which the chief elec-

tion official considers the separate processing required by such subparagraph to be impracticable or unnecessary."

H.R. 6796

By Mr. DODD:

On page 23, lines 9 and 10, strike "$483,300,000", and insert in lieu thereof "$408,300,000" (and conform the figure on page 20, line 26).

H.R. 7171

By Mr. DE LA GARZA:

Page 130, beginning at line 5, strike out everything down through and including page 131, line 25, and insert in lieu thereof the following:

"INTERNATIONAL AGRICULTURAL RESEARCH EXTENSION

"SEC. 1327. The Secretary of Agriculture, subject to such coordination with other Federal officials and agencies as the President may direct, is authorized to:

"(1) expand the operational coordination of the Department of Agriculture with agricultural research and extension activities around the world by exchanging research materials and results and by conducting joint or coordinated research and extension on problems of significance to agriculture in the United States;

"(2) assist the programs of the Agency for International Development in agricultural research and extension in developing countries;

"(3) work with developed countries on agricultural research and extension, including the stationing of United States scientists at national and international institutions in such countries;

"(4) assist in strengthening research and extension capabilities among United States colleges and universities which are relevant to agricultural development activities overseas; and

"(5) further develop within the Department of Agriculture highly qualified experienced scientists who specialize in international agricultural programs, to be available for the activities described in this section."

By Mr. McHUGH:

Insert the following language after the figure "$75" in section 1205(e)(3) at page 14, line 11: "(adjusted annually to the nearest $5, commencing January 1, 1979, to reflect changes in the shelter and fuel and utilities components of housing in the Consumer Price Index published by the Bureau of Labor Statistics of the Department of Labor for the 12 month period ending the preceding September 30)".

By Mr. ROSE:

On page 52, line 5, insert the following:

STANDARD OF QUALITY

SEC. 910. Section 203(c) of the Agricultural Marketing Act of 1946 is amended by inserting immediately before the period at the end thereof the following semicolon: "; *Provided*, That within 30 days of enactment of the Agricultural Act of 1977, the Secretary of Agriculture shall by regulation adopt a Standard of Quality for ice cream which shall provide that ice cream shall contain at least 1.6 pounds of total solids to the gallon, and weighs not less than 4.5 pounds to the gallon, and contains not less than 20 percent total milk solids, constituted of not less than 10 percent milkfat. In no case shall the content of milk solids not fat be less than 6 percent. Whey shall not, by weight, be more than 25 percent of the milk solids not fat. Only those products which meet the standard issued by the Secretary shall be able to bear a symbol thereon indicating that they meet the USDA standard for "ice cream." "

H.R. 7940

By Mr. GLICKMAN:

In section 19 on page 56, line 23, after "patterns." insert the following: "Notwithstanding any other provision of law, the Secretary, in furnishing commodities to summer camps for children may furnish such commodities to any such camp in which the number of adults participating in camp activities as compared with the number of children under 18 years of age so participating is not unreasonable in light of the nature of such camp and the characteristics of the children in attendance."

By Mr. WALKER:

(Amendment to H.R. 7940, as reported and offered as an amendment in the nature of a substitute to title XII of H.R. 7171, as reported.)

On page 29 of H.R. 7940, after line 22, insert the following new subsections:

(e)(1) The Secretary shall determine that a food is of high nutritional value under section 3(g)(1) and under paragraph (3) of this subsection if such food has an Index of Nutritional Quality which is at least 2 for 2 or more of the following nutrients: protein, vitamin A, vitamin C, Vitamin B6, Vitamin D, Vitamin E, Vitamin B12, phosphorus, iodine, magnesium, folacin, niacin, thiamine, riboflavin, calcium, and iron, or if such food has an Index of Nutritional Quality of at least 1 for 4 or more of such nutrients; except that the Secretary, after consultation with the National Research Council of the National Academy of Sciences, the Food Nutrition Board of the National Academy of Sciences, and the President of the National Academy of Sciences, may make specific exceptions to this definition of condiments or food products which have a significant value in the enhancement of palatability.

(2) As used in this subsection, the term "Index of Nutritional Quality" for a particular nutrient means the ratio of the nutrient content of the food sample to the human nutrient requirement as defined by the United States Recommended Daily Allowances, divided by the ratio of the calorific content of the sample to the United States Recommended Daily Allowance of calories.

(3) Food manufacturers, processors, and producers desiring to have their products approved for purchase with food stamps shall submit an application therefor at such times, in such form, and with such information as the Secretary may, by rule, require. The Secretary shall periodically review such applications, shall approve for purchase with food stamps those products which the Secretary determines are of high nutritional value, and shall transmit a list of products so approved to the Congress. The first such list shall be transmitted to the Congress within one year after the date of enactment of the Agricultural Act of 1977, and subsequent lists shall be transmitted at such times as the Secretary may, by rule, determine appropriate.

(4) Annually after products are first approved for purchase with food stamps under this subsection, the Secretary shall review the products approved for such purchase and withdraw the approval of any product which the Secretary determines to be no longer of high nutritional value.

(5) The Secretary shall notify food stamp recipients and retail food stores and wholesale food concerns participating in the food stamp program of products which are approved for purchase with food stamps and of the withdrawal of the approval of any product for purchase with food stamps.

(f)(1) Within 90 days after any product is approved under subsection (e) for purchase with food stamps, the manufacturer, processor, or producer of such product shall indicate the approval in a conspicuous place on the outside container or wrapper of the retail package of such product; except that if the Secretary determines that it is not feasible to so indicate the approval of any product (such as fresh meat, vegetables, and fruit), the approval need not be so indicated, and the Secretary shall notify retail food stores and wholesale food concerns participating in the food stamp program of such products and shall publish in the Federal Register a list of such products.

(2) Within 90 days after the approval of any product for purchase with food stamps has been withdrawn—

(A) the Secretary shall publish in the Federal Register a notice of such withdrawal; and

(B) the manufacturer, processor, or producer of such product shall remove any indication of the approval of such product from the outside container or wrapper of the retail package of such product.

(g) The Secretary shall select the manner by which manufacturers, processors, and producers shall indicate the approval of products for purchase with food stamps under subsection (f).

EXTENSIONS OF REMARKS

THE RENEGOTIATION BOARD: A MASQUERADE IN THE NAME OF THE CONSUMER

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 19, 1977

Mr. HANNAFORD. Mr. Speaker, decisionmaking involving the many important issues of our time requires first that problem analyses be based on valid premises. In particular, I raise this with regard to pending legislation concerning the Renegotiation Board, H.R. 5959.

No one in this Congress wants to see the Government taken advantage of. Extending the Renegotiation Board, however, does not mean that the Government will be protected, in some way, from the connivings of supposedly unscrupulous defense contractors. Nor does a continuance of this Board mean that American taxpayers will see millions of dollars rolling back into the Federal Treasury.

What we are faced with is a decision on whether or not a wartime Board can be justified during peacetime. Unfortunately, "borrowed trophies" are now being displayed to support the case for the Renegotiation Board. Specifically, I refer to the recent articles on the Lockheed Corp's alleged overcharge to the Government for steel. As Senator CRANSTON and I pointed out in a June 21 "Dear Colleague" letter, the Justice Department is handling this investigation at the request of the Defense Department, whose auditors detected the discrepancy. The Renegotiation Board did not uncover this case; it is simply laying claim to an investigation which it obviously hopes will secure the Board's continuance.

Let us take a look at the history of

this Board. It was created in 1942 and called the Wartime Contract Price Adjustment Board. It was terminated at the end of World War II. Later, in 1951 it was reinstituted as the Renegotiation Board at the beginning of the Korean war. As a wartime agency, when contract negotiations are hasty and no thorough review of costs and pricing data can be conducted, the Board serves its purpose. But an honest assessment of the Federal Government's peacetime procurement efforts involving 54,000 individuals, including about 9,000 auditors, numerous pricing specialists and cost analysts, at a cost of about $1 billion makes it difficult to imagine that renegotiation, serving as a tail end process and often at a considerable lag, can be viewed as cost effective. As an example, the Renegotiation Board's 21st Annual Report, 1976 claims that "excess" profit determinations totaling $40 million were made in 1976. These profits were acquired during the 8-year period 1966–73. This averages out to $5 million per year before taxes. After taxes, this amounts to about $2.5 million and its costs $5.5 million to operate the Board. Moreover, $36 million of the $40 million is tied up in litigation; and the costs of this litigation to the Government and the taxpayer should not be overlooked.

Mr. Speaker, at this point let me mention that one of the most disturbing aspects about the Renegotiation Board is that a subjective process is followed in determining what "excess" profits really are. The GAO has even testified that in the past the Board has not made such determinations in a uniform or consistent manner and that the whole "excess" profits area is very difficult to define. The American Bar Association has also raised this point in its resolution against H.R. 5959. Therefore, the very heart of the Board's function currently stands on a very shaky foundation.

The proponents of H.R. 5959 insist that they have the best interests of the public and the Government in mind. The opponents, too, have the best interests of the Government and the people in mind. We are as opposed to windfall profits going to defense contractors, or any other contractors, as we are to unnecessarily burdensome and duplicative paperwork requirements. We also realize that in this instance, there is no solid basis to the notion that defense contractors are trying to ripoff the Government en masse. Evidence of ample existing safeguards is difficult to overlook. As an example, I attach the following form showing the procurement environment in 1951 as opposed to the procurement environment in 1977:

PROCUREMENT ENVIRONMENT IN 1951

1. Source List (Degree of Competition):

A. Known to Contracting Officer and Procurement Engineering Group.

B. Practically no financial data or performance data.

2. Request for Proposal:

A. Proposal submitted to Contracting Officer.

B. Engineering evaluation by engineering located with C.O.

C. Prior analysis by procurement activity with advisory report. No required comment by C.O.

D. District Administrative Office was advisor for selection process. Prior contractor performance given limited consideration.

E. District Administrative Office reviewed facilities capabilities, available personnel and contractor ethics.

3. After Negotiation:

A. Award of contract and performance of contract.

B. Periodic review by ACO or C.O. or his procurement team.

C. Preferred type of contract was cost plus fee or redeterminable type.

D. Section 15 of Armed Service Procurement Regulations applicable only to cost type contracts.

PROCUREMENT ENVIRONMENT IN 1977

1. Source List (Degree of Competition):

A. Computerized and filed in data bank.

B. Extensive financial, performance, managerial and facility data available.

2. Request for Proposal:

A. Proposal submitted to Contracting Officer.

B. Briefings to potential offerors.

C. Engineering review with participation by engineering representatives from procurement or developing agency, ultimate user organization and Defense Contract Administration Services.

D. Cost analysis by DCAS, Defense Contract Audit Agency and procurement representatives. C.O. must document reasons for overruling cost analysis findings.

E. Source selection review board with members from all agencies.

F. C.O. team assisted by DCAA and Administrative Contracting Officer/DCAS conduct fact finding operation.

G. DCAA comments on estimating procedures used, manpower rates, applicable operating burdens, purchasing performance, applicability of accounting disclosure statement and operational audit results.

H. DCAS Administrative and Engineering comments on adequacy of facilities and manpower, managerial and technical and schedule performance history and projections.

I. Multiple negotiations with winner selected after completion of several negotiations.

J. Issuance by contractor of Certificate of Current Cost and Pricing (Truth in Negotiations).

K. C.O. has advance estimate of costs and prepares "Should Cost" and weighted guideline profit or fee analysis prior to negotiation.

3. After Negotiation:

A. Award of contract and performance of contract.

B. Post award audit by DCAA.

C. Preferred type of contract is firm fixed price.

D. Review of Certificate of Current Cost and Pricing and DD633 Form by DCAA and DCAS to assure Government rights under Defective Pricing Clause.

E. Performance of contract by contractor with on-site DCAA performing operational audits, monitoring incurred costs, performing audits to assure compatibility with contractor disclosure statement, applicable Cost Accounting Standards regulations and incurred costs.

F. Performance of contract by contractor with DCAS monitoring scheduling and engineering performance. Additional surveillance functions performed are: mobilization; insurance; safety; purchasing; management; pricing policy; salary administration; small business; minority business; quality assurance; property administration; security; and modernization.

G. Changes in accounting practices have been mandated through Cost Accounting procedures as follows:

Cost Accounting Standards (1972).

Cost Accounting Standards Board to issue from time to time Cost Accounting Standards designed to achieve uniformity and consistency in cost accounting problems which are to be followed by Government contractors and subcontractors, complete disclosure of accounting practices in every aspect of the business required. Changes in accounting practices must be followed by full disclosure to the Cost Accounting Standards Board.

CAS 401: Consistency in estimating, accumulating and reporting costs.

CAS 402: Consistency in allocating costs incurred for the same purpose.

CAS 403: Allocation of home office expenses to segments.

CAS 404: Capitalization of tangible capital assets.

CAS 405: Accounting for unallowable costs.

CAS 406: Cost Accounting period.

CAS 407: Standard costs for direct material and direct labor.

CAS 408: Compensation for personal absence.

CAS 409: Depreciation of tangible assets.

CAS 410: Business units of General and Administrative expenses to a single cost objective.

CAS 411: Accounting for acquisition of cost of material.

CAS 412: Pension costs.

CAS 414: Cost of money.

H. Section 15 of Armed Service Procurement Regulations which defines allowable and unallowable costs and requires specific allocations is now applicable to all types of contracts.

As one of the prime supporters of H.R. 5959, Admiral Rickover, a widely respected figure in the nuclear propulsion area, has presented his view that there are millions of dollars of "hidden" profits somewhere. I urge the good admiral to have faith in our private enterprise system. The defense industry is comprised of many small, large, and medium-sized firms. They are just as concerned with problems of inflation and unemployment and overall economic well-being as are other businessmen. There is no more reason to renegotiate defense-related procurement during peacetime than the billions of dollars of other goods procured by the Federal Government, and only some 36 percent of the procurements are subject to review by the Board. Sometimes, in the name of the consumer, in the name of the public, the Government can go too far. What is the use of our efforts to reduce inflation and unemployment if we turn around and create more inflation and unemployment through poor legislation? What is the use of our advocacy of eliminating unnecessary bureaucracy if we refuse to recognize and eliminate an unnecessary Federal agency that is staring at us in the face!

On a legal and economic basis, the legislation contains serious flaws. Numerous constitutional questions are raised in addition to unfounded assumptions of the defense industry.

The Defense Department, for instance, opposes this legislation. In a study of the defense industrial base conducted by the Department in 1976, profitability before taxes on sales to the Government was on average lower than on sales to the commercial sector.

	Percent profit				
Sales:	1970	1971	1972	1973	1974
Commercial	16.0	12.6	17.3	18.6	19.4
Government	4.6	4.7	4.7	5.0	5.2

The annual average during the 1970–74 period of profitability on sales to the Government was 4.7 percent as compared to 17.1 percent in the commercial sector.

In brief, this study concludes that defense industry profits are not exorbitant, that capital formation and invest-

ment in the industry need to be encouraged. As a result of this study, in which the Conference Board also participated, the Defense Department revised its profit policy and other procurement initiatives. In testimony last year before the Joint Defense Production Committee, a Defense Department representative stated:

. . . the new policy provides for consideration of profit on demonstrated unit cost reductions resulting from productivity improvements. This approach emphasizes that it is our objective to reduce contract price and that we are willing to reward productivity when it yields lower prices.

H.R. 5959 would undermine this policy. Another error of major import is that the Renegotiation Board's determination of "excessive profits" fails to take into consideration the degree of risk in the defense industry. In this regard, the Conference Board's study of the defense industry revealed that major financial institutions considered the industry, as compared to average commercial endeavors, highly risky.

Mr. Speaker, in closing let me add that the Renegotiation Board is not synonymous with good government. A careful assessment of our existing peacetime procurement rules and regulations provides a clear-cut case against H.R. 5959. The more than 200 Members who support my position that the Board should be limited to wartime activity have undertaken a rational, factual analysis of this legislation. We refuse to be swayed by emotional appeals and misleading arguments to keep an ineffective Board in business.

CONCERN FOR AMERICA'S FUTURE

HON. GARRY BROWN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 19, 1977

Mr. BROWN of Michigan. Mr. Speaker, on Memorial Day a former Logan County School Superintendent, Mr. John Stanfield, delivered an outstanding speech which I am delighted to share with this body. He discusses the motivating force upon which this country was founded—patriotism. His love for America comes from the heart and is a result of his experience both in this country and from abroad. The concern he has shown for America was reflected in his job as well as in everyday life. I am proud to say this concern for America is typical of the individuals in Ohio's Seventh Congressional District. I would like to have Mr. Stanfield's remarks reprinted here for the benefit of my colleagues:

MR. STANFIELD'S REMARKS

Mr. Brown, Honored Guests, Friends: Each time we take part in a Memorial Day program or attend ceremonies like these; as we watch the American flags wave in the breeze, hear the bands, we try in our hearts to understand and appreciate the trials, heartaches, moments of torment or happiness that those who have made America the country that it is. We are proud of them and thankful for them. Today is a day for remembering those earlier Americans who lived, struggled to build, and died under tremendous hardships to give us our heritage—this country, this community.

We often severely criticize some aspects of our national life, and perhaps it is good to be able to see where we are wrong and try to correct matters. But if you have ever lived for any time abroad you quickly learn that America is a country of which we can be proud. This concept was repeatedly brought home to me when I conducted American farm leaders on tours of Egypt and Pakistan a few years ago. Without exception the participants would say to me, "John, as I leave this country and return to American soil, I will get down on my knees and thank God that I am an American citizen."

Did you ever help a child make a kite and share with him that eager questioning anticipation which is so much a part of the whole fashioning process? Will it fly? Will it gracefully ride the winds? What if a sudden squall comes up? Will it buckle and dart disastrously into a tree? It wasn't the calm and steady breeze that you needed to be concerned about. It was the turbulence that offered the real test of your kite-making skills.

Have you ever said, or heard it said, "I don't want my child to have as hard a time as I did"? We forget that turbulence is the real test of whether or not we can successfully meet the challenges of life. Today we are beginning to see that a hard testing of our unselfish love of country is becoming as we see that the rapid depletion of the world's natural resources will force us to change our lives, no matter where we live.

There are fundamental aspirations that Americans can hold, basic to our lives now, especially in the light of the rapid worldwide changes we are experiencing. Elmer Morgan has summarized those aspirations and ideals that have brought happiness, achievement and fulfillment to many Americans. He listed them as follows:

1. To be a good father, mother, sister, brother, or friend.

2. To be dependable, faithful, a skilled worker in the home, school, office, Church, field or factory.

3. To be an intelligent, honest, useful and loyal citizen, with faith in God and a love of fellowman.

4. To recognize the brotherhood of man and live by the Golden Rule.

Some of these things may appear as common, ordinary . . . little things. But if carefully examined we will find them to be the most important factors for good in our lives!

The common things in life are the things that have made the uncommon American!

Dean Rusk, former Secretary of State, was invited to a New England college campus to lead a discussion on "Values". He talked of little things, small things: Such as honor, love, faith, character, integrity, sacrifice, patriotism. Following the discussion, as Mr. Rusk walked from the room a dead silence fell over the group. Then . . . tremendous applause. They had understood what he said.

Men and women that we remember—as we look at the lives of those people we realize that they lived by values that made their lives more meaningful, and the world in which they lived more liveable! This could be a realistic goal for each of us—A more liveable world in which to live!

While this day is for remembering those who sacrificed their lives in war to preserve our freedoms, we also remember those who returned to pick up the torn threads of their lives and those families at home who also suffered the pangs, doubts and losses of war. All felt loyalty and duty to country and were willing to pay a high price for the privilege of American citizenship.

What is an American citizen?

President Lincoln once said: "Let reverence of the laws . . . become the political religion of the nations." He was saying that laws are needed and it is necessary that we respect and observe them. Law is a great instrument for social justice—when applied evenly and fairly.

Another president, Theodore Roosevelt, said, "No man is above the law, and no man is below it." He was saying "equal justice for all".

Thus both men highlighted the importance and the correct application of law in the American way of life.

Again, I believe that the American concepts of compassion, dignity, honesty, integrity, loyalty, patriotism, and love of fellowman that were woven into our Constitution and national life, by our Founding Fathers whose thinking was based on the Judeo-Christian ethic, are of everlasting value.

Not all believe this to be true! There are many thousands of people, many groups, that are doing all they can to destroy religion, the law, the schools, the family and the Constitution itself!

Let us think for a moment of some events in our national life. As I name them ask yourselves if you think they should become the accepted standards for our state or nation:

1. Graft, greed, lying, stealing and other crime in government circles.

2. The Supreme Court decision sanctioning abortion. How can we rationalize our righteous indignation of Hitler's slaughter of the Jews in the death camps of World War II, and yet accept this decision and the low value it places on human life.

3. The 'Do your own thing' concept—no matter the cost to others or self.

4. Media programming that is contrary to the basic tenets of Christianity.

5. The 'God is dead' movement with its far-reaching consequences on both youth and adults.

6. Food stamp scandals . . . workmens compensation scandals . . . welfare scandals . . . medicare.

7. The modern view of some that the family is out-dated.

8. Lotteries wherein the State exploits the weakness and greed of its citizens to secure funds. Historically, such governments have declined!

9. State-owned liquor stores, acceptance of prostitution, homosexuality, hard-core pornography.

10. Ruling prayer and expression of religion out of our public schools. I would like to enlarge on this subject: a bit later.

Along these same lines Wm. J. Rogers, present Commander of the American Legion, speaks of America as a 'troubled land' and says that many Americans are filled with doubts; too many are asking if we have fallen victims of our own excesses, too many see old standards, old traditions crumbling, with little evidence of strong new standards rising . . . ordinary Americans are worried that values they fought for are slipping away. He continues:

"Terrorists seize hostages, kill innocent people, posture for TV cameras, mock the police and even demand conversation with the President of the United States.

"Discouragement or disillusionment with government at all levels borders on cynicism. Crime has spawned a silent fear that now pervades many once-proud cities.

"Concerned parents are pulling the plug on dubious, if not offensive, TV programs.

"Neighborhood theatres offer 'parental guidance' rated movies that make many parents blush, and X-rated fare that is artistically redeeming only in the eyes of judges wearing blinders!

It is a cliche to say that this is a dangerous moment in our history. The phrase hase been the editorial writer's prerogative for 200 years. But this is a moment of disquiet in America and it troubles many people. (Symptoms of this disquiet are found each day on the front pages of our newspapers and on each day's newscasts.)"

On the matter of ignoring prayer and religion in our public schools:

The Amendment to our Constitution in 1789 reads as follows: "Congress shall make no laws, respecting the establishment of religion or prohibiting the free expression thereof."

In my judgment the founding fathers had no intention of eliminating everything religious from the official life of our nation. As witness to this we note the ff.

1. The existing numerous government documents and statements that recognize God as the Divine leader of our country.

2. Many mayors, Presidents' and governors' calls to prayer and Thanksgiving proclamations.

3. Prayers in the Halls of Congress.

4. In the 1950's Congress added the words 'under God' to the pledge of allegiance following the words 'one Nation'.

5. Oaths of office by government officials taken on the Bible.

There can be no question that our forefathers believed that independence was possible only when there is a 'Firm reliance on Divine Providence.' The above amendment, in my judgment, was to guarantee the separation of Church and State as institutions, wherein government was not to control the church and no church was to control the government. The reason for this was simple . . . the Founders remembered the evils that arose from such things in Europe. The amendment certainly does not eliminate all government controls over religious activities, nor does it eliminate all religious expressions from public life. A nation 'under God' cannot run roughshod over the ideals of justice and honesty that are a part of our religious heritage.

In summary it appears to me that our country is faced with four crises and in the ff. order:

1. A religious crisis! When civilization is built upon technologies and machines that ignore the dignity of man, reject responsibility to God, then a type of Communism is the logical result.

2. A moral crisis! People have come to think they can do anything they want to, and get away with it. But society cannot endure without moral sanctions: It disintegrates!

3. A political crisis: As certain that night follows day, when society fails religiously and morally it is certain to fail politically.

4. Economic crisis: When economic problems are solved by selfish strife, greed, special interests, enslavement and war—at that moment we have created the ultimate moral/religious crisis. So the cycle continues until we destroy ourselves as a nation.

Government cannot provide all things to all people. We give up some right, freedom or independence for every function we turn over to government in return for more paternalistic catering to our many wants.

All the present-day claiming of 'democracy and rights' will be meaningless unless a life worth living, a spiritual life, is achieved by the individual!

Josiah Gilbert Holland gave us these thoughts:

God, give us Men! A time like this demands,
Strong minds, great hearts, true faith and ready hands;
Men whom the lust of office does not kill,
Men whom the spoils of office cannot buy,
Men who possess opinions and a will,
Men who have honor; men who will not lie.
Men who can stand before a demagogue,
And damn his treacherous flatteries without blinking,
Tall men, sun-crowned, who live above the fog,
In public duty and in private thinking.
For while the rabble, with their little deeds,
Mingle in selfish strife, Lo, Freedom weeps,
Wrong rules the land and waiting Justice sleeps.

America has always had such men—men who have risen to many crises. I believe that the true American spirit still burns in many hearts and that her people will meet the challenge of these times.

CARTER'S COKE CONNECTION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 19, 1977

Mr. McDONALD. Mr. Speaker, this may not be quite the "Coke Connection" which has been discussed at length in the Spotlight, but it is a suggestive enough conflict of interest not unrelated, in that it involves the Coca-Cola Corp.

William Safire has done a nice job in his July 7 column on "Carter, Coke, and Castro."

[From the New York Times, July 1, 1977]

CARTER, COKE AND CASTRO

(By William Safire)

WASHINGTON, July 6.—The Atlanta-based Coca-Cola Company's long-term investment in Jimmy Carter has begun to pay off.

Campaign contributions from Coca-Cola executives swelled the Carter coffers when he was Governor of Georgia; Coca-Cola corporate aircraft bounded him around the nation, as he picked up political support while ostensibly promoting the state; and Coca-Cola chairman J. Paul Austin hosted a luncheon in New York's "21" to raise a major bundle for the Carter Presidential campaign.

That was the investment; here is the return:

1. Proposed windfall payments benefiting sugar processors. Coke is the biggest buyer of sugar—a million tons a year—and wants prices kept low. Strangely, as sugar prices have dropped, soft-drink prices have risen, a market anomaly that Coke would like to see continue.

But because of sugar-dumping around the world, the price is now too low to produce profitably in the United States. To keep U.S. producers in business and to prevent future price-gouging, the U.S. Trade Commission, after lengthy study, recommended a two-cent duty on incoming sugar.

Coke did not like that. Through the "Sugar Users Group"—a trade lobby run by Coca-Cola vice president John Mount—it sold the Carter Administration a scheme that would save big processors money at the expense of taxpayers.

President Carter rejected the two-cent duty (which would have added money to the U.S. Treasury) and instead proposed a subsidy (taking money from the Treasury). In the name of free trade, Mr. Carter adopted a weird form of protection: instead of raising the price of sugar to Coca-Cola with a duty, he would protect corporations like Coke by paying their suppliers an estimated $240 million a year to cover losses. Although Kansas Senator Bob Dole has blocked this ripoff with an amendment limiting payments to $50,000 per grower, Coke lobbyists can expect to overcome resistance soon.

2. Using the Carter connection. On June 4, Coke's J. Paul Austin went to Havana to meet with Fidel Castro. Upon his return from Cuba, Mr. Austin met in the White House with his friend, recent Coca-Cola stockholder Jimmy Carter.

The Coca-Cola Company refuses to say what Mr. Austin discussed with Mr. Carter or Mr. Castro. The White House also refuses to reveal what Mr. Austin reported.

Couple of questions arise. Whom did Mr. Austin represent in his talk with Mr. Castro? Since Coca-Cola stockholders paid for his trip, and since Coca-Cola has a $27.5-million claim against Cuba for the confiscation of its properties in 1961, one would assume the Coke chairman went on behalf of the Coca-Cola Company.

Why, then, the hush-hush briefing of the President immediately upon his return? The White House insists that Mr. Austin was not sent as an emissary. Coca-Cola stonewalls completely, saying only that Mr. Austin and Mr. Carter did not discuss sugar prices.

Assuming that to be true, logic dictates the answer: Mr. Austin carried the President's personal greetings to Mr. Castro; after talking business with that lubrication, the Coke chairman asked if he could carry a message to his friend, President Carter; and the Cuban leader took him up on the kind offer, just as Mr. Austin and Mr. Carter knew he would.

That was the reason for the Austin-Carter White House meeting immediately upon his return from Cuba. The President now has an "unofficial channel" on matters affecting trade relations between the United States and Cuba—who happens to have a huge economic interest in the outcome.

What's wrong with that? Everything.

First, the unofficial ambassador trick neatly circumvents the Congress, which is supposed to confirm and be able to question ambassadors. The Senate Foreign Relations Committee is still a doormat, but one hopes the House International Affairs Committee—as well as the overseers of foreign trade decisions—will soon question the man who is carrying the word from Mr. Castro.

Second, the President's conscious use of Mr. Austin involves the White House in the most brazen conflict of interest. It is no secret that Coca-Cola is dying to do business with Cuba, especially if the U.S. taxpayer is made to subsidize the U.S. cane, beet and corn sweeteners. In that case, is the Coke boss really the person to use for "reports" or private messages from Cuba's boss?

Partisans with good memories will claim a precedent from the Nixon years with Pepsi president Don Kendall opening the Russian market; but even if the case were the same (which it is not), since when are all the actions of the Nixon Administration to be held up as moral criteria for the Carter men?

If this is an open Administration, let's get some answers: What nonbusiness matters did the Coke chairman discuss with Mr. Castro? What business-related matters did he discuss with Mr. Carter? Should a President send a campaign contributor with "personal greetings" to another chief of state when he knows it is a gambit for a business deal?

The Carter-Coke-Castro sugar diplomacy is not merely a potential conflict of interest. It's the real thing.

ALASKAN NATURAL GAS—PART VI: WHAT ABOUT THE NEW ROUTE?

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 19, 1977

Mr. MURTHA. Mr. Speaker, in part V of this series I noted the decision by the National Energy Board of Canada recommending a revised Alcan line project to deliver Alaskan natural gas to the lower 48 States. Upon reviewing that decision, it becomes clear what the Canadian Energy Board really recommended was a new route, with new requirements, that has not been looked at in great detail by American governing bodies.

I would like to insert in the RECORD a

letter from John C. Bennett, of the competing El Paso/Alaskan line, to Presidential Energy Assistant James Schlesinger. The letter well outlines the potential problems and decisions with the new Alcan proposal, and shows how careful consideration of this decision must be to protect the American consumer:

EL PASO ALASKA CO.,
Washington, D.C., July 12, 1977.

Hon. JAMES R. SCHLESINGER,
Assistant to the President,
The White House,
Washington, D.C.

DEAR DR. SCHLESINGER: My purpose in writing this letter is to bring you up to date on some very significant developments which impact on the pending decision concerning how best to market Prudhoe Bay natural gas in the "Lower 48" states. We are in a new ball game, and it is imperative that all concerned understand the recent turn of events.

The decision by Canada's National Energy Board (NEB) on July 4 narrowed the American choices to two: the El Paso project and the new Alcan project. The adjective "new" is fully justified by the NEB's requirements for a new routing in both the U.S. and Canada, a new commingling of Canadian and U.S. gas, an undefined new Canadian corporate structure, a new tax to be borne by U.S. consumers, and requirements for substantially new and different tariffs and plans for financing.

The NEB in effect has advocated the third in a series of proposals which have all been labeled "ALCAN." The first was proposed in 1976 and rejected as unworkable by Judge Nahum Litt on February 1 of this year. The following month (March 8) Alcan introduced a second application. Without calling a single witness to be cross-examined on the alleged costs, environmental studies, etc., of the new proposal, the FPC reversed Judge Litt with two commissioners recommending approval of the new Alcan application on May 1. The latest (third) Alcan project is that revealed by the NEB on July 4. This proposal is literally a combination of assertions by the applicants and as yet unstudied Canadian modifications.

The El Paso proposal, in stark contrast, was examined for more than two years on a sworn record of over 45,000 pages, and has not been modified in any respect since undergoing that exhaustive cross-examination of its costs, schedules, engineering, financing, etc.

Let us now examine what is known about the current proposal which has been recommended by Canada's NEB. Please bear in mind that the following comments accept without question the assertions of the applicant and the NEB, an acceptance which in itself ignores many unknowns about Alcan. The following significant points merit your attention:

To date, the alleged costs (in mid-1975 dollars) of the Alcan project have changed from the originally announced $4.7 billion for facilities only in Alaska and Canada to over $8.5 billion for facilities which include reroutings in Alaska and Canada, a lateral to the Mackenzie Delta along the Dempster Highway, and pipelines in the Lower 48 states.

Additional costs, for which no estimates have even been made, include the costs of the socioeconomic monitoring organization in Canada, the cost of the native claims settlement (if indeed they are settled), the costs of the required new studies and applications for the added legs in Canada, and the costs of the Canadian requirement that gas will be distributed by the applicant to service.

The gas consumption (shrinkage) required by Alcan to deliver Prudhoe gas to U. S. markets has spurted from 6.4% to 11.3%. El Paso's total gas useage (taking no credit for recovery of cryogenic energy) is 10.9%.

The effect of increased capital costs and increased shrinkage will certainly impact the transportation cost of Alcan adversely. We cannot at this point accurately quantify that impact, but hope to have a reliable estimate within two weeks.

The net economic benefits (reported to favor Alcan by the Executive Task Force in its study presented to the President on July 1) are now greater for El Paso than for Alcan, largely because of the increased shrinkage referred to above.

The NEB clearly insists that Canadian political and corporate control be complete. American companies may contribute equity and debt capital, but will have no control over corporate decisions. American consumers will pay bills that are the result of exclusive Canadian political and corporate control.

The NEB requires that the Alcan companies pay up to $200 million for the social services in Canada. This requirement leads inexorably to one of two conclusions:

(a) The hydrocarbon treaty between the U.S. and Canada has been violated by "discriminatory taxation" even before its ratification by the U.S. Senate, OR

(b) If this $200 million tax is claimed not to be discriminatory, then we must conclude that Alcan has already been judged to be a unique pipeline (e.g., the only 48-inch line crossing Canada). If this judgment is accepted, then the hydrocarbon treaty provides no protection for future taxation on the Alcan line across Canada. To put it bluntly, we owe a debt to the Canadian NEB for having clarified this important question before the U.S. decision has been made on which project to approve. What many considered an ambiguity in the treaty has been clearly decided by the NEB. Fortunately, a trans-Canadian pipeline is not yet in the ground; if it were, the American consumer would be helpless against such discriminatory taxation.

The financing of Alcan is almost a "Catch 22" series of decisions. Alcan's original proposal commingled Canadian and American gas, making a private financing unworkable, and thus requiring backstopping by the Canadian and U.S. governments. Alcan's second proposal involved transporting only U.S. gas; Alcan then stated that a private financing was possible and dropped its requirement for government backstopping, although it admitted that legislation would be required. In its July 4 decision the NEB clearly stated that no Canadian taxpayer support would be available, but then modified Alcan back to commingling U.S. and Canadian gas. The combination of a commingled gas stream and the NEB's opposition to Canadian government financial support raises grave doubts as to the financeability of the Alcan proposal.

The decision of the NEB dictating a new route in Canada will necessitate a rerouting in Alaska, which could involve as much as 115 miles outside any established corridors. Until such routing is decided, no EIS can even be prepared. The Alaska Natural Gas Transportation Act of 1976 provides that "the President shall find that any required environmental impact statement . . . has been prepared and that such statement is in compliance with the National Environmental Policy Act of 1969." The rerouting in Canada traverses 363 miles of new territory for which there is no environmental assessment. This, coupled with the 460-mile lateral to the Mackenzie Delta, introduces a total of 823 miles of new routing in Canada for which no environmental data has been examined by the NEB. Thus, the potential for substantial additional delay has been introduced by the NEB decision.

In stating that the native claims in the Yukon "offer more potential for earlier resolution," the NEB threw down the gauntlet to the Council for Yukon Indians.

The NEB decision makes it very clear that the "Canadian content" of the Alcan project will be controlled at the federal level. This control is pervasive, including control of equipment purchases. Canadian policy was vividly illustrated in 1975 by Canadian insistence that Imperial Oil award an engineering contract to a Canadian firm for $20 million, in spite of the fact that the American Fluor Corporation had bid the project for $16 million.

In short, the NEB decision presents the United States with more difficulties—known and "unknown"—than any of the previous Alcan application proposals. Should the United States approve the present Alcan application by the deadline of September 1, it should be done in full realization of the implications of unproven financing, potential aditional delays for a new EIS, greatly increased capital costs, the increased shrinkage in the new system, exposure to future discriminatory taxation, the price of a native claims settlement (if and when it can be accomplished), and the consequences of total Canadian political and corporate control over the next fifty years during which a pipeline across Canada would operate.

The alternative is ready for immediate approval—El Paso's proposal remain the only option over which the U.S. government can exercise meaningful control throughout its years of service.

Prudhoe Bay gas was discovered in 1968, and is needed now in our country. El Paso presents the only timely alternative available to the nation.

Thank you for your continued interest in this impending decision. We are at your call should you require any additional data of any kind.

Sincerely,

JOHN BENNETT.

FRIEDMAN ON FREEDOM

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 19, 1977

Mr. COLLINS of Texas. Mr. Speaker, I was recently reading over "Capitalism and Freedom" written in 1963 by Milton Friedman, awarded the Nobel Prize for Economics in 1976. I wish to share some of his thoughts with you:

"Which if any of the great 'reforms' of past decades has achieved its objectives? Have the good intentions of the proponents of these reforms been realized?

"Regulation of the railroads to protect the consumer quickly became an instrument whereby the railroads could protect themselves from the competition of newly emerging rivals—at the expense, of course, of the consumer.

"An income tax initially enacted at low rates and later seized upon as a means to redistribute income in favor of the lower classes has become a facade, covering loopholes and special provisions that render rates that are highly graduated on paper largely ineffective. A flat rate of 23½ percent on presently taxable income would yield as much revenue as the present rates graduated from 20 to 91 percent. An income tax intended to reduce inequality and promote the diffusion of wealth has in practice fostered reinvestment of corporate earnings, thereby favoring the growth of large corporations, inhibiting the operation of the capital market, and discouraging the establishment of new enterprises.

"Monetary reforms, intended to promote stability in economic activity and prices, exacerbated inflation during and after World War I and fostered a higher degree of instability thereafter than had ever been experienced before. The monetary authorities they established bear primary responsibility for converting a serious economic contraction into the catastrophe of the Great Depression from 1929–33. A system established largely to prevent bank panics produced the most severe banking panic in American history.

"An agricultural program intended to help impecunious farmers and to remove what were alleged to be basic dislocations in the organization of agriculture has become a national scandal that has wasted public funds, distorted the use of resources, riveted increasingly heavy and detailed controls on farmers, interfered seriously with United States foreign policy, and withal has done little to help the impecunious farmer . . .

"A housing program intended to improve the housing conditions of the poor, to reduce juvenile delinquency, and to contribute to the removal of urban slums, has worsened the housing conditions of the poor, contributed to juvenile delinquency, and spread urban blight.

"Social security measures were enacted to make receipt of assistance a matter of right, to eliminate the need for direct relief and assistance. Millions now receive social security benefits. Yet the relief rolls grow and the sums spent on direct assistance mount.

"The list can easily be lengthened: The silver purchase program of the 1930's, public power projects, foreign aid programs of the postwar years, F.C.C., urban redevelopment programs, the stockpiling program—these and many more have had effects very different and generally quite opposite from those intended.

"The greater part of the new ventures undertaken by government in the past few decades have failed to achieve their objectives. Government measures have hampered not helped. The central defect of these measures is that they seek through government to force people to act against their own immediate interests in order to promote a supposedly general interest. They substitute the values of outsiders for the values of participants; either some telling others what is good for them, or the government taking from some to benefit others."

His comments are even more enlightening today as our liberal Congress continues to intervene in the daily lives of our people and gradually take away the freedoms that have made our country great.

INTERN IN CONGRESSIONAL OFFICE

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 19, 1977

Mr. WHALEN. Mr. Speaker, the experience of an intern is a rewarding and educational one, in which the sheltered classroom is left for the bustling office. For many young people, the role of an intern is the first exposure to the world of the decisionmaking executive. The Executive High School Internships of America—EHSIA—is a national program which promotes this special learning experience.

I came across an article in the Montgomery Journal of July 14, in which a high school intern under EHSIA recounts his experiences working in the office of our colleague, SIL CONTE. I am enclosing the article, which I thought would be of interest to my colleagues:

CAPITOL HILL SCHOOLS CONFLICT, COMPROMISE, REALITY

(By Martin Weinstein)

In the senior year of high school, parties abound, school is abolished, beer flows freely, and nobody but nobody looks for extra work.

Nobody that is, except for 22 predominantly senior-year interns, who by choice and by qualification were nominated for and were accepted in the Executive High School Internships of America (EHSIA) program. If you haven't heard of this program, then you are among the 95 percent majority who believe that an intern is a student who has just graduated from medical school and works in a hospital. But EHSIA is an intern program that puts high school students in working environments with executives.

I found out what EHSIA really is through an internship under the tutelage of Jeffrey Jacobs, chief legislative assistant to Congressman Silvio O. Conte (R.-Mass.) It was on my first day on the Hill that I realized that the protection high school gives its students had evaporated and that this was the real world. The bells were still there (indicating the various procedures on the House floor), but there was no one, with the exception of Jeff, to direct me every minute of the day.

My greatest problem that first day was a basic one: how to deal with the horrendous traffic and the difficulty of finding a parking space. Being a lower peon, I was not entitled to a parking space, except for the one I scrounged up on the street six blocks from where my office was to be. That office, located in the Rayburn House Office Building, turned out to be both modern and well-equipped.

The first job of any high school intern is to integrate himself into office life—to gain acceptance. This is a particularly difficult task when one realizes that a 17 or 18 year-old student with little or no office or technical experience hasn't much in common with an established executive twice or three times his age.

For me this task was considerably easier since my sponsor, Jeff Jacobs, is a young—24-year-old graduate of Williams College who will be returning to the University of Chicago Law School this fall. Furthermore, 99 percent of the interns on Capitol Hill are college or graduate students. But, by donning a jacket and tie every morning, I was able to add a few years to my present age of 18.

My first assignment was to establish the affirmative case for the building of an international airport in Lesotho, a tiny black-African nation, surrounded totally by apartheid South Africa. This case was not hard to make, as the present dirt strip airport is woefully inadequate. No planes large enough to fly through South Africa without stopping can be accommodated at the airport.

In addition, weather and the fact that the airport is constructed on the top of a cliff, make afternoon landings inadvisable at best. All of this and much more was reason enough for Mr. Conte to be in strong support of the construction of a multi-billion dollar international airport in Lesotho. This proposal was to be made in a bill which was assigned to the Foreign Operations Subcommittee chaired by Maryland's Clarence Long, a subcommittee of which Mr. Conte is a member. I learned on that first assignment that the title "Mr." is used only in reference to Congressmen or to committee counsels.

Later, during my first week, I was introduced to compromise, the holy word on Capitol Hill. This particular compromise dealt with an acute problem in this country; the lack of accredited veterinary schools. Just a few years ago, less than 10 accredited schools served the entire nation. One of these schools was located at the University of Pennsylvania in Philadelphia and one at Cornell University in Ithaca, N.Y.

It was then, and is now, no secret that entire regions, such as New England, lacking veterinary schools of their own, contract with schools like Penn and Cornell for spaces to accommodate those students from regions like New England who want to go into veterinary medicine. Those spaces number less than 100 and serve regions with millions of students. Therefore, the competition for a spot in a veterinary school is keen.

Mr. Conte joined forces with Congressman Joe Early (D-Mass.) to try to get a $10 million grant for the construction of a New England veterinary school on the grounds of Tufts University in Medford, Mass.

But, to get the money appropriated, the measure would have to be passed by the Appropriations Committee's Subcommittee on Labor-Health, Education, and Welfare. This subcommittee, on which both Conte and Early serve is chaired by Congressman Daniel Flood (D-Pa.). On the Senate side, where the measure would have to be approved also, the Senate's counterpart subcommittee is chaired by powerful Senator Warren Magnuson (D.-Wash.).

It is a well-known fact that very few pieces of legislation to which the chairman are opposed are reported out of a subcommittee. This is a major reason for the fact that out of the 10,000 pieces of legislation introduced in the House each year, only approximately 800 are finally voted upon on the House floor; about 500 are passed and 300 are rejected.

What appeared imperative in the veterinary case was to have the support both of Congressman Flood and of Senator Magnuson. Flood, a Pennsylvanian, whose school stood to lose New England's top students, wanted the enlargement of the University of Pennsylvania veterinary school. Magnuson, from Washington State, wanted a regional veterinary school for the Pacific Northwest in Pullman, Wash.

In a meeting held in Congressman Early's office and attended by Jeff, Early's legislative assistant, Dean Marschak of the University of Pennsylvania Veterinary School, a medical lobbyist, and me, the final compromise was reached. New England would get its veterinary school at Tufts University, the Pacific Northwest would get its veterinary school at Pullman, Wash., and the University of Pennsylvania Veterinary School at Philadelphia would be enlarged. I said nothing throughout the meeting, observing that democracy, when at work, does work and it works well.

A few days later, I was given the assignment of attending a conference of FEERRAT, in place of Jeff who could not go. Contrary to popular belief, this FEERRAT is not a little animal, but stands for the Friend of Eye Research, Rehabilitation and Treatment organization. Immediately on my arrival at the Mayflower Hotel, where the conference took place, I was mistaken for somebody important, and given a badge that read, "Martin Weinstein-Cong. Conte's Staff."

The director of the conference began to impress upon me the importance of eye research as did the other eminent speakers, who were suffering from identity. In addition, the director asked for my support in

securing the sum of $118 million for eye research. I told him that I too, believe that eye problems warrant considerable study and that I extremely would use my limited (extremely limited) influence to secure that sum for eye research.

Not all days consisted of the excitement of being mistaken for somebody important. Most of my days were taken up reading hearings and reports, followed by writing hearing questions for Mr. Conte's use in the examination of witnesses before the various committees on which he serves.

In fact, attending hearings, reading reports, and learning about economics took up about three-quarters of my time. Only when I begin dealing with raw numbers and individual projects, did I realize just how little I knew about the basics of an economic system. To the average high school student, a "fiscal year" is a year in which there is a lot of body contact. Instead, it is, of course, a period of economic measurement which was recently changed from an initial date of July 1 to October 1.

The average day on the Hill is far from the exciting life and death decision-making that most people believe. For most people in the office, including me, each day consisted of learning as much as we could about as many issues as possible. The pace was hectic, and in my case, the result was a case of mononucleosis.

Although I had left Northwood High School as a full-time student, I still wanted to continue as a Northwood track runner and as the sports editor of the school newspaper, the Red and Black. In addition to journalism, I continued advanced placement American history on an independent study basis

These obligations meant that I would rise at 6:30 a.m. every morning to go running in order that I might leave for the office by 8:00 a.m. I would arrive at the office at about 9:00 a.m. But since I had to be at track practice by 2:30 p.m. I would have to leave the office at about 2:00 p.m. Therefore, all the work which was usually done during a school day now had to be done at night. The result was one month in bed with mononucleosis.

During my brief semester on the Hill, I did manage to explode a number of my misconceptions about the work and the workers on Capitol Hill. Although I had had the opportunity to work for the Senator Jackson for President Committee during the 1976 campaign I had not, up until now, had the chance to observe day to day life in a regular office setting.

First of all, my sponsor, Jeff Jacobs, puts in a work week approaching 80 hours. He works on most Saturdays and seldom leaves the office before 10:00 p.m. on weekdays. In addition, Jeff puts in what are called "all nighters", in which he works through the night. During hearing season, which lasts from January to April, Jeff may put in up to three all-nighters a week.

Like Jeff, the rest of Mr. Conte's staff is highly competent and exhibits none of the laziness or disloyalty which a disillusioned public has come to associate with Capitol Hill staffers. If a staff member cannot measure up to Mr. Conte's standards, then he does not last long. Although my opinion of Mr. Conte's staff is biased, in fact the staff is widely acclaimed both on the Hill and in government as being just what I saw—competent, dedicated and loyal.

Congressman Silvio O. Conte, the man for whom all these people labor, represents his constituency well. If being a good congressman means giving the Berkshire County, Mass. Elementary School Patrols a personal tour of the Capitol, posing for pictures with a visiting nun, and flying home to speak before local audiences almost every weekend, then Silvio Conte is a superior congressman.

Moreover, Mr. Conte votes his conscience on every piece of legislation; whether it means voting for common site picketing or against abortion. Mr. Conte, just like any other man is receptive to suggestions up to a point. At that point, conscience takes over and politics takes a back seat.

Now, one can ask what the EHSIA meant to me to warrant my missing a full semester of school. For the other 21 second semester interns, and for me, this past semester has meant a look into the real world of work; a look that is seldom granted before the end of college or graduate school. This internship has meant to me a realization that in terms of intensity and discipline, Capitol Hill offices function just as do most business offices.

What I learned through thousands of pages of research cannot be measured against a high school curriculum. No high school gives a course in executive-student relations. Nowhere in the Montgomery County Schools can one be molded into the daily discipline.

Originally, I had asked for a Capitol Hill placement in the hopes that my internship experiences might reinforce my career goal of becoming a lawyer. Whether, when I enter Dartmouth College this fall as a freshman, I will be intent on aiming for law school, honestly I cannot be sure. But I am now certain that, as Jim Phalen, Minority Counsel to the House Committee on Small Business says, "Law is learning as much as you can, about as many things as you can."

What should not be overlooked in this program is the social fragmentation and isolation which has been known to result. In many instances, interns from various schools have explained that they now feel as if they have no contact with classmates and friends; that the work day precludes participation in any school activities.

I can see the possibility of such isolation. Although my participation in Northwood track brought me to school daily, it was very difficult to compare a day at the office with, say, a food fight in the school cafeteria.

Last month a luncheon was held in Rockville High School to honor both the first-year interns and their sponsors. At the luncheon, Dr. Charles Bernardo, Superintendent of Montgomery County Schools, stated, "The high school internship program is a viable alternative to classroom education."

AGENCY FOR CONSUMER ADVOCACY

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 19, 1977

Mr. MARTIN. Mr. Speaker, I would like to share with my colleagues the enclosed article written by U.S. Senator JESSE HELMS of North Carolina. This article illustrates most vividly the folly of such a super agency to protect the consumer, and at the same time the disadvantages inherent in the creation of yet another bureaucratic agency:

ONE AGENCY WE CAN DO WITHOUT!

Self-appointed "consumerists" are becoming increasingly shrill in their demands that the federal bureaucracy "protect" the American people from the business community. They argue that the consumer is a victim of false claims, harmful goods, and deficient services. They propose that we establish a so-called Agency for Consumer Advocacy to eradicate these evils and aid the consumer.

It is true, of course, that businessmen—as well as the "consumerists"—do make mistakes. It is also true that all of us are consumers. As for businessmen, nobody discounts the fact that, through negligence or zeal, they may produce inadequate goods or present a misleading advertisement. Like everyone else, American businessmen are fallible beings, subject to human error. These capabilities for error are rooted in human nature. But we are approaching the point where we may be running the risk of throwing the baby out with the bath water.

What disturbs me is the fact that the advocates of the so-called Agency for Consumer Advocacy overlook the possibility for human error in the Agency for Consumer Advocacy. This Agency will be empowered to issue public statements regarding the quality or safety of a product or service. Because so many products and services will be under the scrutiny of this Agency—and many of these products are extremely complicated from a technical standpoint—we can be certain that the Agency will, sooner or later, make a false public statement about the safety of a product, or its utility, or its general value. Through error, indifference, or negligence, such mistakes are inevitable.

And then what? The consumer will suffer with the producer. Business already knows some of the dangers and costs of federal regulation. Abuses of government power already have occurred; and there is no way in which a company can be compensated under the proposed Consumer Advocacy Agency.

IT CAN HAPPEN TO YOU

These are not remote possibilities arising under this act. They are clear and present dangers. The tragedy of the Marlin Toy Company of Horicon, Wisconsin, is a case in point. This small company, employing eighty-five individuals, has been driven to bankruptcy. How did this happen? Through administrative negligence and/or human error in the Federal Government.

For many years, the Marlin Toy Company manufactured a toy known as the flutter ball. It was a clear, plastic ball, containing a plastic butterfly and plastic pellets. The toy sold well. It was popular with children. But in November of 1972, at the outset of the Christmas season, the Food and Drug Administration notified—notified, I repeat—the Marlin Toy Company that its flutter ball was banned and would have to be withdrawn from the market. The Food and Drug Administration reasoned—and I am certain that the FDA took all reasonable measures that its information was correct—that the ball was unsafe, even though not one injury had been reported. According to the FDA, however, there was a possibility that the ball *might* break, and, if so, that a child might swallow or inhale the plastic pellets.

Marlin suffered a severe financial setback, but proceeded to redesign the toys without the pellets, hoping to regain its losses in the following year. The company submitted the toy to the FDA, and the FDA assured Marlin that the toy was now acceptable. Marlin was back in business—but not for long.

Through administrative oversight, the Consumer Products Safety Commission neglected to remove the product from the holiday list of banned toys. The Commission admitted its mistake and apologized, assuring the Marlin Toy Company that it would issue a corrected list. By this time, however, it was too late. The damage had already been done, and the Marlin Toy Company was financially ruined. As of August 1976, Marlin had suffered a loss of $2,000,000, not counting its losses in future sales and goodwill. The factory is now an empty shell, and all but six of the employees have been laid off.

There are thousands of federal employees already working in the area of consumer interests; and the proposed new Agency for Consumer Advocacy would amount to merely another layer of bureaucracy.

The American taxpayer cannot afford another agency. The American consumer cannot afford the higher prices that new regulations would cause. The American businessman cannot afford more bureaucratic impediments

to providing goods and services needed to keep our economy running.

If you doubt it, ask Marlin Toy Company.

A PENNSYLVANIAN'S "WALK FOR WATER" FOR RABINAL, GUATEMALA

HON. RICHARD S. SCHWEIKER

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

Wednesday, July 20, 1977

Mr. SCHWEIKER. Mr. President, I would like to bring to the attention of the Senate the story of a remarkable young man, Louis Edward "Eddie" Fischer of Newtown Square, Pa. Eddie Fischer has now passed the halfway mark of a unique journey—a 4,100-mile walk from Guatemala City, Guatemala, to suburban Philadelphia.

Eddie Fischer is walking for water—water for the 30,000 people of Rabinal, Guatemala, who have been living with almost none since the devastating earthquake which destroyed most of their town on February 4, 1976. After a post-earthquake trip to Guatemala, during which he became acquainted for the first time with widespread misery and despair, Eddie and his brother Mark decided to return during the summer to assist in the relief effort. Following a summer of constructing buildings—houses, a church, and a clinic—in the village of Concepcion Las Lomas, Eddie decided to stay in Guatemala rather than return to Georgetown University, where he had been a student.

Eddie moved to Rabinal, where he soon learned that the key to reconstruction and the end to the traditional pattern of malnutrition and poverty was water. Although water existed below the surface of the Earth, it had never been tapped. Eddie devised a plan to utilize this water and organized the men of the area to install a water system. But he soon discovered that an effective and permanent water system was too expensive for the citizens of Rabinal to finance, so Eddie decided to "walk for water" in order to publicize Rabinal's plight, and hopefully to raise $300,000.

Eddie began his walk on Easter Sunday, and plans to pass through Washington in early September. After his journey has been completed, he will return to Rabinal to help complete the water system he initiated. In the spring Eddie intends to begin studying for the Jesuit priesthood, and plans to spend his life in Central America as a missionary.

Mr. President, Eddie Fischer's is truly an inspiring story, and he sets an example of service to his fellow man that is more than worthy of emulation. At a time when many problems, both domestic and international, seem overwhelming in their complexity, it is encouraging that people like Eddie Fischer are willing to give so much of themselves to create a better life for many others.

Mr. President, I ask unanimous consent that an article from the Catholic Standard entitled "A 4,100-Mile Walk to Newtown Square," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Catholic Standard and Times, May 26, 1977]

FROM GUATEMALA TO NEWTOWN SQUARE—EDDIE FISCHER'S "WALK FOR WATER"

(By Linda Palmarozza)

Louis Edward Fischer (Eddie to his friends) of Newtown Square is walking from Guatemala. That is what I said. Eddie Fischer left Easter Sunday from Central America and is walking home.

This journey is not a lark. To Eddie it is as meaningful as Siddhartha's spiritual awakening and as pragmatic as a Jerry Lewis telethon. Eddie wants money for a small town in Guatemala that needs water. He is soliciting pledges en route to raise money for that purpose. It is "Eddie Fischer's Walk for Water."

Eddie went to Guatemala in July, 1976 with his older brother, Mark, to join an American effort to re-build the country that had been ravished by an earthquake in February of the same year. They originally agreed to stay six weeks.

The place they worked was Concepcion Las Lomas, a town of 300 families about 10 miles outside of Guatemala City. With the help of Guatemalans, missionaries, and volunteers, the villagers learned how to make cement blocks so they could rebuild their homes.

"After four weeks, Eddie told me he wanted to stay," recalls Mark. He has now also informed his family that he will be entering a Jesuit novitiate in Panama. He has learned Spanish and wants to be a missionary.

"I just think it is great and so does the whole family," says Mrs. Fischer. "He is so happy and so at peace." Mr. and Mrs. Fischer and their other nine children are members of Blessed John Neumann church.

Eddie's walk, however, is not for Concepcion Las Lomas. After that town was organized enough to operate on its own, he adopted another town, Rabinal, about 100 miles outside of Guatemala City with approximately 30,000 people comprised mostly of Indians, which in Guatemalan society are the low men on the totem pole.

According to Mrs. Fischer, who visited Rabinal with her husband, the major part of the town is located at the base of a mountain range, with clusters of villages in the mountains. It has no reservoir and cannot store water during the rainy season. There is also no means of irrigation. "Most of the year everything just blows away in dust." she says.

Eddie's aim is to get enough money to build a reservoir and wells. He got his idea for the walk-a-thon from a Dominican priest he met in Guatemala. Some years back the priest and a friend raised $45,000 in a similar fashion.

The entire Fischer family is helping Eddie achieve his goal. They have started a committee to support him and spread the word of his need in all the states he will walk through in the United States.

Since he is covering about 30 miles a day, the family estimates that he will be at the U.S. border in about two weeks. Mark is driving to meet him and will rendezvous with him in Brownsville, Tex.

From that point, Mark will drive two to three days ahead of Eddie, announcing his arrival and stirring up interest in his project.

Eddie's itinerary is not the most direct route, because he wants to go to Chicago where there is an active Jesuit group, whose services he hopes to enlist, and to Washington, D.C., because of Georgetown University where he, Mark and sister Marian are students. His tentative schedule puts him in Philadelphia around Oct. 3.

"We are hoping that interested people will join him on the way," says Mrs. Fischer, and the entire Fischer family hope for contributions to "Eddie's Walk for Water."

A 4,100-MILE WALK TO NEWTOWN SQUARE

As you read this, somewhere in the southwestern United States a young man is walking.

He is heading north toward his home in suburban Philadelphia, and if things turn out as he hopes they will, he will be there by Sept. 11, his 22nd birthday. His name is Louis Edward Fischer, and he has been on the road since Easter Sunday. By the time he reaches his parents' home in Newtown Square, he will have logged 4,100 miles, every one of them on foot.

Eddie Fischer, who has never in his life known how it felt to be thirsty when relief was more than a spigot away, is walking for water—water for 30,000 people who have none, who have been living with stone age irrigation facilities for all of their lives and with almost no water at all since the massive earthquake that destroyed their town and most of their country on Feb. 4 last year. Eddie is walking to bring the plight of the people of Rabinal, Guatemala, to the attention of Americans, especially American Christians.

Eddie knows the agony of Rabinal first-hand because he has lived with it. He has been living and working with the people of Guatemala for the past year, helping them rebuild their homes and their lives after one of the most devastating natural disasters of modern times.

The events that took Eddie to Central America began last year at a summer conference of the interdenominational Fellowship of Christian Athletes. It was the most decisive experience of his 21 years, for there Eddie gave his life to Jesus Christ.

Eddie is the second oldest child of Gino's president Lou Fischer and his wife, Babs, parents of 10 children, a family which they describe as having been blessed by unity. It becomes quickly apparent in talking with them that their's is also a family blessed with love; for example, that can open its arms and its house to a Vietnamese family of nine for nearly a year. Nine Vietnamese plus nine Fischers (three were away at college) equals some fond and special memories.

Babs Fischer calls her son's experience at the FCA conference "a personal conversion," and says: "I believe he was being prepared for it for some time. Several people there spoke about what Jesus means in their lives, and when one particular person spoke, it just hit Eddie right between the eyes. All of a sudden he could see where God really would forgive him and accept him as he was, and change him. He felt it all the way to his depths."

One of the things people see is Eddie's growing response to suffering. Raised in suburban affluence, a star linebacker on his prep school football squad, Eddie grew up in middle-class American insulation from most of the world's poverty. A trip to Guatemala with his father and brother brought him face to face with the hunger, disease and despair with which countless millions live and die.

In Guatemala, he saw for himself a people whose built-in poverty has been magnified beyond measure by a disaster in which one million were left homeless, 75,000 were injured and 28,000 died. Eddie's response to Guatemala was immediate and personal. He gave all that he had: himself.

With funds raised and donated by their family, Eddie and his brother Mark, both proficient at Spanish, returned to Guatemala to work for the summer in the village of Concepcion Las Lomas. Drawing on skills acquired during three summers of construction work in Philadelphia, and following building plans of a Guatemalan contractor friend, they constructed buildings and installed electrical and water systems. Work-

ing together, they found that they could construct a basic house for a family of four in ten days. They built house after house, then a church, then a clinic. When the clinic was finished, Eddie persuaded the Guatemalan government to equip it.

Finding that organized aid was minimal, Eddie improvised to meet whatever need arose. His solution to the clothing shortage was simple: if someone needed a pair of pants or shoes he gave them a pair of his. The people began to question him, "Why do you do this for us?"

"Because Jesus Christ loves you."

As the time came for Eddie and Mark to return to the United States and their studies at Washington, D.C.'s Georgetown University, Eddie found himself short of cash for building supplies. He raised it by selling his plane ticket home. It was not a snap decision. He had known for some time that he wouldn't be going back to school. He had decided to stay, to spend his life there as a Jesuit priest serving the people of Central America. He hopes to begin his seminary studies next spring.

But there was something he must do first. When work at Concepcion Las Lomas was finished Mark returned to Georgetown and Eddie moved on to the larger town of Rabinal with its cluster of surrounding Indian villages. The 30,000 people who live there have relied for water, as have the generations before them, on a few small creeks and rivers which dry up during the summer. Now even this was gone, most of the water contaminated by the great earthquake that destroyed 98 percent of their homes.

He devised a simple, but effective, incentive plan. The men of the region will install the water system. In return, their homes will be joined to the system. If a man does not participate in the project his home will have no water. Eddie's self-help plan is bringing widespread enthusiastic response.

The project is on-going. When water is installed each family using the system will pay back a small amount of the installation cost. The money will then help another family who, in time, will also repay the fund, with the result that these dollars will be spent not once, but many times.

Eddie's goal is to raise $300,000. With it he will return to Rabinal to continue living and working with the people until their water system is complete.

Meantime, though, he is walking. Through Guatemala, across Mexico and north through the United States toward home. He hopes that American Christians will learn about his walk and the people of Rabinal he's trying to help, and that they will respond with their prayers and gifts.

"When you come from the States with everything we take for granted," Eddie says, "and you go down to a town like Rabinal and you see people who have nothing—I mean nothing at all—it does something to you. I wish I could take every North American Christian down there so they could see it and smell it and feel it for themselves . . . families living in flimsy temporary shacks . . . filth and disease taking over because there's hardly any clean water.

"I can't describe it adequately, but I want to tell everyone I can reach, 'Listen, these people can't help themselves and you have a responsibility, as a Christian, for them. Jesus said that if we gave a drink to the least of his thirsty brothers, we'd be giving it to Him. Maybe you can't go to Rabinal personally and serve these people, but you can send me. I'm walking 4,100 miles because I believe God's people care. Do you care?' "

Every cent he raises, Eddie says, will go directly to the people of Rabinal to help them help themselves. And every penny will go in the name of Jesus Christ.

THE NATIONAL CLIMATE PROGRAM OF 1977

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. WIRTH. Mr. Speaker, I would like to bring to my colleagues attention H.R. 6669, the National Climate Program Act of 1977. Although the bill was reported out by the Science and Technology Committee on May 6, 1977, it has been removed from the floor calendar many times. This legislation is once again scheduled for floor action next week.

The National Climate Program Act is an attempt to coordinate the splintered Federal efforts to predict weather throughout the country. Further information on the act is available in House Report 95–266. I fully support this act and urge that it be considered by the House as soon as possible.

The following article appeared in the Washington Post July 19, and gives on excellent explanation of the National Climate Program Act of 1977:

DOING SOMETHING ABOUT THE WEATHER

(By Marquis Childs)

As Mark Twain is said to have remarked, everybody talks about the weather but no one does anything about it. Just now proposals are in the wind, with heat and drought uppermost in peoples' minds, that could at least make long-range weather prediction more of a science and less of a guessing game.

The House is about to consider a bill, with every likelihood of passage, that would pull together all the widely scattered governmental functions concerned with weather. The bill's sponsor, Rep. George E. Brown, Jr. (D-Calif.), believes that this coordination will make it possible to monitor long-range trends for prediction three months in advance of possible radical changes in weather patterns.

For example, the exceptional cold of last winter might have been predicted if research had been coordinated to make clear the shifts in the upper atmosphere and their significance. With advance prediction, steps could have been taken to mitigate the worst consequences of the cold.

Similarly, the prolonged drought in the West might have been anticipated by a three-month prediction at the outset, showing the shifting patterns in the upper atmosphere over the Pacific. This might have obviated improvised measures and made possible a long-term program equalizing the hardships of the most stricken areas and those not so hard hit.

In the forefront of concern is how much man has contributed to damaging the environment, thereby opening the way to radical changes in the weather. The National Academy of Sciences is completing a voluminous report on the concentration of carbon monoxide that helps to generate the smog hanging over urban areas. According to those who have seen advance copies of the summary of what will be a four-volume study, principal offenders are the automobile exhaust and the smokestacks of industry that burn oil and natural gas.

Changing over to coal, as President Carter has recommended, would create even more serious atmospheric hazards. Coal in combustion releases sulfur dioxide gas and sulfate particles. Inhaling these can cause respiratory diseases such as emphysema and, by one estimate, shorten the life span by as much as 15 years.

The concern is worldwide. A leading climatologist, Eugene Bierly of the National Science Foundation, has just returned from a seminar on climate held in Leningrad. The chief of the Soviet delegation, Prof. Mikhel Budyko, also a noted climatologist, believes that man-made dusts and gases are almost entirely responsible for extremes of weather occurring around the world. While the number of privately owned cars is small as compared with the U.S., smog has developed in Moscow in the past two or three years with a heavy charge of carbon monoxide.

Factors of which we are often blithely unaware are credited with changes in the atmosphere and therefore in the weather. One is the destruction of jungle vegetation. An example in Brazil, where vast forests have been wiped out in the Amazon basin by the slash-and-burn method in a drive to create farm land.

Bierly talks about the naive assumption that the climate is bound to be benign with only occasional temporary aberrations. On the contrary, with the population explosion forcing an ever more persistent drive for food—as in the Amazon basin—the climate is likely to be ever less benign.

One concern of the climatologists is the overheating of the earth's atmosphere due, in no small part, to the release of thousands of tons of carbon dioxide. What this can mean to the polar ice cap has long been a foremost concern of those who follow the long-term trends of climatic change. If the melting of the ice cap is accelerated, the consequences in rising ocean tides could be disastrous. On the Eastern seaboard it could mean wiping out ports and even port cities.

Talking about the heat, the humidity and the water shortage, which has now reached the parched East Coast, is a preoccupation in this torrid summer. At least it helps to relieve the emotions. Even more deserving of discussion—and exploration—is the question of whether advance predictions could have any useful effect.

POTENTIAL U.S. GAS RESERVES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. COLLINS of Texas. Mr. Speaker, in the recent past, there have been so many conflicting studies dealing with the quantification of remaining U.S. reserves of oil and natural gas, that it is almost impossible even for the expert to form a valid opinion on the subject. As it turns out, most of the discrepancies rest on semantic and definitional inconsistencies.

In the various studies, reference is made to reserves as being demonstrated, measured, identified, indicated, inferred, proved, probable, undiscovered, possible, subeconomic, speculative, potential, and recoverable, to name the predominant terms.

Cutting through the semantic jungle and putting the various types of reserves on a comparable basis results in substantial agreement: almost without exception, the different reserve studies indicate that enormous reserves of oil and gas still exist in the United States. Given a proper incentive, these reserves can be developed.

The attached graph shows, for example, that the potential U.S. gas reserves are 3.7 to 5.4 times as large as the

reserves currently under production. These data come from a study that was prepared by the U.S. Geological Survey; that is, from a source whose technical competence and political neutrality is unquestioned.

Additional natural gas in large volume can be produced from these more expensive reservoirs.

REPRESENTATIVE DRINAN INTRODUCES BILL TO PROHIBIT RELIGIOUS DISCRIMINATION IN EMPLOYMENT

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. DRINAN. Mr. Speaker, on June 16, 1977, the U.S. Supreme Court, for the first time, decided a case involving religious discrimination under title VII of the Civil Rights Act of 1964. In 1971 the Court had divided equally in a similar matter and thus no opinion was written. Because of the uncertainty and confusion generated by that disposition, the Congress amended title VII in 1972, in part, to clarify the scope of protection for religious minorities.

The 1972 amendment, offered by Senator RANDOLPH, sought to clarify the issue by defining "religion" to include "all aspects of religious observance and practice as well as belief, unless an employer demonstrates that he is unable to reasonably accommodate to an employee's or prospective employee's religious observance or practice without undue hardship on the conduct of the employer's business." (42 U.S.C. 2000e(j).) By requiring employers to accommodate to some degree minority beliefs, such as religious practitioners who celebrate their Sabbath on Saturday, the amendment sought to reconcile religious freedom and equal job opportunity.

In its recent decision, the Supreme Court has misinterpreted the 1972 amendment, striking the balance too far to the side of purported business interests to the detriment of religious liberty. Indeed the opinion of the Court appears to be inconsistent with its decision 10 years ago when it held that a State could not deny unemployment compensation to a person who could not find a job because of her refusal to work on Saturday. *Sherbert* v. *Verner* (374 U.S. 398 (1963).)

In my view the balance should be struck more in favor of religious freedom than the Court did in its recent decision. To accomplish that goal, Congress must once again amend title VII. I am introducing an amendment today which will achieve that end. It would require an employer to respect the religious beliefs, practices, and observances of its employees unless "no accommodation for such employee's religious observances or practice is possible without severe pecuniary or other material loss to such employer."

It should be noted that any such amendment seeking to protect religious liberty invariably raises questions under the constitutional prohibition against establishing religion. The Supreme Court has recognized the "internal tension in the first amendment between the establishment clause and the free exercise clause." *Tilton* v. *Richardson*, (403 U.S. 672, 677 (1971).)

My amendment would require maximum accommodation by employers without infringing the proscriptions of the establishment clause. Chief Justice Burger has said that "the transcendent value of free religious exercise in our constitutional scheme leaves room for play in the joints'." *Norwood* v. *Harrison*, (413 U.S. 455, 469 (1973).) The amendment I propose is consistent with that principle.

A copy of the bill is inserted in the RECORD here:

A bill to amend title VII of the Civil Rights Act of 1964 to provide increased protection to employees' religious observances and practices

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 701(j) of the Civil Rights Act of 1964 is amended by striking out "he is unable to reasonably accommodate to an employee's or prospective employee's religious observance or practice without undue hardship on the conduct of the employer's business." and inserting in lieu thereof the following: "no accommodation for such employee's religious observance or practice is possible without severe pecuniary or other material loss to such employer."

THE CENTENNIAL OF THE VILLAGE OF OTISVILLE

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. KILDEE. Mr. Speaker, on March 21, 1877, the Village of Otisville, Mich., was incorporated by the State legislature deep in the pine forests of northeastern Genesee County. This year, from July 16 through July 24, the 725 people of that fine community are being joined by citizens from throughout the area in celebrating the village's centennial. President Jimmy Carter also has commemorated the Otisville centennial with the following message sent to its citizens:

In celebrating this important milestone in your history, you can take pride in the values and ideals that have made your community and our Nation grow and prosper. May the vitality and spirit of your people continue to help build a better America and a better world.

The community was founded in 1840, though it really was not much more than a few houses until 1851 when a sawmill was built there to process the virgin pine timber of the region. A 29-year lumber boon followed, during which time the community received its name in honor of a pioneer resident, Francis Otis; its first school and church were built; early businesses arrived, and settlers began turning the logged land into farms. The village continued to grow and prosper after its incorporation, and on January 17, 1957, its home rule charter was adopted.

Otisville has retained much of its appearance of a half century ago, and the sturdy pioneers who settled the area are reflected today in the warm and industrious citizens of the centennial, rich in civic pride. In addition to more than a week of festivities, the village also is observing its centennial with the publication of a book on the community's history and the issuance of a centennial plate. Newspaper articles commemorating the centennial, many accompanied by fine old photographs of the village and its early residents, have been published over the last few days by the Flint Journal, the Suburban News, the Davison Index, the Millington Herald & LakeVille Aerial, the Clio Messenger, and the Genesee County Herald.

But the full story of Otisville remains to be written, for the significance of observing the past comes in how it helps to build for the future. Otisville is growing at a gradual but steady pace, providing agricultural products and an experienced work force for the economy of the Seventh Congressional District. I am proud to bring to the attention of the Congress the celebration by Otisville of its centennial, as the village looks backward in observance of its heritage before resuming its move forward to build on the community's record of accomplishments and progress.

SCHEUER OPPOSES PAY CUT FOR CONGRESS

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. SCHEUER. Mr. Speaker, I rise in opposition to the amendment which would strike funds from the Legislative Appropriations Act that would be used to finance the pay increase recommended by the Quadrennial Commission which went into effect last month.

There are two ways by which Members of Congress may receive pay raises. The first of these was established by the Quadrennial Commission Law of 1967. This law held that a blue ribbon citizen's commission would be convened every 4 years to recommend pay levels for Members of Congress, the Judiciary, and other high governmental officials. The President either accepts these recommendations or modifies them in whole or in part and then submits them to Congress. The recommendations then go into effect automatically unless either house of Congress disapproves them within 30 days.

The second method for salary adjustment was established by the Executive Salary Adjustment Act of 1975. This law provides that Members of Congress, Federal judges, and other top governmental officials shall receive automatic pay adjustment increases at the same rate as the increases granted to Federal civil service workers. This rate is legislatively tied to the rate of increase in salaries in the private sector.

Congress has vetoed four pay increases since these two pieces of legislation went into effect. In 1969 the first Quadrennial Commission recommended a congressional salary of $50,000. At the Congress

urging, President Johnson reduced that figure to $42,500. In 1973, the Second Quadrennial Commission recommended and President Nixon approved, a congressional salary of $53,000 which was vetoed by the Senate by a vote of 71 to 26. In 1976 Congress passed an amendment to the Legislative Appropriations Act barring the use of any funds to pay for a 5-percent salary increase due October 1, 1976 under the Executive Salary Adjustment Act. And just yesterday, the House passed S. 964 which prevents the automatic increase due to Members of Congress on October 1, 1977 under the Executive Salary Adjustment Act.

Since 1969 Members of Congress have received two pay increases totalling $15,000—or 33 percent. In 1975 congressional salaries were increased 5 percent from $42,500 to 44,600 under the Executive Salary Adjustment Act. And, on January 20, 1977, a 29 percent increase recommended by the Quadrennial Commission went into effect raising congressional salaries to $57,500. The Commission recommended that the proposed pay increase be tied to the passage of a strict ethics code which the House approved on March 2.

Overall, the 1977 increase affects more than 22,000 Federal employees and will cost roughly $118 million. The 535 Members of Congress make up only 2 percent of the total number of Federal employees affected by the pay raise and the $7 million cost for congressional increases represents only 6 percent of the total cost.

Mr. Speaker, I have heard many of my colleagues complaining that the pay raise is too large; that a $12,900 pay increase is too great an increase over former salary levels. I disagree.

Congressional salary adjustments appear to be large because they take effect so infrequently. Furthermore, congressional pay raises have lagged far behind pay raises in the private sector. During the entire history of the U.S. Congress, Members have received only 11 permanent pay increases—including the 1977 increase—an average of one every 17 years. Only one of these increases was lower than the 1947 increase of 25 percent and only two were lower than the 1977 increase of 29 percent.

Overall, the 11 increases average only $5,200 apiece. If the total of these 11 pay increases were divided into equal annual amounts Members would be receiving pay raises of less than $300 per year throughout history.

Even more important is the observation that the 1977 29 percent increase is not out of line when compared to increases in the cost of living and pay increases received by other segments of society. According to the Quadrennial Commission:

Since 1969 the cost of living has increased 61 percent. Even with this pay increase congressional salaries will rise only 33 percent. Thus, by accepting this pay increase we are at the same time accepting a 28 percent cut in real salary over the past 8 years.

While congressional salaries have increased by 33 percent since 1969—with this pay increase—the salaries of the news media have increased by 80 percent, the salaries of blue collar workers 70 percent, the salaries of business executives 59 percent, and the salaries of white collar workers increased by 55 percent.

Had the salaries of Congressmen increased at the same rate as most Americans, Members of Congress would have received salary increases of $25,000 to $30,000 since 1969, and would now be earning approximately $72,000.

The pay of Members today, adjusted for increases in the cost of living, is just barely above what Members of Congress received in the 1930's when serving in Congress was only a part-time job. Today's $57,500 salary is the equivalent of only $13,750 in 1935 dollars. In 1935 Members of Congress were paid $10,000 per year, the equivalent of $45,000 in 1977 dollars. Yet we work 10 or 11 months a year at a minimum and in 1935 Congress was in session for less than 6 months a year.

I am not complaining over the heavy workload of the Congress. However, as the session length has increased so has the burden on each and every one of us. The old standard arguments on a Congressman's life still remain. We have kids to send to college. We must maintain two homes—one in the District and one here in Washington.

Being a Congressman is a good and satisfying life, with very real rewards and satisfactions. But it is also a very demanding and expensive life. I do not find the pay raise which has been granted to us by an independent blue ribbon commission overly generous, and I intend to vote against this amendment.

Printed below is a column by John Gardner, the founder of Common Cause, and an arch critic of Congress. He presents a reasoned case in favor of the pay raise for Members of Congress. I commend it to my colleagues' attention.

WE GET WHAT WE PAY FOR

(By John W. Gardner)

I say Congress should have its pay raise. Do you disagree? Read on.

You are not reading the opinion of a great Congress-lover. I have criticized Congress as vigorously and battled with it as frequently as anyone.

But for us to deny Congress its pay raise would be to behave in an idiotic manner. And I'm against that on principle.

Every four years the President is by law required to appoint a Commission on Executive, Legislative and Judicial Salaries. It is made up of serious citizens and they don't like to throw our tax dollars around any more than you do. Toward the end of 1976 they recommended a raise in all Federal salaries—judges and executive branch officials as well as Senators and Representatives.

The pay they recommend for Members of Congress was $57,500. It sounds like a lot of money and many citizens are outraged. But the outraged citizens are wrong.

A recent news report says that the Board Chairman of one major corporation (United Technologies) received $1.6 million in yearly salary. The Board Chairman of General Motors receives $950,000 annual salary. Among the 500 largest corporations (as listed by Fortune), a salary of $57,500 would place you among the lower level vice presidents.

You may say, "Yes, but $57,500 looks huge out here in River City. Most of the people in our Representative's district never see that kind of money."

But the level of salaries in River City isn't the issue. When the voters send a man or woman to Congress they are sending a person who will participate in the most fateful issues determining the future of this planet. That is true no matter how small or remote or humble the Congressional District.

The representative may have a significant role in deciding whether we have peace or war, what we pay in taxes, whether the nation prospers or goes broke. Those are big decisions—decisions to be made by the best people we can assemble. We should demand a lot of them and then we should pay them well.

They work hard. They live a hard life. (I know because I help to make it a hard life.) most of them have to maintain two residences—one in Washington, D.C., one back home. Most have children whose college education is a family expense that's still ahead. Most are the kind of people who could easily get a higher paying job in the private sector. And that's just what the best of them are going to do if they figure the voter doesn't value their services enough to pay them.

One counter-argument says "They should consider it an honor and a patriotic duty. We don't want public servants who are just there because the salaries are high." Sounds plausible, but I can't buy the argument. I want extremely able legislators, and I want to pay them for their competence. Why should I ask them to scrimp and save for the honor of serving me?

If the honor and patriotic duty justify low pay then perhaps we should cut their salaries in half. I leave it to you to judge what the ablest of our Senators and Representatives would do in that case. They'd leave. And people of less ability would succeed them.

When the President's Commission recommended the raise in salary, it recommended that Congress should only receive the raise if they were willing to pass a strong code of ethics. Congress responded by passing the toughest code of ethics in its history.

Now they should have their raise.

SALUTE TO VFW PVT. LEONARD POST JR. POST NO. 6251, OF CHEEKTOWAGA, N.Y.

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. KEMP. Mr. Speaker, I wish to bring to the attention of my colleagues the outstanding accomplishments of VFW Pvt. Leonard Post Jr. Post No. 6251, of Cheektowaga, N.Y. The post has been recognized as the No. 1 VFW post in the Nation for their Bicentennial activities. We in western New York are particularly proud of the accomplishments of this exceptional VFW post. In addition to this year's national recognition, the post has retained the No. 1 ranking for community service in New York State for 8 consecutive years. This honor represents preeminence in a State which is fortunate enough to have 700 VFW posts.

The VFW Pvt. Leonard Post Jr. was organized in 1946 and has since provided the western New York community with 31 years of public service. Their present membership includes over 1,000 veterans, all deeply committed to participation in patriotic and community affairs. Under the leadership of Comdr. A. J. Maciejewski, Post No. 6251 has maintained their remarkable record of sacrifice by the members for the betterment of the community. These concerned veterans are totally unselfish in their charitable con-

tributions and are strongly committed to the post's programs for the disadvantaged. It is a real honor to be able to count these men among my constituents.

The continuing efforts of VFW Pvt. Leonard Post Jr. Post No. 6251, of Cheektowaga, N.Y. are appreciated by all of western New York. I commend them for their dedication and wish them well in this year's competition at the national convention in August.

INDIANA'S HOSPITAL RATES

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. FITHIAN. Mr. Speaker, recently I had the opportunity to meet with the board of directors from Home Hospital and the lay advisory board from St. Elizabeth Hospital to discuss hospital cost containment and solutions to the rising health care costs. I found their briefing an extremely helpful and clearly documented response to cost containment as to how it would actually work out on the hospital level.

The State of Indiana has had a voluntary rate review program for 14 years. This program has been tremendously successful as evidenced by Indiana hospital rates being 20 to 30 percent below the national average. Before this program, Indiana was slightly higher than the national average. Although this approach is recommended publically by President Carter as a means for cost savings, Indiana's program is not acceptable under the new hospital containment program.

I would like to take this opportunity to share some significant statistics which have been brought to my attention by these two hospital groups.

HOSPITAL COSTS, JUNE 17, 1977

Although many of the figures that will be used in the presentation are specific for St. Elizabeth Hospital, I'm sure that Home Hospital and most other hospitals in Indiana could show similar facts and figures for most of the examples we use.

1. St. Elizabeth costs up 104%, 1970–76.

The costs at St. E. have increased 104% since 1970 and yes, hospitalization is expensive. But before we subscribe to the theory that hospitals are inefficient and increasing their prices indiscriminately, let's see where this increased revenue has gone.

2. Percent of increase from 1970 to 1976.

[In percent]

Salaries:	
Wage scale increases	36
New employees	9
Fringe benefits	10
Fuel and utilities	2
Food	3
Drugs	2
Supplies and other	20
Depreciation	3
Bad debts and medicare subsidy	11
Income over expenses (represents only 3 percent of our billings)	4

We also need to look closer at some of these individual factors.

3. Employees.

Hospitals are labor intensive. They must be staffed 24 hours per day, 365 days per year. It takes 5 people to staff a position for 3 shifts, including weekends, holidays, vacations and other time off, and about one out of three has special skills compared to about one out of seven in most industry. 60 percent of our cost is for personnel.

4. Dime.

The minimum wage has increased 130% since hospitals came under the Federal minimum wage guidelines. A. 10¢/hr. increase for each employee adds 200,000 to costs. Wage scale increases alone have increased our operating costs 2.8 million or $28/patient day since 1970. And we're still below the area average.

5. Personnel increases.

HEALTH PROGRAMS EXTENSIONS

[Dollar amounts in millions]

Programs	House	Conference	Percent change from House-passed bill
Health planning	$431.0	$498.5	+15.7
Health services research	27.6	28.6	+3.6
Health services statistics	31.7	33.6	+5.9
Biomedical research	1,499.8	1,640.5	+9.4
Health services	600.6	641.5	+6.8
Community mental health centers	77.6	102.7	+32.3
Maternal and child health	399.9	399.9	0
Home health services and training	12.0	12.0	0
Total	3,080.2	3,357.3	+9.0

Note: Figures may not add to totals due to rounding.

Nine percent of our cost increase is associated with additional personnel but most of this increase is due to increased workload.

As you can see the Emergency and Outpatient Department has increased from 17.5 to 25 employees but this is largely due to having 24-hour physician coverage and people using the Emergency Room as a source of primary care. Personnel in Pharmacy and Cancer Therapy have increased 75 and 100 percent respectively, but in all cases the productivity increase has been greater than the personnel increase.

6. New employees:

	Employees 1970	1976
Utilization review	0	6
Social services	0	2
Patient services	0	6
Pre-admission testing	0	4

Medicare mandated Utilization Review and Medical Social Service.

7. Fringes.

Area Industry, 30 percent.

St. Elizabeth, 25 percent.

Employee fringe benefit package adjustments account for 10 percent of our increase in cost from 70–76. A substantial portion of this increase is due to legislation governing pension plans such as earlier vesting and entry into the plans.

As you can see we are still 5 percent below the area average. To bring our staff up to the county average for wages and fringe benefits today would add about $12 per day to the hospitalization cost.

8. Fuel:

1970–1975, utilities: 1970, $111,982; 1975, $184,422.

9. Fuel:

1975–1976, utilities: 1976, $265,217.

From 70–75 our utility cost increased about $72,000 and from 75–76 it increased an additional $81,000—a 120 percent increase over the 6-year period.

10. Fuel/gas costs.

Based on November 1976 costs, $1.00 would buy fuel oil to produce 345,000 Btu's of heat or natural gas to produce 751,000 Btu's. We were faced with two factors beyond our control this past year. A severe winter and a gas shortage. This forced us to change our boilers from gas to fuel oil and this change added $540.00 per day to our costs during the month of January.

11. Food costs.

Food costs have risen from 240–470,000 (for the same quantities) and comparing the first quarter of 77 with the first quarter of 76, we see our costs increasing at a rate of 12.8 percent per year.

12. Drugs.

Drug costs increased by 14.5 percent from 75–76.

13. Bed sheets up 66 percent.

And moving in to look at supplies and other we see the cost of bed sheets has increased 66 percent and

14. Malpractice insurance up 532 percent.

15. X-ray room 2.

Equipment cost increases have also affected our costs. In 1974 it was necessary to replace X-ray room 2. This is a fluoroscopic room, the equipment was twelve years old and we couldn't get replacement parts. The cost of that replacement was $95,000.

16. X-ray room 3.

In 1975 we had to replace Room 3. Another fluoro room with equipment thirteen years old and again we couldn't get repair parts. That room cost $165,000. In one year the cost of replacing a fluoro room increased $70,000.

Both rooms needed replacement because of utilization. In 1970 4,400 procedures were performed in these rooms and in 1976 6,500 procedures were performed.

Used: 1970, 4,400 procedures; 1976, 6,500 procedures.

17. New hospital.

We all look forward to moving into our new addition but hospital building costs are expensive. We have looked at how hospital costs have increased and we all recognize that they are high. We've looked at some of the efforts we've made to help control these costs and hope that you see we are concerned and are trying to control costs. We also hope you now recognize that with few exceptions, the factors that have caused this increase in cost are not within the span of control of hospitals. And, whether this increase is controllable by hospitals or not, we question whether the health care industry has done as poorly as we are led to believe.

A look at the April 1977 Consumer Price Index shows some interesting figures.

18. Consumer Price Index, April 1977.

[1967=100]

Item:	
Medical care	199.1
Private transportation	176.3
Gas and electricity	209.8
Fuel oil and coal	282.0
Home ownership	201.0
Food away from home	197.5
Fruits and vegetables	203.0
Gasoline	187.0
All items	179.6
All items (excluding medical)	178.4

The effect of medical costs on the CPI for the last ten years has been to increase the CPI by 0.12 hundredths of a point per year.

HOME HOSPITAL OPERATING EXPENSE DATA COMPARED WITH NATIONAL AVERAGES, 1976

	Home Hospital, 1976	National, 1976[1]
Inpatient revenue per patient day	$135.44	$179.36
Percent below national	32.4	
Cost per patient day	$126.78	157.01
Percent below national	23.8	
Cost per stay	$975.41	$1,167.43
Percent below national	19.7	

[1] Information extracted from "Hospital Administrative Services Six-Month Report", December 1976, 300–399 beds.

Lafayette Home Hospital is somewhat unique in the cost performance pattern for the hospital industry. At the present time, our costs are $30.00 per patient day or approximately $192.00 per case below the national average. While this indicates performance that has contained costs in the past, it also emphasizes that H.R. 6575 would penalize Lafayette Home Hospital.

For example, not only does Lafayette Home Hospital operate on $192.00 per case less, it also means that we would not get 9% of that $192.00, or $17.28 per case, or approximately $232,235 annually, simply because we have been efficient in the past. This is a very inappropriate way to reward the past efficiency of Lafayette Home Hospital. Hospitals, faced with revenue restrictions imposed by "admission corridors," "admission load formulas," etc., could have to consider elimination of some services in order to operate within the funds available; services established, incidentally, over the years in complete support of and in compliance with comprehensive health planning regulations.

WHAT EFFECT WOULD H.R. 6575 AND S. 1391 HAVE ON HOME HOSPITAL?

1. There would be limitations on establishing new services and some existing services would need to be re-examined.

2. We would be penalized for growth. In the past, Home Hospital has grown in response to demand for service from the community it serves. During this period, we have increased the quality of health care service and rendered them in a cost-effective manner. The proposed bill would limit our potential to respond to future demands because of its arbitrary volume limitations.

3. Cost-cutting measures under the bill would necessitate future elimination of some positions and reduction in staffing of patient care areas. Quality of care would also be sacrificed by reduction in staffing of non-direct patient care services such as health and patient education, in-service training, maintenance workforce, etc.

4. The quality of hospital personnel would decline. Home Hospital employees expect, and deserve, salaries and increases comparable to their counterparts in other fields. Only in recent years have salaries in the health care field made progress in catching up with industry. This bill would cause us to fall further behind. We would no longer be competitive for the most qualified professionals. Many would leave the field; few would have the incentive to come in.

5. Title II of the bill would place limits on capital expenditures for renovation projects mandated by various state and federal programs. Home Hospital spent $175,000 in 1976–77 to meet requirements of the Life Safety Code, and anticipates spending several thousand dollars to meet requirements of the newly-enacted Section 504 of the Rehabilitation Act of 1973.

6. Home Hospital's planned emphasis on ambulatory care, which will result in less in-patient admissions, will greatly increase the in-patient unit cost because 50–60% of costs are fixed, e.g., insurance, depreciation, debt service and energy.

WHAT ARE POSSIBLE ALTERNATIVES TO H.R. 6575 AND S. 1391?

1. Consideration of the "Medicare and Medicaid Administrative and Reimbursement Reform Act" (S. 1470), introduced May 5, 1977 by Sen. Herman Talmadge.

2. Delegation of hospital controls to states with rate review agencies and evaluation of various rate review systems. Reimbursement should take into consideration the financial requirements of hospitals.

3. Support of legislation that would provide incentives and assistance to hospitals closing or converting unneeded facilities and beds.

4. Public disclosure of hospital financial information by selected public entities to foster better understanding of the nature of hospital costs.

5. A workable program to curtail unjustified malpractice suits would lower insurance rates and eliminate the necessity for "defensive" medicine.

6. Support of legislation designed to eliminate bureaucratic and duplicative regulation. Almost every hospital department is subject to some form of regulation. In New York state there are no less than 164 different agencies which exact some type of control over hospital activities. A study of a "typical" 150-bed hospital in Tennessee showed that each patient paid approximately $4.00 per day just to cover the cost of federal paperwork.

ANNIVERSARY OF DISTRIBUTIVE CLUBS OF AMERICA

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. PRESSLER. Mr. Speaker, this year marks the 31st anniversary of the founding of DECA—the Distributive Education Clubs of America—a growing national organization of young men and women planning business careers in the fields of marketing, merchandising, and management. Firmly based on the ideals of free enterprise, DECA attracts thousands of new members annually in high schools and colleges. Chartered DECA clubs in every State in the Nation, plus the District of Columbia, the Mariana Islands, Puerto Rico, and the Virgin Islands attest to the effectiveness and vitality of distributive education.

DECA encourages the personal development of vocational understanding, civic consciousness, social intelligence, and leadership abilities. As chairman of DECA's congressional advisory committee, I can testify that club members give the realization of these goals more than lip service. Students tour industries and businesses, organize lectures, conduct surveys, and raise thousands of dollars annually to contribute to numerous philanthropies. In my own State of South Dakota, 80 percent of all distributive education students belong to DECA, and South Dakota has been ranked second in the Nation in membership in relation to the State's population.

Recently DECA realized another goal—the completion of a National DECA Center in Reston, Va. In dedicating the center, which was the culmination of 10 years of planning and construction, former Secretary of Health, Education, and Welfare David Mathews had this praise for DECA:

I should think that if there is any group that understands full well the potential in a closer association between work and education, it would be this group. . . . So I have come to acknowledge what I believe is a very good example that you give the country in finding the productive, useful, work that can be done in associating, in your case, the business world and the world of education.

I echo former Secretary Mathews' high regard for DECA, and I am proud to serve as DECA's advisory committee chairman. Their impressive record strongly affirms that the ideals of free enterprise are alive and well and are continuing to grow through DECA.

H.R. 8359—A BILL TO RESTORE EFFECTIVE ENFORCEMENT OF THE ANTITRUST LAWS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. RODINO. Mr. Speaker, H.R. 8359 and S. 1874, its identical Senate counterpart, have as their purpose the overruling of the Illinois Brick decision, so that the Federal Government, the States, and injured businesses and individuals may once again effectively enforce our antitrust laws.

These bills are strongly supported. I should like to insert in the record the press release issued by the U.S. Department of Justice, and a letter received from the Federal Trade Commission, evidencing the support of those antitrust agencies for this legislation.

I am very much heartened by this support, and look forward to prompt action on this measure. The text of the press release and letter follow:

DEPARTMENT OF JUSTICE,
July 15, 1977.

John H. Shenefield, Acting Assistant Attorney General in charge of the Antitrust Division, expressed support of a bill introduced in Congress today intended to restore the right of consumers to recover treble damages from violators of antitrust laws, even though they have not purchased directly from the violators.

A recent decision by the Supreme Court in the *Illinois Brick* case held that only consumers who had purchased directly from a violator could recover treble damages.

The bill, titled "A Bill to Restore Effective Enforcement of the Antitrust Laws," was introduced by Senator Kennedy, Representative Rodino and co-sponsors.

"The Department of Justice fully endorses the goals of this legislation," said Shenefield. "It will restore an essential element of effective antitrust enforcement.

"The ultimate purpose of the antitrust laws is to protect consumers by fostering vigorous competition in American business, and a primary means of obtaining such protection has been the right of victims of antitrust violations to recover damages from the violator, thus removing the profit from the crime.

"Unfortunately, under the recent interpretation of antitrust laws, consumers will in many instances have lost the right to seek treble damages because they have not purchased directly from the violators.

"These ultimate consumers, and other indirect purchasers, are thus stripped of the opportunity to seek private redress for antitrust wrongs.

"This inequity is compounded by the high likelihood of windfall profits from antitrust violations for direct purchasers, who may have passed on to their customers price-fixed overcharges but may nonetheless now sue to recover treble damages for such overcharges.

"We believe that the intent of the antitrust laws will best be served by permitting all victims of antitrust violations to assert

their claims, and to recover their actual damages, trebled, according to proof. The legislation introduced today should accomplish this goal.

"Moreover, the United States is itself frequently an indirect purchaser of goods and services, and participates as a party plaintiff in civil antitrust damages actions.

"Many state and local governments also are indirect purchasers. Unless this legislation is passed, the federal, state, and local governments will not be able to seek damages for antitrust violations that injure indirect purchasers.

"Accordingly," Shenefield concluded, "to promote the effectiveness of the antitrust laws, to provide equity in treble damage awards, and to protect the interests of the United States as a consumer, the Antitrust Division supports this legislative initiative."

FEDERAL TRADE COMMISSION,
Washington, D.C., July 15, 1977.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary, House of Representatives, Rayburn Office Building, Washington, D.C.

DEAR CHAIRMAN RODINO: We are writing to you to express our concern over the Supreme Court's recent decision in *Illinois Brick* v. *Illinois*, 45 U.S.L.W. 4611 (U.S. June 9, 1977). Pursuant to the authority conferred by 15 U.S.C. § 6(f), we urge that early consideration be given to enacting legislation to overturn the result in that case. We agree with the position of the National Association of Attorneys General, as expressed by its Washington counsel, that this decision is "bad news for consumers and taxpayers." Wall Street Journal, June 10, 1977, at 16, col. 1.

As you know, the majority in *Illinois Brick* held that "indirect purchasers" may not maintain treble damage actions against antitrust law violators, even when overcharges resulting from the violations have been "passed on" to them. The effect of this decision, if allowed to stand, will be to deny injured consumers a needed right to compensation for illegal overcharges. Further, it will frustrate the intent of Congress and permit many antitrust violations to go unchallenged.

As noted in Justice Brennan's dissent, the major purposes of Section 4 of the Clayton Act are to compensate victims of antitrust violations and to deter others from future violations. The *Illinois Brick* decision, however, would limit recoveries under Section 4 in many instances to middlemen. Since middlemen may not be harmed financially and frequently have longstanding relationships with manufacturers, they have little incentive to pursue their legal remedies. As a result, both major purposes of Section 4 are defeated. This means, in turn, that greater burdens are placed upon the public antitrust enforcement officials.

That Congress intended to grant a right of recovery to "indirect purchasers" is further underscored by the legislative history of the recently-enacted Hart-Scott-Rodino Antitrust Improvements Act of 1976. Indeed, the provisions authorizing state attorneys general to sue as *parens patriae* are premised upon the right of consumers to recover damages for Sherman Act violations.

The majority in *Illinois Brick* appears to be overly concerned with potential dangers of multiple recoveries against guilty defendants. Certainly there is such a risk, but as the dissent points out, existing procedures keep the risk within acceptable bounds. In our view, the greater risk is that antitrust offenders will be permitted to retain illegally-obtained overcharges.

A similar response can be made to the majority's concern with the difficulties in determining damages, should "indirect purchasers" be permitted to sue. While proof of damages may be made more difficult in some instances, the problems created are not insurmountable, and certainly do not justify leaving injured parties remediless.

In its opinion, the majority acknowledged that Congress might disagree with its decision and suggested that Congress could amend Section 4 of the Clayton Act. We strongly urge that this invitation be accepted and that *Illinois Brick* be overruled legislatively. This would make our job at the Federal Trade Commission easier. More importantly, though, this would provide needed assistance to the consumers of this country, who are all too often victimized, without effective recourse, by violations of the antitrust laws.

By direction of the Commission.

(Mr.) CAROL M. THOMAS,
Secretary.

A WASTE OF MONEY

HON. ARLAN STANGELAND

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. STANGELAND. Mr. Speaker, the Davis-Bacon Act is increasingly being recognized as one of the most outdated and inflationary pieces of legislation on the statute books. According to GAO figures, the act contributes an estimated 5 to 15 percent additional cost on all Federal and federally-assisted construction. The taxpayer pays more—approximately $1 to $2 billion annually—while the intended beneficiaries of Government programs wind up getting less for the money. I would like to call to the attention of my colleagues a recent column by William Murchison, editorial staff writer for the Dallas Morning News, who observes that Davis-Bacon is a "major cause of price escalation" and questions the wisdom of legislation the main impact of which is to "subsidize the salaries of workers who already earn far more than the average nonconstruction wage." Mr. Murchison also notes the efforts of my colleague from Minnesota, Representative TOM HAGEDORN, to correct the shortcomings of the Davis-Bacon Act with his Federal Construction Costs Reduction Act. I am pleased to be one of the 38 cosponsors of this legislation. The full text of Mr. Murchison's column follows:

A WASTE OF MONEY

(By William Murchison)

Couple together a pair of terms that seem made for each other, and what you have is a boxcar word.

"Damyankee"—an epithet long cherished by unreconstructed Southerners—is one of these. Another is Huey Long's "lying newspapers." And still a third—surely by now the words are joined forever in unholy matrimony—is "government-waste."

Does the government waste money? Does the sun rise in the East? Do the birdies sing sweetly on a spring morning?

For money—most especially other people's money—the United States government has an attitude of the most cheerful contempt. Money grows on trees, or, more properly, on printing presses. There is always more where it comes from.

That is why the assorted and sore-vexed taxpayers of the Republic have cause to cheer on "The Federal Construction Costs Reduction Act of 1977." Rep. Tom Hagedorn of Minnesota and 24 cosponsors, including Dallas' Jim Collins, have a bill that in one department of life would uncouple "government" from "waste" and send the two boxcars speeding in opposite directions. Sen. John Tower has a companion bill in the upper chamber.

What the gentlemen propose to do is reform the Davis-Bacon Act and thereby start saving the taxpayers some not inconsequential sums of money.

The Davis-Bacon Act is not well-known; nevertheless, its impact is widely felt. It was enacted by Congress in 1931, at the depth of the Great Depression, to protect construction workers from low wages.

The nub of the act is its provision that workmen on federally connected contracts should be paid the wage rate "prevailing" in their geographical area for the kind of work performed. Presently, the act covers no fewer than 72 federally assisted programs. It is, in essence, a minimum wage law for the construction industry.

Is this not a fair and splendid thing? it is asked. The answer can be gleaned from consideration of Davis-Bacon's effects.

In theory, the "prevailing wage rate is that which the local marketplace is setting at a given moment. But in practice, the Labor Department specifies as "prevailing" rates the highest rates being paid by area labor unions.

The building trades unions, whose members are the highest paid manual workers in the world, thus set the pace—usually to the detriment of the taxpayer, whose work could be done cheaper at rates that genuinely "prevail."

Thus a nursing home in Moravia, N.Y., cost $91,000 to build when, as the Associated General Contractors contend, use of the "prevailing" wage rate could have saved the owners 11 per cent.

An interstate highway contract in Johnson County, Kan., the contractors affirm, cost $395,000 when the job could have been done for 10 per cent less.

A building at Southwest Texas State College in San Marcos, at $157,000, cost 3.5 per cent more than it need have cost.

Most horrendous of all is an estimate by the governor of Virginia that the cost of Interstate 66, which carries traffic to Washington, D.C., will be 125 per cent more than it ought to; this because wage rates were pegged to those of rapid transit construction workers in the capital city.

Overall, the General Accounting office estimates, Davis-Bacon drives up construction costs from 5 to 15 per cent.

The extra money comes, of course out of the contractors' pockets. But no one need deceive himself that the passing of the buck stops here. The cost is handed on to the builder of the project, thence to the public. Davis-Bacon is rightly regarded as a major cause of price escalation.

That is where Hagedorn, Tower and the rest come in. They would have the Labor Department henceforth set a single wage rate (presently rates are set for each craft), that rate to be the average for "laborers" on similar jobs in the country where the work is undertaken. This would be the minimum rate. Higher rates would of course be allowed, but only if the laws of competition dictated. No contractor would have to pay a higher rate just because the government said so.

Such a procedure, the sponsors contend, would simplify the wage-setting process, make wage rates more realistic and encourage the use of lower-salaried trainees, apprentices and helpers.

For these reasons, the AFL–CIO will fight the Hagedorn and Tower bills tooth and nail. Labor likes Davis-Bacon just the way it is. It assures high wages to construction workers—and, anyhow, the public will find some way, will it not, to pay the bill.

The public, to be sure, always has. But that is hardly an argument for continuing to subsidize the salaries of workers who already earn far more than the average nonconstruction wage. Government waste is all that the subsidy amounts to. Surely, even if we reform Davis-Bacon, there will be enough of that left to please its many beneficiaries.

FEDERAL CONSUMER PROTECTION AGENCY

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. GRADISON. Mr. Speaker, attempts to create a Federal Consumer Protection Agency have apparently encountered increasing opposition. While some proponents of the Agency have attempted to attribute the opposition to the efforts of special interest groups, the real explanation lies elsewhere. The bill to create a Consumer Protection Agency is in trouble for one simple reason. The American people are fed up with Congress attempts to saddle them with more and more bureaucracy.

The following article which appeared in the Cincinnati Enquirer of June 12 offers some perceptive observations on the consumer agency debate. I commend it to my colleagues' attention:

CONSUMER PROTECTION: DREAM OR NIGHTMARE?

(By Robert Webb)

So desperate is the drive for a federal consumer-protection agency that a national lobbying committee—with Ohio Attorney General William J. Brown at the helm—has been formed to overcome mushrooming resistance in a Democratic Congress.

The agency bill, managing a mere 21–20 approval by the House Government Operations Committee, is in trouble so deep Ralph Nader apparently is having spasms. He pulled out all stops in ripping up one Georgia Democrat, Rep. Elliott H. Levitas (D), for fighting the bill in committee.

"He (Nader) either called the local papers in Georgia or got hold of their Washington correspondents," a Levitas aide said. In a lashing attack, Nader branded Levitas, a former Rhodes scholar, "tricky and shifty" and said he was either "intellectually corrupt or intellectually purchased," according to the aide.

That's one hint of the Nader forces' desperation at having a Democratic President and Democratic Congress unable to assure creation of the consumer agency that was a hallmark of the party's 1976 platform.

Attorney General Brown was summoned to Washington the other day for appointment as cochairman of a newly organized Committee for the Consumer Protection Bill. He was recruited by virtue of serving as chairman of the consumer-protection committee of the National Association of Attorneys General.

Brown met with President Carter June 1, then outlined the proposed agency on a Cincinnati stop as "a watchdog over the federal regulatory boards and commissions—with teeth."

But Levitas said in the committee report on the bill it will create "a brand-new agency of sheltered bureaucrats" of dubious merit. He charged Mr. Carter with inconsistency in backing the proposed agency while calling for government reorganization aimed at streamlining.

The agency would have around 200 employees by Brown's estimate. It would start with a proposed first-year budget of $15 million—but where it would end, nobody knows. Significantly, the bill exempts labor matters, agribusiness and international trade from the agency's purview.

"All consumers believe that it is in their best interests to pay a reasonable price for essentials," Levitas said. "It is a major concern; yet this bill exempts the agricultural sector of our economy from intervention of this new so-called 'agency for consumer protection.' What about the consumers' interest in milk, bread and other prices?"

The new agency would "create a circus-like atmosphere," in his judgment. And he asks: "Can we expect the public to understand why one agency of the President's administration is suing another agency in the same administration to get it to do what the President wanted it to do in the first place?"

Levitas also cited the saccharin issue to exemplify the potential horror of an agency ostensibly representing consumers in their dealings with government. "Some self-styled consumer advocates wanted to take saccharin off the market," he noted, while many consumers clamored for uninterrupted sales of the artificial sweetener. His aide said his office was swamped with 700 to 800 letters from people—diabetics, heart patients and the like—outraged at the prospect of its removal from the market.

Mr. Carter argued the new agency would take over functions of around 180 people spread through 13 agencies in consumer-protection work now. Moreover, he said these 13 have a combined annual budget of $10.4 million. But anyone familiar with the bureaucracy knows the small battalion of consumer protectors might soon become an army.

Mr. Carter is obviously nettled by the campaign against the agency bill. His pique showed in his June 1 declaration that "special-interest groups who are selfish" have put forward "misinformation" about the measure. One wonders if, in fact, such groups are "selfish" simply because they oppose the agency setup.

Legions of onetime Naderites and other "public-interest" advocates populate the Carter administration in sub-cabinet jobs, of course. Many have a years-on-end history of working for creation of the agency. The most notable, perhaps, is Joan Claybrook, former head of Nader's Congress Watch lobby and now administrator of the National Highway Traffic Safety Administration (NHTSA).

Enactment of the agency bill could lead to a bureaucratic comic-opera with the new protectors fighting such agencies as Miss Claybrook's or others staffed by onetime citizen champions of the public interest. For as certain as night follows day, the new official vigilantes eventually would cross swords with those partly responsible, in effect, for getting them their jobs.

Ohio's attorney general, who manages a consumer-protection division in his own office, would appear to have his work cut out to convince Congress it needs to make Nader's longtime dream come true. To many in and out of Congress, that dream is a nightmare.

DRILLING INDUSTRY INCENTIVES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. COLLINS of Texas. Mr. Speaker, in regard to the willingness and ability of the oil and gas industry to respond to rising energy prices with increased exploratory efforts, please consider the following facts:

Fact 1.—In the period 1960–70, the real price of oil and gas, after inflation adjustment, declined from $3.40 per barrel of oil equivalent to $2.70. This same period was marked by a drastic reduction in drilling expenditures.

Fact 2.—When the real price of oil and gas began to rise in the early seventies, drilling expenditures doubled between 1971 and 1975.

Fact 3.—Following the oil embargo of 1973, increased exploratory and production activities and their spill-over effects caused employment in the petroleum equipment supply industry to rise from 25,000 in 1973 to 62,500 in 1977, according to the U.S. Commerce Department.

Fact 4.—Plant capacity currently exists to produce 679 drilling rigs per year without further capital investment. Delivery time for a new land rig is 4 to 6 months.

Fact 5.—Depressed interstate gas prices have kept idle more than 50 superdeep drilling rigs suitable for drilling for gas.

The free enterprise system has always responded to incentives. The oil and gas industry has demonstrated through its past economic history that it possesses a strong capacity for expansion.

BILL TO ENABLE HANDICAPPED WORKERS TO EARN LIVING WAGE

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. NOLAN. Mr. Speaker, I have recently introduced the Wage Supplements for Handicapped Individuals Act amending the Rehabilitation Act of 1973 to provide wage supplements to handicapped individuals working in sheltered workshops or work activity centers. By enhancing the work incentive programs now provided by most sheltered workshops, this bill will enable handicapped workers to earn a living wage, thus contributing vastly to their self-esteem and sense of achievement.

Sheltered workshops such as the opportunity training center in St. Cloud, Minn., currently provide work programs through which handicapped individuals can receive job training and attain a measure of self-sufficiency. Through their work, these individuals contribute a number of valuable services to the St. Cloud community, yet few take home more than $35 a week for their efforts.

The legislation I have introduced would provide for a series of pilot programs to demonstrate the feasibility of wage supplements for handicapped individuals who are employed on a long-term basis. In the demonstration projects, each handicapped worker earning less than 50 percent of the minimum wage would receive a $1 per hour wage supplement in addition to his wage. For wages above that point, the supplement would be reduced 7 cents for each additional 10-cent increment in wages, with the entire supplement eliminated for any

wage in excess of 100 percent of the minimum wage.

This legislation is designed to provide a handicapped worker with a degree of financial independence while retaining an incentive for productivity. In this country, we have always been proud of a heritage which encourages each person to realize his full potential. I believe H.R. 7982 will offer such encouragement to handicapped workers and I hope my colleagues will give it their full support.

ADMINISTRATION'S ENERGY PLAN ENHANCES PROLIFERATION

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. TEAGUE. Mr. Speaker, on Monday, July 11, the President announced his support for a $4.5 billion uranium enrichment facility to be constructed at Portsmouth, Ohio. The new facility will be a centrifuge facility.

The building of this facility is in direct conflict with the President's position on nonproliferation. A centrifuge facility offers as much and perhaps more potential for proliferation than a breeder reactor together with its reprocessing plant. For any nation that desires to produce a nuclear weapon, the centrifuge system together with a small research reactor, are actually more preferable to use than the reprocessing facilities which separate plutonium out of spent fuel, and a breeder reactor. The President's concern over proliferation is not directly related to breeder reactors but rather to those facilities, spent fuel reprocessing and fuel fabrication, which are essential to the operation of the breeder.

The centrifuge and a small research reactor cost about a billion dollars less than a small breeder and a reprocessing facility, are less expensive to operate and the small size of these facilities makes them significatly more difficult to detect. A centrifuge system can be purchased commercially and the design for research reactors is unclassified and readily available. In addition, the objective of building the centrifuge plant is not only to increase the fissile content of the uranium for light water reactor fuels but is to teach private contractors how to use and operate a centrifuge separation facility. The knowledge of how to separate or isolate fissile material is also the key to weapons production. During World War II, it was separation, in addition to the transmutation of uranium into plutonium that presented the most difficult technical obstacles and required the most time to resolve.

In fact, you do not even need the research reactor if you have a centrifuge and know how to operate it. A single centrifuge with ancillary systems, as opposed to the mass production facility proposed for Portsmouth, can be used to raise the fissile content of uranium to a level of weapons grade material. Then, without converting the uranium to plutonium, you could make a creditable weapon. Of the two atomic bombs dropped on Japan in World War II, one was fabricated using plutonium and one was fabricated using enriched uranium. Why then is the administration so anxious to cancel the breeder reactor at Clinch River on the one hand and to proceed with an equivalent proliferation threat on the other hand? Proliferation is proliferation is proliferation.

It is obvious at this point that the solution to proliferation of nuclear weapons cannot logically be to halt all technical advancements that might be used to this end but rather to program safeguards into all processes while continuing to work on further international agreements to insure the peaceful use of nuclear material.

All nuclear weapons must be made from a highly enriched fissile material, such as uranium or plutonium. Up to now, enrichment has been accomplished by gaseous diffusion plants. Gaseous diffusion plants could not easily be hidden by any nation who desired to develop nuclear warfare potential because they are both enormous in size and consume vast amounts of electricity. The new centrifuge technology eliminates both the high electrical costs and visibility problems of any nation wishing to clandestinely develop nuclear weapons. A centrifuge facility can be built at modular size and would consume only 4 percent of the electricity of a gaseous diffusion plant.

The Portsmouth plant is necessary to fuel future light water reactors and the centrifuge process promises the most feasible approach to separating uranium, just as the Clinch River breeder reactor is necessary to demonstrate that we can eventually employ breeder technology, if and when we need it, because uranium is as finite as oil and natural gas.

Proliferation possibilities can be enhanced in various ways. However, it seems illogical to prohibit breeder technology because it may offer this possibility while eagerly supporting centrifuge technology which could enable any nation so inclined to make weapons in a simpler, less expensive manner. The facts need to be understood. It is important that we approach the Clinch River decision and all future decisions from the position of solving problems not ignoring them.

RABBI DENNIS C. SASSO AND RABBI SANDY EISENBERG SASSO

HON. DAVID W. EVANS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. EVANS of Indiana. Mr. Speaker, next month Congregation Beth-El Zedeck in Indianapolis will have two new rabbis serving their congregation. It is not uncommon to have two rabbis serving the same congregation, but it is highly uncommon for the rabbis to be husband and wife. In fact, Rabbi Dennis C. Sasso and Rabbi Sandy Eisenberg Sasso are the first rabbinic couple in Jewish world history.

Both are 31 years old and both were ordained from the Reconstructionist Rabbinical College. They came to Indianapolis after serving as rabbis in New York.

Mr. Speaker, it is an honor and a privilege to have this husband and wife serve Congregation Beth-El Zedeck. I invite my colleagues to join me in wishing them success.

SERIOUS PROBLEMS IN GOVERNMENT DISABILITY PROGRAMS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. PICKLE. Mr. Speaker, while the Ways and Means Subcommittee on Social Security considers reform of the system, it is my feeling that it needs to scrutinize the disability side of the question. Payments for disability have grown more rapidly than other portions of the social security program, particularly in the military.

Disability has proved troublesome in other areas, too, such as the growing payments to "disabled" Federal employees. Of course, the vast majority of those Federal employees who receive disability are deserving but the following article from the July 6, 1977, Washington Post does indicate that there is some flagrant abuse of the system which must be halted.

"DISABLED" CIVIL SERVANTS—DRAW PENSIONS, HOLD PRIVATE JOBS

(By Brooks Jackson and Evans Witt)

A federal civil servant retired on grounds that he was disabled, yet earned a total of $117,560 in a new private job in 1974 and 1975, an internal Civil Service Commission report shows.

Another disability pensioner held a private job that paid him a total of $100,943 in the same two years.

Two other supposedly disabled federal pensioners earned $76,793 and $66,444 in a single year.

At the same time, all four were drawing disability pensions ranging from $404 to $1,793 per month, paid mostly by the taxpayers. And most of each pension was considered tax-free "sick pay."

The pensioners, whose names were not listed, are among the commission's "top 20"—persons who earned the most in new jobs while drawing pensions granted because they could not perform their old government jobs efficiently.

The system grants disability pensions to federal workers who in many cases still are able to work.

On the average, the 20 earned more than $29,000 a year in 1974 and 1975, while drawing disability pensions of $9,284 per year.

The 20 are a small minority among the more than 279,000 disability pensioners drawing more than $1.5 billion a year. Yet they illustrate features of the system that have drawn criticism:

The definition of disability is so broad and vague that virtually any ailment, including those that are relatively easy to fake, is grounds for a pension. Nearly 98 per cent of

those who apply for disability retirement obtain it.

Monitoring whether disabled pensioners have recovered their earning power depends almost entirely on unverified earnings reports by the pensioners themselves. Officials admit that fraud usually goes undetected, and when it is discovered, seldom is the pensioner prosecuted.

Government agencies, according to the National Association of Retired Federal Employees, often are unwilling to find light-duty assignments for employees with medical problems, instead pushing them onto the retirement rolls.

The system also is relatively stingy when it comes to those who need help the most: young, low-paid federal workers who become totally unable to work. Many of these workers would receive more money if they were covered by Social Security rather than civil service, a report by the General Accounting Office said.

To receive a disability pension, a federal civil servant need only be declared medically unable to perform one or more parts of his job efficiently.

In contrast, the Social Security disability system and most disability programs in private industry pay only when a person is unable to work.

"We've got a liberal disability provision compared to private industry, there's no denying that," said Thomas A. Tinsley, retirement director at the Civil Service Commission.

The vast majority of disability pensioners probably are abiding by the government's liberal rules. The typical disability pensioner retired at age 51 or 52 with a heart condition, arthritis or cancer and gets about $5,500 a year in pension, records show. Disability pensioners have a death rate 5 to 23 times higher than active federal employees the same age.

Only about a third of all disability pensioners report earnings from jobs, including part-time employment. Yet some are able, despite their supposed disability, to earn a good living.

The system attempts to cut off disability pensions to them, but the rule governing such cases is easily manipulated or ignored.

The law requires cancellation of pensions for those who earn, for two years in a row, more than 80 per cent of what their old job is paying.

In all, half the "top 20" kept their pensions by staying within the 80 per cent rule. The other half lost their pensions because their income exceeded the 80 per cent rule. But their pain was eased because commission procedures allow the pension to continue for one more year beyond the two in which excessive earnings were reported.

For the pension losers the average yearly earnings were $31,345 and the average pension was $8,738.

The commission is all but helpless when pensioners break the 80 per cent rule but conceal their income. Pensioners are required to report earned income by means of a postcard questionnaire, but the commission makes no regular attempt to verify the reports.

"There is no way to police that," Tinsley said. "About the only way we get them is when a neighbor gets mad and turns them in."

In one such case, a disability pensioner was found to be hiding excessive earnings by having his private paycheck issued in his wife's name. The pension was stopped, but the pensioner was not prosecuted, a commission lawyer said.

Before 1970, the commission compared some questionnaires with pensioners' federal income tax information. Tinsley said any effort to re-institute such a policy would be "political dynamite" because of concerns about privacy.

Congress has not yet moved to tighten the law or encourage light duty for still-productive employees. But hearings are likely this year and the Civil Service Commission is working on its own recommendations for changes.

SUBSIDIES HAVE WORSENED THE WATER SHORTAGE IN CALIFORNIA

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. EDGAR. Mr. Speaker, a recent article in Barron's on the water shortage in California raises important points on two issues of importance to this House: federally funded water projects and the impact on regional economies of Federal policies. I would like to share the article, and my letter to Barron's in response to it, with my colleagues:

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 19, 1977.

Mr. ROBERT M. BLEIBERG,
Editor, Barron's
New York, N.Y.

TO THE EDITOR: I was most interested to read your article on the California water crisis in your June 27 edition ("Liquidity Crisis: Subsidies Have Worsened the Water Shortage in California"). I have circulated copies of it to my fellow Congressmen who share with me membership on the Steering Committee of the Northeast-Midwest Economic Advancement Coalition. Your writer cogently points out the vast national subsidy involved in putting scrub land in California to agricultural use. He does not point out that much of this subsidy is coming from the economically hard-pressed Northeast and industrial Midwest.

The size of this subsidy is such that in Fiscal Year 1975 Pennsylvania contributed $2.4 billion in federal taxes more than it received back in federal spending. In other terms Pennsylvania received only $0.87 on every dollar of its federal taxes. In New Jersey the problem is worse; there the state's return is only $0.66 on every dollar of federal taxes. California, on the other hand, receives $1.13 back for every dollar it contributes to the federal treasury.

The Northeast-Midwest Economic Advancement Coalition is an alliance of 204 Congressmen from the older industrialized portions of the country who have joined together to press for more realistic federal policies toward regional balance and economic development. Your article is an important contribution to our study of the regional impact of federal policies.

Cordially,

ROBERT W. EDGAR.

[From Barron's, June 27, 1977]

LIQUIDITY CRISIS—SUBSIDIES HAVE WORSENED THE WATER SHORTAGE IN CALIFORNIA

(By Michael Brody)

Sacramento.—California's water systems today resemble a strange seabed from which the waters have mysteriously receded. Looming up from the exposed depths are rarely glimpsed bureaucratic monstrosities, like giant squid stranded amidst the dried-out concrete reefs of dams, reservoirs and aqueducts.

These shadowy bureaucracies—federal, state, municipal—have controlled the floodgates of agricultural development and economic growth in California since the turn of the century. The seemingly limitless sea of cheap water they have ruled over has encouraged massive wastage by municipal rate-payers scarcely aware of their existence, and has made the fortunes of turn-of-the-century robber barons, modern agribusiness giants, and not a few crooked property speculators and corrupt politicians in between: But the worst drought in California history—which also has severely affected most of the West Coast and Mountain States—finally is putting an end to the illusion that there is such a thing as a free glass of water.

The federal water bureaucracies and their pork-barrel Congressional allies now are under attack by "fiscal conservative" administrations in both Washington and Sacramento. In the wake of the House of Representatives' vote 10 days ago, approving 16 new dam and irrigation projects by a margin too small to override a threatened Presidential veto, Congress is finally being forced to cut some of the more egregious boondoggles to get the rest through. But the Water Resource Policy Study, headed by Interior Secretary Cecil Andrus and due to report to the President next November, will recommend at most only marginal reductions in the huge federal subsidies on existing water projects—including California's vast Central Valley Project. And it is these very subsidies which, paradoxically, have played a major role in creating the water shortages which now threaten many California farmers and ranchers with ruin.

No paradox, perhaps, to those aware of the disruptive effect of subsidies on the price mechanism's allocation of scarce resources. But neither of the major federal water bureaucracies, the Federal Bureau of Reclamation or the Army Engineer Corps, has ever thought of itself as dealing with a scarce resource requiring efficient use or conservation. They have merely assumed that no matter how much development they planned for, there would always be more water and more money to finance its development. They reckoned without the Pacific High.

STORM BARRIER

The Pacific High is a high-pressure atmospheric ridge which established itself two years ago over the ocean off the north coast of California, encompassing a huge area stretching from Hawaii north-eastward toward Oregon, Washington and the Canadian border. In violation of all meteorological laws it has remained virtually stationary off the Pacific Coast for two years, deflecting storms northward over Northern Canada, and leaving California and much of the Western states high and dry in their second consecutive year of severe drought. In the passes of the Sierra Nevadas, the snowpack last winter lay barely two feet deep, where six-to-seven-foot drifts ordinarily wait to bury the traveler—and the snow that did fall was five times drier than snow ought to be. Run-off in the streams and rivers pouring down out of the Sierras into the long Central Valley and lies between the Sierras and the coastal mountain ranges is down to as little as 13% of average flow. Major reservoirs hold less than half their normal water supply, while hydroelectric power generation has been severely cut.

The state's Department of Water Resources estimates that with huge increases in ground water pumping, supply shortfalls will total only about 600,000 acre-feet (326,000 gallons of water will flood an acre to a depth of one foot), against demand for 7.1 million acre-feet, in the coastal regions stretching down from the north coast's forests and vineyards through the San Francisco Bay area and on down to Southern California, where the bulk of the state's population lives. But in the Sacramento Valley—the northern part of the Central Valley, north of the river deltas emptying into the San Francisco Bay—water supplies are expected to run nearly two million acre-feet short of the nine million re-

quired, most of it for irrigation. And in the San Joaquin Valley—the heartland of California agriculture stretching southward from the delta—there will be an estimated 3.7 million acre-feet shortfall on the 20.7 million acre-feet needed, virtually all of it for agricultural use.

Of the 41 million acre-feet of water which users will need this year, 85% of it for agriculture, an estimated 6.5 million acre-feet won't be available; delivery of the rest will require dangerous reductions in the underground water table which will increase soil salinity and ground subsidence and threaten permanent damage to water-bearing geologic formations. Economist David Auslam of the Department of Water Resources calculates that on a "most likely scenario" basis, the cost of the drought in gross state product this year will run $4.5 billion; alternative optimistics and pessimistic estimates: $2.9 billion and $6.3 billion, respectively. Roughly three-quarters of the loss will be in agriculture, with almost all of the rest accounted for by higher energy costs due to hydroelectric power shortfalls.

BEGGAR THY NEIGHBOR

California's state and federal water bureaucracies, and the powerful interest groups which they both serve and mediate among, are now locked in a bitter warfare to determine how the burden of water shortages and multibillion-dollar losses will be distributed. The State Water Project, the smaller of the two, delivered two million acre-feet of water last year down through 600 miles of reservoirs, pumping stations and aqueducts from Northern to South California. Southern California draws water from the Colorado River Aqueduct and the Owens Valley's Los Angeles Aqueduct as well. But it is also the chief beneficiary of the state's California Aqueduct, and Southern California votes give the State Water Project plenty of political clout.

The Federal Bureau of Reclamation's Central Valley Project last year delivered seven million acre-feet of water to the SWP's two million, most of it to the huge agricultural water-users of the San Joaquin Valley, whose votes are few but whose wealthy and powerful farm lobby is not entirely devoid of influence in Sacramento, especially in the more conservative bastion of the State Senate. The battleground across which the state and the Bureau face each other: the thousand or so square miles of marshy delta where the Sacramento and San Joaquin rivers empty into San Francisco Bay whatever muddy trickles of water are left to them by the two projects' pumping stations and dams.

How much water the Bureau can divert is the point at issue. The Department of Water Resources, which runs the State Water Project, is required by state law to assure sufficient fresh water flow into the Delta to maintain water salinity and other standards demanded both by industrial users of the Delta's water and by environmental groups. The Bureau, which is supposed to coordinate its operations with those of the State, does not consider itself bound by the water quality standards set by state law; hence the extra water it takes out of the rivers flowing into the Delta must be made up by the State.

BREAD, NO WATER

Not surprisingly, farmers are insisting that water for agriculture must take priority over everything—especially the enormously wasteful lawn-waterings and toilet-flushings of municipal water-users. The widely publicized filling of an ornamental lake by a Southern California condominium developer brought calls for secession from the state this spring from north coast farmers and wine-growers, whose untamed rivers and streams now are being coveted by both the state and federal water agencies. In fact, water conservation already is being practiced in most of California's major metropolitan areas: Los Angeles faces a mandatory 10% water-use cutback on July 1, San Francisco is conducting a major voluntary conservation program. Suburban Marin County, north of San Francisco Bay, has been forced to impose severe mandatory water rationing, aimed at reducing usage by 25%; such a shrinkage in urban water use in the state's 11 largest metropolitan areas would save one million acre-feet a year. (Marin County's single largest residential consumer cut water use last year by 45%—but, then, the warden of San Quentin *does* have greater powers at his disposal than county officials.)

Major conservation efforts are apt to become a permanent feature, as the costs of the electric power used to pump water skyrocket. Hydroelectric facilities normally provide one-fifth of the state's electric generating capacity; hydroelectric output in 1977 is expected to total barely one-third of that. Pacific Gas & Electric, the state's largest utility, will be compelled to obtain power from Southern California Edison and other suppliers to meet industrial demand; imports from the Pacific Northwest will be severely curtailed by drought conditions in Oregon and Washington. Massive increases in ground water pumping by farmers are a further drain on power supplies. The greatest part of the cost of state water to the Los Angeles basin represents the cost of power to pump that water up 2,000 feet over the Tehachapi Mountains north of the city; when its power contracts expire in 1983 and the state is forced onto the open market for power, Los Angeles water rates are expected to go through the roof.

But even maximum urban conservation efforts aimed at saving one million acre-feet a year state-wide would not begin to meet the estimated 6.5 million acre-feet shortfall facing California farmers. And, of course, millions of additional acre-feet will be needed to replenish underground aquafers to prevent permanent damage to the water-table and the soil. The Bureau is determined, therefore, to wring all the water it can out of the Delta to minimize as far as possible the multi-billion-dollar losses faced by agricultural users in the San Joaquin Valley.

FOUR-FIFTHS FREE

But there is a fundamental economic difference between the state's largely municipal and industrial consumers of water and the Bureau's largely agricultural users. The customers of the State Water Project—municipal, industrial, and agricultural—are paying water rates which cover 100% of the cost of developing and delivering state water supplies, including dams, reservoirs, pumping stations, aqueducts, and electric power. The Bureau's agricultural users for water are being subsidized by rates which cover less than 20% of the cost of the Central Valley Project.

Water priced at less than a fifth of its cost is cheap enough to subsidize farmers bringing into production marginal scrubland which would never have been irrigated and farmed if it had had to produce an economic return sufficient to cover its true costs. The existence of these massive federal subsidies has turned the San Joaquin Valley into a bottomless pit in terms of water demand; even at the height of the drought, the loud calls are for more water to expand agricultural production into ever more marginal land. No one knows how much uneconomic land federal taxpayers and electric rate-payers are paying farmers to irrigate in the middle of a drought; only the Bureau could put together such a figure, and the Bureau has never wanted to know.

The Bureau has the enormous quantities of rough data to make such an estimate, because its contracts with its customers are priced on the basis of the user's estimated ability to pay, irrespective of the cost of development and delivery of the water. That incredible blank subsidy check to the Bureau's clients was written into the federal Reclamation Project Act of 1939. A depression-era measure, its aim was to rescue small family farmers whose obligation to repay the costs of development projects already had been diluted by stretching repayments out over 50 years—without interest.

Today, Southern Pacific and other major corporate landowners in the San Joaquin Valley's scandal-ridden Westlands Water District are still paying $7.50 per acre-foot for subsidized federal water which may have cost $20–$30 per acre-foot to develop. Neither at the Central Valley Project nor at Federal Bureau of Reclamation headquarters in Washington has any study ever been done of how much efficiency of water use would be heightened, how much water demand would be cut, and how much marginal farmland would be taken out of production, if rates were raised to anything remotely approaching levels which would cover costs.

COST-EFFICIENT FARMING

The closest thing to such a study was a report entitled "Pricing and Efficiency in Water Resource Management," done for the National Water Commission in 1971. It repudiated claims that agricultural demand for water was unresponsive to price changes, noting studies from both the Central Valley and the Imperial Valley (near the Mexican border), which had found a sharp boost in water use efficiency and declines in consumption after significant increases in water rates.

But the report did not place the full blame for such grossly inefficient pricing policies on the Bureau, "Ability-to-pay—not cost—is the sole criterion for pricing Bureau-supplied water. Irrigators never pay the full cost of the water which they use, for they are not expected to do so." (The interest-free subsidy of the government's capital investment, the report noted, at an estimated cost of capital of 7% a year over 50 years, cuts the discounted value of irrigators' repayments to less than 30% of true project cost; further subsidies from power revenues cut their repayment share to less than 20%.)

"Nonetheless, repayment of project costs is still the avowed aim of the Bureau and the chief concern of the Congress; a great deal of time and energy is expended over the complexities of cost allocation and repayment. To reconcile these apparently contradictory purposes, the Bureau is forced to use spurious and misleading cost accounting methods to make projects look acceptable to Congress. This is not to suggest that the Bureau is surreptitiously deceiving the Congress; rather, the Bureau is engaged in a mutually advantageous obfuscation with Congress of the economic reality of reclamation. The alleged local economic gains from reclamation projects have made them politically valuable; few policy-makers have been concerned with the real cost of the projects to the national treasury."

Or, in the words of Jim Cook, the self-styled "country boy from Mississippi" who heads up the Bureau in California, the Central Valley Project "got in the hole financially because people wanted it in the hole"—people in the Interior Department, in the Congress, in the farm lobby. "To the economist I would say don't just jump in there and talk about the ultimate truths, like the newfound geniuses in the Carter Administration want to do; track it through, because you've probably got $6 or $7 or $8 in local economic gains riding on every $1 of government subsidy you've got sunk in that marginal land. . . Everybody raises hell about the CVP, and the federal government's operation of the CVP, but those who are on the outside of it want in so damn bad they can taste it, and those that are in are not going to give up a damn thing to let the others come through. So how can it be so damn bad and such a bust if everybody's fighting so hard to hang on to the piece of it they've got?"

PORK FOREVER

That's probably a fair summary of what new-found Interior Secretary Andrus—Cook's and the Bureau's nominal overlord—will be hearing from the good ol' boys in Congress if President Carter goes along with his proposal to try to raise irrigators' share of Bureau water costs nationwide from 19% at present to 25% and then to 30%. Meanwhile, Cook is battling the state over Delta water-quality standards; he has called for wide-scale damming of the rivers of California's north coast, which environmental groups are fighting to place under the protection of the Wild and Scenic Rivers Program; and he has accused the Brown administration and the state's Department of Water Resources of trying to bring in anti-growth land-use planning through the back door by blocking further water development.

At the moment, the major obstacle to new water development is the review President Carter has ordered of the Bureau's Auburn Dam project—a beautiful piece of design which will look like a thin concrete eggshell, and which Bureau engineers are convinced will stand the strain of being located almost on top of an earthquake fault line, just upstream from the state capital. Unfortunately, confidence in the judgment of the Bureau's engineers has waned somewhat since the collapse of the Teton Dam in Idaho, where Andrus was Governor at the time, and Carter has ordered that construction cannot go forward unless California officials are convinced of its safety.

State officials are looking hard for more water; the State Water Project already has signed contracts for the delivery of twice as much water as it has yet developed. But Ron Robie, director of the state Department of Water Resources, sees California as up against very real limits to growth—and angrily describes Cook's references to anti-growth planners in the Brown administration as "demagoguery of the first order."

He adds: "The federal government has not cooperated fully with the state in Delta water management, in allocations; they have been fighting a rear-guard action to discredit whatever we're doing. There isn't an unlimited supply of water and nobody will face up to that, the Bureau in particular. That's not land-use planning, that's just a simple fact. You can't develop everybody's wish-list if you don't have water and you have to let them know that there isn't water."

"The new dams are getting very expensive; as Secretary Andrus has said, all the good sites are gone; Auburn's not a good site. And the Bureau, because of the funny-money process, doesn't make it clear to people in California that new water is costing $100 an acre-foot to develop at the dam and that there are limits to the subsidies. The Bureau has never cared about how water is used; for them it's simply a question of getting more dams on line."

Dams with no water behind them, built to meet demands for non-existent water—demands created by the very federal subsidies that built the dams. If Carter and Andrus think they're going to talk Congress out of a public works program like that, they've got their work cut out for them.

REVOLUTION ON THE FARM—PART VI

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. ALEXANDER. Mr. Speaker, I would like to share with my colleagues the sixth in a series of articles that appeared in the Arkansas Gazette that deal with emerging trends in Arkansas agriculture. I commend this article to my colleagues:

REVOLUTION ON THE FARM—VI: SHARECROPPERS, ONCE BACKBONE OF STATE, NOW ALMOST EXTINCT

(By Tom Hamburger)

In 1950, farm economists say, the sharecropper was the backbone of the Arkansas economy. Now, there are almost no sharecroppers left in Arkansas.

"They were here one day and gone the next," Clay Moore, an agricultural economist with the state Cooperative Extension Service, says.

Black and white sharecroppers in Arkansas provided their labor in Arkansas fields in exchange for a share of the crop they produced using the landowner's equipment.

"The only thing the cropper provided was labor," Moore noted, "Now, when chemicals do the chopping and a picker does the picking, there is very little labor in producing cotton so the whole basis of sharecropping has disappeared."

In 1950, the last year that census officials counted the number of sharecroppers in Arkansas, Crittenden County had 5,900 farms and 44,503 sharecroppers.

By 1959, the number of farms had shrunk to less than 2,000 and "there were no more sharecroppers to speak of," Moore said.

"In St. Francis County, they suffered such a drop in the number of tenants and sharecroppers," Moore said, "that census officials refused to believe it."

The Scott community, a settlement of 350 families located a half hour from Little Rock, lost most of its sharecroppers in the mid-1960s, a little later than the rest of the state. Mrs. Mary Harper, a Scott resident whose family sharecropped, recalled the change.

"It was a shock," Mrs. Harper, who now works with a self-help organization called the Scott Area Action Council, recalled. "We didn't know if we were going to make it. The bossman came and told us there would be no more sharecrop and people would have to find a job. This bit them bad because they didn't know how to get a job."

She estimates that 500 persons have left Scott since that day in 1966, leaving about 350 black families at Scott and with "more leaving every day."

Most residents at Scott will tell you that the changes since the mid-1960s, while difficult at first, probably resulted in higher standards of living for those who left. For those who stayed, the Scott Area Action Council and other agencies have made improvements (they built 11 modern houses recently with plans for nine more), but the residents feel left behind and a bit forgotten.

"It used to be nothing but houses all through here," Mrs. Lee Anna Smith, who lives in a sharecropper shack with her two children, recalled. "I lost all of my friends. Some went up north and some went to Little Rock. It's really sad. I'm here all alone with the kids and no one to visit with."

Mrs. Smith's house has no running water, poor lighting and walls lined with newspaper. There are 11 similar plank houses, some without front doors, left in the community, according to Mrs. Brenda Givens, a member of the Action Council. She estimates that almost of all of the black housing at Scott is substandard.

Mrs. Harper said that nearly all houses occupied by blacks at Scott are former sharecropper houses provided by plantation owners. Today, they still are owned by the plantations and most of the residents stay rent free.

John Barnes, 61, of Scott is saddened by the sudden changes, but says that "no one has starved since they had to quit farming. In a way it really helped the people. People who worked here never thought about owning a car or a home, but after they went out and got a job they got those things."

At Walnut Ridge, Community Service Administration personnel deal with hundreds of impoverished white former sharecroppers and farmworkers.

Mr. and Mrs. Lloyd Vaughn have five children and live in a dilapidated house outside of Walnut Ridge. Mrs. Vaughn says her husband loves to farm and finds work for a few months in the spring of each year.

The Vaughns depend on food stamps and other social services, but they prefer their life to moving to the city where jobs are more available.

The family lived at Chicago for three years while her husband worked as a welder, but they returned to Arkansas. "We left because we were tired of the gangs on our front steps," she said. "We wouldn't go back to Chicago."

RICHARD T. McDOWELL, JR.

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. BENJAMIN. Mr. Speaker, allow me to take this opportunity to ask my colleagues to join with me in commending and congratulating Richard T. McDowell, Jr., 13-year-old son of Richard and Gertrude McDowell of Dyer, Ind., who is receving the God and Country Award this Sunday and the Eagle rank in August for his outstanding record in scouting.

An honor student at Kahler School where he will be in the eighth grade this fall, Richard has compiled an amazing, if not completely miraculous, record in scouting during the past 30 months.

Not only has Richard been awarded 38 merit badges in every discipline and study from atomic energy to safety, but he has also achieved the coveted "Order of the Arrow"—all since his 11th birthday.

Richard also distinguished himself as a Cub Scout where he earned 12 arrows in 2 years. In Weblos, he earned 15 merit badges and his Arrow of Light.

Richard's profundity became apparent in his second- and third-grade years when he entered his school's science fair and won top prizes and further competition in the district division. He has been on the honor roll since the fifth grade and was a member of the newspaper staff and wrestling team last year.

Obviously, Richard has brought laurels to his community and engendered pride in his family. More than that, he is setting a perfect example for his two younger brothers, Rusty and Robert, to emulate.

Richard hopes to enter the Massachusetts Institute of Technology at the appropriate time and major in physics or medical research.

Richard's parents have great reason to be extremely proud of their personable and model son. Likewise, they have great reason to be proud of their contribution to his success because, as we recognized in the adoption Monday of the "National

Family Week" resolution, the continued development and vitality of our Nation are not only dependent upon principled young men like Richard, but also on the love, loyalty, and self-sacrifice of the family which imbues strength and fortitude to its members.

Richard's present accomplishments provide benchmarks from which we will continue to measure his success in the future. I know my colleagues join with me to wish him even greater success in the future and to encourage the McDowell family to persevere in their family inculcation of the values and attitudes cherished in a free and democratic society.

EUROPEAN NATIONS SIGN ACCORDS ON DEVELOPING BREEDER REACTORS

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. TEAGUE. Mr. Speaker, as you know, our committee recently returned from an oversight trip where we spoke with European leaders about the issues surrounding the development of breeder reactor technology. We are doing everything we can to publish the report on the trip shortly. As we have stated in the report, we were made aware as part of our oversight activity that the European nations would be signing accords on developing breeder reactors. I am placing in the RECORD today for the attention of my colleagues the following news report on this latest development:

EUROPEAN NATIONS SIGN ACCORDS ON DEVELOPING BREEDER REACTORS

(By Jonathan Kandell)

PARIS, July 5.—France, West Germany and several other Western European nations today signed accords here for further research and development of nuclear breeder reactors and their eventual sale abroad.

Both Western European and United States officials interpreted the agreements as a rejection of President Carter's call for at least a temporary moratorium on breeder development to avoid the spread of nuclear weapons.

The fuel used by the breeder reactor is plutonium, a material that can also be used for the production of nuclear weapons. The breeder theoretically creates more plutonium than it burns, and has thus gathered support among governments worried over the possibility of a shortage of uranium.

Earlier this year, President Carter said he opposed the use of plutonium as fuel in the United States. But lobbying by the nuclear power industry has kept alive the possibility that funding for a demonstration breeder in Clinch River, Tenn., may be approved by Congress.

DISPUTE WITH BONN AND PARIS RECALLED

The United States has already clashed with France and West Germany over their plans to export uranium reprocessing equipment. The French have held back on a deal to supply the technology to Pakistan, and are expected to announce this decision publicly after the military coup today. The West Germans have refused to rescind commitments to supply Brazil with enrichment equipment.

President Carter's objections to these two deals were based on the fact that reprocessing of spent uranium fuel produces plutonium, unusable as a fuel in conventional reactors, but capable of being diverted for use in weapons. The objections to breeders are essentially the same—they produce plutonium.

The accords signed today are of two kinds. The first calls for cooperation between France and West Germany in research and development. The other accords create a company, including French, West German, Dutch, Belgian and Italian interests, to market breeders.

A number of prototype breeders are under construction or in operation in Western Europe. France has a 250-megawatt breeder that operated for about 16 months, then closed down for half a year because of technical problems, and recently resumed its operation. The French have decided to move ahead with a commercial 1200-megawatt breeder.

SOVIET NOT A PARTY TO ACCORDS

West Germany, together with the Netherlands and Belgium, is constructing a 300-megawatt prototype breeder. The British have two research breeders operating in Scotland. The Soviet Union, which was not a party to today's accords, has a 350-megawatt breeder that is also used for desalting of seawater, and is building a 600-megawatt reactor.

Europeans tend to defend breeders for a variety of reasons, including the following:

There are few secure sources of energy for most Western European countries, which must import most of their oil, coal, gas and uranium. The breeder reactor, by producing more fuel than it consumes, thus becomes an attractive source of energy.

A corollary of this argument is that the United States can afford to take a stand against the potential hazards posed by breeders because it has large reserves of coal, uranium, oil, and gas, and what Europeans view as a strong relationship with Middle East oil producers, particularly the Saudis.

Another argument made in favor of breeders is that Western Europe holds a technological lead over the United States. Officials say the Americans will probably come around to accepting the inevitability of breeders and Europe should be prepared to meet its needs and seize a share of the export market.

EUROPEANS DISCOUNT HAZARDS

Europeans have tended to discount the potential hazards posed by the creation of large amounts of plutonium, and have said that it is possible to create strict safeguards against its use for weapons.

While the Europeans see potential long-range economic benefits in breeders, their construction costs run into the billions of dollars. If the European economies continue to show sluggish growth, an expensive breeder program could be a prime candidate in a budget cut.

Domestic opposition to nuclear energy got started later in most Western European countries than in the United States, but it has now burgeoned into an effective movement and breeder reactors are a likely target.

In West Germany, legal victories won by opponents have slowed plans to have 30 nuclear power reactors in operation by 1985. In France, opposition is being mounted against the 1,200 megawatt Superphenix breeder even before the start of construction. In Britain, both economic costs and domestic protests have led to public debate on breeders. Protest movements have also added uncertainty in the Netherlands, Belgium and Italy.

HUMAN RIGHTS IN CUBA

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. CORRADA. Mr. Speaker, the Cuban Committee Pro Human Rights, whose membership is composed of persons from my district, asked me to convey to the membership of the House their concerns regarding the protection of human rights in Cuba.

I should like to state that I am fully in agreement with the position stated by the Cuban Committee Pro Human Rights, and that I fully support their efforts to secure a respect of human rights by the Government of Cuba and by other nations of the world.

A copy of the statement of position of the committee follows:

OUR POSITION

We, the undersigned, in view of the emergence of a new Cuban policy on the part of the government of the United States of America, which indicates a trend to a rapprochment in the relations of both countries, consider it our inescapable duty to bring to your consideration what we deem is our historical position on this matter.

1. We are, above everything, fully aware that we are a people in exile; without a government. We also understand that we cannot impose our criteria nor attempt to influence the foreign policies of the countries in which we gratefully reside. Furthermore, we believe that the United States of America is conscious of its world-wide responsibilities as the undisputed leader of the free world and as a guardian of these freedoms which up to the present moment, in spite of our own differences which enables us to think and take action on that which we feel is proper, continues to be our staunch allies. We are also convinced that our struggle will not cease until we have seen Cuba finally freed, once again independent and a democracy.

2. But farther to our above stated appreciations, and making use of the rights granted us under a democracy, we feel that it is pertinent to express our thoughts so that we can fully support the legitimate aspirations of the Cuban people to the enjoyment of the same freedoms, the same rights and the same protection afforded the citizens of the United States of America.

3. It is a fact that the economic embargo has not achieved anything by itself. We are convinced that the blockade is a myth. If it exists, it is not due to pressure from the U.S.A., but rather it is due to the inoperative realities of the communist system. The blockade is not from without but rather from within. The lack of foreign currency which confronts Fidel Castro is what really prevents him from carrying out foreign commerce with the western world.

4. However, we firmly believe that an unconditional resumption of relations with Cuba would be tantamount to a cruel blow dealt against the oppressed people of Cuba. A coexistence with the communist Cuban regime on the part of the government of the United States of America, without first taking previous necessary measures to eradicate from Cuba the internal evils from which it suffers, would be absurd and extremely dangerous. A typical Latin-American dictatorship does not exist at present. The situation is more complex when you take into consideration the international implications. Under the Fidel Castro regime, the Cuban people are unable to exercise self-determination. Mere disagreement is considered a crime. The regime has consistently trampled on the most elementary rights. Justice is subordinated to the political power. Individual liberties are non-existent. The people of Cuba are currently submitted to personal persecutions, continuous harassment and a police state vigilance. Indiscriminate mass arrests, without legitimate cause and without evident purpose, are commonplace and daily occurrences which have become, due to their frequency, acceptable and normal. There are no religious liberties. No guar-

antees exist for the working class. Freedom of expression has been totally extinguished. The restriction of the freedom of movement has not only been directed at obstructing those who want to flee Cuba, but also to travel within Cuba. Cuba today is an island-prison.

5. And if the situation of the Cuban within Cuba is intolerable, those languishing in the jails and concentration camps of communist Cuba are in an infinitely worse pathetic condition. At only a mere ninety miles from the shores of the United States of America, thousands of Cubans stoically bear the brunt of the most oppressive penitentiary type regime that any country in the American continent has ever suffered. Life in the communist jails and concentration camps is but a constant and refined torture that ranges from the most cruel and barbaric methods of terror, to calculated and institutionalized hunger, so that the process of annihilation is a slow and sadistic one.

6. The impact of the Fidel Castro regime in the international field has also never been equaled in Latin America. Communism, through Cubans has been bombarding the integrity and security of the Americas, the Antilles, specially Puerto Rico, for quite some time. More recently, Fidel Castro's tentacles and those of his marxist-leninist regime have extended themselves to Africa and the Middle East. Angola, Uganda, Ethiopia and Zaire are some of the countries where the presence of regular Cuban army troops are in evidence; a flagrant military intervention on the part of the Havana communist regime with abetment on the part of the Soviet Union. Cuba, since the inception of its communist revolution has, and continues, to constantly provoke disorders, aid and abet military rebellions, infiltrate countries, subvert the established order of the governments of the Americas and in the extracontinental plane, intervene with regular army troops in the internal affairs of those countries.

This deplorable situation not only worries we the exiled Cubans that cherish the rights of others, but it is also a grave cause of concern to all the peoples and governments that desire to live in peace without the constant fear of armed aggression on the part of the Castro regime.

7. These are, in synopsis, the most outstanding features of the Cuban communist regime with which it appears that there are intentions to establish diplomatic relations on the part of the government of the United States of America.

If our appreciations are correct, and if President James Carter has embarked on the path of renewing relations with communist Cuba, we would like to remind him of a phrase from the inaugural speech of the late John F. Kennedy: "Let us never negotiate out of fear, but let us never fear to negotiate".

If the United States of America have decided to parley with the Cuban communist regime, they must do so without fear. Without fear of demanding from the tyrant, Fidel Castro, a rectification of his domestic and foreign policies. In the Cuban domestic area, if the United States of America wishes to continue being the standard-bearer of freedom, it will have to force the Cuban regime to respect said liberties that have been endowed each Cuban as his natural rights in his condition as a human being. It cannot compromise nor give in when it is a matter dealing with the basic human rights of the Cuban people, long sufferers of this pathetic situation. Parallel to the preceding and of equal importance is to demand from the communist Cuban government the release of its political prisoners. It is high time that the government of the United States of America takes it upon itself to formally demand from the government of communist Cuba the release of thousands of political prisoners that live virtually dying in their cells, sustained only by their firm conviction that they die as patriots in the cause of freedom and democracy.

8. If the government of the United States of America makes common cause with the international organizations that have repeatedly demonstrated insensitivity to the suffering and tortures endured by the political prisoners in Cuba, and resumes unconditional relations with communist Cuba, thus giving the moral and material backing which this floundering Caribbean communist regime desperately needs to survive; if you, the Honorable President of the United States of America, being able to act according to your repeated statements in support of human rights, were to opt in the case of Cuba, to continue preaching without adjusting your conduct and actions in favor of the Cuban people, we would have no recourse, with profound sadness, than to recognize the fact that you as well as your government have let us down. And what is worse, that you have dealt a mortal blow to world democracy.

9. We are in a historically decisive moment in the struggle between freedom and slavery. It is up to the United States of America to tilt the delicate balance one way or another. We have faith that all is not lost. We firmly believe that the people of the United States of America share in and defend the democratic way of life and that the thousands of grave markers that dot the war cemeteries of Europe and Asia and which are symbols of the heroism of the young men and women who made the supreme sacrifice in the defense of this ideal are not meaningless monuments to war, but that the blood that was shed in the name of democracy by these young Americans was not shed in vain. We trust that you will not be the first President of the United States of America to unconditionally recognize the first communist regime in the Americas without first firmly stating and demanding unforfeitable conditions. We Cubans have set our hopes on the government of the United States of America and on yourself. We await, hopefully, President Carter, that in the end you will earn the eternal gratitude of the captive Cuba and the Cuba in exile.

THIRD ANNIVERSARY OF THE INVASION OF CYPRUS BY TURKEY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Ms. MIKULSKI. Mr. Speaker, 3 years ago the Turkish Army invaded and occupied 40 percent of the Republic of Cyprus. The basic issues that faced Congress at that time still remain with us today. Turkey violated U.S. law by using American arms for the invasion and occupation of Cyprus and also violated the human rights of the Cypriots by engaging in large-scale murders, torture, and looting of homes and properties. This was followed by the forceful deportation of Greek Cypriots from their homes in the northern portion of Cyprus. These violations have been documented in a report by the Human Rights Commission of the Council of Europe.

The interests of the United States have been seriously impaired by the Turkish invasion and continuing occupation of the Republic of Cyprus. This act has continued to prove to be a major cause of friction between two American allies, Greece and Turkey. The result is a weakening of the stability and effectiveness of the southeastern flank of NATO with ominous repercussions should a war break out between our two allies.

We in Congress, on this third anniversary of the Turkish invasion, should continue to seek a resolution to this conflict in the shortest possible time and in a way that removes the violation of our law and restores human rights to the people of Cyprus.

TESTIMONY OF REPRESENTATIVE PARREN J. MITCHELL BEFORE SENATE BANKING COMMITTEE

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. MINISH. Mr. Speaker, Congressman PARREN MITCHELL of Maryland has been one of the foremost advocates of effective renegotiation of defense contracts in the U.S. Congress.

Last month, Congressman MITCHELL joined me in testifying before the Senate Banking Committee in support of the Renegotiation Reform Act of 1977. Mr. MITCHELL makes an eloquent case for the continuation and the improvement of the renegotiation process and I commend his testimony to all my colleagues:

TESTIMONY OF REPRESENTATIVE PARREN J. MITCHELL BEFORE SENATE BANKING COMMITTEE, JUNE 14, 1977

I shall be brief.

Mr. Minish has a prepared statement which was submitted to you and I concur wholeheartedly in that statement.

I support the legislation to strengthen and maintain the renegotiation board. Let me make one or two observations if I may.

I have had the honor and privilege of serving on that subcommittee for almost four years now under the able leadership of Mr. Minish. If there is one thing in America right now which is of great moment and great impact it is the desire of the American people, plain Joe Blow out in the street, to have a system of accountability in all aspects of government.

I think that is good. Wherever I travel around this country people raise the question in one form or another, is my government, is my agency, is my congressman, is my state accountable to me?

And in response to that we have and do demand accountability. If this Congress makes a grant under this legislation to a governor or mayor we demand a strict system of accountability and that is right and proper.

If we make a grant to a local group in Cleveland or Boston to run a health project we demand accountability of those funds and I think that is right and proper.

Even in this Congress recently we have subjected ourselves to a series of rather rigorous requirements, the net result being that we are answering in terms of accountability tc the American people because in effect we are under contract really to the American people because we use federal funds.

Why in the name of God if we demand that kind of an accountability across the board, why then do we attempt to exempt accountability from the defense industries?

I think to do so would open this Congress up to serious questioning by the American public. Of course accountability does create a burden. It is a burden on the government to report back that the funds have been properly used. It is a burden on a local grantee to report back that the funds are being properly used. It is a burden for each and every

member of this Congress to go through the whole series of reports that we have to go through in order to live up to the reforms that we ourselves instituted. It is a burden but it is a justifiable one in terms of accountability.

The argument that this is a burden to the defense industry is a suspicious argument. Number one the requirements are not that stringent and number two it does not weigh more heavily on the defense industry than it does on any member of Congress.

The argument has been raised and Senator Brooke has probed into this area, that the renegotiation board was created during a time of emergency and indeed it was. Then the further argument was that there is no longer an emergency, therefore we no longer need the board.

That is nonsense.

We are spending money as has been indicated early on in the hearing at the rate as if we were almost on an emergency basis. $118 billion-plus is what we budgeted this year for the military. So we are spending money as if it were an emergency. We might as well live up to the emergency conditions associated with that rate of spending.

Should the board be continued I would suggest to all of the members of this committee if you knew of any organization, any agency, any group that had done business with the government and has $150 billion worth of contracts, which have not been reviewed in any form at all, you would take great umbrage and you would become excited and angry about that. That is the situation we have today. $150 billion never even examined in terms of whether or not there is excessive profits.

In the matter of the board, in our hearings I had no hesitancy in calling the board inept. Some of the members of the board had no knowledge of their mission, authority, power, and duty. I called them inept at that time and I have no hesitancy to restate my position that it was inept. Its lack of ability reflected certain other things.

One, it didn't have any powers. It couldn't examine renegotiation by product line. If you take that away that board could not do the job even if it had the will to do it.

It didn't have subpena powers. Without subpena powers there is no way in the world that an effective review of $150 billion in contracts can be made.

The one entity that has the power to review in terms of renegotiation is the Renegotiation Board. The Department of Defense does not have the authority to reclaim any excess profits. All they can do is look at those contracts to see whether they are entered into in good faith, to see whether the timetable is kept up, to follow that line.

They have absolutely no authority to examine a single one of those contracts in terms of excess profit. Under the present law, the only group that is allowed to do this is the Renegotiation Board. That is why I argue for the continuation of the board.

Two last points and then I will quit.

My colleague from California, Mr. Rousselot, mentioned the four or five major agencies that do review of contracts. I have no quarrel with his statement. They do. They are all tied into the Department of Defense except GAO.

With reference to those tied into the Department of Defense their review, I again reiterate, under law precludes possibility of examining for excessive profits. I suggest that the burdens we now place on the General Accounting Office are so enormous that it would e impossible for the GAO to review these contracts, even one-third of the backlog, in terms of excessive profits.

Mr. Chairman, and members of the committee, the act does not accuse anyone. The act is not aimed at saying somebody has committed fraud of some sort. All it says is we will demand the same kind of accountability from the defense contractors, defense industries as we demand from the governors of our several states, mayors of our many cities, as we demand from the Congress itself. That is all it does.

I hope the committee in its wisdom would approve the act and let's get about the business of strengthening accountability in the defense industry sector.

I thank you very much.

A WORTHY PROPOSAL

HON. B. F. SISK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. SISK. Mr. Speaker, as those of us representing agricultural areas of this country can attest, this current drought, gripping nearly 30 of our States in one form or the other and to differing degrees, is teaching us some valuable lessons.

Water conservation no longer is reserved solely for the western States nor just for agriculture. It is a national issue. I am pleased to report that water conservation is also an area for innovation and that agriculture, the single largest user of water in California, is in the forefront in developing water saving technology.

Just recently three canneries proposed a unique program of sharing. The canneries will benefit, farmers will benefit, and the consumer will benefit. I am including at this point a copy of the editorial on this from the Modesto Bee:

[From the Modesto Bee, July 12, 1977]

A WORTHY PROPOSAL

The Modesto Irrigation District Board of Directors has reacted with caution to a proposal by three of the area's major food processors to utilize cannery waste water for irrigation.

The response is a proper one at this preliminary stage, because more particulars are needed. The MID has a prime responsibility to maintain the integrity of its irrigation system, and the directors cannot be faulted for moving with caution.

Nevertheless, the careful reaction should not be allowed to obscure the potential of this joint proposal and its basic desirability.

The three processors, Tri/Valley Growers, Del Monte and Tillie Lewis Foods, Inc. discharge substantial amounts of waste water for three months at the height of the growing season—a period which coincides with peak irrigation needs.

The volume is considerable. It would amount to approximately 13 million gallons per day—enough over the period to irrigate 2,000 acres of croplands for a season.

This substantial contribution admittedly commands greater receptivity in the present time of drought. But the fundamental idea of wringing the most out of existing water resources is a good one at any time.

The principal concern of course, is the quality of the water which the processors propose to pump into the MID canal system. Second is the long-range outlook for such a project, since its costs and benefits would not be justified on merely a short-term or interim basis.

The water quality problem may well be the simpler of the two. The proponents of the plan say they are prepared to provide sufficient additional treatment of the water before it is discharged so as to make it fully acceptable for irrigation purposes.

In addition, the Central Valley has now had nearly 20 years of experience with the use of cannery waste water for irrigation. Research and monitoring of these applications since 1970 by the University of California Cooperative Extension have shown that they are, with proper management, a practical alternative to conventional waste water treatment.

The benefits are apparent. Fresh water is conserved for other purposes, yet the waste water used in its place percolates down to recharge ground water supplies. And in this case, the heavy seasonal load on the municipal sewage disposal system would be relieved, permitting the city to accommodate additional industry.

The processors themselves acknowledge that over the years, the project would more than pay for itself in reduced costs of waste water disposal. Good. For it is just this kind of economic stimulation that will do the most to move us toward sensible and beneficial conservation practices.

LEADERSHIP AND THE PUBLIC GOOD

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for July 20, 1977, into the CONGRESSIONAL RECORD:

LEADERSHIP AND THE PUBLIC GOOD

The demand for leadership is a central concern of the American people today.

A constituent asks, "Where are the political superstars?" A friend writes, ". . . we are virtually leaderless, not only in politics and government but in the society as a whole." Many people think their leaders are persons of diminished vision, and believe that the giants of leadership have departed the scene.

One factor that accounts for such feelings is the increasing complexity of the modern world and its problems. Bewildering global crises overwhelm one leader after another who tries to cope with them. Each day more and more issues are thrown into the political arena, overloading the sometimes delicate institutions of government. In every country the problems, but especially the twin specters of unemployment and inflation, continue to erode public confidence.

Of course, there are other contributing factors. The contemporary news media—spurred by recent successes in exposing government scandals—subject all leaders to an intense scrutiny and over-exposure burns up talent quickly. In addition, the events of the past years—most notably Vietnam and Watergate—have generated a deep cynicism, the effects of which no public official escapes Also, institutions have become far more difficult to lead as participation and interest in their work has increased, and their agenda has become more complex.

I would not pretend to be able to resolve these concerns about leadership, but I am persuaded that at this particular time people are especially interested in the moral quality of leadership.

Any sensitive politician quickly identifies this concern of the people because the symptoms are everywhere apparent:

The interest of constituents in the personal character and the ethical conduct of political leaders.

The surprising prevalence of the view that most of us in government are corrupt and have our hand out for a pay off.

The widespread feeling on the part of ordinary people that they have worked hard, lived within the law, struggled to get ahead, but that those in positions of power have not lived by the rules and yet have flourished.

The concern among people about the fairness of public policy, whether it be taxes, jobs, education or welfare.

The decline in respect for law.

The sense of outrage some persons feel about those who break the law and get away with it.

The desire for social programs that meet the needs of disadvantaged people without undermining personal responsibility, the work ethic or self reliance.

The deepest expression of the people's concern for moral leadership is evidenced in their preoccupation with the question of where the country is going and what it stands for. They are also demanding that a person who has the privilege of serving the public should exercise a higher level of honesty and truthfulness than the person who does not bear such a responsibility.

Moral leadership certainly includes the simple virtue of openness to people and to ideas, honesty, simplicity of lifestyle, respect for the democratic process, fairness, and avoidance of false and misleading promises. But perhaps most important, it demands a commitment to the public good. I agree with the observation in a Public Agenda Foundation report that the remedy for the yearning for moral leadership in the country is for each one of us to restore in our lives a sense of the public good. The question is not what is good for Lee Hamilton or for the labor unions or for the business, professional or farm organizations, but what is good for the country.

Perhaps all of us need to be committed more strongly to the common good. We will not always agree about the true nature of the public good, and no one of us will be the permanent interpreter of it. But all of us, as we consider competing interests and demands, must seek to choose the overriding public good.

This search for the common good is vital in a free society. John Adams said, "The public good is the proposed end of all government," and he urged a "distinterested attachment to the public good, exclusive and independent of all private and selfish interest." Thomas Jefferson, in that remarkable first inaugural address in 1801, urged his fellow Americans to "unite in common efforts for the common good."

In the words of that report, our task is to restore to American life an active, urgent sense of the public good.

REVIEW OF CONDOMINIUM LAWS

HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. BURKE of Florida. Mr. Speaker, the State of Florida is growing faster than any other area in the United States. To give you an idea of the growth in 1960 the Fort Lauderdale-Hollywood, Fla., metropolitan statistical area had 334,000 people, in 1974 it had 807,000, and today the estimates are right at 1,000,000 people.

The housing for these newcomers is primarily condominiums. In addition to the permanent population that resides in my district—Florida's 12th Congressional District—there are many other people who buy condomiums and use them only for a part of the year.

Because of many injustices and consumer abuses resulting from the sale of condominiums, a new look at the law was necessary, both, by the Congress, and by the various State legislatures where condominiums are popular. Since the first condominiums were built in Florida, the impact of the injustices of the sales by the builders began to crop up in large number. Various Federal agencies, as well as some of our congressional and the State Legislature of Florida moved to pass corrective regulations and laws.

I have made a review of some of the things that have been done so far for my constituents to review. Much more is necessary, and I commend this review for you:

REVIEW OF CONDOMINIUM LAWS

A great deal of activity has taken place within the last year concerning condominium laws. In an effort to be helpful, the following is a summary of action by the following: (1) U.S. Court of Appeals, (2) Federal Trade Commission, (3) U. S. Congress, and the Florida State Legislature.

The U.S. Court of Appeals decision in Imperial Point Colonnades Condominium vs Harry T. Mangurian reversed the District Court decision on April 4, 1977. Unit owners in condominium brought private treble-damage antitrust suit alleging that a requirement that condominium purchasers enter into a 99-year recreation facility lease constituted an illegal tying arrangement in violation of antitrust laws. The United States District Court for the Southern District of Florida granted defendants motion for summary judgment, and plaintiffs appealed.

The Court of Appeals reversed the decision and held that although plaintiffs bought condominium units from defendant corporation and became parties to recreational lease with individual defendant who was president and sole stockholder of corporate defendant, more than four years before commencing treble-damage antitrust suit on claim that requirement that plaintiffs enter a 99-year recreational facility lease constituted an illegal tying arrangement in violation of antitrust laws, individual defendant's collection of rent constituted acts injurious to plaintiffs within four years of commencement of suit, and a new cause of action for conspiracy accrued upon each act of collection, notwithstanding that individual defendant who sold the tied product was not a party to tying agreements.

Federal Trade Commission has been involved for the last several years in an investigation of the condominium industry. That investigation has focused primarily on long term recreation leases and maintenance contracts and the payment escalation clauses that often are included. The Commission's problem has been to devise a remedy that would give relief to all condominium unit owners subjected to unfair contracts and stay within the budget limitations of the Commisson. Since there are approximately 2200 developments in Florida which have recreation leases, this has been a difficult task. At the present time the Commission is involved in litigation with a North Miami Beach developer, Century 21 Commodore Plaza, Inc. The charges in that cause include that the escalation and other clauses of the contracts are per se illegal. Trial of the case began May 2, 1977.

The U.S. Congress has pending before its House Banking and Currency Committee two bills I have sponsored to assist condominium buyers. The first is H.R. 4175, the National Condominium Act. If enacted, this bill would protect purchasers and prospective purchasers of condominium housing units, and residents of multifamily structures being converted to condominum units, by providing for the establishment of national minimum standards for condominiums. The second bill is H.R. 2855 which, if enacted, would insure that financial institutions engaged in the extension of credit to prospective purchasers of condominium units make credit available without discrimination on the basis of age, sex, race, religon, martal status or national origin. It would also establish an Assistant Secretary in the Department of Housing and Urban Development to administer condominium law. The Subcommittee on Housing advises that no action is scheduled at the present time on either of my bills.

The Florida State Legislature enacted the 1977 Condominium Act which contains the following provisions which went into effect July 1, 1977:

(1) Exempts developers covered under a 10-year insurance warranty program issued by a Florida licensed company from warranty provisions of the Act.

(2) Filing fees for the division of Florida Land Sales and Condominium reduced from $25 to $10.

(3) Establishes a rebuttable presumption of unconscionability if a lease:

(a) is signed at a time when unit owners did not have elected representatives on the Board.

(b) requires payment of real estate taxes by unit owners.

(c) requires purchase of fire and hazard insurance by unit owners.

(d) requires payment of rental for a period in excess of 21 years.

(e) requires subsequent purchasers to assume the lease obligations.

(f) requires unit owners to perform maintenance.

(g) provides for a lien on individual units to secure rent.

(h) provides for rental adjustment based upon price index.

(i) returns to the lessor during the first four years of the lease the appraised value of the leased facilities as appraised during the first year of the lease.

For this section to be applicable all 9 points must be present. The law does not automatically void the lease. It transfers the burden of proof to the lessor to prove the lease is not unconscionable.

(4) If there is no provision in the by-laws, a majority of the units shall constitute a quorum.

(5) Meeting notices may be sent by regular mail rather than certified mail as long as a certificate of mailing is obtained as proof of the mailing.

(6) Limits the liability of unit owners or acts or omissions of the Association to the value of the owners' unit.

(7) Reduces the right of a developer to designate a Board member by requiring the developer to own for sale at least 5% of the units in a condominium of 500 or fewer complex, or 2% in a condominium of more than 500 units, to have representation on the board.

(8) Multiple condominiums contained within a single development will now be permitted to merge into a single condominium where 80% of the owners of each condominium agree to do so.

(9) Effective October 1, 1977, public officers or candidates for public office can no longer be denied the right to speak on common elements or recreational facilities. Likewise, unit owners have a right to peacefully assemble, subject to reasonable rules and regulations.

(10) Protection for unit owners who request a certificate from the association showing the amount of unpaid assessment against the unit from liability arising from reliance on the certificate.

MANDATORY AIR BAGS: 151 CONGRESSMEN JOIN FIGHT AGAINST

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. SHUSTER. Mr. Speaker, 151 Members of the U.S. House of Representatives

thus far have cosponsored my resolution to disapprove the Federal order mandating the installation of air bags or other "passive restraints" in all new cars beginning in 1981.

The order was issued by the U.S. Department of Transportation on June 30, 1977, and Congress has 60 working days in which to adopt a disapproval resolution; otherwise, the order takes effect.

Mr. Speaker, I am happy to report that the lineup of cosponsors represents a broad cross section of the Congress, including Republicans and Democrats, liberals and conservatives, junior and senior Members, from all across the Nation. This demonstrates that the air bag issue is not a partisan one; rather, it is a clear signal to those who would regulate our lives that we have had enough.

Mr. Speaker, 2 weeks ago the air bag lobby said there would be little support for my disapproval resolution. They obviously miscalculated since very few legislative proposals attract 151 cosponsors. After talking with most Members of the House, I believe it is clear that the mandatory air bag order will be handily disapproved if the leadership permits the House to vote on it.

Hearings have already been scheduled in the Senate for September 8 and 9 and I have a tentative commitment for hearings in the House on September 12 and 13.

Mr. Speaker, the support for my resolution indicates that Members of Congress recognize what air bag lobbyists apparently do not—that mandating air bags at this time is not in the best interests of the American consumer. Based on the evidence gathered to date, air bags could actually cause more highway deaths than they prevent.

Additionally, the $200 price tag on a factory-installed air bag, coupled with an even greater replacement cost, could escalate into a consumer rip off totaling over $20 billion. And the American consumer will have absolutely nothing to say about it.

I have opposed mandating the air bag, Mr. Speaker, principally on the basis of the lack of hard evidence to prove that air bags are effective. Earlier this week, I reported to the House information taken from National Highway Traffic Safety Administration documents—the same agency that is pushing the air bag mandate—showing that on the basis of actual field experience, safety belts are 5½ times more effective in saving lives and 2½ times better at preventing injuries in serious accidents. NHTSA figures also revealed, surprisingly, that the air bags never deployed in 42 percent of the tow-away crashes investigated. These statistics may not be conclusive but they are the results to date.

I believe that Americans should accept additional regulation of our lives only if a compelling case is made. If the evidence showed that air bags would actually save lives, I would vigorously support this mandate. Until such a case is made, however, I support Government action to encourage the widespread use of safety belts, which are already a proven safety device on the basis of field experience and are equipped in 95 percent of the cars on the road.

Mr. Speaker, I am grateful for the support of so many House colleagues in this important endeavor. I urge all Members of the House to join us in rejecting this air bag mandate—until and unless a better case is made. Following are the names of cosponsors:

COSPONSORS—H. CON. RES. 273

Abdnor, James (R. S. Dak.); Alexander, Bill (D-Ark.); Anderson, John B. (R-Ill.); Andrews, Ike F. (D-N.C.); Andrews, Mark (R-N. CONGRESSMAN GILLIS W. LONG STATES OPPOSITION TO WATERWAY USER FEES

HON. GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. LONG of Louisiana. Mr. Speaker, I offer for the consideration of my colleagues testimony that I recently submitted to the House Public Works and Transportation Subcommittee on Water Resources.

The text follows:

STATEMENT BY MR. LONG

Mr. Chairman. These hearings by the Water Resources Subcommittee on the waterway user charge issue are of extreme importance. The intent of the Senate passed Title III of H.R. 5885, to impose tolls, lockage fees, or other user charges on the U.S. inland waterways, causes me great concern. It violates the fundamentals of national policy and nearly two centuries of American history. It is clear to me that the user charge provisions of Title III are really taxes and therefore constitute a revenue-raising measure which can only originate in the House of Representatives—and more precisely, under the jurisdiction of the House Ways and Means Committee.

The burden of cost-recovery user charges would devastate much of the waterway industry. The water carriers haul an enormous tonnage of freight, but because they charge so little for doing it, the industry is financially very small. Vessels on the U.S. rivers and the Great Lakes carry nearly 12 percent of the nation's freight, but they collect only 1½ percent of the country's total freight bill. The waterways carry a ton of freight for 25 miles at an average charge of only 13 cents—the price of a postage stamp.

The vessel operators cannot charge much more than they do. Shipments have to be not only big, but huge—500 tons and up. Movement is fairly slow and schedules imprecise. For this reason, lake and river vessels move mainly large-volume, bulk commodities such as farm crops, bulk chemicals and fertilizers, crude oil, gasoline and other refinery products, coal, ore, building materials, and the like. Any sharp increase in carrier rates would force shippers and receivers to turn to pipelines, to use higher

cost materials closer to home, and to curtail output. Imports and imported substitutes would displace some of the movements, as in the case of iron ores, steel, and coal. The massive U.S. export of waterborne farm products would be curtailed. In other words, with a big increase in charges, much of the waterway traffic wouldn't live.

With increased rates would come a decline in waterway traffic. The Federal costs to be recovered, however, are fixed and would remain at the original level. With a fixed level of Federal costs to be recovered from a diminished tonnage of freight, a process of rate escalation would be set in motion with no discernable ceiling.

My major concern relates to the probable effects of such changes on on-going waterway projects and other national policy objectives. The concept of waterway user fees is a matter of extreme importance to Louisiana and other water-oriented states. A significant case in point is the impact the user fees will have on the Red River Navigation Project in central and northwest Louisiana. The significance of this project is that it elevates the economic outlook for this area of Louisiana to its highest peak ever.

The imposition of user fees on the Lock and Dam 26 Bill will set a precedent for other water projects. Since the benefit-to-cost ratio of the Red River Project was marginal, the continuance of this project in light of this recent legislation is dubious. If user fees are imposed on waterway traffic to recoup the future construction, maintenance, and operation costs of the Red River Project, navigation costs will escalate and consequently, the benefits from this project will be reduced. Then, this will decrease the benefits of this project in relation to cost. The completion of the Red River Navigation Project will be endangered since there is the possibility that it will not meet economic justification standards established by the federal government.

People of central and northwest Louisiana, after decades of waiting, are looking forward to a water transportation system linking them to the North and South. This section of the State has endured a long history of unemployment and underemployment, yet the advent of this project has produced signs of economic salvation. The navigation project will attract industry to this area which will remedy the situation, but only if the project is completed and navigation costs remain low.

There are approximately 800 barge and towing companies on the Mississippi River and 1800 on the entire Mississippi system. These operations have been highly competitive keeping water transportation costs low. The American spirit of competition has made the consumer the benefactor in this long standing tradition of low transportation costs. If the rate is increased due to the imposition of user fees, it will be nothing more than an out-and-out inflationary move which will pass on higher prices to the American consumer. It is unfortunate that the intent of the user fee concept is to recoup federal costs at the expense of the consumer.

In the face of rapidly rising construction costs, federal appropriations for new work on river navigation throughout the U.S. barely held their own in dollar amount, and actual construction declined drastically. Stated in dollars of actual purchasing power, these appropriations declined from $204 million in 1962 to only $105 million in 1974, a reduction of nearly 50 percent. Far from restraining excess, waterway user charges would bring an already badly retarded program to a virtual halt. The costs to the nation would exceed manyfold the limited sums to be recouped by the Federal Treasury.

CLINCH RIVER COSTS AND BENEFITS—ANOTHER VIEW

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. TEAGUE. Mr. Speaker, in the debate about Clinch River, the administration seems to have changed its main reason for wanting to terminate this plant. On April 20, President Carter said:

There is no need to enter the plutonium age by licensing or building a fast breeder reactor such as the proposed demonstration plant at Clinch River.

The thrust of the reasoning to kill Clinch River was to "signal" other nations not to build plutonium breeding plants. However, other nations were already ahead of us. After hearing this statement, they merely looked back over their shoulder at our "example" and kept right on going.

Now, the administration is telling us "that the Clinch River plant has an unfavorable cost-benefit ratio as an R. & D. experiment."

However, can this be true? Every other country disagrees with that. Furthermore, has the administration considered the biggest advantage of the breeder? That is, the breeder will use a vast resource our country has available now, untapped and sitting in canisters above ground—200,000 tons of depleted uranium tails. This is equivalent to all of our coal resources!

To further explain this, I hope you will read the following article:

PROLIFERATION / BREEDER — COST / BENEFITS—CLINCH RIVER BREEDER REACTOR DEMONSTRATION PROGRAM

(Washington Wrap-up by Craig Hosmer)

There is a United States energy resource that could fuel the Nation for 165 years at our present rate of energy use. It is neatly stored above ground in steel drums and containers at three convenient locations in the Eastern part of the country. Its energy potential roughly equals that of all U.S. coal resources still in the ground.

But President Jimmy Carter has barred access by Americans to this great national resource.

It consists of about 200,000 tons of depleted uranium tailings. This is the material left over after enriched uranium has been extracted to make fuel for nuclear power plants. The separation is done by a still secret process at government plants operated by the Energy Research and Development Administration at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. The "tails" are at these three locations, government owned and physically available.

Realizing their energy potential would require that they be used in breeder reactors where at least 70 percent of the material would eventually be transmuted into plutonium for use as nuclear fuel. Calculations by Dr. C. S. Winters of the Union Carbide Corporation predict their total power yield at some 11,500 quads of thermal energy. By comparison, today the U.S. uses only about 70 quads per year from all energy sources, including petroleum, coal, uranium and hydropower.

On this basis, these tailings equate to potential energy of 13,300 quads estimated by ERDA for all yet-to-be-mined U.S. coal. Taken with yet-to-be-mined U.S. uranium—around 1.76 million tons—Dr. Winters believes they represent 78,000 quads, or 1,280 years of energy for the U.S. at the rate we now use it.

President Carter's indefinite deferral of breeder reactors places this enormous energy resource as effectively out of reach as if it did not exist.

It is impossible to calculate the cost to Americans in human and economic terms of this abstinence. Its cost may be calculable only in terms of human life to those around the world who depend on United States technology and United States generosity for a minimum subsistence level.

The President declares that plutonium is an ingredient of proliferation and that this monumental act of forebearance is necessary to set an example against the spread of nuclear explosives for others to follow.

But all powers rich enough to wage global war already have armed themselves with nuclear weapons and intercontinental delivery systems. Most of the remaining nations with technical and economic means to go nuclear lack any motivation to do so. The remaining proliferation candidates (including a terrorist) are few in number (6 to 12) and their resources seem to limit them to a potential for regional trouble making as distinguished from a global war making capability. Containing them by military, diplomatic, security and similar means ought to be a readily manageable task.

Thus the issue is raised: Does the danger President Carter wants to contain really warrant the sacrifices called for by his program to manage it?

Other countries almost universally have answered in the negative. It is clearly necessary for Congress to review the President's position in terms of costs-versus-benefits and to consider less costly and more effective anti-proliferation alternatives.

STRENGTHENING GOVERNMENT PENSION RESERVES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. COLLINS of Texas. Mr. Speaker, 3 years ago Congress took it upon itself to try to straighten out all of the private pension inequities in the country. Before Congress even thinks about enacting more standards and regulations for private business, it should establish a model by correcting all of the pension inequities in the Government's own systems. While the bureaucrats were developing more and more restrictions and regulations for private pensions plans, Federal and local governmental pension systems across the Nation have been falling deeper and deeper in insolvency.

Let us review the different governmental pension systems and see what the outlook is for the future. Obviously, social security is the most important and the most extensive financial plan for America's future. It is now conservatively estimated that, on a full reserve actuarial concept, the unfunded liabil-

ity of the Federal Social Security System is nearly $2.6 trillion. The annual social security deficit for fiscal year 1978 will be nearly $7 billion.

All experts agree that the social security insurance program is not an actuarially sound one, but rather is a pay-as-you-go plan. Benefits to retirees are financed not by interest or dividends on real investment, but from taxes on new entrants to the work force. If any private pension fund tried to operate along this type of "pyramid system," it would immediately be prosecuted. Yet the Federal Government continues to deceive its citizens into thinking they are really investing in their futures.

Among the most serious inequities is that retirees on social security can earn only $3,000 a year on their own without losing benefits. We should be encouraging these experienced people to work. I have introduced legislation, H.R. 2569, to remove the outside income limitation, as this will help restore the balance for the retirement needs.

Unfortunately, social security shows no signs of improving. The new supplemental security income—SSI—program totalled $403.8 million in overpayment errors in its first 18 months of existence. The social security system as a whole is now disbursing about $75 billion a year, up from $1 billion as recently as 1950. Under President Carter's proposed social security "reform," annual payments may attain $250 billion by 1984. Who will pay for this? Under the Carter "reform," the maximum per capital tax, which rose from $60 in 1949 to $1,930 in 1977, will rise to $8,380 by 1990. A "reform" system which costs so much that nobody could ever afford to pay for it will never achieve its purpose.

Let us look at the civil service next, which is considered to have the best funded pension plan managed by the Government. Yet a conservative deficiency estimate here would be $108 billion in inadequate reserves. The Government guarantees these funds and ignores the fact that trust funds available now total only $34 billion. 43 percent of pensioners on civil service also receive a social security check.

Railroad pensions are also now coming under the U.S. Government. Two years ago, Congress took special action and passed a supplementary deficiency bill so the general Treasury could back up the defunct railroad retirement system. In the past 5 years, benefit payments have been increased 68 percent but there has been no increase in income for the fund.

Military pensions are another of the responsibilities which now face the Federal Government. U.S. armed services' pensions have zero reserves. Yet, benefits are up 500 percent during the past 10 years while beneficiaries are up only 116 percent.

With all of the focus on the Federal system, people are only beginning to become aware of the deficits in State and local pension plans. Presently, each and every citizen owes approximately $500 in unfunded State pension obligations. New York City residents owe a staggering $1,000 additional for city pensions alone.

Further complicating the national pension system problems is the fact that, despite its record of complete financial mismanagement, the U.S. Government has recently moved in to "guarantee" the private pension sector. If you left social security coverage at age 48, you would get zero cash back from the Government at that time even if you had worked all your life. With every Government plan inadequately vested and funded, the private pension sector has good reason to question what the Government "guarantee" will mean.

It is time that this administration and this Congress face the fact that the Government pension programs are out of balance. Before the Congress even thinks of enacting one more restriction on private pension plans, it should clean up its own house. Current pension reserves must be strengthened. Americans must be assured of their annuity income in the years ahead.

HERBITS ANALYSIS OF THE KING REPORT—PART VI

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. STEIGER. Mr. Speaker, in the past five CONGRESSIONAL RECORDS, I have inserted the analysis done by Stephen E. Herbits of the report prepared by Dr. William King for a Senate subcommittee on the all-volunteer military force and national service. In today's RECORD, and again tomorrow, I am inserting charts used by Steve Herbits as an appendix to his analysis.

The charts include detailed information on these military manpower issues: Manpower costs, absentee and desertion rates, high school diploma graduate content of the enlisted force, attrition and changes in Army manpower data. These statistics provide some excellent insights into the status of and prospects for the Nation's military forces. They will, I know, be of great interest to all who are concerned about our defense force. I commend them to your attention:

APPENDIX

DEPARTMENT OF DEFENSE—ABSENTEE INCIDENT RATE

[Absentee incidents of less than 30 days]

Year	Army	Navy	Marine Corps	Air Force
World War II:				
Calendar year:				
1942	(1)	(1)	(1)	(2)
1943	(1)	(1)	(1)	(2)
1944	(1)	(1)	(1)	(2)
1945	(1)	(1)	(1)	(2)
Korea:				
Fiscal year:				
1951	(1)	28.4	(1)	(1)
1952	181.0	31.9	(1)	62.0
1953	158.0	36.3	(1)	58.4
1954	115.3	37.6	(1)	38.3
Vietnam:				
Fiscal year:				
1965	60.1	26.8	(1)	2.9
1966	57.2	29.2	(1)	3.3
1967	78.0	22.4	(1)	3.6
1968	89.7	14.4	(1)	3.6
1969	112.3	13.5	(1)	4.4
1970	132.5	17.5	174.3	5.9
1971	176.9	19.0	166.6	9.4
1972	166.4	18.3	170.0	17.2
1973	159.0	21.7	234.3	16.1
1974	130.0	53.8	287.5	17.3
1975	95.4	73.0	300.9	13.0
1976	[3] 70.3	77.5	201.8	7.8

[1] Data not available.
[2] Air Force did not become a separate service until 1947.
[3] A slight distortion is present in the Army's figures due to the inclusion of officer incidents, which could not be readily purged from the reported data.

Discussion: Absentee incident rate—Rate per 1,000 average enlisted monthly end strength.
Calendar year (Jan. 1 through Dec. 31).
Fiscal year (July 1 through June 30).

Source: OASD (M. & R.A.) (MPP), Nov. 15, 1976.

DEPARTMENT OF DEFENSE—DESERTION RATE

[Unauthorized absences of 30 days or more]

Year	Army	Navy	Marine Corps	Air Force
World War II:				
Calendar year:				
1942	(1)	5.5	[2] 7.3	(3)
1943	(1)	3.1	[4] 8.8	(3)
1944	63.0	3.0	[4] 6.9	(3)
1945	45.2	3.5	[4] 5.4	(3)
Korea:				
Fiscal year:				
1951	[5] 14.3	3.1	10.1	(1)
1952	22.0	6.2	19.7	(1)
1953	22.3	8.7	29.6	(1)
1954	15.7	6.9	2.2	(1)
Vietnam:				
Fiscal year:				
1965	15.7	6.7	18.8	.4
1966	14.7	9.1	16.1	.4
1967	21.4	9.7	26.8	.4
1968	29.1	8.5	30.7	.4
1969	42.4	7.3	40.2	.6
1970	52.3	9.9	59.6	.8
1971	73.5	11.1	56.2	1.5
1972	62.0	8.8	65.3	2.8
1973	52.0	13.6	63.2	2.2
1974	41.2	21.2	89.2	2.4
1975	26.8	22.4	105.0	1.9
1976	[6] 17.7	24.8	69.2	1.2

[1] Data not available.
[2] Dec. 1, 1941 to June 30, 1942.
[3] Air Force did not become a separate service until 1947.
[4] Fiscal years.
[5] Calendar year.
[6] A slight distortion is present in the Army's figures due to the inclusion of officer incidents, which could not be readily purged from the reported data.

Discussion: Desertion—The term used herein has no legal significance. When an individual has been absent without authority for 30 days or more, he/she is administratively classified as a deserter. Only after an individual is convicted of the charge of desertion can the term "deserter" be applied in the full legal sense.
Desertion rate—Rate per 1,000 average enlisted monthly end strength.
Calendar year (Jan. 1 through Dec. 31).
Fiscal year (July 1 through June 30).

Source: OASD (M. & R.A.)(MPP), Nov. 15, 1976.

DEPARTMENT OF THE ARMY—INFORMATION PAPER, MARCH 1977

Subject: High school diploma graduate content of the enlisted force.

Facts: High school graduate/equivalent content of the enlisted force since December 1971 is as follows:

Period	High school graduate/ higher	General educational development (GED)	Total
December 1971	69.4	NA	69.4
Fiscal year:			
1972	70.1	NA	70.1
1973 [1]	71.3	NA	71.3
1974	60.2	13.3	73.5
1975	61.6	16.3	77.9
1976	64.6	16.5	81.1
197T	65.7	16.5	82.2
1977 (1st quarter)	66.1	16.5	82.6

[1] GED data not available in reports prior to fiscal year 1974.

[From the Department of the Army, March 1977]

ARMY ENLISTED LOSSES IN FISCAL YEAR 1976

Separations prior to Expiration of Term of Service (ETS)—109,035.

Adverse [1]—75,343.

Non-adverse—33,692.

Separations at ETS (including retirements)—95,163.

The statement that more enlisted soldiers separated prior to ETS in FY 76 than left at the end of their normal tour of duty is based upon the above statistics.

What that statement fails to say, however, is that 50,797 soldiers also reached their ETS in 1976 and reenlisted! Therefore, a statement comparing the following figures gives a more meaningful indication of the performance of our enlisted soldiers in FY 76.

Separations prior to ETS—109,035.

Personnel Successfully Completing Enlistment Obligations (including reenlistments and retirements) 95,163+50,797=145,960.

Adverse separations constituted 69 percent of the prior-to-ETS separations in FY 76.

[1] The term "adverse separation" describes a separation which the Army initiates (as opposed to the soldier) because of a soldier's act—or acts—or because of inaptitude or lack of motivation, discipline or the like, which demonstrate the soldier's unwillingness or inability to perform his duties in his unit; or otherwise meet acceptable standards.

DEPARTMENT OF THE ARMY, MARCH 1977

ENLISTED ATTRITION [1] LOSSES BY FISCAL YEAR

Fiscal year:	Attrition losses
1964 [1]	51,744
1965 [1]	50,559
1966 [1]	70,293
1967 [1]	112,868
1968 [1]	128,559
1969	86,389
1970	143,471
1971	162,873
1972	346,142
1973	139,442
1974	113,789
1975	100,549
1976	109,035

[1] The term "enlisted attrition" is defined as the number of nonprior service (NPS) enlisted accessions who are separated before the completion of their initial service obligation or 36 mo of service, whichever is less.

[2] The term "fiscal year-cohort" is defined as all those NPS enlisted personnel who entered the Army in the fiscal year being discussed.

[3] May not add due to rounding.

[4] Data not available for fiscal year 1972 and earlier years.

[5] Data not yet available.

CHANGES IN ARMY MANPOWER DATA

1. Manpower management. The variables of force structure planning and predicting are interrelated accessions. NPS losses, prior service accessions, manning levels, authorized end strength reenlistment. As each of these change based on actual performance or outlook, all others must be adjusted. Thus, planning is dynamic, usually changing from month to month. It is reasonable that the picture now bears little resemblance to the estimates of a year and a half ago. All the variables have changed, probably several times since then. Below are figures which show this change.

SELECTED ACTIVE ARMY MANPOWER DATA

[In thousands]

	Budget before Congress [1]					Current Army program			
	Fiscal year 1976	Fiscal year 1977	Fiscal year 1977	Fiscal year 1978	Fiscal year 1979	Fiscal year 1977	Fiscal year 1978	Fiscal year 1979 [2]	Remarks
Faces NPS male accessions	164	49	166	161	167	159	153	158	Requirements driven by total fiscal year losses Down in fiscal year 1978 because of lowe adverse attrition and more reenlistments and prior service accessions. Fiscal year 1979 increase due to increased total losses that year.
Faces NPS male RSDG accessions	(91)	(28)	(94)	(97)	(95)	(89)	(95)	(95)	HSDC level dependent on market and resources. 95,000 is now best estimate of achievable number within reasonably sized budget.
Percent HSDC of NPS males	55	57	57	60	57	56	62	60	
Faces prior service (PS) accessions	13	4	16	6	6	17	8	5	Fiscal year 1978 and fiscal year 1979 decrease is a deliberate constrain of PS accessions except for those who desire to enlist in a shortage skill in the career force. Improved reenlistments are a better solution for Army career force manning. A trade-off of PS for NPS accessions is neither economical (slightly lower training costs do not offset longevity and increased grade costs), nor consistent with the need for retention of good 1st term soldiers. Arbitrarily increasing PS accessions disrupt the desired career/noncareer force balance by aging the force. PS accessions only compliment reenlistments which produce an already trained cost effective soldier.
Faces reenlistments	51	15	67	63	62	70	65	70	Increasing reenlistments in fiscal years 1978–79 reduce accession requirements and provide Army with good, trained soldiers. Increase limited by necessity to balance career/noncareer mix (45/55) and the size of the population eligible to reenlist. Complemented by PS accessions.
Faces adverse losses	74	18	70	76	76	62	63	60	Quality accessions in fiscal years 1975–76 and better analysis of loss data have lowered attrition projection. Recent analysis shows that we have turned the corner in adverse attrition.
Spaces end strength	[3] 779	[3] 782	789	790	790	789	790	789	Decrease in fiscal year 1979 end strength assumes civilianization of 1,000 spaces.
Spaces force structure	[4] 661	[4] 661	665	669	672	665	673	677	Projected force structure increases result from continuing force improvements possible with stable end strength and serve to improve Army readiness posture. These increases cannot be realized with an end strength reduction.
Spaces general purpose force structure	[4] (466)	[4] (467)	(472)	(477)	(480)	(473)	(481)	(488)	
Force structure manning (over/short).									
Faces end year [5]	+2	−6	−9	−6	−9	−14	−7	−6	Depending on summer months for HSDC accessions forces the Army to be either undermanned in units at end year (although total strength is on target) or adequately manned with overmanning after the training base has handled the surge summer load. The 14,000 unit undermanning at end fiscal year 1977 is due to the unwillingness of the Army to sacrifice its yearly HSDC goal despite some shortfalls in HSDC recruiting at the beginning of fiscal year 1977—most probably the result of low resource levels in fiscal year 1977.

It must be emphasized that these figures represent a 1-day snapshot of force structure, not a solid base to draw fundamental conclusions. When the last · scal year to end on June 30 (fiscal year 1976) ended, the structure was

Footnotes at end of table.

SELECTED ACTIVE ARMY MANPOWER DATA—Continued

[In thousands]

	Budget before Congress [1]					Current Army program			
	Fiscal year 1976	Fiscal year 1977	Fiscal year 1977	Fiscal year 1978	Fiscal year 1979	Fiscal year 1977	Fiscal year 1978	Fiscal year 1979 [2]	Remarks
									overmanned by 2,000. At the end of fiscal year 197T (3 mo later), it was undermanned by 6,000. This reflects the annual surge into the trainee account during the summer months—the best recruiting months. Were we still using the old fiscal year end (June 30), the manning for fiscal year 1977 would be +6,000. USAREC is gearing up for a massive summer effort. The true test of our success or failure will come at summer's end. If we fail, then, not now will be the time to assess our ability to recruit required quality in sufficient numbers to man the force. The Army is optimistic. We have the largest delayed entry program (DEP) in our history for the summer months. As of April 30 more than 31,000 or 46.4 percent of NPS male objectives are in the DEP (the total DEP is 36,431) for entry into the Army during the summer months.
Average	−3	−2	+3	+2	+2	+2	+3	+3	This column, average structure manning, is the only true barometer of force structure behavior, as it shows the year-round picture. The slight undermanning in the early years has given way to slight overmanning now and in the future. This overmanning is necessary to assure adequate manning of the force year round (i.e., reduce the undermanning periods to acceptable levels) and to provide manpower for force structure expansion.

[1] Estimates finalized Dec. 15, 1976.
[2] Preliminary data.
[3] Actual data.
[4] As reflected in the fiscal year 1977 MRR.
[5] Fiscal year 1976 as of June 30, all others as of September 30.

Conclusions. In summary, supported by the above figures: The Army is not sacrificing quality for numbers. Adverse losses are not escalating, leading to a "revolving door" phenomenon. In fact, the reverse is true. MPS accession requirements are descreasing. There is no need for continuing the fiscal year 1977 level of PS accessions in fiscal year 1978. Taking more than 8,000 in fiscal year 1978 would cause problems in the management of the desired career/noncareer force balance in fiscal years 1979 and 1980. Arbitrary increases age the force (combat is a young person's profession). Also, 88 percent of all PS accessions require skill training. Going above 8,000 PS accessions is neither necessary nor desirable. The performance of HSDC during the last 2 fiscal years, a trend likely to continue, has produced a disciplined force. Indiscipline indicators are steadily declining. The training base and trainee numbers are now growing steadily fatter and forcing an erosion in force structure. In fact the force structure has been increasing and is programed to increase more while training base and number of trainees are programed to decrease. The Army has not reprogramed its manpower data in order to ward off an end strength cut. Force structure management is a dynamic process with the latest picture being the best picture. Cutting end strength and raising PS accessions do not lead to increased force structure.

NAUTICAL MARCH HONORS COLUMBUS

HON. PETE V. DOMENICI

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

Wednesday, July 20, 1977

Mr. DOMENICI. Mr. President, Congresswoman SPELLMAN of Maryland and Congressman RODINO of New Jersey have expressed attributes of the Christopher Columbus March as an enduring honor for the discoverer of America. I too feel that the universal language of music is an ideal media for honoring the great navigator.

In fact, Mr. President, it was my honor to deliver the principal address at the Bicentennial Christopher Columbus Day Ceremonies. Following my talk, the Christopher Columbus March, composed by University of Maryland Professor Charles T. Gabriele, was performed by the Navy Band conducted by former Secretary of the Navy J. William Middendorf II.

Mr. President, although this march was first played in the 1976 National Happy Birthday Bicentennial Parade, its first public performance took place at Annapolis where the U.S. Naval Academy Band, conducted by its leader Lt. John R. Bledsoe, included the march in the Navy Day Concert.

Today's Naval Academy Band is a far cry from the 13 men who reported to Annapolis a century and a quarter ago to provide music as an important part of Academy life. By 1919 the band had increased to 74 members in order to remain proportionate to the Brigade of Midshipmen. Over the next decade the Marine, Army, Navy and West Point bands grew further, and the Naval Academy Band strove to be recognized on equal footing. Legislation was passed in 1931 which placed the Naval Academy Band on the same basis as the other military bands. Under the direction of William R. Sima the new Academy band played a weekly nationwide radio broadcast, and in 1939 represented the State of Maryland at the New York World's Fair.

In recognition of the American Bicentennial Year and the Band's 125th Anniversary Year, the band under the direction of its current leader, Lieutenant Bledsoe, emphasized music by American composers.

Mr. President, I feel that it is most commendable that the U.S. Naval Academy Band perpetuates honoring Columbus by rendering outstanding performances of his march at concerts, christenings of ships, and at other public events.

CAPTIVE NATIONS' WEEK

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. DINGELL. Mr. Speaker, for almost 20 years, the people of the United States have observed Captive Nations' Week. It is a solemn commemoration indeed, Mr. Speaker, as we take time to honor the millions of brave people who, for far too long, have been oppressed in their pursuit of physical and spiritual freedom by the smothering grip of tyranny.

It is beyond belief that today—with the ever present emphasis on human rights—so many nations and people are still denied a meaningful national life. Despite all the advances in education, science, and technology and social and behavioral studies, the world does not reflect progress of the most fundamental nature—progress in expanding man's freedom.

Therefore, Mr. Speaker, we, the people of the United States, symbolic of a free people, must continue to do our best to support such progress, and cannot ever forget those who, in captive societies, continue to live in deprivation of the most basic human rights.

TRIBUTE TO DR. ALICE PAUL

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. VENTO. Mr. Speaker, Adlai Stevenson said a long time ago that "there can be no gains without pains." He could have been speaking about the life of Dr. Alice Paul. Dr. Paul's leadership and dedication to the women's movement helped bring about passage of the 19th amendment, but not without causing her much personal suffering including the indignity and abuse of being jailed in England for trying to win voting rights for women there.

We all mourn the passing of this great

woman, and I am privileged to join my colleagues in paying tribute to her.

It is hard to believe that only a few decades ago women in this country did not have the right to vote. It is hard to believe that in 1977 we have not yet adopted the Equal Rights Amendment to assure social, legal, and economic rights for all persons regardless of sex.

The work begun by Dr. Paul and others in the forefront of the women's movement is far from complete. It is incumbent upon the women and men of this country to continue to strive for the ideals that were exemplified by Dr. Paul's philosophy and life's work.

NEW GAS DEREGULATION FACTS

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. JONES of Oklahoma. Mr. Speaker, with the House due to consider the energy bill in a few short weeks, I think it is imperative that all Members consider certain actions taken in the various House committees dealing with portions of the administration's energy bill.

A recent Wall Street Journal editorial of July 13, 1977, puts into focus the decision of the House Interstate and Foreign Commerce Committee not to deregulate supplies of new natural gas. I am concerned that the legislation before us will not provide adequate incentives to increase our domestic supplies of energy, and for this reason, I will be actively working to bring issues such as the deregulation of natural gas and a plowback of funds collected through the Crude Oil Equalization Tax for a vote by the entire House.

At this time, I insert the text of the editorial:

$48 BILLION ERROR

"When the House Commerce Committee two weeks ago voted 22-to-21 against deregulation of new natural gas, President Carter and his energy people celebrated a victory. The White House had come down to using the argument that deregulation would give producers a 'windfall' of more than $71 billion in revenues. This is over and above what they would get from the $1.75 per thousand cubic feet (mcf) price ceiling in the Carter plan. Perish the thought, even though producers would probably invest almost as much in exploration and production as they receive in revenues.

"Mr. Carter's energy people have been shamelessly playing with numbers like this all year to support their case for continued regulation, scaring people with the idea that deregulation will cost consumers a lot more money. What they carefully avoid mentioning is that continued regulation will cost even more.

"In a careful, conservative study that bends over backward to be fair to the White House, two Republican Congressmen this week estimated that the Carter plan will cost $48 billion more than deregulation between now and 1990. Here is how Rep. David Stockman of Michigan and Rep. Clarence Brown of Ohio came to this conclusion:

"They first reject the incredible White House assumption, implicit in its numbers game, that at a price above $1.75 per mcf zero gas will be produced. The study instead reckons that over the 13-year period, an additional 25 trillion cubic feet (tcf) will be produced as a result of deregulation. Current production is about 20 tcf a year, and the estimate of 25 tcf from deregulation is highly conservative. More production, of course, would mean more savings from deregulation.

"If American consumers are denied 25 tcf of natural gas, they will have to get the energy instead from oil or liquefied natural gas or synthetic gas from naphtha or coal. All are more expensive than gas is likely to be under deregulation. The cost of these fuels adds $168 billion to the energy bill. And by moving 25 tcf less gas through the pipeline system, the distribution charges rise per unit to the consumer. This comes to another $44 billion cumulatively. The administration simply ignored these hidden costs in making its case.

"The 13-year energy costs under deregulation are then calculated by Stockman-Brown at $414.2 billion. The parallel figure under the Carter plan is $461.8 billion with the gap between the two widening every year thereafter.

"If there is any error in these numbers, the Carter plan gets the best of it, considering the length to which Reps. Stockman and Brown went to be fair. For example, they hold OPEC pricing constant through the 13 years. But obviously, if the United States must substitute for 25 tcf of domestic natural gas, it most likely will have to import the energy equivalent. This increase in demand would permit OPEC to increase its oil price by at least $1 per barrel for all oil. This adds an average of roughly $33 billion to the U.S. import bill during the 13 years, and adds $100 billion to the import bill of Europe, Japan and the Third World. The Stockman-Brown $48 billion estimate charitably ignores these costs.

"Even if the increased demand has zero impact on OPEC pricing, it would still mean the United States would have to increase imports of Arab oil by nearly 500,000 bbls. per day when compared to a deregulated scenario. The Stockman-Brown study figures the Carter plan will mean an extra $26 billion in the U.S. import bill over these years even without a price increase.

"The Carter people will no doubt want to quibble with these numbers, if they can't find a way of ignoring them altogether. But there is absolutely no logical way deregulation can cost consumers more than the Carter plan. The only way the President's people can defend their position is by sticking to to their assumption that there is no gas to be found above $1.75. It is hard to see how any serious person can accept such an assumption. Even the most pessimistic of the three estimates in the ERDA MOPPS study, for example, found twice as much gas at a price of $3.25 than at $1.75.

"Mr. Carter is supposed to be good with numbers and logic, and ought to sit down with his own slide rule, taking the administration's gas deregulation position as seriously as the B1 or the neutron bomb. It's inconceivable that a good engineer would make a $48 billion mistake."

STATEMENT ON CYPRUS

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. LONG of Maryland. Mr. Speaker, a valued constituent of mine, Mrs. Theodore G. Venetoulis, who was born in Cyprus, has asked me to put the following statement in the RECORD:

STATEMENT ON THE THIRD ANNIVERSARY OF THE INVASION OF CYPRUS JULY 20, 1977

On the third anniversary of the Turkish invasion of Cyprus, it is important to reconsider some of the basic facts and issues which surround the Cyprus problem.

In July and August of 1974, the United States Government failed to prevent or even limit the brutal Turkish invasion of Cyprus, which was carried out with U.S.-supplied weapons in violation of the Foreign Military Sales and Assistance Acts of 1961 and the bilateral agreements with Turkey under those Acts. The Kissinger-Ford Administration failed to uphold the rule of the law in the conduct of our foreign policy by continuing to supply Turkey with arms in the face of Turkey's violation of U.S. laws, the NATO Charter and basic international law.

Today the occupation of Cyprus continues with 28,000 Turkish troops on the island, still armed with U.S. weapons, preventing over 200,000 Greek Cypriot refugees from returning to their homes. And aid to Turkey continues to be provided under two fictions:

1. Such arms are necessary for Turkey's defense capabilities;

2. The arms provided an "incentive" for Turkey to negotiate a settlement on Cyprus.

Such arguments are deceptive and will ultimately work against U.S. and NATO interests. First, these arms are not being used for NATO purposes, but are used to bolster Turkey's military strength against Greece, a NATO ally, and allow Turkey to continue its threats against the territorial integrity of Greece and the Greek Islands. Providing such arms to an aggressor who has flagrantly violated the NATO Charter also raises substantial questions as to the commitment to the noble principles of the Alliance and demeans NATO.

Second, providing arms as an "incentive" for negotiations simply does not work. After the Ford-Kissinger Administration used this argument to lift the arms embargo, Turkey intensified its holding on the island, expelled Greek Cypriots from the north in violation of international law and continued to ship in Turks from the mainland in pursuit of the illegal colonization policy. Appeasement of an aggressor simply does not work. The aggression merely is rewarded and reinforced.

The only way that justice will come to Cyprus is when the United States takes a firm stand against aggression, against the horrendous violations of human rights by the Turkish army and for the restoration of an independent Cyprus founded on Democratic principles, insuring basic human rights of freedom of movement, freedom of settlement, and freedom to be secure in one's home. I genuinely hope that we have resolved to commit ourselves in deeds, not just words, to these fundamental rights which have been tragically lost to the Greek Cypriot people.

COMPLIMENTING ADMINISTRATION FOR LOWENSTEIN NOMINATION

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. CONYERS. Mr. Speaker, for those of us committed to the domestic and international struggle for human rights, designation of Allard K. Lowenstein as Alternative Representative for Special Political Affairs to the United Nations is one of the administration's most notable appointments.

As a young man, he was the first U.S. student representative to the United Nations Association, working closely with Mrs. Eleanor Roosevelt, the prime mover of the United Nations original Universal Declaration of Human Rights. Mr.

Lowenstein was an activist in the civil rights movement in the South. In the late sixties, he was a tireless organizer in the antiwar movement and one of the most effective architects of the mass groundswelling of public opinion against that senseless and illegal involvement. As a Member of the 91st Congress, his voice was consistently raised on civil rights and antiwar issues.

More recently, Mr. Lowenstein was the U.S. Representative to the United Nations Human Rights Commission in Geneva at which the Commission considered, for the first time, the matter of human rights in the Soviet Union. His history as a defender of human rights at home and abroad enhances the meaning and integrity of the administration's policy.

TROUBLED SOYBEAN FARMERS

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. MADIGAN. Mr. Speaker, since the House is now considering the farm bill, H.R. 7171, I would like to address some problems affecting our soybean farmers. Soybean growers are an independent lot. They generally want as little Government interference or involvement with their soybean crop as possible.

There have been no target prices or disaster payments for soybeans. The only aspect of Government farm programs provided soybean farmers is the loan program, and the loan rate is and has been only about one-half the market price. This means that the possibility of the Government winding up owning any soybeans under nonrecourse loans is virtually nil.

Despite the desire of soybean farmers to avoid Government involvement in their crop, the Government has taken certain actions over the years that have been detrimental to prices and the preservation of foreign markets. These Governmental actions have ranged from embargoes to financial assistance for palm oil development.

I wish to discuss some of these problems.

Recently during hearings held on the research provisions contained in the farm bill, I was taken by surprise to hear some college professor testifying about the scarcity of natural rubber.

I seem to recall, as do many others, that one of the reasons for the international lending institutions, such as the World Bank, financing of palm oil industries in Indonesia, Malaysian, and Africa in the 1960's and early 1970's was the fact that the demand for natural rubber was declining. Now, after years of financing the palm oil industry overseas in direct competition to our own U.S. soybean oil, we are being told that the natural rubber that was being used as an argument for financing palm groves in underdeveloped countries was not a "glut" at all—but was in fact an increasing demand forecast.

Here are some of the key points contained in a USDA, Foreign Agriculture Service study of the world palm oil situation as of January, 1976 which I would like inserted in the RECORD:

KEY POINTS

The data clearly indicate that the impact of International Financial Assistance programs for palm oil have already boosted world production by more than 300,000 tons. This expansion has accounted for more than one-fourth of world palm oil expansion in recent years.

More than two-thirds of the palm oil production added by International Financial Assistance programs is being exported. These expansion assistance programs have expanded world exports by more than 200,000 tons—accounting for about one-fifth of the growth in world palm oil trade in recent years.

The loans were spread over the 1965–75 period. Because oil palm trees require 3 to 4 years before bearing and do not reach their maximum yield potential until 8 or 10 years, the bulk of the impact from the expansion assistance programs will be during the next decade.

During the 1975–80 period, the palm oil expansion assistance programs will account for over 800,000 tons of output or nearly one-half the projected growth in world palm oil output.

Of the palm oil output added during the 1975–80 period, more than two-thirds or about 500,000 tons will be exported.

The export growth projected for palm oil output under assistance programs during the 1975–80 period is expected to account for one-third of the world palm oil export growth.

Beyond 1980, there will be yet a further sizable production and export impact from palm oil expansion assistance made under the 46 loans approved during the 1965–75 period. This reflects the fact that only 20 percent of the loans during the 1965–69 period are for plantings which have reached full production potential. Another 40 percent applied to the 1970–74 period which, for the most part, have only begun to register impact on production and trade. Finally, the remaining 40 percent of the loans will affect plantings in the 1975–79 period. This portion of the expansion will not reach its maximum potential until the late 1980's.

Although two-thirds of the expansion assistance loans were made to African countries, the bulk of the expansion in exports is projected to be from Malaysia and Indonesia. This reflects the fact that African plantations are, in general, less productive per acre as well as the fact that a larger share of the increase in African output will be needed to satisfy indigenous consumption requirements. Thus in a crunch where the law of comparative advantage is being tested, it would be Malaysian and Indonesian producers who would be best able to compete in world markets.

Mr. Speaker, meanwhile, recent studies by the National Academy of Sciences show a demand in natural rubber in this country almost doubling for the period 1965–75 when most of the financing for palm groves overseas was being provided by international financing institutions. And, of course, the U.S. contribution to the international financial institutions was a large portion of the total.

I am not influenced by claims that natural rubber usage increased with the increase in world oil prices in 1974. Supply and demand of natural rubber was working fine until the Government, acting through international financial institutions, started financing the palm oil industry in the 1960's and 1970's.

The foregoing charts a sorry course of governmental interference in generating industries overseas in competition with our own soybeans, while at the same time contributing to the scarcity of natural rubber of which the United States is a principal consumer.

AUTOMOBILE SAFETY DEFECT LEGISLATION

HON. JOHN E. MOSS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. MOSS. Mr. Speaker, I am pleased to introduce today a bill to amend the National Traffic and Motor Vehicle Safety Act of 1966, in order to close a serious loophole that exists in that legislation. It is perfectly possible under the law for a dealer to sell a new vehicle to an unsuspecting buyer, even after the dealer has received notice that the vehicle contains, or may contain, a safety defect.

Indeed, we have recently received reports from new car buyers that they were notified of a safety recall only after putting many miles on their new cars even though the recall was officially announced several months before they had accepted delivery of these new cars. This practice subjects unsuspecting car buyers to unreasonable risks and must be expressly prohibited. Therefore, the purpose of this amendment is to require the dealer to correct or cause to be corrected safety defects that have officially been made subject to a safety defect recall before selling the vehicle to a retail purchaser. Other provisions of the law insure that any financial burden resulting from this requirement will fall on the manufacturer, rather than the selling dealer.

The amendment also provides for a citizen right of action in the event of a violation of the provision, to avoid placing consumers in the position of waiting for a Federal agency to take action on their behalf.

I commend this amendment to the attention of the House and urge its passage. The amendment follows:

H.R. —

A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to strengthen the provisions relating to remedy of defects and failure to comply with Federal motor vehicle safety standards.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 154 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1414) is amended by adding at the end thereof the following new subsection:

"(d)(1) If notification is required under section 151 or by an order under section 152 (b) and has been furnished by the manufacturer to a dealer with respect to any motor vehicle or item of replacement equipment which fails to comply with an applicable Federal motor vehicle safety standard or contains a defect which relates to motor vehicle safety, then such dealer shall not sell, offer for sale, deliver, or transfer any interest in such motor vehicle or item of replacement equipment in connection with its first purchase in good faith for purposes other than resale unless the defect or failure

to comply has been remedied in accordance with this section, or, in the case of notification required by an order under section 152(b), enforcement of the order has been restrained in an action to which section 155(a) applies or such order has been set aside in such an action.

"(2) For purposes of this subsection, notification shall be considered to have been furnished to a dealer (i) upon actual receipt of such notification by such dealer or (ii) at the beginning of the sixth day after the date on which a mailing or other means of such notification to such dealer has been accomplished in accordance with section 153(c), whichever occurs first."

SEC. 2. Section 109 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1398) is amended by adding at the end thereof the following new subsection:

"(c)(1) Whoever violates any requirement of section 154(d) or any regulation issued thereunder shall be liable in an amount equal to the sum of—

"(A) three times the amount of actual damages sustained or $1,500, whichever is the greater; and

"(B) in the case of any successful action to enforce the foregoing liability, the costs of the action together with reasonable attorney fees as determined by the court.

"(2) An action to enforce any liability created under paragraph (1) may be brought in a United States district court without regard to the amount in controversy, or in any other court of competent jurisdiction, within two years from the date on which the liability arises."

TAX-SUPPORTED MAYORS GROUP FRONTS FOR GUN CONTROL LOBBY

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. ASHBROOK. Mr. Speaker, the U.S. Conference of Mayors, an organization which uses taxpayers' money, is lobbying to take away every citizens' right to own handguns. In their July 1977 annual meeting in Tucson, Ariz., pro-gun moderate mayors worked to remove the gun confiscation policy which had been in effect since 1972. Due to a packing of the committee structure with big city liberals led by Atlanta Mayor Maynard Jackson, the efforts by smaller town mayors were beaten back. Buoyed by Jackson's efforts the conference continues its drive to abolish handgun ownership in the United States, in pursuit of a policy which inaccurately claims that the law allows gun dealers to sell to persons who are mentally ill, criminals, dope addicts, convicted felons, and juveniles. Their entire policy is a fraud. The 1968 Gun Control Act which was passed by the antigunners includes just such a prohibition against the sale to these persons. Violation of the act may result in the gun dealer receiving a sentence of 1 to 10 years in prison and subject him to a heavy fine.

In their political action manual, "Organizing for Handgun Control," the Mayors Conference goes on to say that citizens really do not have the right to gun ownership, even though the Constitution says that the right to keep and bear arms shall not be infringed.

In the same manual, the group goes on to present antigun organizers with a sample fundraising letter which falsely states that two-thirds of the American people want tough handgun control laws.

Surveys conducted by knowledgeable research groups are disproving this notion. In April 1977, the decisionmaking institute released results of a nationwide survey showing an 85 percent approval of private handgun ownership. In the most accurate measurement of public opinion, the ballot box, the voters of Massachusetts upset an antigun referendum by a 69 percent to 30 percent margin in favor of private handgun ownership.

In light of this sentiment of the general public, the mayors of those cities lending tax support to the U.S. Conference of Mayors should take a hard look at their organization.

STATEMENT BY THE HONORABLE JOHN W. JENRETTE, JR., ON PRESIDENT CARTER'S NONPROLIFERATION POLICY

HON. JOHN W. JENRETTE, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. JENRETTE. Mr. Speaker, I am pleased to be able to insert in the RECORD today positive confirmation of the President's support of the Barnwell Nuclear Fuel Plant in Barnwell, S.C. Since President Carter issued his energy statement on April 7, progress on commercial reprocessing was indefinitely delayed at the Barnwell plant pursuant to the President's formulation of a nonproliferation policy. In a cooperative spirit, the administration has worked with the Congress to make a concrete advance in the implementation of that nonproliferation policy through a careful research program at the Barnwell facility.

On July 11 the Senate passed an amendment to the Public Works appropriations bill under the leadership of Senator HOLLINGS, earmarking up to $14 million for the Barnwell research program. As the amendment specifies, only "research, assessment and evaluation activities—consistent with the nation's nuclear research and nonproliferation policies" shall be carried out under the parameters of the study at Barnwell. Included in this seminal study shall be an evaluation of nuclear safeguards systems, international management options, and technological controls on the nonpeaceful use of fuel processing facilities.

Identical language was adopted today by House conferees on the Public Works appropriations bill.

The letter which I shall now insert states the clear administration support for this $14 million appropriation. It is incumbent upon Congress to allow President Carter to pursue his goals of eliminating the proliferation of nuclear weapons. It is my belief that the use of the Barnwell facility will enhance our abilities to accommodate the President's nonproliferation goals.

THE WHITE HOUSE,
Washington, July 19, 1977.

Hon. JOHN JENRETTE,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN JENRETTE: Pursuant to our conversation, I am sending you the Senate language on the Barnwell Nuclear Fuels Plant which the Administration supports. It reads as follows:

To. H.R. 7553, an Act making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1978, and for other purposes, viz:

On page 3, line 9, beginning with the colon, insert in addition "provided further," That up to $14,000,000 of this appropriation is to conduct a study of the Barnwell Nuclear Fuels Plant located in South Caroling to determine if that facility may be utilized in support of the nonproliferation objectives of the United States and for activities contributing to the International Fuel Cycle Evaluation Program to be carried our under the contract at the Barnwell Nuclear Fuels Plant, including only such research, assessment and evaluation activities as the Administrator determines are consistent with the nation's nuclear research and nonproliferation policies and provided that the Plant shall not be used to process spent fuel from nuclear reactors.

Sincerely,

FRANK MOORE,
Assistant to the President
for Congressional Liaison.

COMMEMORATING THE 200TH ANNIVERSARY OF GEN. KAZIMIERZ PULASKI'S ARRIVAL IN AMERICA

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. ZABLOCKI. Mr. Speaker, on July 23, throughout the United States there will be programs commemorating the 200th anniversary of Gen. Kazimierz Pulaski's arrival in America. In light of the great contribution Pulaski made to the fight for American independence, it is only fitting that we reflect on the life of this most extraordinary individual whose career symbolizes the highest ideals of freedom and personal liberty.

In order to better appreciate the spirit that animated General Pulaski and the activity and zeal in the defense of justice and moral rectitude that prompted him to come to a strange land, where he was unknown, and whose language and customs he did not understand, I would like to share with my colleagues and with the American people a brief, historical account of General Pulaski's service to our Nation.

In 1773, after 7 years of militant opposition to Russian intervention in the affairs of the Polish Government, Pulaski was unjustly charged with the crime of regicide and forced to spend the next 3 years in exile in the Balkans. Disheartened by his futile attempts to organize concerted military action against the Russian Government, he arrived in Paris in November 1776, where his dejection

and despair turned into renewed enthusiasm and vigor at the prospect of serving the cause of the American colonies fighting for their independence.

The French court warmly recommended Pulaski to Benjamin Franklin, who was seeking volunteers for the American Revolution. After a brief meeting with him, Franklin gave Pulaski letters of introduction to the Continental Congress and to General Washington, and on July 23, 1777, the former Polish militant arrived in America aboard the ship *Massachusetts*, debarking at Marblehead. Two months later, Pulaski arrived at Washington's headquarters in Wilmington and was introduced to the Commander in Chief by General Lafayette.

The opportunity to prove himself as a superior officer presented itself to Pulaski on September 11, at the Battle of Brandywine, where he exposed himself to great danger by riding close to the British lines and reconnoitering their position. At a critical moment, Pulaski took command of Washington's cavalry detachment and charged the British lines, staying their advance. In addition, Pulaski's attack on the British vanguard under Lord Cornwallis saved invaluable military supplies of the American Revolutionary Army.

The American Military Biography includes a telling account of Pulaski's Brandywine engagement:

> Pulaski, who had been an experienced cavalry officer at home, had a command given him in the light horse unit. He was first engaged in the Battle of Brandywine, in which the young Marquis de la Fayette and many other foreigners were employed. Pulaski, who commanded a party of horses, sustained his reputation for courage; his activity and exertions were conspicuous throughout the engagement and he was particularly noticed by the Commander in Chief, as having distinguished himself.

During the terrible winter at Valley Forge, Pulaski was stationed at Trenton, N.J., where he reorganized his Calvary Corps and issued its first service regulations. On February 25, 1778, Pulaski met again with General Washington at Valley Forge. Dissatisfied with the relatively minor role American military thinking assigned to his cavalry, Pulaski submitted his resignation as the Commander of the Cavalry Corps and presented a plan for the formation of an Independent Corps of Light Cavalry and Infantry. With Washington's endorsement, Pulaski presented this plan to the War Department at Yorktown, and 10 days later, on March 28, Congress authorized the formation of the Independent Corps and retained Pulaski's rank of Brigadier General.

From October 8, 1778, through February 8, 1779, the Pulaski Legion was engaged in minor skirmishes with the British while guarding the frontiers at Egg Harbor at Minising on the Delaware River. But when 2,000 American troops under General James Ashe were defeated by the British under General Provost, Pulaski and his men were ordered to the southern theater of operations to join General Benjamin Lincoln's army.

As British forces invaded South Carolina and marched toward Charleston, Pulaski hastened to the defense of that city. By the time the Pulaski Legion reached Charleston, the city was on the verge of surrendering to the British, but Pulaski, appearing before the city council on May 11, prevailed upon it to reject the British ultimatum. Leaving the council chambers, Pulaski attacked the British, forcing them to abandon the Charleston siege.

The siege of Savannah by American and French forces began 4 months later, on September 23, 1779. Two weeks earlier, Pulaski and his Legion had joined the French forces under the command of Admiral d'Estaing and had made courageous plans for the inevitable battle. Indeed, the unexpected appearances of the French fleet off the American coast and of Pulaski's troops within miles of the city's boundaries greatly alarmed the British forces in Savannah. On the 13th of September, Count d'Estaing landed 3,000 men at Beaulieu who were joined by Pulaski's Legion on the 15th. Within 1 week, the allied armies broke ground for the siege and proceeded with the assault on Savannah.

The attack was conducted as planned, but an officer who deserted the Charleston volunteers communicated details of the scheme to British General Provost, enabling the redcoats to prepare for the assault. When the column of men commanded by Count d'Estaing and General Lincoln was slaughtered by British sharpshooters and the forces led by Count Dillon lost their way in the darkness, Pulaski remained undaunted. The American Military Biography recounts the General's subsequent movements:

> Pulaski, perceiving the danger in which the revolutionary soldiers were placed, made a bold effort at the head of two hundred horses, to force his way through the enemy's works and gain the rear of Mainland . . . but while advancing at the head of his men, exposed to the most tremendous fire, the intrepid Pulaski received a mortal wound, and fell from his horse. The fall of their heroic leader stopped the progress of the squadron, and they immediately retreated.

Pulaski lived 2 days aboard the American brig, *Wasp*, but finally died on the 11th of October at the age of 32. His body was consigned to the sea the next day. On October 14, a symbolic funeral in memory of Pulaski was held in Charleston with the highest civic and military authorities in that sector of military operations participating.

It is only fitting that we pay tribute to this great man, for all Americans today enjoying the blessings of liberty, peace, and prosperity are indebted to him for the courage and valor and strength he demonstrated at the time of our Nation's birth. Pulaski was truly a man dedicated to the spirit of the revolution, and his never ending belief in the great promise of the "American experiment" colored his every decision during the war. With hundreds of other Polish immigrants who fought in the Revolutionary War, General Kazimierz Pulaski stood resolutely by the cradle of American independence and helped to lay the foundation for a new government in the New World, dedicated to the principles of human liberty and justice.

TO PRESERVE TOBACCO PRICE SUPPORT PROGRAM

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. FOUNTAIN. Mr. Speaker, I would like to share with my colleagues copies of two recent letters concerning the important need to preserve the Federal tobacco price support program.

The first letter was sent to the President and is signed by all 13 members of the North Carolina congressional delegation.

The second letter is signed by me and was sent to Health, Education, and Welfare Secretary Joseph Califano.

The letters follow:

HOUSE OF REPRESENTATIVES,
Washington, D.C., June 29, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We, the undersigned members of the North Carolina Congressional Delegation, are deeply concerned about statements in opposition to the Nation's modest, inexpensive tobacco program made by the Secretary of Health, Education, and Welfare last weekend on national television.

We sadly regret the Secretary's use of the word "subsidizing," not only because American tobacco farmers are not subsidized, but also because its use revealed a lack of understanding of national policy on a crop of greatest economic importance to our State and to millions of people throughout the country.

There is, of course, a medical controversy concerning the effects of smoking. On the one side there are epidemiological studies associating smoking with several diseases, and on the other hand there has been no conclusive scientific evidence proving that smoking per se or smoking alone causes any of these diseases.

However, the smoking and health controversy is not really at issue here. What we see here is that Secretary Califano has chosen to take a strong position against the tobacco program—an issue not within his area of responsibility.

A powerful member of your Cabinet has intemperately attacked a program of basic importance to the United States. Consequently, we are extremely uneasy about what course your Administration may follow with respect to the tobacco program.

At the same time, we take comfort in your previous statement: "I personally see no need to do away with a program (the tobacco price support program) that costs the government next to nothing while enabling so many hardworking families to earn a living."

Mr. President, if Secretary Califano's words are translated into action all you are going to do is bankrupt—literally bankrupt—and transfer to welfare, several hundred thousand farmers and place the production of tobacco in the hands of big corporate farmers.

All you are going to do is encourage the importation of tobacco from some of the largest tobacco-producing countries in the world, including Communist China, India, Russia, Turkey, Brazil, Japan, Bulgaria, Greece, Italy, the Republic of Korea, and Poland.

Remember a lot of nations produce tobacco. We are only one of the nations competing for the world tobacco market. In 1975 the major tobacco producing nations were—in pounds; Communist China, 2,160,508,000; United States, 2,118,560,000; India,

837,748,000; Russia, 639,334,000; Turkey, 573,636,000; Brazil, 557,816,000; Japan, 364,244,000; Bulgaria, 319,667,000; Greece, 279,168,000; Italy, 239,419,000; Republic of Korea, 238,996,000; and Poland, 220,812,000.

In the United States over 600,000 farm families today depend on tobacco as a major source of income. It is the fifth largest cash crop we produce. In 1976, the Nation's crop was worth over $2.3 billion.

The cash receipts for the tobacco crop in our own State of North Carolina alone are estimated at $1 billion for 1976.

Twenty-two States and the Commonwealth of Puerto Rico grow tobacco within their borders. The States include North Carolina, Kentucky, Virginia, South Carolina, Tennessee, Georgia, Florida, Connecticut, Maryland, Ohio, Indiana, Wisconsin, Massachusetts, Pennsylvania, Missouri, West Virginia, Alabama, Arkansas, Illinois, Kansas, Louisiana, and Minnesota.

Tobacco and tobacco products provide significant amounts of tax revenues to governments at the Federal, State, and local levels each year. In fiscal year 1976, an estimated $6,153,983,000 were collected in direct taxes on tobacco products. Since 1863, when tobacco products taxed by Government first included cigarettes, over $119.1 billion have been collected.

Of the total tax revenue for 1976, the Federal Government collected almost $2.5 billion. State governments received over $3.5 billion. Local governments took in almost $114 million.

These taxation figures include only the direct taxes received from tobacco products. They do not include the billions and billions of dollars in personal and business income taxes which come from people employed in farming or the manufacture, shipment, and sale of tobacco products, from the many corporations and other businesses which are a direct part of the tobacco industry, from the many wholesale and retail businesses supplying these farmers and companies, and the innumerable industries supplying equipment and products of every kind to those directly engaged in the tobacco industry—supplying everything from trucks to twine to tankcars.

Currently, over 200 factories in this country manufacture cigarettes and cigars, as well as snuff, chewing, pipe, and rolling tobacco. The manufacturers of cigarettes and cigars are located primarily in North Carolina, Virginia, Kentucky, Florida, and Pennsylvania. Manufacturers of the other tobacco products are scattered over several other States.

About 76,400 production workers are engaged in the manufacture of tobacco products. Several hundreds of millions of dollars in wages and salaries are paid to these people each year.

Almost 1.5 million retail outlets in this country distribute tobacco products. Needless to say, these outlets employ millions of people to assist in handling these sales transactions.

In 1976, almost 3,000 tobacco product wholesalers in every State in the Nation traded an estimated $10.7 billion in cigarettes, cigars, snuff, and other smoking related articles such as pipes.

Mr. President, tobacco is indispensable to the economy of the country. In industries which are related to tobacco, the manufacturers and suppliers of farm machinery and materials and supplies, as well as the advertising, shipping, and trucking concerns employ millions of additional people and add many millions of dollars to income taxes and other revenues throughout the United States.

In recent years, over one-third of the Nation's tobacco crop has been exported to foreign countries. Exports last year totaled about $1.46 billion. Our imports were about $316 million, giving the tobacco industry a net contribution of over $1.1 billion to our balance of payments in 1976. Cigarettes alone were exported to about 130 countries. Practically all of the exports of leaf tobacco and tobacco products were from eight major ports on the East, Gulf, and West Coasts—Norfolk, Wilmington, New York, New Orleans, Baltimore, Miami, San Francisco, and Philadelphia.

Who knows what the effects of doing away with the tobacco program would be in the factory, on the loading dock, and in the wholesale and retail outlet? Who knows what the effects would be on the tobacco tax revenues of governments in every one of the 50 States?

Tobacco is a commodity which is considered by many historians to have insured the survival and vitality of the early American colonies. Controversies over tobacco have raged since the 17th century, when those earliest colonies began to be established. The arguments and sermons we hear from the anti-tobacco forces are indeed not new. The fact remains that tobacco is a legal commodity. It is sold around the world. The price support program under attack today does not add significant cost to the American taxpayer. Rather, the return on the investment is substantial enough to justify entirely continuation of the program. It is a responsible program, and it is of low cost.

Tobacco farmers are not looking for a handout. They want to work their crop, market their products, and make a decent living. In order to do this, the tobacco program is necessary to stabilize the production of tobacco and insure fair prices for the crop on a competitive market.

We respectfully urge you to take no action which will in any way undermine the tobacco program.

With kindest regards and best wishes, we are

Sincerely,

Robert Morgan, Jesse Helms, Charlie Whitley, W. G. (Bill) Hefner, Charlie Rose, Richardson Preyer, Jimmy Martin, L. H. Fountain, Lamar Gudger, Steve Neal, Walter B. Jones, Ike Andrews, Jim Broyhill.

HOUSE OF REPRESENTATIVES,
Washington, D.C., June 7, 1977.

Hon. JOSEPH CALIFANO,
Secretary, Department of Health, Education and Welfare, Washington, D.C.

DEAR JOE: Having reviewed your recent exchange of correspondence with Dr. Sidney Wolfe and Secretary of Agriculture Bob Bergland on the smoking and health controversy, I feel constrained to make several observations.

Regardless of where one stands on this issue, I am told that as of today there is no conclusive laboratory or clinical evidence that cigarettes cause any human diseases for which they have been statistically related. Thus, we are left with statistical associations. No responsible epidemiologist says that statistical associations alone can establish cause and effect.

I would point out that although releases from the Department of HEW indicate that the medical profession stands united on the cigarette theory, it is conversely a fact that no less than 1 in 5 of all medical doctors and registered nurses in the United States are smokers, according to a paper released by Mr. Laurence Garfinkel, Assistant Vice President of Epidemiology and Statistics, American Cancer Society. It would seem that we have here a familiar homily: "Do as I say, not as I do."

Whether we like it or not, the use of tobacco does remain very much a controversy within the medical profession and I dare say it will remain in this category until research, not statistics, reveals the truth. What is needed is full, free, and informal scientific discussion, not propaganda by any of the agencies of government or any quasi-public organizations such as the American Cancer Society.

The economics of tobacco should by no means be equated with any alleged health effects, but it should be realized that the destruction of the tobacco industry can only bring down on the heads of those responsible, the plight of a poor section of this country equal only to their plight following the War Between the States.

The loss of the tobacco program would put 600,000 to 800,000 farm families on the welfare rolls, according to testimony presented to a House Committee recently by the Secretary of Agriculture, and the fall-out effects would be catastrophic to the financial stability of millions of other people whose lives are so closely intertwined with the industry.

It should be realized that in addition to the farm family livelihoods which are at stake, destruction of the tobacco industry means destruction of the fifth largest cash crop in America, a commodity that is considered by many historians to have insured the permanency of the American colonies. A commodity that today returns to the Federal and State Government annually over $6 billion. A commodity that today adds one billion dollars in United States exports annually to help to offset the deficits in oil importation. A commodity that brings employment to over 80,000 workers across the land in the manufacturing process, and represents millions of dollars in payrolls. A commodity that is distributed through over 1½ million retail outlets by means of vending machines, tobacco stores and tobacco departments of large chain-operated stores. A commodity with related employment numbering in the millions.

Mr. Secretary, the dependence on a complex industrial and service network greatly extends the importance of tobacco in the nation's economy. The need for farm and manufacturing materials, supplies, and equipment as well as services ranging from transportation to advertising gives employment to additional millions and adds hundreds of millions of dollars to personal and business income in almost every state of the nation.

Mr. Secretary, please understand that the average acreage of tobacco allotted to growers amounts to less than one acre in the Burley tobacco area and less than 3 acres in the fluecured areas of the nation. The return from the sale of the minute allotments per farm represent the only cash income many of these farmers receive throughout the year. In aggregate this has meant, in the latest annual reports, over $1 billion to North Carolina, $500 million to Kentucky, $200 million to South Carolina, $165 million to Virginia, $160 million to Georgia, $140 million to Tennessee, with lesser amounts to Connecticut, Florida, Maryland, Ohio, Indiana, Pennsylvania, Wisconsin, Massachusetts, Missouri, West Virginia, Alabama, Arkansas, Illinois, Kansas, Louisiana, Minnesota, and New York.

Federal, state, and local governments collected $5,821,851,000 in direct taxes on tobacco products in Fiscal Year 1975. 98.5 percent represented taxes on cigarettes—some $5,734,390,000. Taxes on other tobacco products totaled about $87,461,000.

The federal government's share was $2,315,090,000 with cigarette taxes, at 8 cents per pack, accounting for 97.7 percent, or $2,261,116,000. About $53,974,000 in taxes were collected, mostly for cigars.

State taxes on all tobacco products totaled an estimated $3,401,408,000. Of the total $3,368,089,000, or 99 percent, represented cigarettes taxes and $33,319,000 was collected from sales of other tobacco products. Three-hundred sixty-five city and county government tobacco taxes came to $105,353,000. Of that amount, $105,185,000, or 99.8 percent, represented taxes on cigarettes. Local governments also collected $168,000 in taxes on other tobacco products.

Since 1863, when cigarettes were added to the tobacco products taxes by the federal government, governments at all levels have

collected almost $113 billion in tobacco taxes. Cigarettes have accounted for 93.4 percent of that figure or about $105.5 billion.

Because of increased sales and higher cigarette taxes in many states, smokers paid 1.8 percent more in state cigarette taxes in 1974. More than half of the proceeds of domestic retail sales of cigarettes to civilians went to federal, state, and local government treasuries in the form of cigarette excises.

Mr. Secretary, the controversy over tobacco is not new, it has raged from the 17th century forward, but the fact remains, tobacco is a legal commodity, it is sold worldwide and to deprive American tobacco growers of a responsible, low-cost price support program would be sheer folly.

In conclusion, I would like to respectfully request that you carefully reconsider your plans about tobacco.

With kind personal regards and best wishes, I am

Sincerely,

L. H. FOUNTAIN.

DR. J. BODENSIECK'S INSPIRING MINISTRY

HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. ARMSTRONG. Mr. Speaker, a few days ago my family and I had the privilege of being at our home church, St. Matthew Lutheran Church of Aurora, Colo., for the observance of a very special occasion. On July 3, our congregation celebrated the 60th anniversary of the ordination of Dr. J. Bodensieck.

Dr. and Mrs. Bodensieck came to St. Matthew Lutheran Church in 1965 to serve as visitation pastor assisting his son-in-law, Pastor Leonard Fritschel. The life and witness of these great people has been a source of tremendous inspiration to all who have known them in Aurora and to thousands of people whose lives they have directly influenced in this country and abroad and the millions of persons who have benefited from their ministry.

Dr. Bodensieck was born in Germany, immigrated to the United States in 1910. He returned to Germany to earn his Th. D. at the University of Munster. He taught at Wartburg Seminary, from 1921 to 1930, 1940–47, 1948–49, 1954–64. From 1940–47 he was president of Wartburg.

Following World War II, he was appointed the U.S. liaison between the Allied Forces and the churches of Germany. From 1930–40, he was editor of Kirchenblatt, the official publication of the American Lutheran Church in Germany. He edited the Encyclopedia of the Lutheran Church published in 1965 and was editor of the Lutheran Herald, 1925–30. He served on many boards of the church, the National Lutheran Council and on the Central Committee of the World Council of Churches from 1952–62.

Upon the occasion of the 60th anniversary of his ordination, the president of the American Lutheran Church, Dr. David W. Preus, summed up well our esteem and affection for this great servant of Christ:

There are a few names recognized and respected by the Lutheran Family throughout the world. Bodensieck is one of those. You are honored for your compassion, your dedication to Christ and the Church, your scholarship and your service to people and churches in times of great need. It is a privilege to salute you on this day and convey to you the love and prayers of your Church.

THE NEED TO MAINTAIN AT LEAST MILITARY BALANCE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following column by my constituent, Gen. Henry Huglin. General Huglin is a retired Air Force brigadier general and syndicated columnist. He comments on the need to maintain at least military balance if not superiority in comparison with the Soviet Union:

ASSESSING SOVIET STRENGTHS AND INTENTIONS

(By Henry Huglin)

The headlines trumpet the Soviets' stepped-up propaganda attacks on President Carter's policies and on our country.

These attacks are evidence that relations between the Soviets and us are becoming harsher than at any time since "detente" became a lulling nostrum.

But a major benefit in the growing tensions with the Soviets can be that we—and many abroad—will be shaken out of a dangerous complacency. We will now access more realistically than we have recently the nature of the Soviets' society and their military strengths and intentions and, hence, their on-going threat to us.

An objective view of Soviet Russia is hard to get. Yet, our relations and the power balance with that country now and in the future are crucial to the security of our country, and to most of the rest of the countries of the world as well.

For more than 30 years we have been verbally whipsawn by the super-hawks and the super-doves, with their wholly contrasting views of Russia.

Still, it should now be clear that the Soviets are neither "ten feet tall" nor midgets, and their military power is very formidable and continuously growing.

Despite conflicting views regarding the Soviets, our government, until recently, prudently chose to keep an edge of military superiority over them—in strategic nuclear capability, naval power, and overall weapons technology—to counterbalance the hang of the Kremlin leaders that they must zealously try to expand communism and their influence throughout the world, by any feasible means.

Now, over the last decade, the Soviets have undertaken a startlingly heavy, protracted buildup of armaments. Meanwhile, we—largely because of the malaise over Vietnam—have generally been scaling down our military strength.

Also the Soviets have been stepping up projecting their influence abroad—through political intrigue and delivery of arms, economic aid, advisers, and even surrogate Cuban troops. Vietnam and, more recently, Angola, Mozambique, Somalia, and Ethiopia have been their prime opportunities and successes.

And now there are press reports that the Carter Administration is developing a study of Soviet strengths and weaknesses which rejects as "largely unfounded" the view of the Ford Administration, and of many knowledgeable people, that the global power balance is shifting to the Soviets. This new, optimistic view apparently was arrived at by giving much weight to non-military weaknesses, such as the Soviets' chronic labor problems and backwardness in non-military technology.

But not reported was whether the Soviets' intentions are being well assessed. Yet, this is one of the most vital factors to be considered in the balance—for their expansionist intentions are ominous for our interests and long-term well-being.

As to the Soviets' weaknesses, it is certainly true that they are beset with many at home and abroad. But these may be no curb on further buildup and use of their military strength for political influence, coercion, or actual hostilities.

A similar analysis 40 years ago could have "proved" that Hitler could not go to war because of Nazi Germany's problems of limited resources and manpower.

Now, most likely the Soviets' intention is not war, but expansion by helping power-seeking groups in other countries amenable to the Soviets' influence—and by checkmating us from opposing them, through the coercive effect of military forces superior both strategically and tactically in areas of the world important to them.

Even Hitler tried to achieve his intended expansionism without war—by propaganda, an aura of military superiority, and use of political coercion. But Hitler prepared for and finally resorted to war. And the Soviets' strategic doctrine clearly includes the idea that war is still the extension of politics by military means and also that nuclear war is winnable, by them.

So, what does this situation add up to?

Well, we ought to be highly skeptical of rationalizations of the Soviets' strengths, emphasis on their weaknesses, and equating their intentions with ours.

The Soviets' troubles and problems will cause them to modify the internal repressions of their totalitarian regime and their expansionism abroad only if they do not gain further significant successes in the world. And curbing such successes depends greatly on our continued strengths, constancy, wisdom, and will.

We ought to recognize—and impress on our government leaders—that there is really no easy, riskless, inexpensive way to insure our security in this world with a pushy superpower of Soviet Russia's strengths and intentions.

We have no prudent choice but to continue, generally, the dynamic role in the world that we have pursued for 30 years—and to maintain at least equivalent military strength with the Soviets, and preferably an overall edge.

SUPPORT FOR FAMILY FARMS

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. PRESSLER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

I support the Nolan amendment, for I strongly believe in the economic productivity of America's family farms. This amendment clearly exempts corporate family farms which are family owned and family run. Congress must take steps toward insuring that farmland is passed on from family to family

rather than being passed on to real estate speculators and corporations whose primary income is nonfarm.

Farmland is a good investment—indeed, a Library of Congress study pointed out that "farmland values have not experienced a year-to-year decline since 1954." In my home State, South Dakota, land values continue to increase with an 11-percent increase in 1976 alone. Large corporate farming operations have helped drive up the cost of farmland to the point where young farmers are having a hard time getting the money to even consider buying a farm.

Coupled with the attractive investment potential of farmland is the fact that the average American farmer is about 60 years old. That means we will be seeing a lot of farms changing hands within the next 10 to 20 years. While I do not believe it is the business of Congress to make farmland a bad investment, I do believe we must insure the future stability and the continued existence of family farming in the United States. We must provide the incentive to keep families in farming, and I firmly believe the Nolan amendment pending before us is such an incentive.

LAW OF THE SEA CONFERENCE

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. FRASER. Mr. Speaker, the Law of the Sea Conference recessed at United Nations Headquarters last Friday and will meet early next year in Geneva.

The Informal Consolidated Negotiating Text, a composite product of the 8-week session, was released today. After reviewing this text Ambassador Richardson will have to assess the progress of this session of the conference. He will report to the International Relations Committee Monday, July 25.

On June 29, 1977 I hosted a luncheon for House and Senate Members, at which two foreign delegates spoke about the Law of the Sea. The chairman of the Seabed Committee, Paul Engo of Cameroon spoke, as did the chairman of the Drafting Committee, Ambassador J. Alan Beesley of Canada.

Congressman McCLOSKEY has already inserted—July 14, 1977—Mr. Engo's statement into the RECORD on my behalf and for BEN GILMAN.

Today, I would like to insert Ambassador Beesley's remarks to Members of Congress about the Law of the Sea Conference and legislation. I hope my colleagues will find them useful and informative. I am therefore attaching on behalf of PETE McCLOSKEY, BEN GILMAN, and myself, the Beesley speech of June 29, 1977.

REMARKS BY J. ALAN BEESLEY, Q.C. (CANADA)

Mr. Chairman, Distinguished Members of Congress, Ladies and Gentlemen:

INTRODUCTION

I am deeply honoured by your kind invitation to meet with you today together with my colleague Paul Engo, Chairman of the First Committee of the Law of the Sea Conference.

I am aware that I am here in my capacity as Chairman of the Drafting Committee of the Conference. However, since I have the dubious distinction of being the only Chairman of a Committee which has never met, I propose to express to you today my purely personal views on the importance of the Conference and the consequences of its success or failure.

IMPORTANCE OF THE LAW OF THE SEA CONFERENCE

It is often said that the Law of the Sea Conference is the most important international conference since that held in San Francisco when the United Nations was founded. Be that as it may, there is no doubt that the Conference is grappling with fundamental issues of tremendous importance to every nation state. It has a mandate so broad that it embraces new questions ranging from the rights of landlocked states with respect to ocean resources to traditional concepts relating to rights of passage through international straits. Thus, there is no state which would remain unaffected by the results of the Conference, whether it succeeds or fails, a basic point to which I shall return.

THE PRE-EXISTING LAW

It is essential to bear in mind the state of the law as it was when we began the Conference in order to attempt an appraisal of the progress made, the prospects of success and the consequences of failure. In simple terms, the pre-existing Law of the Sea was based on two fundamental principles of international law, namely, state sovereignty and freedom of the high seas—the principles established by Grotius nearly 350 years ago. Translated into specific terms, this has meant that for over three centuries the nation states of the world have accepted the concept of a narrow marginal part of the territorial sea over which states assert total sovereignty, subject only to the principle of innocent passage, and that the area beyond has been open to the use of states on the basis of freedom of the high seas. These principles proved adequate for their time, although it has been alleged that the principle of the freedom of the high seas gradually became translated and distorted into the right to overfish, a license to pollute and the "roving sovereignty" of the flag state. One change in the traditional law of particular relevance to our discussion today was the acceptance in 1958 of the "exploitability test" as the outer limit for coastal state jurisdiction over the continental shelf as reflected in the Geneva Convention on the Continental Shelf, another point to which I shall return.

PRESSURES FOR CHANGES IN THE LAW

Since the 1958 and 1960 Law of the Sea Conferences there have been increasing pressures for changes in the Law of the Sea to better reflect the spectrum of interests represented by all those countries which have received independence since 1958. Coincident with these demands have been an increasingly widespread recognition of the need for new rules to conserve the living resources of the sea, to preserve the marine environment and to regulate the exploitation of both the living and non-living resources of the oceans.

BACKGROUND TO THE CONFERENCE

In 1967, two important developments occurred which led directly to the creation of the Law of the Sea Conference as a means for effecting these changes in the law. It is well known that in that year Ambassador Pardo of Malta introduced into the United Nations his progressive and imaginative concept of the common heritage of mankind. It is not so widely known that in that same year the USSR canvassed a large number of countries to solicit support for an agreement upon a 12 mile territorial sea coupled with a high seas corridor through international straits. The significance of these two separate but eventually interrelated developments is as important today as it was in 1967 as indications of the basic preoccupations of the developing countries on the one hand and the major maritime powers on the other.

THE PREAMBLE OF THE CONFERENCE

The "Seabed Committee" created in 1968 as a result of the Malta initiative became transformed in 1970 into a preparatory committee for the Law of the Sea Conference. I had the honour of introducing the resolution which laid down the terms of reference of the Conference, and I can speak from personal experience in attesting to the fact that there was a widespread determination to tackle all of the interrelated issues of the Law of the Sea and a total rejection of any attempt at a "manageable package" approach, limited to a few issues. Criticisms are often made of the decision to embark upon such an ambitious undertaking. A point of fundamental significance to bear in mind in this connection is that it was argued by the major maritime powers that the operation was feasible since the basic trade-off between them and the developing countries would be recognition of resource claims in return for recognition of freedom of navigation. Presumably, no one anticipated at that time that the major developed nations of the world would later be in the forefront in the rush for resources, and, in the process, undercut the whole foundation of their bargaining position. This has already occurred with respect to the 200 mile fishing zones established by the USA, Canada, the USSR and the EEC; an example, we are told, soon to be followed by Japan. It is also proposed, as you know, that some of these same countries should take the lead in asserting unilateral jurisdiction over the resources of the deep ocean seabed in the face of strong opposition from the developing countries. The implications for any state attaching importance to freedom of navigation are obvious, but I should like to elaborate upon this question a little later.

PROGRESS MADE

How does one answer the question: How much progress has the Conference made? The answer is that it has made tremendous progress on a wide range of issues. We are light-years away from where we began. A preoccupation with remaining difficulties should not obscure this fact. Had we been embarked on a mere codification exercise, which is essentially what was entailed in the 1958 and 1960 U.N. Conferences on the Law of the Sea, when we were unable, in spite of great success on a wide variety of questions, to reach agreement on a 6 mile territorial sea and a 6 mile contiguous fishing zone, we should have long since finished our work. What we have been involved in, however, is a basic rethinking and restructuring of the law, a process which must inevitably take much longer, taking into account the number, range and complexity of the issues and the fact that over 150 nation states are involved in the exercise. You are all aware of the radically new concepts which have emerged from the Conference. Of these, amongst the most important are the economic zone; the common heritage of mankind; freedom of transit through straits; and the archipelagic state. Interestingly, the regime of the territorial sea is also being altered in an important respect.

THE ECONOMIC ZONE

The economic zone embraces, in brief, coastal state sovereign rights over fisheries and the seabed resources in an area extending out to 200 miles from shore, coupled with limited and defined coastal state jurisdiction

for the purpose of preserving the marine environment and regulating marine scientific research. The origin of this concept was an attempt to find an accommodation between those countries, mainly the major maritime powers, committed to a narrow territorial sea, and those claiming a territorial sea or patrimonial sea extending to 200 miles.

THE COMMON HERITAGE

The common heritage concept, as developed in the Conference, embodies the creation of an International Authority to regulate and control the exploitation of the deep ocean seabed resources, (including in particular manganese nodules), and the establishment of an "International Enterprise" which would have the right to exploit these resources for the benefit of the "common heritage of mankind". Obviously, the proposed international area begins where national jurisdiction ends, namely, at the outer limit of 200 miles of the economic zone (or the outer limit of the continental shelf, in those cases where the land territory of the coastal state, i.e. the continental shelf, extends beyond). As Paul Engo has pointed out, we have finally achieved what I would not hesitate to call a "break-through" on the common heritage principle at this Session of the Conference. I refer to the widespread acceptance of "guaranteed access" permitting states and private enterprise as well as the proposed international institution to exploit the resources of the seabed.

FREEDOM OF TRANSIT

The freedom of transit concept has been developed as a direct consequence of the impact of the widespread acceptance of a 12 mile territorial sea upon those international straits which would be enfolded by the territorial sea of one or more "strait states". It means exactly what it says, namely, the right of free transit through such straits, a substantive and even radical change of the pre-existing law, based as it was, on the principle of "non-suspendable innocent passage". In brief, the new rule would provide for little or no coastal state control over vessels passing through international straits, thus maximizing freedom of navigation in such areas.

ARCHIPELAGIC STATES

The archipelagic state concept, in essence, comprises recognition by the international community that the waters within straight baselines joining the outermost islands of archipelagic states constitute territorial sea, but subject to provisions relating to freedom of navigation in "sea-lanes" through straits used for international navigation. The point of importance is that the length of the baselines has become a secondary issue and the precise rules relating to passage through sea-lanes have become the important question.

TERRITORIAL SEA

I referred to the fact that the régime of the terriorial sea is, in my view, being altered in a most important respect. At the present time, the USA, the USSR and Canada all have legislation (the USA Port and Waterways Authority Act, in the case of the USA) which permits coastal states to legislate concerning the design, construction, manning and equipment of foreign vessels passing through the territorial sea of the coastal state. No state has ever alleged that this legislation is contrary to existing international law. Yet the provisions of the Revised Single Negotiating Text eliminate this right completely, and do not even permit the coastal state to pass such legislation to implement internationally agreed rules. It seems clear that unless some radical alterations are made in the RSNT, the USA Port and Waterways Authority Act will have to be amended.

If I may speak for a moment as a Canadian, I regret that the USA and Canada appear to have lost this battle to preserve the environment and that we must continue to accept the threats to our respective coastlines posed by sub-standard unseaworthy tankers loaded with oil. Even the "compromise" likely to emerge from any further negotiations is most unlikely to be of the kind which would eliminate the need to amend the legislation of our two countries. All I can tell you on that issue is that I don't intend to give up the fight.

PROSPECTS FOR THE CONFERENCE

I have attempted to give a capsule summary of the background to the Conference and of the nature of some of the changes being proposed in the pre-existing law. I would now like to turn to the question of prospects for success of the Conference and the consequences of failure. The first point I should like to make is that there is an increasing danger in many parts of the world of a loss of interest in the Conference on the part of governments, legislative bodies and the public as a consequence of the widespread establishment of a 200 mile fishing zone, which represented a major objective for many states. The second point I should like to make is that it is no longer accurate to judge the success of the Conference by the stalemate, approaching paralysis, which had pertained for a period in Committee I on the deep ocean seabed régime. Indeed, it might now be said with some accuracy that Committee I has caught up to the work of Committee II, concerned with all the basic jurisdictional issues, and Committee III, concerned with the preservation of the marine environment, the conduct of marine scientific research and the transfer of technology. Yet, nevertheless, pressures are mounting in various countries for unilateral legislation to license deep ocean seabed mining.

What then, against this background, are the prospects for the Conference, the consequences of the success or failure and the relationship to these questions of unilateral legislation on the deep ocean seabed? I had occasion to address these questions recently in a speech I delivered in San Francisco at the Annual Meeting of the American Society of International Law, in which Ambassador Elliot Richardson also participated. The points I made were as follows:

It is impossible to make any firm predictions concerning the fate of the Conference. It seems likely that the Conference will require at least another two years to conclude its work.

No one can say with certainty whether the Conference will succeed or fail. What is certain is that there remains a good chance that the Conference can succeed, provided governments do not refuse to continue with the exercise because of the time it is taking and the costs involved, in terms not only of human and financial resources, but the self-restraint required of states on claims they wish to advance while the Conference continues. It is generally accepted that this (Sixth) Session of the Conference is likely to prove the "make or break" Session. If the basis for agreement is worked out on the seabed régime, then there will be great pressure to conclude the negotiations on the other unresolved issues. Even so, at least one further full substantive session may be required, in addition to considerable work by the Drafting Committee. It seems likely, however, that if visible progress is made at this Session, governments will be willing to continue to commit themselves to pursue the Conference to a successful conclusion.

CONSEQUENCES OF SUCCESS OR FAILURE

I have pointed out in a series of recent speeches that a successful Conference could mean agreement on over 500 treaty articles, including annexes, which would together comprise a comprehensive constitution of the oceans—an area, we are often reminded, consisting of over 70 percent of the earth's surface. These rules of law would not exist in a vacuum. They would bind states to act in new ways. They would elaborate a wholly new regime for the rights of passage through international straits. They would lay down totally new principles concerning the management of ocean space. They would, for example, oblige all states to undertake the fundamental commitment to preserve the marine environment, to conserve its living resources, and to cooperate in the carrying out of scientific research. They would establish a single twelve-mile limit for the territorial sea throughout the world. They would result in a major re-allocation of resources as between distant water fishing states and coastal states, and more importantly perhaps, from developed to developing states. They would give recognition to the concept of the archipelagic state, consisting of sovereignty over the waters of the archipelago, with clearly defined rights of passage and over-flight through sea-lanes. They would bind states to peaceful settlement procedures on most—unfortunately not all—issues. They would, moreover, establish something new in the history of man—an international management system for a major resource of the planet earth—the seabed beyond national jurisdiction. They would reserve this area for purely peaceful purposes. They would subject it to a legal regime governed by an international institution unlike anything known either in the UN system or outside it. The international community would actually become engaged in economic development activities whose benefits would be shared by mankind as a whole. Interestingly, the UN, in the process, could engage in economic competition with states and, perhaps, private enterprise.

These new rules, if accepted by the international community and coupled with binding peaceful settlement procedures, would undoubtedly make a major contribution to a peaceful world. Of equal importance perhaps, they would lay down an essential part of the foundation for a new international economic order, since it would effect a transfer, by consent, of powers and jurisdiction on many issues from the richer and more powerful states to the poorer and less powerful.

What are the consequences of the other alternative—a failure of the Conference? As I have suggested in a series of interventions in a variety of fora, a failed Conference would mean that while the 200 mile limit has come into existence as a fact of international life, none of the safeguards embodied in the draft treaty would necessarily apply. The 200 mile concept, if left to state practice following a failed Conference, is far more likely to become a 200 mile territorial sea than a 200 mile economic zone confined, as in the RSNT, to specific jurisdiction and coupled, as it is in the RSNT, with stringent safeguards. The 12 mile territorial sea is a fact of international life, and is beyond challenge in the International Court, but its application to international straits would not be coupled, as it is in the draft treaty articles, with specific rules concerning rights of passage. That can occur only through acceptance of the treaty as a whole. New proposals concerning the delimitation of marine boundaries could have sufficient legal weight to erode the pre-existing equidistant-median line rules, but they would not be linked to binding third party settlement procedures, without which the new "equitable" approach would have little meaning. The nine years of work on the international regime and institutions to govern the seabed beyond national jurisdiction would be lost. Some developed states would almost certainly take unilateral action authorizing their own nationals and other legal entities to explore and exploit the deep seabed beyond the limits presently claimed by any state.

Certain developing states might well re-

spond by new kinds of unilateral action asserting national jurisdiction over these same areas, basing their action on the "exploitability test" of the 1958 Geneva Continental Shelf Convention—while the developed states prove that the area is exploitable, and thus subject to such claims. Indeed, they have said they would do so. Disputes over fishing rights, environmental jurisdiction, under-sea resource rights, conflicting delimitation claims, rights of passage in straits and claims to the deep ocean seabed could "surface" all over the globe.

The conclusion which follows from the foregoing is obvious. The Law of the Sea Conference has gone too far in developing new concepts and eroding the "old international law" for it to be permitted to fail at this stage. The particular interests of individual states, be they powerful or weak, maritime or coastal, landlocked or geographically disadvantaged, merge and coalesce with the general interest of the international community as a whole in the overriding need for a successful conclusion to the Law of the Sea Conference. This is no longer merely a desirable objective. It is an international imperative.

CONCLUSIONS

As I have been pointing out, in the series of recent speeches to which I have referred, it seems clear that the international community is facing the choice, on the one hand, of a very real danger to peace and security—quite apart from the damage to the UN—should the Conference fail, or, on the other hand, of an opportunity to lay the foundations for a world order of the oceans, and, in so doing, demonstrate the heights to which mankind can rise when we are prepared to look beyond our narrow immediate interests to the broader long-term interests of all. In legal terms, the Law of the Sea Conference presents the opportunity to leave behind us both the narrow 19th century concept of sovereignty, and its faithful companion, the laissez faire principle of freedom of the high seas, and to create new laws in place of each, embodying a totally new concept, an approach reflecting the need to manage ocean space in the interests of mankind as a whole. For far too long, the Law of the Sea has been based on the notion of competing rights, with little or no recognition of the need reflected in even the most primitive systems of law, whereby duties go hand in hand with rights.

Areas of the sea have been treated as subject to the assertion of sovereignty of one state or another, with no corresponding duties concerning the conservation of fisheries in such areas or the preservation of the environment itself. The oceans beyond the territorial sea have been subjected to the principle of first come first served, a régime which tended to benefit the powerful at the expense of the weak, while defended under the name of freedom of the high seas. When coupled, as it has been, with the doctrine of flag states jurisdiction, and further adopted by the device of flags of convenience, it has become a kind of "roving sovereignty" of the flag state, subject to little or no restrictions, except in the cases of piracy, slavery and narcotics control. Freedom of the high seas has meant, increasingly, the freedom to over-fish and the license to pollute. These are the freedoms which must be circumscribed, while the essential freedom of navigation for purposes of commerce and "other internationally lawful uses" (including legitimate self-defense) must be protected.

The difficulties in the way of harmonizing the conflicting uses of the oceans and the divergent interests of states in a comprehensive constitution of the oceans are immense. The dangers of failure are increasingly acute. The benefits of success, however, are tremendous. Whatever the imperfections of the proposed treaty, it offers the possibility of an orderly régime, in place of the chaotic situation which would otherwise pertain.

There is, in my view, a duty upon influential opinion-making groups such as this body to support the efforts of governments to go forward with perseverance and determination toward the resolution of those problems still besetting the Conference. The greatest danger, at this stage, may well be the possibility of unilateral action on the seabed, stemming, admittedly, from years of frustration and mounting impatience. As I see it, it is the duty of every one of us to use our best efforts to encourage our governments and our legislatures not to give up on the Law of the Sea Conference, but to go that last nautical mile, and to make one further effort to reach the objective of a global constitution of the oceans.

In conclusion, I would like to make the following observations. Firstly, if the basis for the trade-off of freedom of navigation in return for resources has been weakened due to the fisheries resource claims already made by many major maritime states, the basis for such a compromise would be completely undermined by new resources claims to the deep ocean seabed by these same countries.

Secondly, it would be a fundamental error to draw conclusions about the consequences of such action based upon the legislation establishing the 200 mile fishing limit. That legislation, while in advance of the Conference, was based on one of the fundamental new concepts emerging from the Conference, namely the 200 mile economic zone. Unilateral legislation on deep seabed mining would be interpreted as being diametrically opposed to the other important new concept emerging from the Conference, namely the common heritage of mankind. Reactions would be quite different. In these circumstances, the legislators in countries with global strategic interest in freedom of navigation should think very seriously about passing legislation advancing additional resource claims which could have the effect of destroying the Law of the Sea Conference.

Thirdly, the situation is well past the point of no return in terms of state practice or, if you prefer, unilateral action. It is no longer possible to go back to the status quo if the Conference fails. The clock cannot be turned back. The 3 mile territorial sea cannot be resurrected. It is worth noting that the 3 mile territorial sea and, indeed, the very concept of the territorial sea—and of the freedom of the high seas—was established by state practice, that is to say, unilateral action in which other states acquiesced. Eighty-six states* have now established a territorial sea of 12 miles or more. It is totally unrealistic at this stage to imagine that such states would be willing to repudiate such legislation except—in the case of claims beyond 12 miles—in the event of a Conference solution.

Fourthly, if the Conference fails, many states can protect their major interests by unilateral action. However, freedom of navigation through straits enclosed by new territorial sea claims and through the 200 mile economic zone or territorial seas established unilaterally by other states cannot be protected by the same kind of unilateral action. Perhaps it can be protected by the use of force or the threat of force or by diplomatic pressure but it cannot be protected by legislation on the part of those states attempting to assert freedom of navigation. It is essential to bear in mind that the objectives seemingly achieved by the results of the Conference to date concerning freedom of navigation cannot be taken for granted should the Conference fail. Obviously the Conference solution is not only the best answer to this problem but may be the only one.

Fifth, the situation is not one in which a state can protect its interests by refusing to ratify the Convention. Thus, even great powers have been overtaken by events—events in which they have themselves participated. I refer primarily to the development of new customary principles of international law through state practice—that is to say unilateral claims—based on the results of the Conference to date. Non-ratification would merely signify non-acquiescence in claims by other states, but it would not eliminate the legislation passed by the vast majority of the existing international community. All it would do is keep open the right to refuse to recognize such claims and dispute them (by such means, for example, as occurred between the United Kingdom and Iceland).

The sixth, and final point, I wish to make is that it is unnecessary and, indeed, counterproductive, at this stage, either to consider contingency plans should the Conference fail, or to consider non-ratification should the Conference agree upon a treaty containing provisions which are not acceptable. The Conference is still underway. The USA has a tremendous influence in that Conference. No state has a greater influence. No state had made a greater contribution to that Conference. No state is more deeply committed to a successful Conference. Surely, the conclusion is obvious.

We all need a successful outcome from the Conference on the Law of the Sea. It is unrealistic that the treaty will be wholly satisfactory to any state. Every state must accept compromises on some issues. We are too far down the pipe, however, to attempt to reverse the flow, to stop the Conference because we want to get off. We have a responsibility to see it through and the responsibility is a shared one: shared by all of the states involved in the Conference and shared by governments and legislators as well as by the public and the press. I know that the U.S. Government is playing an extremely active and constructive role in the Conference and has worked very hard for many years to achieve a successful outcome. I hope I have given you reasons to support this objective.

VAST SUPPLIES OF NATURAL GAS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. COLLINS of Texas. Mr. Speaker, administration spokesmen have stated that natural gas prices above $1.75 per mcf would not produce any significant additions to natural gas reserves, presumably because there is not much gas left to be found in the United States. This assertion is incompatible with observed market bchavior in intrastate gas markets, where supply and demand have been balanced at prices substantially above $1.75 per mcf.

Since 98 percent of prospective sediments remain untouched by drilling, huge quantities of conventional natural

gas remain undiscovered. Even if only 5 percent of the unexplored areas prove productive, the remaining U.S. gas reserves will be more than doubled.

The primary prospects for increased conventional gas production under price incentives are:

First. Low-production areas where wells may produce slowly for many years or require expensive special recovery treatment.

Second. Deep geological basins, at depths below 15,000 feet. In 1976, only 404 such wells have been drilled.

Third. Frontier areas such as Alaska, the Outer Continental Shelf, and areas that are remote from existing pipelines.

To unlock these reserves it is absolutely essential to deregulate new gas prices.

JESUIT COMMUNITY THREATENED IN EL SALVADOR

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. DRINAN. Mr. Speaker, I wish to direct the attention of my colleagues to the urgent situation now confronting the 47 Jesuits residing in El Salvador. On June 20 of this year, these men were threatened with annihilation by the right-wing terrorist group known as the White Warriors Union. Having been given the option of fleeing El Salvador within 30 days or facing possible assassination, the Jesuits decided against deserting the land and the people to which they have devoted so much of their energy. They have chosen instead to remain in El Salvador and continue their work.

The White Warriors Union, calling the Jesuits, among other things, "Communists," has been involved in a seemingly perennial hate campaign against the Jesuit community. Let me briefly review some of the fascist-inspired tactics recently employed by this terrorist group.

In early 1976, the White Warriors exploded six bombs at the Jesuit-run Catholic University in San Salvador, causing extensive damage to one of the few centers of learning in that Central American nation. On March 12 of this year, Father Rutilio Grande, S.J., was ambushed and murdered by machinegun fire while on his way to celebrate Mass. On the same day, the brother of a native diocesan priest was brutally murdered while riding in his brother's automobile.

The persecution of the Jesuits has increased markedly in recent months. In May, the Archdiocesan Criterio Press was bombed by terrorists in order to terminate publication of the Church newspaper, Orientacion. On May 10, the Rev. Alfonso Navarro Oviedo was murdered while worshipping in his church.

This is only a sampling of the harm inflicted by the White Warriors Union on the Jesuit community. Two priests and four laity have been murdered, three priests have been tortured, two have been maltreated, and many religious leaders have been driven out of the country by violence and the threat of violence.

The apparent reason for the White Warriors' campaign of hate and violence seems to lie with the Jesuit community's support for the human and economic rights of El Salvador's impoverished peasants. When the government announced its agrarian transformation program in July 1976, the Jesuit community enthusiastically praised this significant move in the direction of true progress for the people. The program was designed to redistribute the land in a more equitable fashion. The government, however, yielded to pressure from the landowning class and abandoned the reform plan. The Jesuits once again took up the cause of the peasants and issued a strong call for an effort to implement land reform.

The vast majority of the peasants in El Salvador earn barely over 40 cents per day and rarely own any land. Half of the peasant population is unemployed, and the jobs available usually last only a few days, forcing the itinerant laborers to live from day to day at the mercy of the landholders.

Mr. Speaker, the activities of the White Warriors Union recall those of Hitler's Brown Shirts of the 1930's. It is essential that the United States exert all efforts to save the lives of the Jesuit community in El Salvador and secure the human rights of all the citizens of that nation. Accordingly, I have today written to Secretary of State Vance commending him for the efforts he has made on behalf of the Jesuit community in El Salvador and urging continued vigorous action. I insert below the letter to Secretary of State Vance and a recent letter to the New York Times by the Rev. Eamon G. Taylor, S.J., Provincial of the New York Province, Society of Jesus, which lucidly describes the present atmosphere of terror in El Salvador.

The letters follow:

JULY 20, 1977.

Hon. CYRUS R. VANCE,
Secretary of State, U.S. Department of State, Washington, D.C.

DEAR MR. SECRETARY: I wish to express my appreciation for your efforts on behalf of the human rights of the citizens of El Salvador, and in particular, of that nation's Jesuit community.

I also wish to commend you for personally sending Mr. Richard Arellano, the United States Deputy Assistant Secretary of State for Inter-American Affairs, to El Salvador on July 11 to convey to the leaders of that Central American nation the depth of American concern over the threatened mass murder tomorrow (July 21) of the Jesuit community by the right wing terrorist group, the "White Warriors Union."

The perilous situation confronting the El Salvadoran Jesuits is of the utmost concern to Americans of all religious faiths. No one can be completely sure what will ensue tomorrow and in the future in El Salvador. I trust that you will continue to exert all available influence upon the El Salvadoran Government to take appropriate action to protect the lives of the members of the Jesuit community and to provide to all citizens of El Salvador their fundamental human rights. In the future, official public statements concerning the seriousness of the El Salvadoran situation and concrete action such as the reduction or termination of United States economic and technical assistance may be necessary to bring about positive action by the El Salvadoran Government. I trust that you will take all measures needed to protect the lives of El Salvadorans who have been threatened by right wing terrorists, and that you will endeavor to secure for all citizens of El Salvador their basic human rights.

With my appreciation for your attention to this urgent matter and my every best wish, I am

Cordially yours,

ROBERT F. DRINAN,
Member of Congress.

[From the New York Times, July 19, 1977]

JESUITS IN EL SALVADOR: "STAYING AT THEIR POSTS"

TO THE EDITOR:

One week from today, July 20, has been set as execution day for the 47 Jesuits who live and work in the Central American Republic of El Salvador. As reported in The Times June 22, right-wing terrorists calling themselves the White Warriors Union—the Klan by any other name smells as sweet—has vowed to kill immediately and systematically any Jesuits found in the country after that date.

The Jesuits are staying at their posts and are relying on world opinion to shield them not only from the anonymous terror of landowners and industrialists, but also from the El Salvadoran Government's toleration of their outrageous threats.

That the threat must be taken seriously is attested by the following facts, probably unknown to most readers of The Times:

(1) The White Warriors have claimed responsibility for bombing the Jesuit-Salvador directed Catholic University of San Salvador six times in the last semester.

(2) The Warriors have claimed the kidnapping and killing of a diocesan priest, Alfonso Navarro, May 11.

(3) A Jesuit (Father Rutilio Grande), along with two assistants (an old man and a young boy), died in a hail of machine gun bullets as they went to mass in Father Grande's country parish March 12.

(4) Eight foreign-born priests have been expelled from the country.

(5) Three priests have been tortured.

These attacks on the church in general, and now on the Jesuits in particular, are due to the fact that they have become the only persistent proponents of civil rights and land reform. In this most densely populated of Latin American countries, an oligarchy has frustrated the Government's dissident attempts at a redistribution of land; less than 1 percent of the population continues to control 40 percent of the arable lands, and more land is used for export products than for local consumption. One can understand why reform is so necessary and why the corresponding resistance to those who take the part of the poor has become so vicious.

OTA'S NEW STAFF STUDY ON IMPROVED OIL AND NATURAL GAS RECOVERY IS ALREADY OUT OF DATE

HON. JACK F. KEMP

IN THE HOUSE OF REPRESENTATIVES

OF NEW YORK

Wednesday, July 20, 1977

Mr. KEMP. Mr. Speaker, Congress' Office of Technology Assessment released a new study this past weekend.

The study concentrates on two areas:

First, the prospects for enhanced oil recovery, also known as tertiary recovery.

Second, Devonian gas, which is contained in coal-like shale formations, mostly in the Appalachian region but extending out to parts of the Midwest.

Both are necessary, if our nation is to become energy independent.

Enhanced oil recovery is a method of increasing production from already discovered oil reservoirs by use of advanced technology. In general, only a small percentage of oil in a given reservoir is being recovered under existing economic conditions and available technology. Devonian gas, on the other hand, is locked in shale and requires improved fracturing technology to bring to the surface. The feasibility and costs of such improved technologies have been found by the study to be unlikely, too slow, and too high.

I commend the Members of Congress, House and Senate, who serve on OTA for having directed the study of this question, and I laud their staff for having carried out such an extensive undertaking.

I disagree, however, with the findings of this study. I think, for the most part, they are wrong. I think there may be an understandable reason for it: The advance of technology has been so rapid in this area that it passed the OTA's staff as it was in the process of preparing the study.

Let me be more specific.

OTA's study concludes that enhanced recovery techniques are too complex, too costly, and take too long. Even assuming the most favorable market conditions, OTA calculates enhanced oil recovery would provide only a million barrels a day in 1985 and that the Devonian natural gas production goal of 1 trillion cubic feet could take 20 years to attain. The study calculated that present world prices adjusted for inflation could lead companies to recover an additional 11 billion to 29 billion barrels of reserve oil, and that vastly higher prices of more than $30 a barrel would bring on only 51.5 billion barrels more. The report states it would take 69,000 wells to bring on the 1 trillion cubic feet a year of Devonian gas, and the cost of drilling that number of wells and then transporting the gas through pipelines would require a wellhead price of $2 to $3 per thousand cubic feet.

Those findings and the conclusions which flowed from them may have been accurate when the report was started, but events passed them by. Examined next to changes in technology announced since that report started, next to energy proposals made by the President, and next to alternative costs brought to our attention by economists, these enhanced recovery techniques may well be the very place we should be going.

On May 3, I brought a major new finding of the highly respected Institute of Gas Technology to the attention of the House. I read into the RECORD, of that day the testimony of the senior vice president of IGT, Dr. Frank C. Schora, before the Subcommittee on Interior of the Committee on Appropriations. That testimony addressed itself to the new hydroretorting processes which give energy yields from the Appalachian deposits almost as high as those obtained from western shales. My remarks are found on pages 13279–13281 of that day.

On June 13, there appeared another major story in Chemical and Engineering News. This too addressed itself to improved hydroretorting techniques, finding eastern oil shales now look better than they ever have, and that they do generate as much oil as western shales, when the hydroretorting technique is used. The article concluded, "If present indications are borne out, the U.S. could find itself with an unexpected new source of hydrocarbons and fuels." I will read this new article into the RECORD in a moment.

The conventional wisdom on oil extraction from these shales is based on an assay technique, known as the Fischer assay. That was the assay standard used by OTA and its resources. According to the Fischer assay, Devonian shale yields only 10 gallons per ton. Under those conditions, OTA would be right, as to yield, cost, and time delay.

But IGT has shown on the basis of a specific test, that Devonian shale yields 25 gallons per ton if done through hydroretorting. Under those conditions, OTA is wrong as to yield, cost, and time frame. Enhanced oil recovery from Appalachia alone could outpace the million-barrels a-day-by-1985 estimate of OTA by more barrels and in fewer years. And that does not even include the other oil to be recovered by enhanced oil recovery processes.

OTA's estimate of the Devonian production goal of 1 trillion cubic feet per year taking 20 years to attain is proved wrong by other factors as well. I call their attention to remarks of my colleague from Pennsylvania, Bill Moorhead, found in the RECORD of March 2, at pages 6022–6023, and the chart of U.S. natural gas production contained in those remarks, and to my remarks of May 3, specifically on page 13280, column b, with respect to natural gas reserve additions and production in the Appalachian States for last year. Taken together, plus the work ERDA is committed to carrying out in developing improved fracture and other recovery techniques for Devonian shale, that 20 year period could be significantly reduced.

As a matter of fact, if the energy legislation now being considered by the Select Committee on Energy incorporates the text of H.R. 3664—a bill to exempt sales by small producers of certain natural gas from regulation of the Federal Power Commission and from the requirement of certificates of public convenience and necessity of section 7(c) of the Natural Gas Act—we will meet this 1 trillion cubic feet goal in a few years. That legislation is cosponsored by LUD ASHLEY, the chairman of the select committee, by BILL MOORHEAD of Pennsylvania, by myself, and about 60 other Members of the House.

The OTA study feels it would require a wellhead price of $2 to $3 per thousand cubic feet for producers to make the investments required to assure the 1 trillion cubic feet. Admittedly, that is higher than the $1.45 per Mcf at the present time and the $1.75 being recommended by the President.

But, it is about the same price level as that now being charged for unregulated gas sold within the State of production and look at the States where Devonian gas could be sold in-State: New York, Pennsylvania, Ohio, Illinois, Michigan, Indiana, Virginia, Alabama, Kentucky, Maryland, Mississippi, Missouri, Tennessee, and West Virginia. That is 45 percent of this country's population and also half its industrial production.

When you talk about $2 or $3 per Mcf, it cannot be compared solely to the present $1.45 or the President's proposed $1.75. It must also be compared with alternative gas required because the $1.45 and $1.75 are so low they result in adequate supplies—shortages. Instead of going ahead with a Devonian natural gas project at the highest rate envisioned by the OTA study—$3 per Mcf—the report seems to be saying, since that is too high, do not concentrate on bringing this new domestic gas source on line.

What will the effects of such a policy be? Let us take a look at Massachusetts, for example, the State of Senator EDWARD KENNEDY, the chairman of OTA. It will mean continued inadequate natural gas supply from total domestic sources. That in turn means the supplier for Massachusetts will have to buy foreign natural gas, either pipeline natural gas from Canada or liquefied natural gas from the Arab countries. The cost of that Arab gas? From $4 to $6 per Mcf—twice the rate of going ahead with Devonian production. And this would be true throughout parts of the Northeast and the Midwest.

This would be true for New York State, too. In comparison to the best estimate of what the price level would be next year for completely deregulated natural gas—which is $2 per Mcf—Brooklyn Union Gas Co., the supplier of New York City, imported liquefied natural gas will run $3.25. This is higher than the $3 maximum the OTA report sees as the effective rate at which to increase dramatically the production of Devonian gas. By 1980, just 2 years later, it sees that LNG price at $3.75 per Mcf. And with increased production of Devonian gas, we have less need for imported, higher price LNG, thus enabling us to achieve energy independence sooner.

Mr. Speaker, I do not know the inside reason for why this staff study reached the conclusions it did. I do know things were happening so fast during the period in which it was prepared that the staff, if it recognized that, would have had to start again, using new premises based on new information. That would have delayed the study's release, and it probably would not have coincided with the forthcoming House and Senate considerations of natural gas legislation.

But now that I have spread out on the pages of the RECORD the gist of the new technology which does change the factors in OTA's equation—thus giving Congress a substantially different result—I think it would benefit Congress immeasurably to have a revised report

issued. The one released last weekend is already outdated and of virtually no real use to the House and Senate in their deliberations. Technology supports a conclusion different from that reached by OTA.

Secretary Schlesinger, as recently as the Washington Post interview of July 10, reiterated his support for improving recovery from the Devonian shale. Chairman ASHLEY is on record in support of an immediate deregulation of Devonian stripper wells, as are many other influential Members of the majority party. It seems to me, the majority party's internal politics support a conclusion different from that reached by OTA too.

The article on hydroretoring to which I referred a moment ago follows:

EASTERN OIL SHALES BETTER THAN THEY LOOK

The Institute of Gas Technology (IGT) has adapted its hydroretorting oil shale process to treat eastern Devonian shales. If present indications are borne out, the U.S. could find itself with an unexpected new source of hydrocarbons and fuels.

IGT senior vice president Frank C. Schora notes that eastern shales have long been considered inferior in quality to western shales. But, he says, there is now valid evidence to refute this.

Much of the confusion centers on the significance of the Fischer assay test to rank shales. The test indicates value in terms of oil yield via conventional thermal retorting. Thus, western shales, such as those of the Green River formation, test out typically from 25 to 30 gal per ton of shale; eastern shales test out at about 10 gal per ton. Much of the loss of interest in eastern shales can be attributed to this peculiarity of the Fischer assay. However, Schora points out, recent investigations by IGT show that the Fischer assay is not the only test that should be applied. In fact, the total carbon content of the kerogens in both eastern and western shales is about 13.5%. The inference is that with appropriate processing, yields of both shales would be comparable.

In one test, IGT investigators found that a Kentucky shale with a Fischer assay of 10 gal per ton yielded a hydrocarbon equivalent to 25 gal per ton plus 2000 scf per ton of synthetic natural gas when processed by hydroretorting. The reason for the apparent discrepancy, Shora says, is that the chemical characteristics of eastern and western shales are different, even though actual carbon contents may be the same. The Fischer assay apparently does not distinguish the chemical differences.

This leads Schora to two major conclusions. The first is that the IGT process extracts more hydrocarbons from all types of shale than does thermal retorting, and this is borne out with higher yields from western shales. The second conclusion is that the chemical differences between eastern and western shales are of little or no consequence in the hydroretorting process. It extracts with equal facility from both types of shale.

There are some advantages in being able to process eastern shales effectively. One is the greater availability of raw materials close to the consumers. Another is the extent of the shales with rather low carbonate minerals contents. A typical eastern shale contains about 0.5% by weight minerals, whereas the typical western shale has 15% by weight.

Whether eastern or western shales are used, Schora also believes that the IGT hydroretorting process has unique advantages. It produces about 70% of its oils in the middle distillate range, thereby requiring less finishing. The reaction rates are higher than for conventional thermal retorting, thus permitting smaller plant size for a comparable production capacity. About 90% of the kerogen in all types of shale can be converted by hydroretorting.

The basic feature of the IGT process is retorting under a hydrogen pressure up to 500 psig. This improves the hydrogen-to-carbon ratio of product hydrocarbons and reduces the need for subsequent product upgrading before being accepted by a conventional refinery. A logical step, says Schora, would be to integrate shale extraction and refining in one plant that would produce feedstocks and fuels directly for the market. The hydrogen requirement is achieved through sacrificing some of the product but the penalty is small. The same is true for plant utilities requirement. Hydroretorting can be altered internally within wide limits to yield predominantly liquid or gaseous fuels, or any combination, although the hydrogen requirement for gases (primarily methane) is higher.

Considering that oil yields of up to 250% of the Fischer assay have been obtained in hydroretorting eastern shales, Schora estimates that the actual magnitude of recoverable oil in the eastern shales is as much as 1000 billion bbl. That is roughly eight times the total recoverable reserves of conventional crude oil.

If technical feasibility has been all but demonstrated, there are still a number of obstacles in the path of a major shale oil industry in the east. Most of the deposits in question are found in Illinois, Indiana, Kentucky, Tennessee, Ohio, Michigan, and Pennsylvania, with lesser deposits in Texas, Oklahoma, and Arkansas. Recovery would be limited to those deposits that can be strip-mined unless in-situ methods are developed for the deeper deposits. One problem now being studied is the distribution and composition of the shales. A definitive survey would be required before any extensive mining could begin.

Although the problems of strip mining have been aired thoroughly in recent years, there remains considerable environmental opposition to such mining except under rigorous control. Schora, who considers himself a confirmed friend of the environment, believes that there is no reason why shale recovery, even on a large scale, should mean great environmental damage. However, convincing environmentalists and legislators of that is a formidable task.

The present shale recovery efforts at IGT are being conducted in a 1-ton-per-hour process development unit in Chicago. IGT is considering the various possibilities for financing the next steps, and Schora suggests two possibilities. The first is the conventional approach via a 400 bbl-per-day pilot plant followed by a commercial demonstration plant. Schora told the Senate Subcommittee on Energy Research & Development early in April that this approach would require at least 12 years for completion. If, however, a large pilot plant of 1200 bbl-per-day capacity were built, Schora believes that the demonstration plant could be eliminated and direct commercialization might be achieved in eight years. Any plant built would have to be in close proximity to the shale deposits.

It is too early to project any costs and operating data for commercial plants, although flowsheets are being devised at IGT. Schora believes, however, that an oil value between $15 and $20 per bbl would be a reasonable estimate for hydroretorting with eastern shale.

THE AVERAGE NEW HOME: $53,000

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. KASTEN. Mr. Speaker, the Federal Home Loan Bank Board recently released figures showing that the average new American home sold in June was $53,000, with a downpayment of $13,600. For a used home, the average price was $47,100, with a downpayment of $12,500.

Even more startling to me, the average new home sold in Wisconsin's Milwaukee-Racine area cost $68,800, according to the latest May figures. The average used home sold in May cost $48,400.

Mr. Speaker, millions of Americans—particularly young couples just starting out—cannot afford to buy a new home today. In fact, a recent study shows that three-quarters of the American people have been priced out of the market.

To keep the dream of homeownership within the reach of American families, I have introduced the Young Families Housing Act of 1977, a bill also introduced in the Senate by Senator EDWARD BROOKE of Massachusetts.

The bill would permit first-time home buyers to save up to $2,500 a year for a downpayment on a home through a tax-free savings account.

The bill also provides for graduated monthly mortgage payments, which would reduce payments during the early years of a mortgage and gradually increase them over time, presumably as family income rises.

Thirty-seven Members of Congress—from both sides of the aisle—have cosponsored the bill. I hope that we will be able to secure action on the Young Families Housing Act in the near future.

GOVERNMENT INTERFERENCE IN SOYBEAN TRADE?

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. MADIGAN. Mr. Speaker, recently soybean prices have come under severe pressure and have declined about 50 percent since April. There is much speculation about what caused the decline, but one of the staff writers for the Champaign-Urbana News-Gazette suggests that much of the blame may rest with the Government, more particularly the Commodity Futures Trading Commission. That article appears at the conclusion of these remarks.

What this article suggests to me is that the soybean farmer has been handed another defeat by the Government.

Now we are being told that the U.S. Department of Agriculture wants to amend the farm bill to extract a set-aside from soybean producers for the rather limited loan program offered in the farm bill. I am strongly opposed to any such amendment, and I feel certain that the soybean producers are opposed to any such amendment.

It seems to me that soybean producers have been dealt with rather harshly by their Government in recent years. Rather than further punishing them by imposing a set-aside on soybeans, it seems to me Congress should be investigating the palm oil situation and the Hunt story

surrounding the precipitous drop in soybean prices.

I would appeal to President Carter and Secretary Bergland to withdraw any support for a soybean set-aside and to take whatever action is necessary to withdraw U.S. financial support for the palm oil industry overseas, which is in direct competition with our soybeans:

DID HUNT CASE CAUSE LOWER BEAN PRICES?

(By Phil Brockamp)

Since April, soybean prices have dropped more than $3. Why they have done so is a question no one can positively answer but one reason that has been thrown around is the action the government took to when the Hunt family of Texas started making money hand over foot.

The Hunts were purely speculating with 24 million bushels of old beans and 14 million bushels of new crop.

With that in mind, the Commodities Futures Trading Commission went into federal court on April 14 on an emergency basis to seek an order for the Hunts to divest themselves of their holdings.

Basis of the action was a regulation that no one individual may own more than 3 million bushels of futures stock. No one single member of the Hunt family was in violation but the government charged they were acting in consort with the total number of bushels they owned.

A federal judge heard the case and on April 29 entered an order that the Hunts could accept delivery of no more than 3 million bushels of their May soybeans contracts.

That is when highly respected University of Illinois ag economist Tom Hieronymus got into the act.

Hieronymus filed an affidavit saying that he thought the 3 million restriction should be removed—that the action of the government in the whole Hunt matter was causing additional confusion in an already troubled market. The judge took the restriction off and the case went to trial.

Hieronymus said there was a digression when the attorneys for the Hunts argued the three million rule was capricious and arbitrary and had no basis in law.

The judge agreed that it was arbitrary and capricious but said it was not so arbitrary and so capricious that he could impose his judgment on the CFTC.

The trial that started almost two months ago is still going on said. 'Did they or didn't they act in consort? There's no argument about the postions they had in April. Did they act as one entity or did they act separately? That's the only legal issue involved.

The Hunts have made counterclaims against the government saying that it revealed confidential information but that's another whole can of legal worms," Hieronymus said.

"I think that somewhere along the line they will get to what I think is the principal issue—whether or not the behavior of the Hunts was endangering the market. That is one facet."

DID THE HUNTS INFLUENCE THE MARKET?

"The other facet is what impact the case had on bean prices," he said. "This has been a purely speculative market. There are two or three reasons for it. In September it was apparent we had a shortage of beans—in the context that the availability was less than the then rate of use. The rate of use in the 1975–76 crop year was huge and it wasn't going to be as big in 1976–77 because we didn't have that many beans.

"However, by any other standard it was big. The crux of it comes down to domestic use of soybean meal. The key question was what price do we have to put meal to get a reduction in the domestic use of soybean meal. Meal was abundant in terms of any year except the preceding year. It was a hard market to forecast.

"Farmers were holding beans until the price started up. When it started up, they started selling because they had taken $5 the year before. When they got to $7 they sold the hell out of them. That put an awful lot of beans in the market positions.

"This was the first time since 1971 that we really needed speculators in large amounts in the bean market.

"Forces combined to keep the price of soybeans from rising early, which normally happens with a short crop.

"Put in that context," Hieronymus said, "the Hunts came in. They bought. They were a supporting influence in the market. They were right. Beans had to go higher because we were using them too fast. We used them too fast all the way through May. The longer the decision was delayed, the higher the price had to go.

"I had said all spring, 'I don't know where the top is, but at some point it's going to fall and really fall.'

"If there had been a lot more people like the Hunts and kicked up the price early, it wouldn't have gone as high. In that situation the Hunts were constructive.

GOVERNMENT ACTION ADDED UNCERTAINTY

"I think the government coming into it added a dimension of uncertainty," Hieronymus said.

"Traders understand things like exports, crush rates and weather. But when they are confronted with something they don't understand, they tend to cut and run.

"The break may have occurred in a normal pattern. It may have been triggered by the government action against the Hunts," he said.

"The quick analysis is that the soybean market may have broken so far and so fast that the use will increase and we will have to play the game again in August.

"We can't really sort out what is normal market behavior and what is the result of government action against the Hunts."

I asked Hieronymus if he thought the action against the Hunts prematurely made the market drop and he said:

"It's entirely possible. I think the extent of the decline is probably associated with the triggering. You can't really say though. I think the government action against the Hunts triggered it and probably is associated with it going as far as it has so fast. Traders were confronted with a new dimension of uncertainty.

"Keep in mind that on April 1, there were 616 million bushels of soybeans in the United States. The Hunts didn't drive the price up to $10.75—no way."

Hieronymus filed an affidavit saying that if the Hunts wanted to take delivery of the May beans they owned, they should be allowed to do so. The judge agreed, the deliveries were made and the market stayed stable.

If nothing else comes out of the Hunt case, Hieronymus is hopeful that at least maybe the three million bushels speculative limits will be dropped.

"I've been against them since 1953. I hope to get rid of the damned things," he said.

WHAT NEW YORK CAN DO FOR MR. CARTER

HON. ELIZABETH HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Ms. HOLTZMAN. Mr. Speaker, the recent power failure which darkened New York City starkly illuminated the problems of urban America. An editorial in the July 19 New York Times eloquently stated the need for Presidential leadership in dealing with the doom that threatens our cities.

The text of the editorial follows:

[From the New York Times, July 19, 1977]

WHAT NEW YORK CAN DO FOR MR. CARTER

With misleading solemnity and precision, President Carter made a place for himself in the news of the New York blackout by demanding a full report from the Federal Power Commission—in exactly two weeks' time. (Nine days remain to deadline.) But that was a press-agent President at work or, at best, a White House that takes too seriously its press clippings about the President's talent as an engineer.

What New York can finally do for Mr. Carter is to broaden his sense of the national defense and Presidential duty. A President does not worry about generator nuts and bolts when the social fabric of the nation's largest city is exposed as inflammable. A President cannot confine himself to tension in Korea or negotiation with Israel when life's losers are rampaging in the streets of America, spreading blight and the disease of racism. Nor does he need yet another commission to discover that half the black and Hispanic youths in his major cities are out of work and out of hope and out of mainstream America.

The President prides himself on his knowledge of poverty in the rural South. But he need no longer pretend, as in his campaign, that this equips him to understand the culture of desperation that makes urban centers unlivable. A President who knows what he does not know about urban America would seize on such dramatic opportunities as the New York looting to inform himself and to rouse a nation. He would meet with looters and their victims and find a way to convey their nightmares to the rest of the world. And he would find ways to lead the nation to take up the burdens that it has unintentionally dumped upon New York and Newark, Detroit, St. Louis and Los Angeles. He would seek ways to have the Federal Government assume responsibility for more of the poorhouse costs that weigh upon these cities. He would struggle urgently to create the proposed national youth service corps and also programs for massive neighborhood rehabilitation, vocational training and job-placement services. (And as James Wieghart observed in yesterday's Daily News, a President seeking to keep in touch with the American people would do better one week after the blackout to visit Brooklyn than the home of a fertilizer manufacturer in Yazoo City, Miss.)

Understandably, this was the year in which President Carter intended to sacrifice almost everything else for the design and adoption of a sound national energy policy. When ne heard about a power failure, it was his energy program that he thought of first. So much depends on it, that the program rightly claims his highest priority. But a President so shrewd at recognizing political opportunity, and so in need of a memorable social program as well, might also seize upon the New York experience to ask whether welfare reform must really wait four years more, to ask whether job-creation and city rebuilding must really remain in the category of primitive and experimental Federal programs.

A lack of money can be a pretext for inaction but not a reason. The causes that Americans embrace in common can be afforded and enacted, whether they are called national security or unemployment insurance. The need in our cities is for both defense of the society and insurance against the unemployable underclass. That is not a noble way of defining our most urgent human problem, but anything would do for a

President who cares to learn and then sets out to teach us to care.

It has been estimated that a National Youth Service Corps to enlist the energies of the idle in social reconstruction and personal rehabilitation might cost $15 billion. The large-scale Federal assumption of more welfare costs might cost $5 billion. Call these figures conservative. Imagine an effort that might cost $30 billion. What price millions of our fellow citizens properly motivated, educated and relocated in jobs? What price conquest of a social disease? What price habitable cities, with hundreds of billions of dollars worth of housing and transit already in existence, that law abiding citizens can find fit places for raising children? The last President's fear of the swine flu cost the Treasury a quarter of a billion dollars and produced damage claims close to a billion. Another recent President's payoff to a single lobby of milk producers cost consumers nearly one billion dollars. The direct cost of the damage done in one night in New York last week is estimated at a billion, and a billion more each year in lost commerce and opportunity and taxes is inevitable if the damage to morale and property is not soon repaired.

But the issue is not what Mr. Carter can do for New York. The crisis exposed so devastatingly in our home city is not a special product of New York mismanagement or fiscal legerdemain. It points up a national danger that threatens dozens of communities, millions of homes and livelihoods. It points to a people waiting to be led.

FUTURE MIDDLE EAST POLITICAL ALINEMENT

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. LONG of Maryland. Mr. Speaker, I bring to the attention of my colleagues an interesting speculation on future Middle East political alinements. The article, which appeared in the July 14 issue of the Baltimore Evening Sun, was written by Stanley A. Blumberg and Gwinn Owens, two Baltimoreans who are at work on a book concerning Middle Eastern peace and war. Some will find the article provocative; others may find it provoking; but all will find it worth reading:

ARTICLE IN BALTIMORE EVENING SUN

(By Stanley A. Blumberg and Gwinn Owens)

"I have no illusions. I believe with all my heart that divine providence has brought you back here, restoring you, a Semitic people who were exiled in Europe, and have shared in its progress, to the Semitic East, which needs your knowledge and initiative."

The year was 1948. The speaker was the late King Abdullah of Jordan. His audience was Golda Meir, later to be Prime Minister of Israel, and Orientalist Ezra Danin. The interview is quoted by Larry Collins and Dominique Lapierre in "O Jerusalem," their epic work on the founding of Israel.

Abdullah was assassinated in 1951 by Arab extremists who read his treasonable thoughts. It may turn out, however, that the little Hashemite king was merely ahead of his time. More and more, an alliance of Egypt, Saudi Arabia, Jordan and—yes—Israel seems logical and possible, even if, at first thought, they would seem to make strange bedfellahs.

The fact is that the currents of history are forcing these four nations to find common cause. Right now they share a dependency on the United States. All are looking over their shoulders toward the Soviet Union, bent on encircling them militarily. And the Soviets are supporting the Palestine Liberation Organization, a profound enemy of both Israel and Jordan.

The traditional motive behind Russian interest in this part of the world has been to control the eastern Mediterranean. Now, however, other alarms ring louder in the Kremlin. The Politburo realizes that by the early 1980's the Soviet Union will have to start importing crude oil. Most of it must come from the Mideast oil sheikdoms.

Toward this end, the Soviet Union has recently acquired access to ports in Libya and Syria and a naval base in Somalia. The Somalian incursion is a part of the systematic Russian effort to control the Red Sea and the Gulf of Aden. Recognizing Ethiopia's potential role along the Red Sea, the Soviets have been courting the new Ethiopian strong man, Lt. Col. Mengistu Heile-Mariam.

Earlier, Moscow had welcomed the PLO's Yassir Arafat, whose official visit was accompanied with chief-of-state protocol, and who received a pledge of Soviet support in his efforts to establish a PLO state in Jordan's former West Bank territory and in the Gaza strip.

A new threat to Jordan, Saudi Arabia, Israel and, especially to Egypt, has come into the picture with the rise of the fanatic Sennusi Muslim leader, Col. Muammar el-Qaddafi of Libya. In 1972, Qaddafi called on Jordanian troops to overthrow King Hussein. The Libyan's plans also included an attempt to assassinate King Hassan of Morocco, and an abortive plot to oust Mohammed Al Numeiry of the Sudan.

But it is Egypt's President Anwar Sadat who has felt the worst sting of Qaddafi's venemous hatred. The Libyan regards himself as the inheritor of the late Gamel Abdel Nasser's role as the natural leader of the Arab world. He has tried several times to have Sadat assassinated. He insults the Egyptian president almost daily. Last October, Sadat was alarmed to the point where he massed 30,000 troops on Libya's border. War did not break out, but it is still a possibility.

Like Arafat and his PLO, Qaddafi has become the foster child of the U.S.S.R. The Russians have cached an estimated $800 million worth of arms in Libya. To Arafat and Quddafi one enemy is, of course, Israel, but other foes are the "conservative" regimes of their fellow Arabs in Egypt, Saudi Arabia and Jordan. Again, Israel faces a common danger with three Arab states.

On March 21 of this year the Palestinian National Council, the policy-making body of the PLO, issued a communique calling on the Arabs to "purge the Zionist presence from Palestine," and advocating "armed struggle." There was an equal threat, however, to Jordan. On March 31, the Dutch newspaper Trouw published an interview conducted by correspondent James Dorsey with Zoheir Muhsin, a leading member of the PLO executive council. Said Muhsin: "After we have attained all our rights in the whole of Palestine, we must not postpone, even for a moment, the reunification of Jordan and Palestine." Thus, in the mind of a PLO leader, were two sovereign states summarily dispatched.

This natural affinity between Israel and the so-called conservative states occasionally results in cooperation that belies the enmity existing on the superficial, or propagandistic level.

After Nasser died on September 23, 1970, both the United States and the Soviet Union immediately attempted to influence the political coloration of the successor regime. The Russians pinned their efforts and hopes on Ali Sabri, a pro-Soviet vice president. The United States quietly backed Sadat. When Sabri and his followers could not suppress Sadat, they attempted a coup to depose the new President. Unfortunately for the plotters, Israeli intelligence learned of their plans and notified the CIA. The CIA, in turn, alerted Sadat and the plotters were arrested, tried and jailed. The Israelis had weighed the situation, made a judgment on their own behalf and, in doing so, probably blocked Communist control of Egypt.

There was another occasion when Israel probably saved King Hussein's throne. On September 20, 1971, the Jordanian government reported that a heavy concentration of Syrian troops, armed with Russian weapons, had crossed the frontier. With the concurrence of the United States, Israel massed her tanks and prepared to intervene in Jordan's defense. The Syrians were not prepared to fight on two fronts. They withdrew, and King Hussein remained in command of his shaky kingdom.

It would be an oversimplification to charge that the Soviet Union is orchestrating all these events. It is clear, however, that she is supplying arms and other forms of support to the PLO and other countries that seek to subvert and overthrow the governments of Israel, Jordan, Egypt and Saudi Arabia. The long-term interests of these countries and the United States tend to coincide. None welcomes Russian dominance in the Middle East; none wishes to extend hospitality to Arafat and the PLO. Significantly, President Carter seems to be backing off from his support of an independent Palestinian "homeland," perhaps because he recognizes that such a homeland would be an implacable foe of Jordan and a base for Soviet expansion.

Certainly it is true that Israel, a modern democracy, has little in common ideologically with the semi-feudal regimes of Egypt, Jordan and Saudi Arabia; little, that is, except survival. In the long run, the United States, competing for a finite supply of oil, could claim a similar bond. It is a powerful incentive that the Carter administration might well recognize as it prepares for the visit of Israel's new Prime Minister, Menahem Begin. King Abdullah, it seems, recognized it nearly 30 years ago.

DOCTORS' MAGAZINE FINDS MARIJUANA HARMFUL EVEN "IN MODERATION"

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. McDONALD. Mr. Speaker, as we know, it is fashionable to claim that marijuana is harmless in moderation, by way of commending it as a new habit of the sort we do not need, despite the sorry state of those cultures in which pot-smoking is widespread.

Writing in Private Practice magazine for July 1977, the distinguished Prof. Hardin Jones of the Donner Laboratory, Berkeley, Calif., outlines some of the effects. Dr. Jones outlines 14 changes of the sort commonly seen in marijuana users. While it may be argued that any one of these changes are rather mild, they make a rather dysfunctional combination.

One would think that alcoholism alone provides us with more than we really need in the way of disabling vices. We do not need new courses of woe.

The article follows:

A SHORT GUIDE FOR PARENTS

Many people in the government and the national media seem to be saying that mari-

juana—if used in moderation—is pretty much harmless. But is it? As more and more young people use it, the question becomes urgent.

One of the scientists who have studied the drug the longest—Dr. Hardin Jones, professor of medical physics and physiology at the University of California, Berkeley, and assistant director of the Donner Laboratory, says no. Writing in Private Practice Magazine, a medical journal, he highlights fourteen brain changes exhibited by the average marijuana smoker. These are especially helpful for parents.

Says Dr. Jones:

1. He has shifted from a self-activating interesting, and interested person to one who is withdrawn and given to disordered thinking.

2. Thought formation in the marijuana user tends to be less powerful: conclusions are relatively impetuous, and expressed ideas are often non sequiturs.

3. The marijuana user's attention span and ability to concentrate have been reduced.

4. Memory, especially short-term memory, is shortened.

5. The facial circulation reflexes are impaired; blushing is reduced. The skin tends to be pallid and relatively lacking in blood (except during the marijuana 'high').

6. The conditioned social responses, such as affection for parents and tolerance for their suggestions, are impaired. There is a loss of other conditioned responses; for example, an unkempt appearance is common and a loss of inhibition about urination in inappropriate places. Concern for consequences is reduced, and concern for the rights and well-being of others may be largely absent.

7. The marijuana user does not want to be "hassled." Mild criticism or merely requesting that housekeeping chores be done may be interpreted as hassling.

8. Marijuana is a hypnotic drug, and the hypnotic spell is long lasting. Thus, the user is likely to be talked into many situations that he would otherwise avoid.

9. The young marijuana user tends to remain thin and to be underdeveloped for his age. The trend is more pronounced with heavy use. The daily marijuana user of several years' duration is likely to appear emaciated.

10. The male is deficient in male hormone. He is likely to have a tendency toward paranoia or schizophrenia, or both.

11. He is likely to have an elevated number of broken chromosomes in cultures of his white blood cells.

12. His white blood cell immune response is lowered.

13. The daily cycle of sleep and waking is largely inverted. The marijuana user stays up at night.

14. Sexual functions are often stimulated early in marijuana use, but with regular use, the sexuality is suppressed.

In short, pot is anything but harmless. Parents whose children are smoking this dangerous weed should discuss this with their family doctor. It is a serious health problem.

SUPPORT GROWS FOR STRENGTHENING THE FOOD STAMP SHELTER DEDUCTION

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. McHUGH. Mr. Speaker, I have been very encouraged by the groundswell of support that has developed for an amendment to the food stamp bill that I will be offering on behalf of myself and Mr. JEFFORDS when the bill reaches the floor.

Our amendment would adjust the cap on the shelter deduction to reflect increases in the cost of living. We believe this is necessary to preserve equity over the 4 year life of the program, and I am very pleased that so many groups and organizations agree with our assessment.

To date our amendment has been endorsed by the following organizations:

AFL–CIO.
Amalgamated Meat Cutters and Butcher Workmen.
American Federation of State, County, and Municipal Employees.
Food Research and Action Center.
Industrial Union Department of the AFL–CIO.
Interreligious Task Force on U.S. Food Policy.
Leadership Conference on Civil Rights.
League of Women Voters of the United States.
National Association of Counties.
National Council of Senior Citizens.
National Farmers Organization.
National Food Stamp Campaign.
New York State Office for the Aging.
New York State Washington Office.
Retail Clerks International Association.
U.S. Conference of Mayors.
UAW.

Their support is most gratifying. I should also note that, within the last few days, the following Members have come forward to indicate that they would like to join Mr. JEFFORDS and myself as cosponsors of this amendment:

Hon. Edward Koch.
Hon. James Scheuer.
Hon. William Brodhead.
Hon. Michael Harrington.
Hon. Robert Drinan.
Hon. Frederick Richmond.
Hon. Andrew Maguire.
Hon. Richard Nolan.
Hon. Jonathan Bingham.
Hon. Richard Ottinger.
Hon. Austin Murphy.
Hon. Frank Horton.
Hon. Stanley Lundine.
Hon. Donald Fraser.
Hon. Harold Hollenbeck.
Hon. Charles Rangel.
Hon. Joseph Le Fante.
Hon. Elizabeth Holtzman.

A number of other Members have indicated their support by circulating a letter to Members of the House. The signers of that letter include:

Hon. Parren Mitchell.
Hon. Berkley Bedell.
Hon. Alvin Baldus.
Hon. Richard Nolan.
Hon. Shirley Chisholm.
Hon. William Lehman.
Hon. Donald Fraser.
Hon. Lindy Boggs.
Hon. Charles Rangel.

And, of course, many other Members have told us informally that they will support our amendment and work actively for its adoption. Their support is appreciated very much, and I believe that our amendment will pass because of their efforts.

HERMAN BADILLO

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. HARKIN. Mr. Speaker, being the mayor of New York City has been described as the "second most difficult job in America, next to being the President of the United States." This year there are many candidates for this office in New York City. One of the candidates for this position is my good friend and colleague, HERMAN BADILLO. Because I have worked closely with Congressman BADILLO in the area of human rights, I know of his deep commitment to upgrading the quality of life for all of our citizens, and especially those in our large cities. As the following article points out, HERMAN BADILLO is "exceptionally intelligent." Moreover he combines this intelligence with a rational and human approach to problem solving. He understands that the problems of our large cities are human problems and that they must be solved within a human context and not just with facts and figures on pieces of paper. As the article concludes, HERMAN BADILLO "makes sense." I would like to share with my colleagues a recent article about Congressman HERMAN BADILLO who is a candidate for mayor of New York City.

HERMAN BADILLO: THE MAKING OF A RATIONALIST-REVOLUTIONARY

(By Nat Hentoff)

When Herman Badillo is sworn in as mayor of New York, his immediate priorities will be:

The cashiering of Felix Rohatyn; the restoration of free tuition at City University; waging unremitting battle against Hugh Carey, landlords, and bankers to protect rent control; and initiating an unsparing evaluation of the state of public school education—leading for the first time in city history to every teacher and principal being made accountable for what goes on in those schools.

That's before lunch. In the afternoon Badillo will focus on preventing any further rip-offs of federal housing subsidies in the predatory tradition of Manhattan Plaza ($460 million in federal support over the next 40 years). Instead, such funds would go to rebuilding the slums through economical, low-rise, scatter-site housing. Similarly, the new mayor will remove the projected 7000 luxury apartments from the Westway landfill blueprints—thereby grieving bankers and builders, but again enabling more of the poor in the other boroughs to obtain comfortable housing in which they can take some pride.

There is much more on Herman Badillo's long, precisely annotated, and researched list of mayoral tasks. Provided, of course, he is able to convince the electorate to give him the job.

This is Badillo's third try for City Hall. In Democratic primaries he came in third in 1969 and second in 1973. This time, being even better known, particularly as an acknowledged congressional expert on urban affairs, Badillo expects to be first. He really does. In addition to his own unassailable self-confidence (matched, among public figures, only by that other cool customer, Hyman Rickover), Badillo is a true believer in rationality. How, in logic, he says, can he not be elected? He understands the *details* (a favorite word) of city governance, especially their fiscal dimensions, better than any of the other contenders. And he is way

ahead of the field in his knowledge of the intricacies of that federal urban legislation—some of it pushed through by Badillo himself—which, if used resourcefully and honestly, can greatly help to regenerate the city.

There is one more factor. Even his opponents, including lurking enemies from other campaigns, concede that Badillo is exceptionally intelligent. That he delights in demonstrating that intelligence, suffering fools not at all, causes some to grumble about his "arrogance." And Badillo's wit is more of the mordantly wounding order of Gene McCarthy's than that of the usual cautiously amiable politician. That's another reason some consider him uppity. But again, a rational electorate, according to Badillo, makes its judgment on performance, not personality.

The relationship, however, between rationality and politics is at best accidental. The sainted James Michael Curley of Boston, for instance, carefully hid his considerable intellect, not bothering to more than skimmingly research issues for a campaign. Indeed, as I saw when I was his announcer on radio, Curley often didn't even take the trouble to write out his speeches. He knew the catchwords the voters thirsted for, and he poured them into their eager gullets. So it is thus far in the current mayoralty campaign. Let the citizen be secure in his home and on the streets! (Is there a mugger running on a contrary platform?) A crusade against pornography! (And then will the banks and real estate interests have less of a stifling hold on the city?) Bring discipline back to the schools! (Once the kids are bolted in, teach reading intravenously.)

Away from the gusty sloganeering is Herman Badillo with his figures and analyses and detailed programs. "He's a smart dude," said a waiter watching a recent Badillo press conference. "If Herman's so smart," his colleague snickered, "why isn't he going to be mayor? He ain't nowhere in the polls."

I ask Badillo whether he may have greatly miscalculated the odds against him. I don't know anyone, I add, who thinks he's going to win. Or is this an educational campaign he's running? The cool customer smiles very thinly. "I have never been known as someone who wastes his time," says the congressman from the South Bronx. "I know a lot about numbers, and the odds are not what they seem."

First, Badillo thins the field. Percy Sutton never got up enough steam to run out of it. Ed Koch somehow cannot catch on. Mario Cuomo began with the governor on his back and has been losing ground ever since. Already, then, it is Badillo against two. And of those two, he believes Abe Beame to be a stronger candidate than Bella. "Beame has a more solid constituency that is basically his own," Badillo says. "It's the machine following added to a certain conservative constituency. Furthermore, the incumbent nearly always has an edge."

As for Bella, Badillo casually discounts her early lead in the polls. Primary polls, he notes, are notoriously inaccurate, pointing to their firm 1973 predictions that Al Blumenthal, rather than Badillo, would face Beame in the runoff. Also, at this point, 25 to 30 per cent of the voters remain undecided and September is quite a while away. In addition, Badillo does not believe that Bella's constituency is as solid as it has to be for her to prevail. "Those areas in the city she carried in the senate race last year," Badillo says, "were *my* areas. And I wasn't in that race.

"Bella's support is soft in another way too," Badillo claims. "Once the campaign really does get into issues and programs, people are going to recognize the difference between being a mayor and her kind of legislator. When you're one out of 435, you can come up with a rather wild idea which then becomes modified during public hearings and debate. But when you're the mayor, you're one out of one. Once the mayor makes a decision, that's it—that's what everybody has to go with. As people really start to think about what it takes to be an effective mayor, they'll be looking for different qualities than Bella's." The rational candidate expects a rational electorate.

In Badillo's projection, therefore, the runoff is likely to be between him and the dynamic incumbent. "Beame beat me last time," Badillo says, "but he's weaker now. Last time Beame looked very solid, and then he turned out to be mush. Another reason he beat me four years ago was that the people then were not willing to believe what I was telling them. I predicted the fiscal crisis; I said there'd have to be a wage freeze and an adjustment of pensions. Beame said none of those things. Quite the opposite. So which of us has credibility now?"

Is it possible, after all, that Badillo—who, as Steve Flanders of WCBS put it, "campaigns by using facts and figures like hammers"—can actually win by the force of logic? As when he raises a hammer of lucidity in the direction of Felix Rohatyn. "Although you would never know it unless you read Jack Newfield," says Badillo, "Felix has been consistently working *against* the best interests of the city.

"I'll show you," Badillo begins in the manner of the adjunct professor he is at Fordham's Graduate School of Urban Education. "The city budget, to begin with, has *not* been cut. Today it's over a billion dollars higher than it was in 1975. What have been cut are city services—police, firemen, teachers, sanitation, and hospital workers. But instead of the money from the cuts having been saved, it's gone into debt-service payments. And Rohatyn, along with the Emergency Financial Control Board, is responsible for the fact that these debt-service payments now come to more than *20 per cent* of the budget!"

Badillo pauses to contemplate—with the horror of the certified public accountant he is—all the current talk of New York's "recovery" when the city is so awash in debt. "According to what I find to be the national standard," he says, "a municipality is in trouble if debt payments make up 12 or 13 per cent of the budget. And it is in very deep trouble if the figure goes over 15 per cent.

"The fact is that despite what you read in the papers," Badillo goes on, "New York City is paying scandalous, disastrous interest rates. Sure there was rejoicing on the front page of the Times July 14 when MAC bonds were sold at 7.5 per cent. But even that's much too high a rate, and what wasn't reported is that the interest rates can easily go up again because the new budget is not balanced and because there is a real possibility of further fiscal crisis.

"Meanwhile, Rohatyn and his colleagues admit to an annual debt service outlay of $2.4 billion. But it's more than that because of the Big MAC stretchouts. Every time Felix triumphantly announces another stretchout, the interest rates go up even more. Let me give you an example. A recent deal exchanging $400 million of city notes for Big MAC bonds was also hailed as a great achievement by Felix. But nobody pointed out that in this deal, 6 per cent city notes were being exchanged for 9.75 per cent bonds—an increase in the interest rate of over 50 per cent. If anyone had proposed a 50 per cent increase in the salaries of policemen, firemen, teachers, or other city employees, there would be outraged editorials in all the newspapers. But no comment was made when these huge benefits were given to bond holders. Once again, investors and banks have profited from the city's crisis while vital services keep being squeezed. Now you know why the first thing I'm going to do as mayor is get rid of Felix."

To bring down the grotesque interest rates the city has been bludgeoned into paying, Badillo—the only New York City congressman on the House Committee on Banking, Currency, and Urban Affairs—has introduced a bill which would provide federal loan guarantees to the city through a national development bank that will service both urban and nonurban areas (thereby securing rural votes for the bill). "Once investors know their money is guaranteed," Badillo explains, "we can return to more reasonable interest rates and save from $300 million to $500 million a year in debt service payments."

Would he, as mayor, try to abolish the Emergency Financial Control Board along with Rohatyn? "No," says Badillo, "because as a certified public accountant I have no objection to making the city's books available to the control board so it can certify that the mayor's financial projections are accurate. I don't want my figures to be doubted by anyone. But as mayor, I am going to make sure that the control board stays out of policy making. I was chosen by the New York congressional delegation to be an observer at control board meetings, and I've seen how the board has arrogated the power, for instance, to close hospitals—Morrisania and Fordham. Making policy is none of the board's business. That's up to elected officials, and I'm going to take back that power."

There is indeed little question about Badillo being a strong mayor. With his pride in mastery of details and his conviction, not entirely misplaced, that he knows more than anybody else about everything, Badillo would be a stringent taskmaster, keeping an icy eye not only on the EFCB, but on everyone who is part of or has dealings with city government.

Under a Badillo administration, for instance, the public schools, resolutely resistant for many decades to any change that actually benefits kids, will be resoundingly shaken up. "First," he says, "there'll be no more pushing kids through whether or not they can read or do math. The way it is now, nearly everybody passes; and so we can't really evaluate what's going on in the classrooms. The full extent of the failure is hidden. So I will insist that students not achieving on grade level be flunked. Then we can concentrate a variety of resources on getting them to learn. From Title I funds and poverty money we can develop tutorial programs, starting at the elementary school level. And in other ways we can keep after them until they're legitimately able to pass.

"At the same time, the heat will finally be on those teachers and supervisors under whom kids have been failing to learn. Once the facts are all out in the open, for example, a teacher who continually has sizable numbers of students not being promoted will have to be made accountable for the quality of his or her teaching. The same will be true for principals of those schools in which most of the kids are not learning.

"We have never had real evaluation, and thereby real accountability, in the schools, One way not to get it is by changing the command structure—like this empty Beame plan for a chancellor responsible to the mayor. You only get real change by focusing on educational policy, not structure. My plan, by the way, does not involve firing teachers and principals without due cause and without due process. I'm not interested in mass firings; I'm interested in results, and once the heat is on, we'll get results."

Badillo's fierce interest in education—an issue he underscores more persistently and coherently than any other candidate—comes from his logical perception that it is impossible to have a substantial middle class in this city's future without an educational system capable of teaching middle-class skills. (It is also because of his determination to preserve and nurture a middle class in New York that Badillo is so eager to war on the landlords and their ally, Hugh Carey,

for the preservation of rent control. "Take away controls," he says, "and you'll drive what's left of the middle class out of the city, leaving it to the poor and to those who can afford the luxury housing that brings so much profit to builders and to the bankers who provide them with mortgages.")

With regard to education as a way to create a new middle class, Badillo intends to further energize the schools by recruiting parents. Not just, in the traditional way, to help the kids with their homework, but to go to school themselves. "The educational achievement of a child." Badillo insists, "is related to that of his parents. In this city you'll find that children tend to go to school about two years longer than their parents did. So, if the parent dropped out in the eighth grade, chances are the kid will leave in the 10th grade. What I propose to do is keep the schools open after three as well as in the evenings and on weekends so that parents can earn high school equivalency diplomas."

Who'll do the teaching? "Any regular teacher who wants extra income, and I'll also use people who are now working for the poverty programs. And as the parents stick it out, so will the kids. You see, the only thing that counts, that makes a difference, in planning for the city are programs that are concrete. Like making it possible for parents to finish school. Like insuring that the school system as a whole is accountable for its failures. These are things that are tangible. Either the child or the parent graduates, or he doesn't. And if he doesn't, you must set it up so you're able to find out why."

If Herman Badillo can ever be said to brood—his mind is usually too crowded with hard facts breeding more hard facts to allow for hovering moods—he laments the waste of money on intangibles. When asked, for example, how he intends to implement his pledge to overhaul the city's poverty program, Badillo's answer is much like that of Pierre Boulez when the latter was asked how he proposed to reform German opera. "With dynamite," said Boulez. Badillo's plan for what he considers an utter scam of a poverty program is to just plain abolish it.

"Hundreds of millions of federal dollars," Badillo says, "are going down the drain through all the community action, model cities, youth, drug addiction, and manpower training programs. Nobody evaluates them. The poverticians in charge are running their own patronage systems and have no one's interest in mind but their own. Wherever you look, you can't find anything concrete that these programs are accomplishing. Look at the community corporations. For fiscal year 1976, 36.4 per cent of all our poverty funds went into those corporations. Show me the results. They have block workers. What do they do? Cheer people up? Nobody knows what those block workers do. Whatever is not tangible should not be funded."

Mayor Badillo would scrap all those programs and put all discretionary federal funds—community-action and public-works employment money, grants under the Comprehensive Employment and Training Act—into one massive youth training and construction program. "Take people from 16 to 21 and even a little older," says Badillo, "and put them to work building and rehabilitating housing where they now sit around unemployed. This way we would actually get some improved housing, and the youngsters would be kept busy while being trained in good work habits. This is tangible. The other stuff is baloney."

Another concrete Badillo priority is the restoration of free tuition at City University. As a Puerto Rican paradigm for Horatio Alger, Badillo had to work (dishwasher, pinboy, cook) while still in Haaren High School. He probably would not have been able to go to college had it not been for the "free ticket," as he puts it, to City College (from which he graduated magna cum laude). Badillo still cannot fathom the stupidity—Beame's, Carey's, and that of the Emergency Financial Control Board—that ended New York City's 130-year tradition of providing children of the poor with free tickets to the middle class.

"It was not only a stupid decision," says Badillo. "It was also cruel because it sells out the future of so many young people. And as usual, the poor are being used to bear the brunt of the city's mismanagement. Unless free tuition is restored. New York is going to become a city of endless poverty, for the poor will no longer be able to get the education necessary to become part of a new middle class."

The only other city policy that angers Badillo more than the barring of the gates of City University to the poor is the systematic program of planned shrinkage aimed at making New York smaller by letting its poor neighborhoods wither away.

"In its crudest form, that policy was revealed in Felix Rohatyn's suggestion a while ago that the South Bronx be entirely leveled and an industrial park built there. To get an idea of how planned shrinkage is actually working—for all the denials that it's going on—just look at the slum neighborhoods. The buildings there are not being maintained. The city does not go in with emergency repair work. And then look at the capital budget. There is no money for reconstruction of the slum areas. None at all. But meanwhile, funds are used instead for such ventures as that Richard Ravitch white elephant, Manhattan Plaza, with its huge federal subsidies which should have gone into housing for poor people throughout the city.

"It was Ravitch, by the way who, when he was head of the Urban Development Corporation, closed down UDC projects for the poor in my district in the South Bronx. He said there was no money. But somehow, he found funds to finish other UDC projects in areas with less poverty.

"The poor do not count in this city."

Badillo is almost apologetic for stating the obvious. "The poor have no clout. People like Ravitch have clout. And there is something else about Manhattan Plaza out of which Ravitch, as a private builder, made a fine profit. That's in Bella's goddamned congressional district, and she never paid attention to what was going on. It's a matter of detail again. She did not attend to details. Hardly anybody does.

"Look at Battery Park City. There, the long-range projection is for at least 7000 apartments on landfill. They'll do anything rather than build in the slums. It's the kind of contempt for the poor and just plain greed that could lead them to create landfill all the way to London to build so-called middle-class housing which will have to be subsidized with money that should have gone to the slums. And look at Westway. All the shouting has been about the highway, thereby overlooking the details of 60 acres of landfill that will contain 7000 units of luxury housing which, of course, will have to be subsidized. And then they'll say there's no money left to build housing for the poor."

As mayor, Badillo, not surprisingly, will press for the removal of subsidies for the Richard Ravitches and instead use the funds for citywide low-rise, scatter-site housing. "This way we can build for millions of dollars instead of billions," Badillo says, "and so we can build many more units. The poor would be able to reclaim their neighborhoods, and the middle class would be in a position to revitalize their neighborhoods with the money we save.

Badillo has sheafs of illustrations of tax money being diverted from legions of leaderless plebeians to the already well-favored few: "Yankee Stadium, John Lindsay's mistake, wound up costing $200 million. Can you imagine what could have been done with that money in the South Bronx? Now there's Beame's convention center. He estimates it will cost $171 million. Multiply that by 10. If the center goes through, that will further ensure there will be no rebuilding of the slums because if you use that huge an amount of limited resources for a wholly city-funded project, there's no money left for anything else."

Herman Badillo, the coolly persistent avatar of reason in city politics, brandishing his facts and figures, turns out to be the most radical candidate of all—if radical is defined denotatively as "going to the root" of the noisome ailments that plague New York. His main strength is making tangible sense. But the polls and the political analysts say he cannot possibly win.

"I shan't feel deflated if I lose," says Badillo. "It will not mean I was wrong in anything I said or proposed. This city will be destroyed if planned shrinkage goes on. It will go bankrupt if we continue paying these enormous interest rates. A generation or more of the city's children will be ruined unless we actually make the schools work for them. So if I lose, I will not feel in any way discredited for, unfortunately, I will still be right."

Watching Herman Badillo through the years stubbornly moving up his own ladder of facts, I think occasionally of Dick Reeve's story about the boy from Puerto Rico who was orphaned at five, sent to live with a succession of relatives, and ended up, at 12, with an aunt and uncle in Burbank, California.

"They didn't have anything," Badillo told Reeves, "and they felt it was hopeless having me around because I couldn't speak any English except 'yes' and 'no' and a couple of other words. I knew that schools opened in September. It was a nice middle-class town, and from the house, I watched all the kids going to school the first day. Of course, I couldn't talk to them. The second day I followed the kids and went to the school, and using sign language and a few words, I enrolled. I took care of myself from then on."

So he did, chronically making sense out of whatever went on around him. But the question is whether the electorate of the city of New York can with equal rationality choose Badillo as mayor.

Badillo has no plans to mount an expensive television display. It makes no sense. "By now," he says, "people know who I am. There is no image I'm trying to sell. I just have facts, programs, and a solid record of knowing how to make things work. That should be enough, don't you think?"

IS THE CARTER ADMINISTRATION PREPARING A MASSIVE ATTACK ON GUN OWNERSHIP?

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. ASHBROOK. Mr. Speaker, recent reports from gun shops—both pro and con—reveal a high probability of administration-sponsored antigun legislation during this session of Congress. In the July 22 issue of Gun Week newspaper, a Chicago-based antigun group, the Civil Disarmament Committee for Handgun Control was quoted in its June–July 1977 newsletter as saying that its ally, the National Council To Control Handguns "Have lobbied strenuously, have established very good relations with the Carter administration and expect the administration to come out with strong

handgun recommendations sometime in July."

Having held its silence in the early days of its administration, the Carter organization may have developed a game plan for new antigun legislation, at a time when all seems quiet in the rank of the antigunners. In a press conference conducted in Washington, D.C. July 13, a pro-second amendment group, the Citizens Committee for the Right To Keep and Bear Arms cited a White House plan to deprive tens of millions of lawabiding American citizens of their constitutionally guaranteed right to keep and bear arms.

The citizens committee unveiled a proposed White House antigun policy statement which it claims was prepared by the Justice Department and submitted to the White House. Calling for a ban of so-called Saturday night special handguns, the document declares war on private ownership of handguns for personal protection. Purchase of more than two handguns in a year, and more than one handgun in a month by a single individual would be outlawed. It would prohibit the use of sporting guns except under very limited conditions. Citizens would be forced to submit their names to a data bank in a forced gun registration program.

That the Carter administration would harbor this antigun attitude is of no surprise. Morris Dees, Mr. Carter's chief political fund raiser, was the chief organizer of the National Gun Control Center, a vocal antigun group. Gun owners remember well the threat issued last year by chief Carter adviser Hamilton Jordan, who said, "Carter will really go on gun control and really be tough. We're going to get those bastards".

The great surprise is the fact that Mr. Carter would maintain this unfavorable policy in light of the public's attitudes favoring handgun ownership. In a nationwide survey by "Decision Making Information," an independent research organization, 85 percent of those surveyed voiced support for their right to own guns. The public has spoken loudly in favor of private ownership of handguns. Why not follow their wishes, Mr. Carter?

STATEMENT OF CONGRESSMAN GEORGE MILLER BEFORE THE SENATE FINANCE COMMITTEE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. MILLER of California. Mr. Speaker, the issue on which this subcommittee undertakes hearings today is much larger than simply adoption subsidies, or even foster care reform. The purpose of H.R. 7200, and my own "foster care and adoption reform bill" from which much of the House-passed bill was drawn, is to improve the functioning, quality, cost-effectiveness, and humaneness of a system which, during 2 years of review, I have concluded, is failing at its very basic purposes. Sadly, that is an opinion shared by experts in every related field around the country.

Last week, when the administration opened the public testimony on H.R. 7200, Senator MOYNIHAN asked Secretary Califano, "What do you know about foster care and adoption that you did not know one year ago?" I think we can definitively answer that, 1 year ago, we had no idea of the widespread failure of the foster care system, or of the enormous fiscal and human cost involved in that failure.

During this past year, several major, authoritative studies on foster care have been released which have greatly expanded our knowledge of the operation of the system in the States. Late last year, HEW itself released a study entitled, "Foster Care In Five States," which reviewed stated evaluations in California, Arizona, Iowa, Massachusetts, and Vermont. Earlier this year, the General Accounting Office released a study, "Children in Foster Care Institutions" which was commissioned in mid-1975 by Congressman JOHN BRADEMAS and myself concerning conditions in California, New York, New Jersey, and Georgia. Also this year, the Regional Institute of Social Welfare Research of Athens, Ga., released the study "Supply and Demand for Child Foster Care" which examined the program in the eight southeastern States—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee. Most recently, the New York City comptroller, Harrison J. Goldin, who will also testify today, released a major study of foster care in that city.

The conclusions of these studies, dealing with a variety of States in every area of the Nation, are startlingly similar:

Many children are removed from their natural homes needlessly, because appropriate services were not provided their parents;

Many children are kept in inappropriate, overly restrictive foster placements far longer than necessary;

Many children, and their parents, do not receive proper post-separation services which could lead to the reunification of the family;

Existing accountability and due process procedures are extremely vague, and widely ignored, which directly contributes to the maintenance of thousands of children in indeterminate and inappropriate, and costly foster care;

Many thousands of adoptable children remain in foster care because the system is designed to retain them in limbo, and because Federal financing placed a premium on indeterminate maintenance rather than on permanent placement.

As I have stated many times, the skewed Federal program actually subsidizes the breakup of the family rather than concentrating its resources on preserving and improving family life. We will continue to spend hundreds of millions of dollars to retain a child in foster care for years, but spend little on services to avert placement, and virtually nothing on moving the parentless child into a permanent, loving adoptive home.

It is therefore critical that this committee recognize that the continuing crisis in foster care exists not in spite of the Federal role, but largely as a direct result of our financing and lack of providing goals and direction. Simply tacking a new program, such as adoption subsidies, onto the end of a very bad system does nothing to reform the process which creates the situation. Likewise, requiring major reform of the procedures involved in foster care without providing additional Federal funding, and targeting it to preventive and reunification services, cannot alone solve the crisis. The bill which I introduced, and the program as outlined in H.R. 7200, therefore, is a comprehensive approach which should be pursued.

Within the past year or so, we have become aware not simply of the many problems in foster care at present, but of the fact that there exist many workable alternatives to the present crisis which could be sustained with the kinds of direction and funding contained in H.R. 7200. Some of these alternatives have been funded on a demonstration basis by HEW itself.

The comprehensive services program in Nashville, while saving an estimated $68,000 over projected foster care costs during the 4 years of the program, recorded impressive results during the early 1970's: numbers of children removed from home, down 51 percent; institutionalization was cut by 85 percent and eliminated entirely for children under the age of 6; recidivism was cut by 88 percent. These results have been matched by other preventive service programs from New York City to San Francisco, most of which are struggling to continue in spite of the severe lack of Federal funding.

The effectiveness of the impartial, independent, and judicial or quasi-judicial reviews contained in H.R. 7200 have also been shown to be effective in aiding in the appropriate placement of children and in flushing out of the system the thousands of children who do not belong in foster care. The National Council on Juvenile Court Judges has operated the "Children in Placement" project in a number of States, reviewing cases on a periodic and thorough basis. The cost savings of these reviews has been stressed in testimony by project president, Judge John Stekettee of Grand Rapids, Mich., and proven in the results in several States. In reviews in Ohio, Oregon, Texas and Rhode Island, CIP moved substantial numbers of children out of care. For Senator PACKWOOD's benefit, I would mention that 66 percent of the children reviewed in Oregon were moved out of care, 69 percent of whom were placed for adoption. In Oregon, one-fifth of these children were returned to their natural homes, and the study of the eight Southeastern States concluded that one-third of the children should go home.

These are the kinds of programs and procedures which H.R. 7200, and, I believe, the Carter administration's bill, are designed to replicate.

My own legislation, and H.R. 7200, contain sections requiring that, when a child is placed in foster care, that he be placed in the least restrictive setting which most approximates a family and in which his special needs, if any, may be

met—within reasonable proximity to his or her natural home—where appropriate—with relatives. This provision goes to the very heart of much of what is currently wrong with the foster care system.

Every study has concluded that between half and two-thirds of the children in foster care are inappropriately placed, frequently in settings far more restrictive than required by their actual conditions. Children are kept in institutions, when they could be in group homes; group homes are used instead of foster homes. The New York comptroller has estimated that 11,000 children were kept in foster care an average of 5½ years too long, and that the cost to the taxpayer of this inappropriate placement was over a quarter of a billion dollars.

Let me assure you that this appropriateness standard is far from being a minor detail. Senate and House committees have heard of the practice of sending foster children hundreds of miles from their homes, across State lines, to unregulated, fly-by-night ranches for the convenience of an agency and to the severe detriment of the child. We have all read of children being kept in institutions for years unnecessarily. Not only are there enormous human losses, but also financial costs to this inappropriate placement pattern. Maintenance of a child in an institution can cost 10 times the amount required to place a child in a foster home.

It is not enough to point to the reviews contained in this legislation. There must be some standards established for those reviews, and there is major difference between "standards" and "detail." Without such a provision, there is no way to enforce an appropriateness standard in a review.

This appropriateness and proximity standard is very similar to that enacted by Congress in recent legislation, and was embodied in a major suit, Gary W. against Stewart, in Louisiana last year. The U.S. Department of Justice was a coplaintiff in that suit, which resulted in Federal Judge Rubin's issuing a decision including standards very similar to the ones contained in H.R. 7200. Recalling that important decision, the New Orleans Times-Picayune recently endorsed H.R. 7200, saying:

> The sense of it in regard to child care and foster homes is humane and should be kept intact. This would go far toward assuring that never again will any State banish its disturbed and handicapped children.

The issues raised in the Gary W. suit are the same ones upon which my own investigations were launched. In 1975, I became aware of press accounts which documented the frequent shipment of abused, neglected and handicapped children across State lines to institutions and other facilities often located hundreds of miles from their natural homes. In some cases, natural parents fought for years in an attempt to retrieve their children, who had been virtually kidnapped by the State.

Crusading officials, and private citizens in the State of Illinois exposed, in 1975, the widespread shipment of children from the State to Texas and Maine. Indeed, the report, "An Illinois Tragedy," not only sparked my own concern for these children, but led to a major reorganization in the child welfare department in Illinois, and the elimination of the out-of-State placement program.

But unfortunately, this type of placement, which has become known as "banishment," is not unique to Illinois. Nor is it only a matter of interstate shipment. In my own State of California, children are taken from their home communities and placed hundreds of miles away in institutions in another part of the State. The detrimental impact on the child, and the likelihood that such placement will substantially impede the return of that child to his own home, is no less severe than had that child crossed a State border.

The real issues are ones of appropriateness and proximity of placement. Children should not be shunted around from facility to facility at the whim of a social service agency. By the same token, a child placed in foster care because of parental problems, as over 90 percent are, should not be confined in an institution or other highly restrictive setting simply because such a placement is convenient for the placing agency.

The fact is that there is nothing wrong with many of the children in foster care at all. Yet the system into which they are thrown is so lacking in procedure, so devoid in many cases of concern for the child's welfare, that often the system itself produces—in 3, or 5, or 10 years—a candidate for permanent subsidy by government, in jail, on welfare, or in an institution permanently.

I think that we should focus some special attention on Judge Rubin's decision in the Gary W. suit, because it addresses the legal and constitutional questions involved in H.R. 7200 and in the foster care system itself. Judge Rubin stated, in his opinion, that the questions of appropriateness stood "at the heart of the suit." Gary W. against State of Louisiana, opinion, July 26, 1976, Judge Rubin wrote that the phrase "least restrictive setting" is "a convenient way to sum up the standard applicable to all governmental restrictions on fundamental personal liberties," and he concluded:

> What is required is that the State give thoughtful consideration to the needs of the individual, treating him constructively and in accordance with his own situation, rather than automatically placing him in institutions, perhaps far from home and perhaps forever.

As a result of this finding and in agreement with the virtually unanimous support by professionals of noninstitutional, community-based placement procedures, Judge Rubin ordered:

> No child shall be placed in an institution unless the child's treatment plan prescribes this placement on the basis that residence in an institution is the least restrictive setting feasible for that child—the availability in the child's home community of services and programs likely to afford adequate treatment shall be considered—whenever possible, a child shall be placed in his own home or a foster home, and, if that is not possible, within reasonable proximity to his family.

This is the exact standard included in H.R. 7200. It is the most elementary standard which must be made concerning placement, when placement is indeed the best course.

Let us keep one very critical point in mind. Judge Rubin's decision concerned conditions in one State, Louisiana. But those of us who have studied the foster care picture in this country know full well that the conditions he documented are as widespread as should be the application of the standards he issued. Louisiana was not even one of the States studied by HEW, by GAO, or by the New York comptroller. But those studies, and more, all showed that inappropriate placement was a severe problem, that it exacerbates the problems which led to foster care, that it serves to prolong placement and thus drive up costs, and that it creates long-term problems for the innocent child captured by the system.

The impediments to speedy reunification caused by inappropriate placement bring me to one additional point. In response to a questionnaire which I sent to all the States, I have learned that many States report that a substantial percentage of their foster care populations have been in placement over 2 years; several States report that 40 to 60 percent have been in care over 3 years. During the joint hearings chaired by Senator MONDALE in 1975, we were told that a child remaining in foster care 18 months has a better than 80 percent chance of remaining there for the rest of his childhood. HEW's study has documented that children entering foster care for a short period often remain years. How great must be the added impediments to a swift return of the child when that child is placed many hundreds of miles from his parents, and from the agency with responsibility for reviewing and monitoring that child? How many children become locked into this system because they were deposited in a convenient, out-of-State institution far from caseworkers, reviewers, and their parents? And how many of these children could have been helped, could have been reunited with their parents had the simple, basic standard of least restrictive appropriate placement, in proximity to the natural home, been enforced?

The record of inappropriate placement, as documented in the several studies I have cited and in Judge Rubin's decision, make a telling case for retaining this critical provision in H.R. 7200. Without it, the Senate will remain silent on the worse abuse in the foster care system, and will significantly undercut the strength and integrity of this legislation.

We must increase our Federal commitment to preventive services which will take an enormous burden off the shoulders of the State and local governments, where it has disproportionately rested for many years. We must introduce greater accountability and improved due process for those children who do enter our foster care system. In particular, with full knowledge that inappropriate placement, often at great distance from a child's family, is among the most noxious aspects of the system, we must enact a standard like that contained in recent court decisions, to insure that a child will be placed in the least restrictive set-

ting appropriate for that child, not for the convenience of a placing officer. Similarly, we should establish a standard that a child ought to be placed near to his home, with relatives if possible, so as to make the foster care experience as nontraumatic as possible for the child.

I would like to make what I believe is a very critical closing point. Having been involved in the conceptualization, drafting and advocacy of this legislation for over 2 years, on a daily basis, I am well aware of the fact that there are those who view portions of this legislation as too restrictive, too detailed, and difficult to administer. Most often, these accusations are made about those sections which would attempt to protect better the basic rights of children and families whose rights, various studies have well documented, are flippantly ignored at present. I do not believe there is excess detail in this legislation.

Some claim that the reviews would overload the courts. I find it highly significant, therefore, that the 40th convention of the National Council of Juvenile Court Judges last week unanimously endorsed H.R. 7200, and that Judge Steketee, originator of the children in placement project, has been the strongest advocate of the reviews in this bill.

I also asked the Congressional Research Service to inquire about the views of State social service agencies about their views on these provisions. Their review of 14 States in every region of the country failed to turn up an opponent of these provisions. Indeed, several States such as New York, California, Ohio, and Virginia have begun to move in these same directions in anticipation of, or in spite of, the Federal position.

I would like to conclude by adding that, in response to Senator MOYNIHAN's question last week, that we have learned an enormous amount about the foster care system in the last year, and unfortunately, most of it points to the utter failure of that system to reach any of its prescribed goals. We have, in H.R. 7200, legislation which is the product of hundreds of hours of work by national experts in every related field. Its provisions are not theoretically inspired or detailed for the sake of granting additional authority to the Federal Government.

Rather, its provisions are designed specifically to remedy the patricular abuses, shortcomings and tragedies which study after study has revealed to exist in each State's program. They are based upon cost-effective models which have shown a capacity for improving foster care. Failure to enact these standards for the program, given the severe abuses which I have spoken of today, would be to virtually sanction the continuation of such abuses, an unthinkable suggestion. To add Federal dollars to this system, without proscribing rules by which to spend those dollars in a manner more likely to assist children, would be fiscally irresponsible. I have confidence that this committee, and this administration, after considering the record and this legislation, will endorse the provisions of this legislation which I have discussed as being fundamental principles and central features from which a more responsible and more compassionate foster care and adoption system will emerge.

PLEDGE TO NCOA

HON. ABRAHAM KAZEN, JR.

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. KAZEN. Mr. Speaker, on July 1, 1977, I had the honor and privilege to address the Noncommissioned Officers' Association international convention in San Antonio, Tex. Also in attendance was our colleague, MENDEL J. DAVIS, who serves with me on the House Armed Services committee. Congressman DAVIS was the convention's keynote speaker June 30, at its annual Awards Night.

The gentleman from South Carolina offered some enlightening remarks that all of us in the Congress should hear. He said:

People who have service under one set of rules shouldn't have those rules changed for the years they have already served.

I certainly agree. Threats of unionization of our military forces would not exist if we stuck to that principle. It is the least we can do for the men and women who man our defense ramparts.

Mr. Speaker, I insert the text of Congressman DAVIS' remarks in the RECORD:

REMARKS OF THE HONORABLE MENDEL J. DAVIS

It is a pleasure for me and a distinct honor to be invited to address such an august gathering as we have here tonight.

My service on the House Armed Services Committee has been a most rewarding experience since I have been in Congress. My interest in enlisted personnel was inherited from my predecessor, the late Mendel Rivers who all of you know was a champion of the enlisted personnel.

I shall discuss briefly with you tonight several points in the field of legislation pertaining to military pay and benefits, medical care, and others which I hope will be of interest to you.

During the first months of the present Congress, there have been a number of actions taken by the Congress in regard to military compensation.

EXTENSION OF AUTHORITY TO PAY ENLISTMENT/REENLISTMENT BONUSES

Of particular interest to enlisted men was the action of the Congress in extending from June 30, 1977, to September 30, 1978, the authority to pay enlistment and reenlistment bonuses.

In this connection I would point out that the House passed a bill in February which would have done all that was necessary to authorize the services to continue to pay enlistment and reenlistment bonuses.

However, the Senate, after a delay of three months, passed the House bill but amended it to authorize recoupment of the unearned portions of the bonus when, in the words of the Senate bill the member "who, voluntarily or because of his misconduct . . . is not technically qualified in the skill" for which he received an enlistment or reenlistment bonus. When this bill came back to the House I was greatly concerned about this authority to require an enlisted man to repay a bonus when somebody decided he was no longer technically qualified in the skill for which he received the bonus. As the result of my insistence, the Department of Defense has clearly stated the circumstances under which recoupment will be authorized and has assured the Congress that the authority will be used sparingly and only when clearly justified.

SURVIVOR BENEFITS

The Committee on Armed Services on March 17, 1977, reported favorably on a bill, H.R. 3702, which will make a number of much-needed improvements in the current Survivor Benefit Plan for military retirees. Among the provisions of that bill are the reduction of the social security offset from 100 percent to 50 percent. In cases where there is a minor child or where the widow is getting social security based on her own employment, H.R. 3702 will eliminate that offset entirely. It will also conform the retired military member's contribution to the Survivor Benefit Plan to the formula applicable to retired civil service employees.

MILITARY RETIREMENT

There has been a great deal of talk, both in the Congress and in the Executive Branch, about the military retirement system's liberality and its cost.

In order to fully evaluate this concern and decide whether changes are in order and if so what those changes should be, the Military Compensation Subcommittee will hold hearings later on in the 95th Congress.

It is likely that preliminary exploratory hearings will be held sometime later this year. However, it is likely that the Committee will defer until early next year consideration of possible changes which may be made. By that time, we expect to have the recommendations of the Blue Ribbon Panel which the President is appointing to review the military compensation system.

I would want to give you one message on the matter of retirement. We may find it necessary to make some changes. At this time I don't know; but one thing is certain. People who have service under one set of rules shouldn't have those rules changed for the years they have already served. This is and will be my position if we decide to change the present system.

I am reminded of the story of the stranger walking down a country lane and he comes upon a farmer who's milking a cow. He stops and he asks the farmer what time it is. The farmer looks at him, and reaches down under the cow and taps the udder several times, and says, "It's 3:45." And the stranger is very impressed with this, and he says to the farmer, "What a magnificent cow you have. How can you possibly tell the time by feeling the udder?" And the farmer replies to him, "Well, the cow has nothing to do with it, but by lifting the udder up, I can see the church steeple and the clock on it says 3:45." I think, as we deal with the challenges or perhaps the legacy of the 70's, it's incumbent upon all of us to keep our eyes on the clock and the steeple and not be diverted by any of the multitude of magnificent cows that are being paraded in front of us as solutions to some of the problems that we all face.

Every member of this association is aware of the attempts over the past three years to eliminate the commissary subsidy. You are even more aware of the impact this decision would have on your pocketbook. The most adverse impact would, of course, be on those military personnel who are most in need of assistance, namely, the young enlisted members and the non-commissioned officers. However, it would have the greatest economic effect on the retired military community, many of whom are in the lower income brackets, since their retirement income is based on the low military pay scales of years gone by.

I have taken a very strong personal interest in this matter and have initiated letters to the members of the House, urging them to oppose any reduction in the subsidy. I have personally talked to members of the House and Senate urging them to defeat any

effort to eliminate the commissary subsidy. So far, over the past three years, against strong opposition, this effort has been successful. However, as late as June 10, the Senate Appropriations Defense Subcommittee approved language to phase out the subsidy over the next three years. I can assure you I will continue my efforts to defeat this proposal when it comes before the full Senate Appropriations Committee for a final vote.

This is a benefit members of our Armed Forces were promised when they retired. I believe the government should keep its promises. I intend to oppose any effort on the part of the Congress to erode those benefits earned by you, the military enlisted personnel of our Armed Forces.

MEDICAL CARE

Our committee is concerned over the deterioration of medical care delivery, and in some cases dental care, in military facilities. We have received reports from various areas around the country indicating that care is being curtailed, or in some instances, discontinued for retired personnel and dependents. To compound the problem, there are reports that in some areas civilian medical care under CHAMPUS is not available as a substitute because of the scarcity of civilian physicians or the remoteness of the military activity.

Our Military Personnel Subcommittee, as well as our Military Compensation Subcommittee, have been looking into these problems for some period of time in an effort to find remedies through the legislative process. As far back as the 92nd Congress, the House Armed Services Committee initiated legislation which was eventually enacted to establish a scholarship program and the Uniformed Services University of the Health Sciences in order to provide new sources of physicians. It was evident after termination of the draft that a shortage of physicians could develop, and the committee, in addition to establishing the medical school and the scholarship program, sought other means of encouraging retention in the services through bonuses, other income benefits, and most recently in the last Congress, malpractice legislation which provides complete coverage for health care professionals in the services.

In the meantime, the physician shortage struck with an impact which has hit dependents and the retired community with a severe blow. The fruits of the physician have not had time to materialize since the first students have not completed their training and the military medical school is in its second year. Nonetheless, we hope to fully support those programs and indeed possibly make them more attractive to encourage greater numbers of people to enter military medicine. We hope to take other initiatives that will further alleviate the problem in the years ahead.

In the meantime, we are also directing our attention to CHAMPUS and hope to see an improvement in the administration of that program, including better claims service, up to date fee schedules, and other initiatives which would make CHAMPUS more attractive to the medical community.

In sum let me assure you that our committee will make every effort to improve the health care situation, both for dependents of active duty personnel, as well as those in the retired community.

MILITARY PERSONNEL

In the area of personnel, the Military Personnel Subcommittee of the Committee will be holding hearings soon on grievance procedures in the military. The focus of these hearings will be to find out whether the existing grievance procedures provide an effective avenue for service personnel to express their concerns.

Many of the Members believe that a major reason behind the interest in unionization in the military is frustration on the part of service personnel with their inability to have their problems aired properly within the system. During these hearings, I would expect that the Subcommittee will be receiving evidence from servicemen and women of all ranks to get their perspective on how the system is working.

I personally think that the major problem existing in this area is that the first-line supervisor—who knows the man and his problems the best—is not being given enough authority to solve the individual's problems. Possibly these hearings will be able to provide assistance in this area.

In another area, the Military Personnel Subcommittee will be looking into the status of Reserve training and overall readiness. I don't have to tell each of you that the viability of the Army as a whole today depends on an effective Reserve force. In the Individual Ready Reserve, which would provide fillers for existing units and replacements in the first days of combat, the present situation is a disaster with a shortage of over 300,000 personnel.

The Selected Reserve is also experiencing severe recruiting and retention problems with the Army Guard and Reserve almost 50,000 short of their authorized strengths. The Committee on Armed Services initiated an incentive program this year in an effort to attempt to offset this deficiency. If incentives are not effective, a more drastic step such as a draft for the reserves may be necessary.

In closing, let me again say what a distinct honor it has been for me to talk to you on subjects I hope have been of considerable interest to you. Thanks again for inviting me.

WHERE COMMUNISM REMOVES ITS MASK

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 20, 1977

Mr. DORNAN. Mr. Speaker, a curious masquerade is being performed on the world stage today and it is succeeding in fooling many Americans with the help of the liberal elements in our country.

These Americans are fed a steady diet of pro-Communist pap from the left wings of the press, academe, the State Department, and Congress.

These Americans are told that the Communists mean us no real harm . . . we can all live together amicably.

They are told that communism is merely another life style and that it can exist side-by-side with a free society.

They are told that the bulk of those who live under communism are at peace with their rulers.

They are told that communism has succeeded in bringing a higher quality of life to many backward countries to the benefit of the citizenry.

They are told that there are only a few dissidents who wish to escape Communist domination . . . most people are getting along very well in their day-to-day existence.

And—not suprisingly—the Communists are cooperating with and encouraging this sham. Cultural exchanges are arranged so that the American people can see the "high quality" of entertainment produced in a Communist society. "Amateurs" from Communist countries compete in international sports events to show the calibre of athlete trained under communism often bests that trained in many free nations. Guided tours are given of Potempkin villages to spread the word about the high quality of life under communism.

The charade is very well orchestrated. At least in most places.

There is one place where the wave of people fleeing communism has become such an embarrassment that the Communists have removed their mask of benignancy and exposed their hideous visage of oppression.

That place is the border between Eastern and Western Germany.

The Berlin Wall and the heavily fenced 836-mile frontier are testimony to the failure of communism and the masquerade.

The facts of the Wall and the fence have shattered the mask of communism so completely that the press has been forced to recognize it. The very elements in our own society which tend to depict communism's victims as "happy workers" now report on the "hideous fence system." Time magazine, in its July 18 issue, has even reported on the daily activity of our own servicemen patrolling that fence in their article, "G.I. Watch on a Deadly Border."

We can only hope that this is the beginning of an awakening on the part of all the members of the press to the masquerade of communism and their own role in its perpetration:

GERMANY—G.I. WATCH ON A DEADLY BORDER

Even when hopes for détente have been high—and nowadays they are waning—tensions between East and West have remained all too tangible along the border between the two Germanies. For more than a generation, elite units of NATO and Warsaw Pact forces, the world's two most powerful war machines, have faced each other across this heavily guarded 836-mile frontier. To signal clearly that it remains determined to defend Western Europe, even in the face of a massive Warsaw Pact arms and troop buildup, the U.S. next year plans to base an additional 3,800-man infantry brigade in West Germany, near Bremerhaven. Meanwhile, crack U.S. units continue to patrol more than half the eastern frontier, along with the West Germans who guard the entire border. Two armored cavalry regiments of the U.S. Army, about 8,400 troops in all, keep watch on the ground and aboard helicopters.

Time Bonn Bureau Chief B. William Mader recently joined a squad from the 11th Armored Cavalry Regiment on its dawn-to-dusk rounds along a section of the border. His report:

As our Jeeps moved slowly along a narrow dirt road parallel to the border, the G.I.s kept their eyes peeled for signs of unusual activity, such as East German troop movements or perhaps even the sight of Russian units, which usually keep themselves well hidden. Occasionally we halted directly across from an East German watchtower or work detail; when the G.I.s peered through their binoculars, they could see East Germans peering right back. At some spots we were barely five yards from the Communist troops but exchanged neither word nor gesture with them. Said Major James Steele, a tall, lean Texan: "This is where the action is. We all know exactly what to do if things blow up."

HIDEOUS FENCE

One of the patrol's main tasks was to note the progress the East Germans were making in renovating the hideous fence system they

have built along the frontier to stop their citizens from escaping to the West. At one location, about 30 soldiers—guarded by other troops, in standard East German fashion—were sinking concrete pilings, stretching mesh wiring and installing self-firing explosives. Apparently the old system, consisting of two parallel mesh-wire fences with a minefield in front of each, was not considered deadly enough. Thus "improvements" are being made, at a cost of about $500,000 a mile.

In the new system which has now been completed along roughly one-sixth of the frontier, the first fence has been eliminated, while a deep, concrete-lined ditch has been added. It is intended to thwart would-be escapees trying to crash the border in cars or trucks. West of the ditch is a minefield, then a new close-meshed wire fence that begins 3 ft. underground (to prevent tunneling) and rises 10 ft. above the earth.

Along the fence are antipersonnel mines and automatic-firing machine guns that are triggered by an electronic eye and set up to hit, variously, at knee, head or chest level. One part of the old system remains: hungry police dogs on long wire leashes still roam along the fence. Muttered Cadet Wade Schieber, a West Point third-year man assigned to summer border-patrol duty: "It's hard to imagine the dreadfulness of this until you see it. It sure isn't any New York-New Jersey state line."

Despite the overwhelming odds against success, East Germans still keep trying to beat the fence. Last year some 573 fled over the Berlin Wall and across the frontier; in the first four months of this year, an additional 204 made it to the West. But many fail. American patrols have had to watch helplessly as escaping East Germans have been gunned down by the border guards. Under strict orders not to violate East German territory, the G.I.s cannot do anything to help unless the escapees manage to reach West German soil.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterik to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, July 21, 1977, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 22

8:00 a.m.
Judiciary
Separation of Powers Subcommittee
To hold hearings on constitutional issues associated with negotiations for the disposition of the Panama Canal Zone and of U.S. facilities located therein.
6202 Dirksen Building

8:30 a.m.
Judiciary
Constitution Subcommittee
To continue hearings on S.J. Res. 1, 8, and 18, proposing amendments to the Constitution so as to provide for the direct popular election of the President and Vice President of the U.S.
235 Russell Building

9:00 a.m.
Government Affairs
Federal Spending Practices and Open Government Subcommittee
To resume hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Judiciary
Antitrust and Monopoly Subcommittee
To continue hearings on proposed legislation to amend section 4 of the Clayton Act so as to allow recovery for damages by direct or indirect purchasers of goods.
2228 Dirksen Building

9:30 a.m.
Environment and Public Works
Resource Protection Subcommittee
To continue oversight hearings on the Endangered Species Act of 1973.
4200 Dirksen Building

Special Aging
Closed business meeting.
154 Russell Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To consider the nomination of Robert H. McKinney, of Indiana, to be a member of the Federal Home Loan Bank Board, and H.R. 5675, to authorize the Treasury Department to make short-term investments of any portion of its excess operating cash balance.
5302 Dirksen Building

Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings on S. 1077, to assure that essential maritime transportation is provided to Alaska, Hawaii, and certain U.S. territories.
5110 Dirksen Building

Energy and Natural Resources
To consider pending calendar business.
3110 Dirksen Building

Foreign Relations
Foreign Assistance Subcommittee
To receive testimony from Administration officials on the proposed sale of AWACS aircraft to Iran.
4221 Dirksen Building

Government Affairs
Permanent Investigations Subcommittee
To continue hearings on the present status of the Department of Labor Task Force investigation of the Teamsters Central States Pension Fund.
1114 Dirksen Building

Judiciary
To hold hearings on the nomination of Harold L. Murphy, to be U.S. district judge for the northern district of Georgia.
2228 Dirksen Building

Veterans' Affairs
To consider pending calendar business.
412 Russell Building

3:00 p.m.
Joint Economic
Priorities and Economy in Government Subcommittee
To hold hearings on the status and function of women in the military.
5302 Dirksen Building

JULY 25

8:00 a.m.
Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To hold hearings on proposed energy conservation amendments to S. 1469, proposed National Energy Act.
3110 Dirksen Building

9:00 a.m.
Environment and Public Works
To hold hearings on the nominations of Joseph M. Hendrie, of New York, and Peter A. Bradford, of Maine, each to be a Member of the Nuclear Regulatory Commission.
4200 Dirksen Building

Finance
Taxation and Debt Management Subcommittee
To hold hearings on estate and gift tax problems arising from the Tax Reform Act of 1976.
2221 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Elizabeth E. Bailey, of New Jersey, to be a Member of the Civil Aeronautics Board.
6226 Dirksen Building

Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume oversight hearings on the Railroad Revitalization Act of 1976 (P.L. 94–210) and amendments proposed thereto.
5110 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on S. 1724, to establish a Neighborhood Reinvestment Corporation.
5302 Dirksen Building

Joint Economic
To receive testimony on a mid-year review of the economy.
1202 Dirksen Building

Select Indian Affairs
To hold hearings on S. 1582, to authorize the Secretary of the Interior to supply water to the Ak Chin Indian community in settlement of that community's claim against the United States.
235 Russell Building

10:30 a.m.
Governmental Affairs
To hold hearings on the President's plan to reorganize the Executive Office of the President (reorganization plan No. 1).
3302 Dirksen Office Building

2:00 p.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on S. 1514, to extend the dates during which the transitional rules of the Tax Reform Act of 1969 postpone the applicability of Section 4941 of the Internal Revenue Code.
2221 Dirksen Building

JULY 26

8:00 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings on S. 1478, S. 1622, and 1857, providing improved authority for the administrtaion of certain National Forest System lands in Oregon.
1318 Dirksen Building

Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To continue hearings on proposed energy conservation amendments to S. 1469, proposed National Energy Act.
3110 Dirksen Building

Judiciary
Hearing Panel
To hold hearings on S. 1503, to provide for the payment of losses incurred as a result of the ban on the use of the Chemical Tris in apparel and fabric.
2228 Dirksen Building

9:00 a.m.
Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To resume hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Human Resources
Labor Subcommittee
To hold hearings on bills to amend the Age Discrimination in Employment Act of 1967 to protect the employment rights of older workers (S. 481, 1583, 1768, 1773, and 1784).
4232 Dirksen Building

Select on Nutrition and Human Needs
To receive testimony from representatives of the egg industry concerning a report on "Dietary Goals for the U.S.".
322 Russell Building

9:30 a.m.
Environment and Public Works
Transportation Subcommittee
To hold hearings to consider financing alternatives for the remaining portions of the Federal Interstate Highway System.
4200 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To resume oversight hearings on the cost of drugs.
Until Noon 6202 Dirksen Building

Joint Economic
To hear OMB Director Bert Lance on a mid-year review of the economy.
318 Russell Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To resume mark up of H.R. 5294, S. 918, and S. 1130, to amend the Consumer Protection Act so as to prohibit abusive practices by independent debt collectors.
5302 Dirksen Building

Foreign Relations
To hold hearings on protocol to the Convention on International Civil Aviation (Exec. A, 95th Cong., 1st sess.), and related protocols (Exec. B, 95th Congress, 1st sess.)
4221 Dirksen Building

Governmental Affairs
To receive testimony on a proposal submitted by the President on July 15, 1977, relative to the reorganization of the Executive Office (Reorganization Plan No. 1).
3302 Dirksen Building

Select on Intelligence
Intelligence and the Rights of Americans Subcommittee
To hold closed hearings on proposal to establish procedures for electronic surveillance in the area of foreign intelligence (embodied in S. 1566).
H-405, Capitol

JULY 27

8:00 a.m.
Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To hold hearings on part E (Electric Utility Rate Reform) of S. 1469, proposed National Energy Act.
3110 Dirksen Building

9:00 a.m.
Armed Services
Research and Development Subcommittee
To receive testimony in closed session on S. 1863, DOD supplemental authorizations for fiscal year 1978.
224 Russell Building

Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To continue hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Human Resources
Labor Subcommittee
To continue hearings on bills to amend the Age Discrimination in Employment Act of 1967 to protect the employment rights of older workers (S. 481, 1583, 1768, 1773, and 1784).
4232 Dirksen Building

9:30 a.m.
Human Resources
Health and Scientific Research Subcommittee
To continue oversight hearings on the cost of drugs.
Until noon 1318 Dirksen Building

Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings on the role of the halfway house in the rehabilitation of alcoholics.
Until noon 1202 Dirksen Building

Judiciary
Criminal Laws and Procedures Subcommittee
To resume hearings to examine the erosion of law enforcement intelligence gathering capabilities.
2228 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Business meeting to consider pending calendar business.
Room to be announced

Select on Intelligence
Intelligence and the Rights of Americans Subcommittee
To hold closed hearings on proposal to establish procedures for electronic surveillance in the area of foreign intelligence (embodied in S. 1566).
H-405, Capitol

JULY 28

8:00 a.m.
Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To continue hearings on part E (Electric Utility Rate Reform) of S. 1469, proposed National Energy Act.
3110 Dirksen Building

8:30 a.m.
Foreign Relations
Foreign Economic Policy Subcommittee
Closed business meeting.
S-138, Captiol

9:00 a.m.
Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To continue hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Human Resources
Labor Subcommittee
To hold hearings on S. 1871, to increase the Federal minimum wage.
4232 Dirksen Building

9:30 a.m.
Environment and Public Works
Resource Protection Subcommittee
To resume oversight hearings on the Endangered Species Act of 1973.
4200 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To mark up S. 695, to impose on former Federal procurement personnel an extended time period during which they may not work for defense contractors.
5302 Dirksen Building

Commerce, Science, and Transportation
Business meeting to consider pending calendar business.
Room to be announced

Foreign Relations
To hold hearings on proposed Threshold Test Ban and Peaceful Nuclear Explosions Treaties with the U.S.S.R. (Exec. N. 94th Cong., 2d sess.)
4221 Dirksen Building

To receive testimony on the results of the recent Law of the Sea Conference.
4232 Dirksen Building

JULY 27

9:00 a.m.
Veterans' Affairs
Health and Readjustment Subcommittee
To hold oversight hearings on a study by the National Academy of Sciences on health care for American veterans.
6226 Dirksen Building

SENATE—*Thursday, July 21, 1977*

(Legislative day of Tuesday, July 19, 1977)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the Acting President pro tempore (Mr. METCALF).

PRAYER

The Reverend Canon Nelson W. Pinder, vicar of the Episcopal Church of St. John the Baptist, Orlando, Fla., offered the following prayer:

Our Father in Heaven, bless this Senate and grant that all the work done may be to the glory of Your great Name and to the benefit of all Thy people.

Give Thy wisdom and grace to all authority, that they may be examples of holiness, simplicity, and self-denial. Bless each one who works here. Take from them all pride, vanity, and self-conceit, and give them true humility. Enlighten their minds, subdue their wills, purify their hearts, and so fill them with Thy spirit and Thy love that their labor here will contribute to the unification and strengthening of our great country.

We praise You for the founders and benefactors of this Senate and pray Your blessings upon them. May we all truly trust in Thee and remain one Nation under God. Amen.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Jour-

nal of the proceedings of yesterday, Wednesday, July 20, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, the Human Resources Committee, in an effort to be responsive to President Carter's priority on hospital cost containment legislation, has developed a timetable which would result in reporting the legislation (S. 1391) before the August recess.

In order to meet that timetable, which is necessary in order for the Finance Committee to complete deliberations by the target October 8 adjournment date, the Subcommittee on Health and Scientific Research, headed by the Senator from Massachusetts (Mr. KENNEDY), has had to schedule a subcommittee executive session for today at 2 p.m. This time was necessitated by the schedules of the majority of the members of the subcommittee.

I therefore ask unanimous consent that that subcommittee may be authorized to meet today at 2 p.m.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. STEVENS. I do object.

The ACTING PRESIDENT pro tempore. The objection is heard.

Mr. STEVENS. It is reluctantly that I do so, but, as I am sure the majority leader knows, we have an objection from our side to a committee meeting at that time.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that any committees having jurisdiction over energy legislation, and wishing to meet today during the session of the Senate on energy legislation only, may be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. STEVENS. Reluctantly, again, I must object to that. I will report back to the majority leader on that limited request. I will, however, have to define the limits of my authority.

The ACTING PRESIDENT pro tempore. Objection is heard at this time.

Mr. ROBERT C. BYRD. I must say for the record that I had not indicated to the distinguished assistant Republican leader that I was going to make that request. I had not had the opportunity to do so. So I fully understand the objection to my request he has put in.

Mr. STEVENS. I will check it out.

Mr. ROBERT C. BYRD. I thank the Senator.

(Later the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, in order that the Committee on Human Resources may know that it will have the consent of the Senate to meet during the session of the Senate today, I ask unanimous consent that the Committee on Human Resources be allowed to meet during the session of the Senate today for the purpose only of concluding an important hearing on the nominations of nine Presidential appointees to positions in the executive branch.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, is this the subject, the same matter that is the subject, of the letter of July 21 given to us this morning?

Mr. ROBERT C. BYRD. Yes, it is.

Mr. BAKER. Mr. President, I would ask the majority leader respectfully to withhold for just a moment until I can make an inquiry.

Mr. ROBERT C. BYRD. Yes, indeed. I withdraw the request temporarily.

The ACTING PRESIDENT pro tempore. The unanimous-consent request is withdrawn.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Does the assistant Republican leader seek recognition?

Mr. STEVENS. Mr. President, I ask unanimous consent that my staff assistant, Will Browning, be permitted to have access to the floor today. His name is not yet on the list.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STEVENS. I yield the time of the minority leader to the Senator from Pennsylvania, who wishes, as I understand it, to discuss the problem of the Johnstown flood. He is on his way over. Is there a special order?

SPECIAL ORDERS

The ACTING PRESIDENT pro tempore. The next order of business is the special order for the recognition of the distinguished Senator from North Carolina (Mr. HELMS), who is to be recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the special order of Mr. HELMS there be a brief period for the transaction of routine morning business, with statements therein limited to 10 minutes, and with no resolutions coming over under the rule.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STEVENS. I thank the majority leader, and I yield back the minority leader's time.

The ACTING PRESIDENT pro tempore. Under the previous order——

Mr. STEVENS. I suggest the absence of a quorum, for just a minute.

Mr. ROBERT C. BYRD. I ask unanimous consent that the time for the quorum call be taken out of the minority leader's time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that a member of my staff, Miss Sarah Simms, be accorded the privilege of the floor during the morning period.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

WHO REALLY REPRESENTS THE VIEWS OF THE MAJORITY OF AMERICAN WOMEN?

Mr. HELMS. Mr. President, I think the title of my remarks today should be, "Who Really Represents the Views of the Majority of American Women?" The subtitle perhaps ought to be, "How Carefully, If At All, Does the Congress of the United States Monitor the Expenditure of the Funds Which Congress Appropriates?" I intend to address myself at some length to both of these questions in my ensuing remarks.

Mr. President, from the beginning of congressional debate on activities surrounding the International Women's Year movement, I have been opposed to Federal funding of the U.S. National Commission on International Women's Year.

As I stated in May of 1976, it was my opinion that the various organizations supporting this Commission did not represent the majority of American women. Nor did I feel that this Commission would represent the best interests of American women.

Mr. President, I make no claim to prophetic power, but in recent weeks some of my deep concerns have become reality.

Mr. President, in the past month my office has received letter after letter from concerned women all across the United States. These women have described their frustrations with and opposition to what they have witnessed at the various State women's conferences conducted under the auspices of the National Commission on International Women's Year—a Commission which received $5 million in Federal tax moneys.

I ask you, Mr. President, to bear with me as I present a rather lengthy report on activities which are being conducted before our very eyes. It is urgent that we take the time to examine carefully meetings held in the name of "justice for American women."

Despite the length of this report, it is by no means complete. When reports of events at the North Carolina IWY meeting began to reach me—about a month ago—I asked my staff to make a preliminary survey of what was happening around the country.

Mr. President, I make no pretense that the result can be considered a thorough-going investigation; it consists only of information that came to hand through inquiries limited by time and facilities.

But even so, enough information has come to light to reveal a widespread pattern and practice of discrimination by IWY and its State affiliates against

those women who do not agree with the narrow and negative ideology and partisan biases of the IWY organizers. In those few instances where a fair vote was forced upon IWY meetings, the IWY program was overwhelmingly defeated. But for the most part, the reports indicate rigged sessions, hand-picked committees, stacked registration, and little or no publicity to women at large. The IWY program to date appears to be a distortion of the intent and purpose of Federal statutes authorizing and funding IWY, and perhaps even may represent a violation of Federal law. At any rate, the IWY program represents a violation of the rights of all women who believe in the positive social and moral values of womanhood.

Today I am calling upon the appropriate committees of both the House and the Senate to investigate how these public funds are being spent and to determine whether the IWY organizers have adhered to the basic principles of fairness, balance, and equity, and to determine whether any Federal laws have been violated. If such be the case, then certainly Congress should take action to halt further spending by IWY, particularly for the proposed National IWY Conference in Houston—which now appears will be a rubberstamp, unrepresentative debacle. Moreover, action should be taken to recover Federal funds already spent from those responsible for any misuse.

Moreover, Mr. President, I am writing to the General Accounting Office today to ask for an accounting of the spending to date of the $5 million appropriated last year for the IWY, and of the IWY's adherence to the requirements set down in the appropriate statutes authorizing and funding the IWY. GAO has already studied lobbying by the National Commission and funding of the Commission by executive branch agencies previous to the 1976 appropriations, and found substantial irregularities even at that time. I believe that Congress and the American people have a right to know whether the National Commission on International Women's Year has been keeping to the ground rules in the spending of the appropriated $5 million.

Mr. President, I ask unanimous consent that my letter to Mr. Elmer B. Staats, Comptroller General of the United States, be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., July 20, 1977.

HON. ELMER B. STAATS,
Comptroller General of the United States, General Accounting Office, Washington, D.C.

DEAR MR. STAATS: On July 20, 1977, in a speech delivered on the Senate floor, I cited numerous complaints which had come to my attention with regard to the fairness, balance, equity, and adherence to Federal law by the National Commission on International Women's Year—a Commission established by Executive Order in 1975 and authorized and funded with $5 million by acts of Congress in 1976.

My remarks did not represent a full-scale investigation; but in view of the material which has come to light, I believe that such an investigation is called for. Of particular concern are the areas of lobbying activities, the balance of representation on the National Commission and its state affiliates and at the state women's conferences, and an accounting of the appropriated $5 million.

In both Public Law 94–167 and Public Law 94–303, the National Commission on International Women's Year is prohibited from using appropriated funds for the purpose of lobbying activities. Nevertheless, information received seems to indicate that the intent of the National Commission is to directly influence members of legislative bodies, both State and Federal, with regard to legislation pending before or proposed to those bodies—particularly with regard to the Equal Rights Amendment to the United States Constitution.

In addition, it appears that the National Commission has violated the Federal Advisory Committee Act of 1972—in which the following conditions are stipulted:

Section 5b(2): "The membership of the advisory committee is to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee."

Section 5b(3): ". . . appropriate provisions must assure that the advice and recommendations of the advisory committee will not be inappropriately influenced by the appointing authority or by any special interest."

Furthermore, numerous violations of Federal Rules and Regulations have been alleged concerning voting and financial accounting procedures. Pertinent sections include the following:

1901.12(a): "Complete financial records of grant funds including legible, itemized receipts to support all payments must be maintained by the fiscal officer or agent of the Coordinating Committee. Receipts for all expenditures made by the Coordinating Committee shall be maintained on file and certification of the existence of these receipts shall be submitted with the reports required in 1902.13(a). . . ." (Federal Register, vol. 42, no. 59)

1904.16(c): "The Nominating Committee shall prepare and present a balanced list of nominees for the State's Representatives with name, address, statement of willingness to serve and other data specified by the Commission." (Federal Register, vol. 42, no. 38)

1904.16(d): "The list of nominees shall be presented to the Coordinating Committee not less than 10 days prior to the State Meeting, and shall be made available immediately to any inquiring person or group. . . ." (Federal Register, vol. 42, no. 38)

With $5 million in Federal tax monies involved, I believe that the American public has a right to know whether the National Commission on International Women's Year has adhered to the Federal statutes governing its operations.

I therefore request that the General Accounting Office undertake an audit of the National Commission on International Women's Year to determine whether or not Federal laws have been adhered to. I am enclosing a copy of my report to assist you in your investigation.

Sincerely,

JESSE HELMS.

Mr. HELMS. On July 1, I brought to the attention of my worthy colleagues a strategy—indeed, a battle plan—which the National Organization for Women, the National Women's Political Caucus, the Lesbian Caucus, and other militant feminist groups are implementing at the individual State women's conferences. The purpose of such a plan is to prevent differing viewpoints from being given appropriate consideration.

These conferences, Mr. President, were intended to provide an open forum for women of all persuasions. Ms. Bella Abzug, now the presiding officer of the National Commission on International Women's Year, repeatedly reassured members of the House during its deliberation over Public Law 94–167 that these conferences would indeed be for all women. I quote from Ms. Abzug:

As I stated in my opening remarks, and as is the expressed purpose of this legislation, . . . we expect that the [state] meetings and the [National Women's] Conference will provide a forum for people of opposing views on [the Equal Rights Amendment, abortion legislation,] and many other issues. People who are concerned with women and their role will be welcome without regard to their views on any specific issues.

Now, Mr. President, how do we reconcile the purpose of the Monitoring and Mobile Operation Partnership Plan (MMOPP)—which I entered into the RECORD on July 1— and the above statement by Ms. Abzug? Well, the answer, of course, is that we cannot.

The closing cry of the MMOPP plan, "Never Give Your Enemy an Even Break," is characteristic of a spirit which is most offensive to those of us here and to all citizens who seek to serve the greatest democracy the world has ever known.

It is time, Mr. President, that Congress investigate the performance of the National Commission on International Women's Year. I believe that this report contains enough information to demonstrate that such an investigation is long overdue.

I. THE NORTH CAROLINA WOMEN'S CONFERENCE

Let me begin, Mr. President, by describing to you the situation in my own State of North Carolina. Concerned women from all across my State have written to voice their strong opposition to and frustration with the manner in which the women's conference held in Winston-Salem on June 17–19, 1977, was planned and conducted.

Areas of particular concern are representation of all viewpoints, availability of registration materials to all interested women, the actual planning of the conference, voting procedures employed at the conference, and lobbying activities by the IWY Commission.

An examination of these issues, Mr. President, will reveal the inequities committed in the name of "equal rights" for all women. A more fitting title for such activities would be "absolute power" for a few elitist women's groups who would dictate their desires upon the grassroots woman.

Mr. President, let us look first at the issue of representation. The Federal Advisory Committee Act of 1972—Public

Law 92–463—requires the membership of any advisory committee

to be fairly balanced in terms of the points of view represented . . .

And—

that the advice and recommendations of the advisory committee will not be inappropriately influenced . . . by any special interest. . . .

With that in mind, Mr. President, is it not somehow incongruous that the 32-member North Carolina IWY Coordinating Committee stands 31 to 1 in favor of the equal rights amendment, and that there is no representative of a pro-life group on the committee?

Mr. President, this coordinating committee was appointed in a State which has repeatedly rejected the equal rights amendment as elected legislators voted the conviction of the majority of their constituents. But, of course, we must remember that the National Commission on International Women's Year is also representative only of a well-organized feminist minority. Of its 42 members, only 1 woman represents those millions of women who oppose the ERA and abortion on demand.

Are we then witnesses, Mr. President, to a violation of a Federal law in that special interest groups do have a most decided influence upon the workings and recommendations of the North Carolina IWY Coordinating Committee?

The ramifications of this initial situation are great. Permit me, Mr. President, to turn to the issue of publicity and registration. Ms. Abzug herself uncategorically affirmed that these women's meetings would be widely publicized. I quote from Ms. Abzug:

The state meetings will be widely publicized through the media, through the press, through organizations, through community groups, so that every organization and every woman will know that in her state . . . she will have an opportunity . . . to come together with other women and say: "This is how I feel. This is how I see what has happened in this country. This is what I think should happen . . ."

Mr. President, there must be untold thousands of North Carolina women who look in disbelief at that statement. In addition to having little advance notification, the press—and particularly in Winston-Salem, the location of the Conference—attempted for several weeks prior to the Conference to obtain information from the Raleigh IWY office. Exact information was frequently not forthcoming. Television spots aired in Winston-Salem the week of the Conference—and on which IWY Coordinating Committee members were interviewed—revealed little more than a series of "I don't know's" or "We don't have that information yet."

As you can well imagine, Mr. President, this was a cause of real embarrassment to the interviewer. Can one call such a performance "informative publicity" for such an important meeting?

As I mentioned, Mr. President, I have received many letters from women who had volunteered their time and efforts to the planning of the Women's Conference, but who felt that their help was not wanted. Allow me to take just one example and go into this at some length because it is typical of many other cases.

At a January 13, 1977, planning meeting for the Conference, Mrs. Mary Pegg of Winston-Salem agreed to handle registration. She volunteered her time and efforts and was sincere in wanting to do a thorough and responsible job. At every step along the way, however, her efforts were thwarted or simply overlooked.

After the January 13 meeting, Mrs. Pegg went to the Republican Women's Club of Forsyth County and requested its help with registration. The women voted to so do and would wait for instructions.

Mrs. Pegg went to three local planning meetings in January and February. At each meeting she requested information from State coordinating committee members as to her exact duties and responsibilities, but her requests were brushed aside.

Finally, in February, she received a list of items for which she was to be responsible. Mrs. Pegg, therefore, called a meeting in March to begin the work. Her committee worked up a profile sheet for use in establishing equitable quotas should more than 2,000 women register for the conference. Mr. President, can we not understand Mrs. Pegg's dismay when she learned that the coordinating committee had rejected the profile and that one had been drawn up without the help of the registration committee?

Furthermore, Mr. President, Mrs. Pegg made repeated suggestions as to how costs could be kept down for preparing the convention packets. She was told that these ideas would be looked into.

Nevertheless, as weeks passed, there came no indication that these suggestions were followed up. Time and time again, Mrs. Pegg made the effort to secure information or begin work on her responsibilities. Time and time again she was told not to worry with that. It had already been taken care of.

Can we not well imagine, Mr. President, that Mrs. Pegg became quite concerned as to exactly who was running the show and for what purposes? On May 15, 1977, therefore, she sent in her name stating her desire to serve as a delegate to the Houston National Women's Conference. Not until 4 days before the Winston-Salem Conference did she receive word from the State coordinating committee. The decision to place her name on the official slate came only after a storm of protest from a woman quite concerned about the possible balance of viewpoints among the nominees.

A clue to the usurpation of authority finally came when Mrs. Pegg—who had been duly appointed chairman of the registration committee in February, and who had been vainly trying to fulfill that function—received a form letter dated June 6. It was signed by another person as registration chairman, and it thanked the recipient for volunteering to sit at the registration desk. At this point, Mrs. Pegg felt that her efforts had been completely frustrated, and she, therefore, indicated her intention to resign. The self-appointed clique that was determined to control the convention with an iron hand had won the day.

Such accounts of frustrated efforts are numerous, Mr. President. I have been informed that the program committee, composed of women from Greensboro and Winston-Salem, had already met three times when they received word that the Raleigh office was handling workshop arrangements and that the committee's work was not needed.

Mr. President, I have received reports that important meetings were missed by coordinating committee members. It has also been alleged that vouchers and receipts were not required before reimbursement by the Raleigh office. In general, Mr. President, it appears to have been a classic example of poor administration.

Members of the coordinating committee started arriving in Winston-Salem on June 12, and were housed in the very elegant Hyatt House. They thus had 5 days in comfortable surroundings to organize the preconvention activities.

However, Mr. President, when the opening of formal registration began at 3 p.m. on Friday, June 17, the delegates found that nothing—I repeat—nothing was ready. There were no conference packets. Workship assignments had been printed, but no one was sure who had them. Indeed, workshops had to be conducted without the necessary supplies of paper and pencils.

In short, Mr. President, the situation pointed to an inexcusable waste of taxpayers' moneys. Had not coordinating committee members been in Winston-Salem, across the street from the conference center, for 5 days?

Mr. President, let us consider even another matter. Many organizations in Winston-Salem itself—to which many women contribute and including the Winston-Salem Symphony Guild, the Southeastern Center for Contemporary Art, the Right to Life chapter, and the Winston-Salem/Forsyth County Council on the Status of Women—received no formal notification of the so-called grassroots-oriented women's conference.

It appears to me that an elitist group controlled the access to information and registration materials and that grassroots women were excluded from the planning and indeed notification processes.

Mr. President, I have received numerous other letters charging the North Carolina IWY Coordinating Committee with additional irregularities. Prominent among these charges is one dealing with the process of nominating and electing delegates to the National Women's Conference to be held in Houston, Tex., in November.

Pertinent sections of the Federal rules and regulations governing IWY State meeting organization demand the following procedures:

1904.16(c) The [State] Nominating Committee shall prepare and present a balanced

list of nominees for the state's Representatives with name, address, statement of willingness to serve and other data specified by the Commission.

1904.16(d) The list of nominees shall be presented to the Coordinating Committee not less than 10 days prior to the State Meeting, and shall be made available immediately to any inquiring person or group.

Once again, Mr. President, the reality stands in contrast to the rules. First of all can we possibly expect a stacked State coordinating committee to elect a nominating committee which would be able to prepare a balanced list of delegate nominees? Given all the other facts that have come to light concerning the planning of the Conference, would it not be naive to assume that the nominees truly represented a balanced cross section of North Carolina women?

Moreover, the list of delegate nominees was not completed until 4 days before the Conference and was not available to the public until the time of registration. Then on Saturday morning, June 18, a new list appeared entitled "Women for Women"—the result of a late Friday night caucus of feminists not pleased with several of the names on the initial list. After much confusion among the Conference participants, it was finally announced that the list from Friday was the official delegate nominee list; but the "Women for Women" list remained in circulation.

Mr. President, I live in Raleigh and have a high regard for the abilities of the women of that city. But I do find it difficult to believe that other metropolitan and rural areas apparently lack qualified women to represent their concerns. Of the 32 delegates eventually elected, 16 are from the Raleigh-Durham area alone. In addition, not one of the 32 women elected represents a Right to Life or Stop ERA group.

I suggest that such a group is not representative of the majority of North Carolina women.

In connection with the election, Mr. President, I have been informed that mistakes in voting procedures necessitated a revote. The revote was not called until after midnight Saturday and was scheduled for Sunday, June 19. Without having to point out the fact that the call for a revote was inexcusably late, I would also like to remind my colleagues that June 19 was Father's Day—a day which many of the women wanted to spend with their families.

Such a revote meant that more than half of the convention participants could not take part in the final election. Most of these women never knew that their first ballot was meaningless.

Finally, Mr. President, there is the issue of lobbying. Allow me first to refresh briefly the memory of my distinguished colleagues—or inform them, as the case may be—concerning the history of this issue.

The original legislation directing the National Commission on International Women's Year to convene a National Women's Conference had nothing in it which specifically prohibited the use of funds for lobbying purposes. Because of the great concern expressed by the constituents of many Congressmen that the IWY and its national conference would be used to lobby for ERA, abortion, and other issues, an amendment was accepted which prohibited the use of any authorized funds for lobbying activities.

Bella Abzug further attempted to reassure Congressman BAUMAN, in particular, that he—and I quote—"need not fear that this conference will be used to lobby on those issues that he is concerned about."

I commend Mr. STEIGER of Arizona, however, for his correct assessment of the inevitable outcome. He considered such an amendment a worthy exercise in statutory language and then went on to say:

I know it will be supported by the ladies. It would also be impossible of enforcement, as I am sure the Members of the House are aware. Lobbying is indeed the only result of these conferences.

A truer statement could not have been uttered. Despite the assurances of Ms. Abzug and her followers, despite the written prohibition against lobbying contained in Public Law 94–167 and in the appropriation bill, Public Law 94–303, these conferences are organized and resolutions are passed which are intended to influence State legislatures and the Congress with regard to certain issues.

Allow me to illustrate my point, Mr. President. At the North Carolina Conference, the IWY book "To Form a More Perfect Union . . . Justice for American Women" was given to every registered participant. I will simply quote some of the material found therein.

The ratification of the Equal Rights Amendment is a logical and overdue step toward our historical commitment to 'form a more perfect union' and 'establish justice.' (From the Transmittal Letter)

In another section of the book, we find the following:

Full partnership for the homemaker . . . and for the woman in the work place . . . reproductive freedom, as well as responsible choice, . . . passage of the Equal Rights Amendment—all these and many more are part of the dream. It is the duty of every citizen who cherishes the Declaration of Independence to help it come true. (Page 2)

In another section of the book, we find entire chapter entitled "ERA—Let the Record Speak". In this chapter only pro-ERA arguments and statements appear.

As if we might need further evidence to realize that equality and freedom of speech are reserved only for those who support Bella Abzug's views, let us make careful note of the following statement printed at taxpayers' expense and distributed at each State conference meeting. Once again, I quote from "To Form a More Perfect Union . . .":

A campaign to discredit the Equal Rights Amendment, which has confused the public, has been mounted by ad hoc organizations, such as Stop ERA, Happiness of Womanhood, and Operations Awake. Statements of effects on the law of the Equal Rights Amendment have been circulated. Many . . . are distortions, half truths, or outright misrepresentations. . . . It has been difficult for the press to report on the ERA because the typically short press deadlines make it all but impossible to check out Phyllis Schlafly's systematic misrepresentations. (Pages 29–30)

Now I ask you, Mr. President, does the National Commission on International Women's Year have the corner on the discernment of truth?

According to such statements, it appears that they believe so. And they are using our money to force their convictions on State legislatures and the Congress.

Turning to some of the resolutions passed at the North Carolina Conference, let us remember that these State resolutions will go on for consideration at the National Conference in Houston, and that similar resolutions from the Houston Conference will form the basis of recommendations to the President and to Congress.

With regard to gay rights, the North Carolina Women's Conference resolved that—

The FCC be directed to establish advertising and program guidelines . . . prohibiting the exclusion of . . . people representing diverse lifestyles.

With regard to the equal rights amendment:

Be it resolved that the North Carolina State Women's Meeting urge the State legislature to ratify the Equal Rights Amendment to the United States Constitution."

With regard to abortion:

Be it resolved that government funding should continue to finance abortion for all women . . . as a basic human right.

These resolutions and others, Mr. President, were passed at a meeting controlled by an elitist group of feminists who had $74,388 of Federal tax moneys at its disposal. I do not believe that such a conference is truly representative of the women of North Carolina.

II. A BRIEF HISTORY OF THE INTERNATIONAL WOMEN'S YEAR MOVEMENT IN THE UNITED STATES

Mr. President, in order to understand what is happening this summer, it will perhaps be helpful to review the history of International Women's Year activities in the United States.

Direct U.S. participation in the United Nations observance of International Women's Year began in 1972. In that year the Department of State established an informal interagency group responsible for planning the U.S. observance of International Women's Year in 1975. This group established a U.S. Center for IWY and began urging the creation of a national commission.

The Department of State also established an IWY Secretariat responsible to then Deputy Secretary Robert S. Ingersoll. The purposes of this group were:

First. To prepare materials for the U.S. delegation to the International Women's Year Conference to be held in Mexico City in 1975;

Second. To act as the staff for the national commission.

State Department personnel provided administrative services to the Secretariat and the National Commission on International Women's Year which was established by President Ford on January 9, 1975, through Executive Order 11832. The 35 Commission members from the private sector and its 4 members of Congress were supported by Sec-

retariat staff members, many of whom were on detail from other agencies.

Administrative services provided the Secretariat from the State Department included quarters and budget, personnel, and printing services. Included among the personnel services was advice from Virginia Allan, then Deputy Assistant Secretary of State and Chairman of the 1969 President's Task Force on Women's Rights and Responsibilities.

Mr. President, it is extremely important to note the composition of that first National Commission. This Commission should have been constituted in compliance with rules of the Federal Advisory Committee Act of 1972—Public Law 92-463. The following sections of that act are pertinent:

Section 5B(2): "The membership of the advisory committee [must] be fairly balanced in terms of the point of view represented and the functions to be performed by the advisory committee."

(3): ". . . appropriate provisions [must be made] to assure that the advice and recommendations of the advisory committee will not be inappropriately influenced by the appointing authority or by any special interest."

It is obvious, Mr. President, that no such attempt at balanced representation was made. From the beginning the National Commission on International Women's Year has been dominated by active feminists and used to further their goals.

A sampling of the Commission membership tells the story:

MEMBERSHIP

1. Jill Ruckelshaus—Chairman—pro-ERA/abortion, member of the Advisory Committee on the National Women's Political Caucus.
2. Alan Alda—characterized in ". . . To Form A More Perfect Union . . . as an active feminist
3. Casey Eike—characterized in ". . . To Form A More Perfect Union . . ." as an active feminist
4. Elizabeth Athanasakos—member of the 1969-70 President's Task Force on Women's Rights and Responsibilities, the League of Women Voters, and a local Women's Political Caucus
5. Pat Carbine—publisher/editor-in-chief for Ms. Magazine
6. Audrey Rowe Colom—President of the National Women's Political Caucus
7. Martha Griffiths—former Congresswoman and principal supporter of ERA in the House.
8. Velma Hill—member of the American Federation of Teachers (a teacher union with ties with the AFL-CIO) and the New York Commission on the Status of Women
9. Patricia Hutar—U.S. Representative to the UN Commission on the Status of Women
10. Bella Abzug—Congresswoman from New York
11. Congresswoman Margaret Heckler—a leader in the ERA fight
12. Gerridee Wheeler—member of the National Women's Political Caucus
13. Senator Birch Bayh—a sponsor and leading advocate of ERA
14. Senator Charles Percy—active in the field of legislation for women and a delegate to the 1975 IWY Conference in Mexico City.

Mr. President, there are at least 24 active feminists out of the total 39 members. Biographies of others were not specific enough to be able to determine how many of these might have been pro-ERA. However, none have been prominent in the anti-ERA fight.

Moreover, Mr. President, we all know that an advisory committee composed of nonpaid members cannot be expected to run the day-to-day activities of the office. Because of this, it is important that the deputy coordinator in charge of policies and plans for the National Commission is Mrs. Catherine East. Mrs. East is a veteran from the Council on the Status of Women and is quite outspoken in her advocacy of ERA and abortion.

With these facts in mind, Mr. President, can it hardly be considered surprising that the following resolution was adopted at the Commission's first meeting on April 14-15, 1975?

The National Commission on the Observance of International Women's Year, as its first public action and highest priority, urges the ratification of the Equal Rights Amendment . . .

As our main commitment to the observance of International Women's Year we pledge to do all in our capacity to see that the Equal Rights Amendment is ratified at the earliest possible moment.

Such a resolution, Mr. President, definitely appears to represent the viewpoint of a special interest group and could never have been the result of a Commission of balanced points of view. To accomplish its goals the Commission already had at its disposal about $350,000 of funds and personnel—Federal tax moneys—transferred from other agencies. More funds would continue to be made available.

In addition to the passage of the above resolution, Mr. President, the Commission also established 13 work committees to examine issues important to women. An interdepartmental task force was also created within Government departments to implement IWY projects. This was in accordance with section 4 of the Executive order issued by President Ford on January 9, 1975.

Each agency of the Executive Branch shall designate at least two persons, preferably a man and a woman, to be responsible for planning and implementation of projects and programs within such departments and agencies for the domestic observance of International Women's Year.

A. THE INTERDEPARTMENTAL TASK FORCE

On August 1, 1975, the task force met for the first time and examined the World Plan of Action unanimously adopted at the U.N. Conference in Mexico City. The members of the task force were urged to begin to implement "those parts of the plan which are relevant to our stage of national development."

Such "parts", Mr. President, would call for the passage of the ERA, abortion on demand, Government funded universal child care centers as a means for the Government "to supplement the training and care that children get at home," a so-called more equitable distribution of income by means of more Government regulation, the implementation of a new international economic order, and the birth of a society created by women serving as a "powerful revolutionary social force."

Now, Mr. President, according to the World Plan of Action, it will be necessary in this emerging ideal society to reassess the "functions and roles traditionally allotted to each sex in the family and the community at large." Furthermore, the plan asserts the "necessity of a change in the traditional role of men as well as of women."

These are only some of the worldwide goals established by a Conference controlled by the most militant feminists and revolutionaries. These are only some of the plans, Mr. President—all involving increased governmental control—which would be forced upon the citizens of the United States if the National Commission, in its role as a "revolutionary social force", has its way.

Let me reiterate, Mr. President, that this elitist group of feminists and their viewpoints were being financed with Federal tax moneys.

B. THE THIRTEEN WORK COMMITTEES AND THEIR RESOLUTIONS

The 13 committees also began their work. Needless to say, Mr. President, the results could have been predicted by any astute observer of the feminist movement. The reports and resolutions of the committees and the task force form the bulk of the content of the official report of the National Commission given to President Ford.

Published in mid-1976 and funded by tax moneys, this report—To Form A More Perfect Union . . . Justice for American Women—represents only one viewpoint—that of the feminists. Millions of American women should take great offense that such a report was given to the President and to the people of the United States as a statement on the needs of all American women and as a means by which justice could be brought to "all the unliberated women."

In actuality, Mr. President, does not the entire activity of the National Commission and its use of Federal tax moneys to promulgate the interests of a particular special interest group amount to the historically controversial concept of taxation without representation? Nowhere in this report, Mr. President, is there to be found a viewpoint representative of the woman against ERA, for the life of the preborn child, against increased Federal intrusion into her life and her family's happiness, for the unhindered functioning of the free enterprise economic system, for the independent functioning of the American democratic system, and for the supremacy of our Constitution over any decree issued by the strife-torn and ineffective United Nations.

Indeed, in a strange turn of the tables, these attitudes are characterized as unpatriotic and reactionary. I quote from the report:

Full partnership for the homemaker . . . and for the woman in the work place . . ., reproductive freedom, as well as responsible choice, passage of the Equal Rights Amendment—all these and many more are part of the dream. It is the duty of every citizen who cherishes the Declaration of Independence to help it come true."

Mr. President, consider some of the verbatim resolutions presented in the report, followed by my comments on their long-range impact:

1. The IWY Commission asserts that the Federal Government should assume the major role in directing and providing for universal voluntary child development programs as a valuable service to parents, as essential to a child's best interest, and as society's obligation to avoid the cost of neglect."

Mr. President, here it is assumed that the Federal Government should be responsible for the care of preschool children. But who or what is the Federal Government? How can it have the real interest of each and every child in mind? Would not such control during the formative years of a child's development eventually serve only the interests of the State? What educational philosophy would be adhered to?

A partial answer for these questions is perhaps to be found in one of the topics discussed at a workshop on motherhood held at the Virginia Women's Conference. The subtitle ran: "How To Raise Nonsexist Children."

2. The IWY Commission recommends that the United States Commission on Civil Rights conduct its planned study of "Sex Discrimination in Physical Education and Athletics" without delay, using this study to evaluate the effectiveness of title IX (Education Amendments of 1972) in eliminating sex discrimination in physical education and athletics generally in educational institutions. Furthermore, The IWY Commission recommends that the President and Executive Branch oppose any amendments which would weaken the protections against sex discrimination in education guaranteed by title IX.

Now, Mr. President, this recommendation would require forced sex-integration in every aspect of the educational system, including elementary, secondary, and college, public and private, academic and athletic, and school social functions, regardless of whether the students and parents involved want such sex-integration. These recommendations implicitly state that one should not have any right to attend a single-sex school or participate in any single-sex functions in connection with any school or college. Any amendment which would allow exemptions from the strict mandate against sex discrimination should be repealed or rejected. This would include amendments permitting girls' sororities and boys' fraternities, mother-daughter and father-son school events, and girls' or boys' glee clubs. Mr. President, would not such a state of affairs be tragic, indeed?

3. The IWY Commission supports the series of Supreme Court decisions guaranteeing reproductive freedom to women and condemns any interference, open or subtle, with a woman's right to control her reproduction. Furthermore, the Commission recommends that all State Governments bring their abortion laws into compliance with Supreme Court decisions.

First of all, Mr. President, is there not inherent in the above recommendation an element of lobbying? Let us recall that this would be lobbying with our tax moneys. If such a recommendation is adopted by all States, every woman is given the legal right to kill her preborn child at any time.

Moreover, the Commission's recommendation that "responsible sexuality, including family life and parenthood, be offered at all levels of elementary and secondary education"—coupled with the admonition that all such programs "must take into account changing sex roles and new lifestyles" and that "teachers must recognize and accept the many differences in contemporary family structure"—means that young school boys and girls will come to accept the killing of unborn babies as freely as tonsillectomies and appendectomies.

In my opinion, Mr. President, there is even a more serious implication from the recommendation. And that involves the inherent recognition of the acceptability of homosexual lifestyles.

Mr. President, I submit that these attitudes cannot be construed as being representative of the majority of American women.

4. The IWY Commission recommends the ratification of the equal rights amendment.

Mr. President, many American women have presented arguments against the ERA. Chief among their concerns are the following: First, draft-age girls would be subject to compulsory military combat duty in wartime; second, husbands would no longer be legally obligated to provide the main financial support of their wives and children; third, homosexuals would legally be able to obtain marriage licenses and teach in the schools; and fourth, the Federal Government would have final decision-making power over marriage, divorce. and child custody.

C. FUNDING OF THE NATIONAL COMMISSION

Mr. President, the biased research for and publication of this report was being conducted with operating cash which the IWY Commission was receiving in grants from other Federal agencies. A recent GAO investigation, January 13, 1977, instigated at the request of Representative OLIN TEAGUE of Texas revealed that for fiscal years 1975 and 1976 the IWY Commission received $299,860 in transferred funds and $298,974 in personnel detailed from other Federal agencies. According to this report, $245,000 of the transferred funds were provided without proper legal authority, and one of the staff assignments, costing $21,234, was improper.

With all these resources available to the National Commission and its tremendous efforts on behalf of the ERA, it must have come as quite a surprise when both New York and New Jersey referendums defeated ERA on November 4, 1975. The Commission scrambled to enable itself to function through the 1976 legislative battles on ERA. President Ford must surely have been unaware of the actual reality of the National Commission when he extended the year of IWY to June 30, 1976, through Executive Order 11889 issued on November 25, 1975.

III. INITIAL CONGRESSIONAL ACTION ON THE IWY—PL 94-167

It is against this dramatic backdrop, Mr. President, that the legislative drama produced by then Congresswoman Bella Abzug begins to unfold with the discussion of H.R. 9924 on December 10, 1975. Let us briefly review the specifics of Ms. Abzug's bill.

H.R. 9924 contained provisions, first, to continue the National Commission on IWY; second, to direct the Commission to convene a National Women's Conference to be preceded by State and local conferences; third, to establish a permanent committee of the Conference to follow up on Conference recommendations and hold a second conference in 1985; and fourth, to authorize $10 million for the above purposes.

House debate was intense. Opponents expressed their deep concern that the conferences would result in little else but lobbying for ERA and other issues which were opposed by their constituents.

Mr. HYDE pointed out that these conferences would simply duplicate work already in existence. Every State, he pointed out, has a Commission on the Status of Women which is active in "developing, isolating, delineating, and confronting the problems that face women."

Mr. HYDE reasoned that if Ms. Abzug was serious in her statement that "this is not a bill which projects or requires the conference to project a particular point of view" but that "women will be coming to this Conference who hold opposing viewpoints on all subjects, then he—Mr. HYDE—saw more merit in working with the previously mentioned State commissions than "going through the rather ritualistic and expensive charade of a conference where polarization is unquestionably going to occur."

Would not polarization indeed be the result—even in the most ideal circumstances of mutual respect for other viewpoints—of Ms. Abzug's stated intention that, and I quote:

> The significant thing about this National Conference is that it will afford an opportunity for every kind of woman, representing every viewpoint, in every State of this Nation to make a statement of her concern.
>
> The Conference will provide a forum for people of opposing views on these and many other issues. People who are concerned with women and their role will be welcome without regard to their views on any specific issues.

Mr. President, are we so naive or so fearful of being unjustly accused as anti-women that we could fail to reason that a National Commission controlled by representatives of the most militant of feminist organizations—a Commission which had already spent and would need to continue to expend thousands of dollars to publish the unequivocally feminist-activist report "To Form A More Perfect Union," a report which speaks disparagingly of groups who oppose the pro-ERA, pro-abortion, pro-increased Federal intervention in private lives viewpoints—are we so naive as to believe that a Commission which acted as the catalyst in uniting organizations supporting the ERA under the umbrella of ERAmerica—are we so naive as to believe that such a Commission would be capable of planning and conducting State and national conferences which would not be forums for feminism and which could, indeed, provide a "meaningful setting," in Ms. Abzug's own words, for "truly [examining] the questions addressing American women"?

Mr. President, even if we ignore the composition of the National Commission and its previous track record, a disturbing theme subtly runs throughout many

of the proponents' speeches. The phrase "women with common goals" appears not infrequently in the arguments for Federal funding of a National Women's Conference. Now, Mr. President, I am not saying that there is something wrong with women of common goals wanting to come together to build a sense of unity and to strengthen their fight to achieve equality and justice. What I am saying is that the Conference was touted as one dedicated to equal representation of women with all types of viewpoints and goals. Therefore, Mr. President, I see a disturbing contradiction in the proponents' arguments.

Mr. Albert was careful to say he realized that women are not monolithic human beings, but he continued what has in actuality characterized the purported "multi-philosophical atmosphere" dictated by Federal law at the primarily federally financed women's conference. I quote:

It is necessary that we permit women with common goals to meet locally, on the State level, and on the national level to try to point out the areas where they lack the same rights that belong to their brothers in their own society.

In this statement, Mr. President, I believe that Mr. Albert clearly asserted the monolithic viewpoint and set of goals which the women's conferences were presumed to represent.

Once again, Mr. President, let me reaffirm my belief that various women's groups should be allowed to assemble and promulgate their own ideological identity, but it should not be done at the taxpayers' expense and espousing to represent all American women. As Mr. STEIGER himself said:

Women are not monolithic human beings.

But perhaps the most contradictory of all defenses given for a Federally funded series of monolithic women's conferences is that expressed by Mrs. Mink:

By keying the themes of International Women's Year and the Bicentennial, we will draw a broad cross-section of all women to attend each of the 50 state conferences. . . . We can effectively combine the goal of the IWY's "action" plan and the theme of American women, past and present. . . .

Such a statement, Mr. President, is predicated upon the acceptability of the U.N. World Plan of Action—a plan endorsed by an organization which increasingly ignores all semblance of equality and justice and rarely speaks the desires of the freedom-loving American public.

Furthermore, the philosophies of this Plan of Action and of that behind the Bicentennial celebration stand in diametric opposition to one another. The idea commemorated by the Bicentennial was independence, limited government, personal freedom; the idea espoused by the IWY is subservience to increased Federal regulation, world government, militant radicals, and a value system in which there are no absolutes. Therefore, Mr. President, a conference which truly sought to combine the themes of the IWY and the Bicentennial would be doomed to failure from the outstart. One or the other would triumph.

Mr. President, it saddens me to state that, indeed, strictly monolithic planning has assured the success of the IWY ideals. H.R. 9924 passed the House with 252 to 162 with 1 answering "present" and 19 not voting. It was amended to provide for a termination date for the Commission on March 31, 1978; to reduce the authorized funds from $10 million to $5 million; and to prohibit any authorized funds from being used for lobying activities. On December 23, 1975, Public Law 94–167 went into effect.

IV. LAWSUIT FILED AGAINST IWY COMMISSION

On April 9, 1976, a lawsuit was filed in Federal District Court in Alton, Ill., against the National IWY Commission, charging that it was violating the United States Constitution and the Federal Advisory Committee Act of 1972. Several of the complaints were as follows:

Count 6: The United States Constitution does not permit the Executive Department of the Federal Government to have any part in the proposing or ratifying of amendments to the United States Constitution. It is a violation of Article V of the Constitution for the Executive Department or for a creation thereof, such as the Defendant National Commission to work for passage of the ERA to the United States Constitution Section 9 of said Public Law 94–167 also forbids using funds authorized to it "for lobbying activities."

Count 7: Members of the Defendant National Commission and employees thereof, such as Catherine East, have appeared frequently on television, at State Legislative hearings and in public speeches across the country . . . for the purpose of urging ratification of the Equal Rights Amendment. In addition, the Defendant National Commission has adopted the "Statement of the Reproduction Freedom Committee" supporting abortion-on-demand, Federal financing of abortion facilities for all women, and opposition to any constitutional amendment that would limit abortion. Members of the Defendant are publicly supporting the Federal financing of abortion facilities for all women. Said acts of the defendant constitute "lobbying activities" forbidden by said Section 9 of Public Law 94–167.

Mr. President, the suit is still under litigation.

V. IWY RECEIVES $5 MILLION FROM CONGRESS

On April 13, 1976, Mr. President, debate began in the House on H.R. 13172, an appropriations bill containing the $5 million authorized to the National Commission by Public Law 94–167. Of great concern was the very issue of lobbying on the part of the IWY. Despite the activities of the IWY on behalf of the ERA, abortion and other issues, there were still people who actually believed or wished to believe that a National Women's Conference under the guidance of the National IWY Commission could be called for and conducted "totally separate from the ERA, from abortion, from busing, from any other controversy" that Congress might wish to consider (Mrs. HECKLER). Opponents, realizing that the money would inevitably be appropriated, amended the bill to stipulate "that none of the funds shall be used for the purpose of directly or indirectly influencing the passage or defeat of any piece of legislation before any legislative body including the ratification of any Constitutional Amendment." Mr. President, the specificity of such wording indicates the great concern and intent of the Members of the House.

Debate in the Senate on May 11, 1976, was also intense. Despite the past history of the Commission as a "controversial, special interest group engaged in political activity" which "may well be operating outside of the law"—as I noted in my remarks on the issue—H.R. 13172 was approved. The final version of the bill, worked out in conference, resulted in an apparent weakening of the antilobbying clause. The wording of Public Law 94–303 appropriates $5 million provided that "none of the funds appropriated shall be used for lobbying activities."

During House discussion on the conference report, Mr. BAUMAN, in trying to clarify the term "lobbying activities," received assurances from Mr. MAHON that the new wording "should limit" lobbying activities before Federal and State bodies. And in words which almost give the impression of a wishful hope, Mr. STEED responded:

". . . it is my opinion that it does prohibit any use of this money for lobbying. . . . We have been assured by the chairman and others involved in the work of this Commission that there will be no abuses of the use of this money in the lobbying field. Outside of having their assurance and their word for it, I do not know of anything else at this stage that we can depend on, other than the language of the bill, and that is the way they interpret it."

Public Law 94–303 went into effect June 1, 1976.

VI. PREPARATIONS FOR THE WOMEN'S CONFERENCES

It is time, Mr. President, now that the reassurances of proponents are legislative history, to begin to examine on its own merits the concept of the National Women's Conference as it unfolds at the various State conferences. Apart from its tangible history, the National Women's Conference remains an idea, an idea which perhaps the majority of American women would support if it were carried out in the spirit of true freedom and equality.

But let us return once again to the activities of the National Commission as it appointed State coordinating committees to head up the planning in the individual States. A pattern began to develop and continued into the preparation of workshop materials and debates—a pattern which clearly conflicts with Federal Advisory Committee Act provisions calling for balanced representation and safeguards against inappropriate influence exercised by any special interest. The epitome of such disregard for the principles of a democratic society is evidenced by the sworn testimony of Mrs. Catherine East before Judge Robert Morgan in Federal district court in Illinois. Mrs. East admitted that the National Organization for Women had been invited to participate in the Illinois Women's Conference, but that groups opposing ERA had been excluded "because they are not concerned with women's issues."

On March 29, 1977, President Jimmy Carter specifically directed the National Commission on International Women's Year to organize and convene a National

Women's Conference and increased the Commission to 45 members, amended to 42 members by means of Executive Order 11980. Appointed by President Carter, the Commission presently includes some of the most active and, indeed, even militant feminists:

APPOINTEES

1. Bella Abzug—Chairperson
2. Gloria Steinem—editor of Ms. magazine
3. Jean O'Leary—co-executive director of the National Gay Task Force
4. Eleanor Smeal—President of N.O.W.
5. Audrey Rowe Colom—President of the National Women's Political Caucus
6. Martha Griffiths—former Congresswoman and principal backer of ERA
7. Elizabeth Athanasakos—immediate past chair of the IWY National Commission
8. Liz Carpenter—co-chair of ERAmerica.
9. Seymour Chassler—editor of Redbook and originator of a project designed to publish pro-ERA articles in 35 magazines.
10. Ruth Clusen—President of the League of Women Voters.
11. Mary Anne Krupsak—Lieutenant Governor of New York and leader of ERA fight in 1975.

The following organizations are represented, all of which have come out in favor of ERA:

ORGANIZATIONS

1. National Women's Political Caucus.
2. American Civil Liberties Union.
3. ERAmerica.
4. National League of Women Voters.
5. National Federation of Business and Professional Women's Clubs.
6. National Organization for Women.
7. Citizens' Advisory Council on the Status of Women.
8. National Gay Task Force.
9. Church Women United.
10. American Association of University Women.
11. Women's Action Alliance.
12. Coalition of Labor Union Women.
13. Common Cause.

Of the 42 Commission members from the private sector and the four Members of Congress—Senators BAYH and PERCY, Representatives HECKLER and HOLTZMAN—only one member opposes ERA. Not one member belongs to STOP ERA, the Eagle Forum, or Right to Life—groups which represent the viewpoints of millions of American women. Is such a situation what "justice for American women" is all about?

"To Form A More Perfect Union" has already delineated the issues and chosen sides. If the national Commission is allowed to continue its plans, the recommendations from this report and additional ones from other militant groups will be passed off as the views of the majority of American women.

The question, "How representative of all women are these recommendations?" must be answered quite skeptically, Mr. President, in view of the evidence already presented. In view of the State-by-State account which follows and in view of the implementation by the highly organized feminist minority of the monitoring and mobile operation partnership plan, MMOPP, the answer to the above question becomes even more obvious.

VII. THE STATE WOMEN'S CONFERENCES: ARE THEY OPEN FORUMS?

Turning now to the evidence provided at the various State women's conferences, more pieces of the emerging puzzle begin to take shape. Reference has already been made to the situation in North Carolina. Therefore, permit me, Mr. President, to give highlights from other parts of the country.

A. CALIFORNIA

Mr. President, the California IWY Coordinating Committee received $100,000 in Federal funds for the convening of a California Women's Conference in Los Angeles on June 16–19. The following irregularities and complaints have been filed by women who attended that conference and characterized it as being controlled and conducted by militant radical groups "to promote the ratification of ERA, Federal-financed abortion on demand, Federal child development and baby-sitting services for all children, and other women's lib and gay-lesbian legislative and social goals." Mr. President, the facts are profoundly disturbing.

First. The timing of the meeting was quite inconvenient for many women in California. It was held on the weekend of school graduations and Father's Day. This kept most family oriented women from attending or caused great hardship and sacrifice for those women who chose to attend. In addition, the plenary session to vote on resolutions was held on Father's Day.

Second. Very little publicity was given to the meeting. Ads or articles in newspapers announcing the event were frequently not carried until 2 weeks before the event. Many announcements appeared after the deadline for mailing in applications to become a delegate to the National IWY Conference in Houston.

Third. Prominent church women's groups were not invited to attend nor to aid in the planning of the meeting.

Fourth. There was personal harassment and intimidation to those who did not agree with the feminist viewpoint. A literature table presenting pro-life material was stormed by a large group of lesbians.

Fifth. Registration packets of information were often incomplete. Omissions included the official slate of delegates to Houston and the convention rules.

Sixth. Workshop locations were moved without notice and confusing notices were placed on doors as to the new location of the workshop.

Seventh. In the resolution voting session on Sunday morning, those having grievances were asked by the Chair to go to another part of the building to air their complaints to a committee member. The voting procedure nevertheless continued. When points of order were presented to the Chair concerning this matter, they were ruled out of order.

Eighth. Workshops were changed, eliminated or taken over by an easily identified element which then proceeded to establish its own purposes and select its own moderator. For example, the workshop "health care for all" became the "self-help clinic." In order to vote on proposed resolutions, one had to be in attendance during the workshop discussion. The women thereby were subjected to lesbian films.

Ninth. Floor nominations for delegates to the national conference conducted at the Friday A.M. plenary session were abruptly closed after 36 nominations. After much protest, the nominations were held open for 2 more minutes. At the end of that time, floor mikes were unplugged.

Tenth. During the workshops, the MMOPP plan of stacking workshops was much in evidence. Women were directed by means of monitors and beepers as to the workshops where they were needed for a majority.

Eleventh. Voting boxes were left unattended. The marking of the ballot was done any place by any means.

Twelfth. When the voting results were announced, all 96 delegates to Houston are women who were endorsed by NOW and other feminist groups.

Thirteenth. In a workshop called "Combining Feminist Services with Politics," organized by the Center for Women's Studies and Services, literature was used which contained the following summation:

> Those of us who don't buy the current government know we can't overthrow it tomorrow. But we can begin to undermine it today. As women revolutionaries, this is part of our long haul. Why not use the system to our best advantage? Note the word "use", not "join"!

Mr. President, is there any need for comment?

B. GEORGIA

Mr. President, in Georgia, in preparation for the conference held May 6–7 in Atlanta, only 1 woman opposing ERA was appointed to the 37 member coordinating committee. Indeed, it is quite revealing that one pro-ERA committee member—after witnessing the workings of the committee—made the following remarks and remained "out of town" during the conference:

> The overall thrust of the [IWY] recommendations is to increase government (particularly federal government) involvement in all aspects of American life, to increase uniformity throughout the fifty States and the territories, to increase expenditure of public money, to increase dependency upon public institutions . . . (statment by Eliza Faschall)

In addition to extensive complaints filed by the IWY Citizens' Review Committee with regard to registration and voting irregularities, the following comments and questions demand careful consideration:

First. Keynote speaker was supposed to be "noncontroversial, one who has not made her views on ERA known publicly." This should not be Bella Abzug.

Second. Requests for second keynote speaker presenting opposing viewpoint were repeatedly made and repeatedly denied.

Third. Selection of panelists violated Federal Advisory Committee Act. Of the 100 stated workshops, only 5 presented panelists with opposing views.

Fourth. Blueprint for IWY meetings, "To Form a More Perfect Union" violates Federal Advisory Committee Act. Only one viewpoint is presented.

Fifth. Several times members of the news media were upbraided for covering the press conferences held by opponents of IWY. This is a direct attempt to sup-

press the news and the people's right to know.

Mr. President, can 300–600 people voting for the whole State of Georgia be considered as representative of all Georgia women?

C. IDAHO

The Idaho IWY Coordinating Committee received $25,000 in Federal funds for the Idaho Women's Conference held May 20–22, 1977, in Boise. Mr. President, a dissenting report was submitted by Idaho Stop ERA, Mrs. Susan Hill—chairman, and contained the following points:

First. Idaho Stop ERA, a statewide organization responsible for rescinding ERA in Idaho, was excluded from direct IWY communication and/or invitation to the conference. Other organizations were extended this courtesy as well as direct mailings to their membership.

Second. In order to provide an opportunity for those unable to attend to express their position, absentee ballots were distributed throughout the State by Idaho Stop ERA. These ballots were identical copies of the National IWY resolution questions. Duly qualified Idaho women cast 1,539 absentee ballots, individually signed and complete with address. Said absentee ballots were rejected as far as power to affect the vote on the basis of State rule No. 2–3 which requires that all voting participants be registered at the meeting. We were not allowed to register these women without paying the $5 per person charge even though these women could not be in attendance and wished only to voice their opinions via absentee ballots. This rule and action are definitely discriminatory toward women who were unable to attend, but who desired to express their opinion.

Third. Idaho women were led to believe that the IWY Conference was an effort to obtain grass roots input regarding issues affecting Idaho women. Participants attending the conference found instead highly structured workshops leading to predetermined conclusions supporting the National IWY platform.

Fourth. Further participants were asked to vote on summaries of recommendations already drafted in Washington. The predetermined recommendations clearly show that IWY is not a "grass roots action," but a nationally controlled organization operating on our tax money. Rejection of the 1,539 absentee ballots which were individually signed and addressed, is further evidence that this conference was not concerned with the viewpoints of the majority of Idaho women.

D. ILLINOIS

The Illinois Women's Conference, held June 10–12, at Normal, Ill., received $100,000 in Federal funds. Of the 59-member coordinating committee, Mr. President, only one woman opposed ERA. Registration information was freely distributed only to certain organizations. The IWY Citizens' Review Committee was forced to spend approximately $5,000 to spread registration information to women of the more traditional viewpoint.

I call to the attention of my worthy colleagues a minority report filed by Mrs. Rosemary Thomson, chairman of the IWY Citizens' Review Committee. Her comments are, in my opinion, most disturbing:

1. Times and methods for registration at the Conference fluctuated at the whim of the Illinois IWY Coordinating Committee both before and during the Conference. There was no proof of state residency required at either registration or delegate elections.

2. Workshops were stacked with 49 panelists and 16 moderators representing one viewpoint, to 1 token panelist representing the opposition. Resolutions introduced by IWY officials corresponded to those recommended by the National IWY Commission in their policy manual ". . . To Form a More Perfect Union." Rules for participation and voting established by the conference were repeatedly violated including a directive by a state legislator to bring pro-ERA delegates from another workshop into the ERA meeting after the entry deadline for voting had passed, thus assuring "enthusiastic ratification of ERA" by a slim majority in spite of reported errors in computing votes.

3. The Illinois Conference was used to indoctrinate women with the merits of the Equal Rights Amendment. Keynote speakers Bella Abzug, National IWY Chairperson; Senator Charles Percy, and Eileen M. Schaeffer, International spokesperson, all spoke in favor of ratification of ERA. No opposing viewpoint was permitted. In effect, the Federal Government, by appropriating funds, became the lobbyist for "radical, special interest," group legislation.

4. The right to express various viewpoints or to seek parliamentary information was forcibly violated by tight control over floor microphones. Tactics by IWY facilitators included unplugging, covering by hand and, at one point, breaking the microphone in half to prevent speakers from being heard. The chair refused to allow the one opposing resolution out of 130 to be voted on.

5. Finally, participants were asked to endorse a package of resolutions and were denied the opportunity to hear them read prior to the vote. Resolutions included requests for legislation to provide abortion rights, universal Federal child care, military disarmament, homosexual rights, and ratification of ERA—to name just a few.

At the end of the conference, Mr. President, 530 women walked out when it became apparent to them that their consitutional right to speak out was being repeatedly denied.

During the conference, literature was available from groups such as Common Cause, the Religious Coalition for Abortion Rights, Illinois National Organization for Women, the Illinois Women's Political Caucus, Day Care Crisis Council, Socialist Workers Party, and the Young Socialist Alliance. Furthermore, Mr. President, a film produced by the Socialist Party and shown at the Conference presented, naturally, its own special solutions to the problems of society, especially with regard to feminist issues. The film emphasized revolutionary tactics and spirit and sought to discredit free enterprise and democracy.

Other literature passed out or sold by nonprofit organizations and commercial businesses — with IWY approval — included:

"My Childbirth Coloring Book," "Growing Up Gay," "High School Women's Liberation"—with chapters on Capitalism against Socialism and the Gay Movement, "Our Bodies, Ourselves"—a rather explicit sex manual for women alone, "Demand for Day Care," emphasizing day care's opportunities to revolutionize society.

Fliers were also distributed encouraging the picketing of legislators on Father's Day to protest the ERA defeat in the Illinois State Legislature.

Finally, Mr. President, the resolutions passed included the following:

First. The military budget should be reduced; saved money should be transferred to further women's equality and people's welfare and end the arms race.

Second. The immediate ratification of the ERA is urged.

Third. Federal and State governments are to prohibit sexual—preference—discrimination in employment, housing, public accommodations, and education.

Mr. President, can we possibly consider such a conference to have been representative of a wide spectrum of philosophical viewpoints?

E. MICHIGAN

On June 10–11, 1977, the Michigan Women's Conference was held in Lansing and was funded with $99,327 of Federal tax moneys. In addition to complaints similar to other States as regard the lack of balanced representation on planning committees—only 1 woman representing the Stop ERA movement was named to the 29-member coordinating committee—and the lack of adequate publicity preceding the conference, many irregularities, Mr. President, were cited concerning the nomination of delegates to the National Women's Conference.

Mrs. Bernice Zilly, a member of the IWY planning committee and against the ERA, had received assurances that 1 hour would be granted to nominate women from the anti-ERA forces in addition to the time necessary to present the official slate and receive nominations from feminist groups. At the conference itself, however, only 1 hour total was designated to present all nominees.

Now, Mr. President, I have been told that advance notice to members of the Unity Caucus—an organization of 19 feminist groups—that all those wishing to make floor nominations would need numbers indicating speaking order, enabled these women to control the mikes for 50 minutes. Only 10 minutes, Mr. President, were left for nominating candidates with other than a feminist viewpoint. A motion to extend the nominations for an extra 15 minutes fell less than 20 votes short of the necessary two-thirds majority.

F. NEW YORK

Turning now to New York, Mr. President, we find that $100,000 of Federal funds went to the New York IWY coordinating committee for the purpose of planning the Women's Conference held in Albany on July 8–10, 1977. Attempts made by anti-ERA/pro-life groups to get information were frustrated at every turn by those in control of the meeting.

Mary Tracy, in a press release, related vividly her efforts to locate the IWY headquarters and secure registration information for her groups. Mr. President, her difficulties began as she learned that the New York office of the IWY had an

unlisted telephone number. When she made a special trip to New York, she found no listing for the IWY office on the wall directory in the building for which she had an address. Finally she learned that the IWY did share an office in the building with the National Organization for Women.

After talking with an IWY staffer, Mrs. Tracy requested applications for women in her groups and another meeting with the staffer to share the concerns of the anti-ERA/pro-life women with regard to women's issues. A second meeting was arranged, and applications were promised as soon as they were available.

On May 2, 1977, Mr. President, Mrs. Tracy and three other women made another trip to New York to meet with the IWY staff member. They were told upon arrival that they had made a mistake. The staff member was not there to see them. After waiting for an hour, the women were just about to leave when they ran into the staffer at the elevator. She belatedly agreed to meet with them.

During that meeting, Mr. President, the request for applications was repeated. Once again, the same promise to send them when ready, was given. As of the date of the press release—June 12—no applications had been received. And yet, Mr. President, just prior to the press release, Mrs. Tracy learned through a woman in charge of the Albany IWY office that 75,000 applications had already been mailed.

Furthermore, during that May 2 meeting, Mrs. Tracy was told that only those women filing a statement of destitution would be awarded scholarships to attend the meeting. Mrs. Tracy quickly noted that such a condition eliminated many homemakers who were not destitute, but on whom it would be a hardship to take household funds to pay expenses already funded by their tax money. Mrs. Tracy's conclusion:

> Members of Right of Life and Eagle Forum are being systematically excluded from the Women's Meeting in Albany, July 8–10, 1977, even if they or some of them are ready, willing and able to pay some of their expenses.

Mr. President, let us all make special note of the reply given to Mrs. Tracy's protest by the woman in charge of inviting outstanding women to the meeting. She shouted: "Get your own funds and have your own conference."

At the Albany meeting itself, Mr. President, some of the irregularities reported include:

First. The special busing of pro-ERA women from New York City to Albany for the express purpose of voting—in spite of the fact that they arrived only for Sunday and registration for voting purposes had officially ended on Saturday at 3:15 p.m.

Second. The withholding of workshop information—The locations of the 101 workshops were not listed in the program. Women with walkie-talkies were seen directing selected groups of women to the various workshops.

Third. Irregular and slow voting procedures—Only 30 voting machines had been ordered to handle the 8,000 registered voters. The ballot for delegates to Houston had 200 names listed randomly. Falsified "staff" badges were used to get special groups of women to the front of the lines, causing long waits for everyone else. After 5 hours, only 1,200 participants had voted.

Fourth. Deliberate attempt to ram resolutions through without due consideration at the Sunday plenary session—Only 4,000 copies of the resolutions had been printed; therefore, only selected women received copies. The resolutions were passed as a package and not individually. A motion to take a nose count on that ruling was ruled out of order.

Mr. President, the list could go on ad infinitum, but I believe that these items begin to present a vivid picture of the situation at Albany.

G. OHIO

A Federal grant of $100,000 was given to the Ohio IWY Coordinating Committee to help finance the Ohio Women's Conference held in Columbus on June 11–12, 1977. Of the Ohio women appointed to the coordinating committee by the National Commission, Mr. President, not one woman is publicly identified with a prolife or anti-ERA group. At a later date, however, one woman was chosen as a liaison between the philosophical groups and was eventually appointed as cochairman of the Outreach Committee.

Realizing that they had been excluded from the principal planning group, Mr. President, I am told that more than 20 prolife/anti-ERA women submitted their names to be considered as candidates on the official slate of delegates to the Houston National Women's Conference. When the official slate was announced, 52 nominees and 5 alternates represented the pro-ERA viewpoint and only 4 nominees represented the con-ERA viewpoint. Furthermore, all members of the IWY Coordinating Committee were named to the official slate.

During the conference itself, Mr. President, reports seem to indicate that the 44 workshops were carefully controlled so that profamily/anti-ERA viewpoints were excluded. If minority resolutions did gain workshop approval, they were never presented for a vote at the plenary session.

In addition, Mr. President, the following irregularities have been noted in the minority report filed by the Ohio IWY Citizens' Review Committee:

First. The profamily literature tables were placed so that their position was not an advantageous one. Many profamily participants never found the literature tables, even though they knew that they existed.

Second. Although 221 candidates were nominated, 56 being profamily nominees, when the ballots were distributed, only the official slate was presented in alphabetical order and printed on one side. The remaining candidates were listed according to nomination and their names appeared on both sides of the ballot.

Third. To accommodate 2,278 registered voters, only 12 voting booths were provided while the rest of the voters gathered around tables and exchanged names while voting. This is certainly a far cry from the secret ballot that should be preciously guarded.

Fourth. Cardboard boxes were used as ballot boxes, but women were assured that the boxes would be sealed and that ballot-tampering would be impossible. However, during voting there was no evidence of a seal and although some ballots were placed into the box through the slot, some ballots were placed in the box by lifting the top.

Fifth. In addition, ballots were not numbered; voters were not asked to sign in; and to date it has not been announced concerning the number of votes cast, the number needed for election, and the number of votes that each candidate received.

Sixth. In a conversation and letter on June 11, the IWY Citizens' Review Committee chairman was denied the request to have observers when the votes were tabulated. According to several legal opinions, this request cannot be denied a candidate, and the letter, requesting an immediate reply to this information still remains unanswered.

Seventh. At 4:30 p.m., June 12—the delegates were to be announced on June 13—one of the unsuccessful candidates entered a motion that the delegates to the National Women's Conference be instructed delegates. This motion failed.

The above motion, Mr. President, is perhaps explained by the fact that rumors had been circulating all day that the profamily delegates had won overwhelmingly. And indeed, that was true. Profamily candidates had won 45 out of the 56 delegates and all 5 alternates, indicating that the feminist concept of profamily as being minority thinking is simply not true. With a minimum of expenditure of private funds, Mr. President—approximately $1,000—the profamily women accomplished their objectives against the feminists and their $100,000 of taxpayers' money.

H. UTAH

The Utah IWY Coordinating Committee received $25,000 in Federal funds for the women's conference held June 24–25, 1977, in Salt Lake City. The following complaints have been registered by Utah women:

First. Unfair representation on the official slate for delegates to the National Women's Conference—38 pro-ERA and only 4 against.

Second. Secret registrations—IWY Committee members were allowed to register on the Thursday preceding the official opening of registration on Friday.

Third. Inadequate time allowed for floor nominations—with several thousand women expected, only 28 minutes were allotted for floor nominations to delegates for the Houston meeting.

Fourth. Lack of publicity—at least one newspaper received its first bit of "advance" publicity from the IWY on the final day of the conference.

Mr. President, if it had not been for the last minute efforts of Mormon women, Utah might have had 14 delegates going to Houston claiming to represent Utah women and yet voting for the ERA, abortion, homosexual rights, and many other items which are quite foreign to the real majority of Utah women. With an unexpected crowd of

13,000, the voice of the Utah legitimate majority was ultimately victorious. The 14 delegates elected represent the real majority opinion.

I. VIRGINIA

Mr. President, my office has received the following information with regard to the Virginia Women's Conference held in Richmond on June 10–12, 1977. The Virginia IWY Coordinating Committee received $61,061 in Federal funds to help plan and conduct the conference. Of the 39 members on the coordinating committee, there is not one who belongs to Stop ERA, Eagle Forum, or Right to Life—groups which represent many Virginia women and their concerns. However, Mr. President, the National Organization for Women, the Virginia Women's Political Caucus, the Virginia Equal Rights Amendment Ratification Council, the Woman Activist, Inc., the League of Women Voters, the American Civil Liberties Union, Catholic Women for ERA, the Virginia Commission on the Status of Women, Virginia ERA Central, and the National Black Feminist Organization are represented.

Even prior to the announcement of the 39 members, reports indicate that conservative forces were systematically excluded from the planning processes. The chairman of Virginia Stop ERA was not originally invited to attend a planning meeting held July 24, 1976. When she heard of the meeting, she immediately requested an invitation and received one on July 22, 1976. Had she not been so outspoken, only one point of view would have been represented at such an important meeting. Furthermore, her offer to serve on any committee was rejected.

Mr. President, at a February 19, 1977, meeting in Charlottesville, Va., the IWY Committee proposed a preliminary list of Virginia IWY State Coordinators. Once again, it appears that many women's groups were excluded from this aspect of the planning. On that preliminary list of 30 women, not one woman represented Stop ERA and pro-life women.

On May 29, 1977, the charade of equality continued. The chairman of Stop ERA was informed by the nominating committee that "in its efforts to maintain a balanced slate of nominees to serve as candidates for Delegate to the National Meeting in Houston, Tex.", it was necessary to exclude her name. Letter to Alyse O'Neill, chairman of Stop ERA, from Martha D. Boyle, vice chair, nominating committee, May 29, 1977.

At the conference itself, Mr. President, workshop coordinators represented the feminist viewpoint:

First, Muriel Smith—ERA workshop—member of the Virginia ERA Ratification Council.

Second. Beth Marschak—Sexual preferences in lifestyles workshop—member of the Lesbian Caucus.

Third. Nora Squyres—Women in the world-world plan of action workshop—member of the National Women's Political Caucus.

A workshop on motherhood had as its topic of discussion—"Raising nonsexist children." If it had not been for the inquiries of the chairman of the Virginia Farm Bureau's Women's Committee, the workshop on rural women would have been conducted without a representative for farm women. Furthermore, Mr. President, there was a workshop on witchcraft. This would appear to be in conflict with the rules and regulations issued March 18, 1977—Federal Register, vol. 42, No. 59. Paragraph 1903.3(d) under the "Responsibility for Agenda for State Meeting" states:

> Neither the Coordinating Committee nor the State Meeting shall include as a topic selected for the meeting subjects dealing primarily with religion, or religious institutions, organizations or activities, or women's roles in any of them.

Finally, Mr. President, according to newspaper accounts, resolutions on abortion and sexual preference were not voted on by conference participants until 10:30 p.m. on June 11, 1977. At that time, only 200 of the approximately 1,200 voting participants were present. Can the results of such an election, Mr. President, be called representative of the women attending the conference and also representative of the majority of Virginia women?

J. WISCONSIN

For the Wisconsin Women's Year Meeting held June 3–5, 1977, at Madison, the Wisconsin Coordinating Committee received $57,805 in Federal funds. According to reports, the 28-member coordinating committee, Mr. President, was dominated by women from the Governor's Commission on the Status of Women, the National Organization for Women, and the League of Women Voters.

Two members of the resolutions committee were original founders of NOW. The member in charge of workshop and resource people is the paid executive secretary of the Status of Women. In addition, the coordinating committee used the office of the Status of Women for planning the conference.

Mr. President, I submit to you the following additional complaints which have been filed:

COMPLAINTS

1. Registration was very lax. No identification was required in order to pick up packets for preregistered participants.

2. One method of providing scholarships to needy women was to fill 5 buses from Milwaukee. The scholarship consisted of the registration fee, lunch, and the bus trip. When the voting came up, there were therefore 220 additional people available at the planning committee's command.

3. The displays of books by the lesbians and the Socialist feminists were profoundly disturbing.

4. The officials deadline to submit one's papers to serve as a delegate to Houston was May 23, 1977. In spite of having adhered to the deadline, women whose names did not appear on the official list of delegates selected by the Nominating Committee of the State Coordinating Committee were required to resubmit their nomination papers on Saturday, June 4.

5. After posting, the nominating papers were tampered with. Certain organizational affiliations had been underlined in red. On others, names of the nominees had been circled.

6. At the Saturday, June 4, plenary session, N.O.W. facilitators controlled the mikes. Although questions were still pending on the floor, the meeting was adjourned without a formal motion.

7. Both of the luncheon speakers on June 4 were pro-ERA.

8. Voting procedures on resolutions at the workshops varied from workshop to workshop, and no official parliamentarians were present at the workshops.

9. The distribution of ballots for electing the delegates to the National Conference was uncontrolled. Any number of ballots could be taken by one person. The ballots contained errors in name spelling, the duplication of one name, and one column that had one more name than lines available. Voting was thereby made more difficult.

10. The ink stamp mark on one's hand to indicate that one had voted could easily be wiped off. This was demonstrated to some of the voting clerks, but nothing was done.

11. At the Sunday, June 5, plenary session there were only 300 participants remaining to vote on the resolutions. This cannot be considered as a representative vote for the women of Wisconsin.

12. As an illustration of the one-sided nature of the conference, consider the following: a Chicago Sun Times reporter thought that the conference had been funded by N.O.W.

Mr. President, in Massachusetts—whose meeting has yet to be held—$65,304 Federal moneys have been given to the coordinating committee. Complaints are already being received concerning the committee's constant changes of plans and times, resulting in a difficulty for pro-life, anti-ERA women receiving correct information promptly.

From New Jersey, receiving $72,434 for the conference held June 17–19 at Princeton University—come articles criticizing stacked workshop panels and the fact that resolutions approved in workshops—particularly a human life amendment—were never brought before the general assembly for a vote.

Mr. President, the accounts could go on and on to encompass many more States and many more complaints, including noted absences of the American flag and other patriotic signs of respect for our country. The freedom which allowed certain women's groups to be so vocal has not been shared with all women. Permit me to give one final poignant illustration of this fact. Rosemary Thomson, chairman of the IWY Citizens' Review Committee, received a call one day before the Nebraska Women's Conference from the Chairman of the IWY coordinating committee in that State. The message was short and clear: Women who do not share IWY goals should stay away and not disrupt her meeting by attempting to give their viewpoints.

Mr. President, it is Congress who financed these meetings with $5 million in Federal tax moneys collected from the broadest spectrum of people. And it is Congress, Mr. President, which must now act to halt the further funding of such clearly undemocratic and, even in some instances, anti-American conferences.

VIII. SUMMARY: AN ANALYSIS OF THE INTERNATIONAL WOMEN'S YEAR IN TERMS OF ITS OWN GOALS

In closing, Mr. President, it is perhaps not inappropriate to take a look at the

stated goals of such women's conferences contained in Public Law 94–167. Many of these goals call for an assessment of some aspect of the American woman's life and activities. The evidence presented in this report shows that these assessments are coming from an elitist group of appointed women. Therefore, let us assess this very group in terms of their own mandated goals.

A. Section 3(b)(3) "The Conference shall assess the role of women in economic, social, cultural, and political development."

Mr. President, permit me to address myself first to the Commission's economic understanding and fiscal responsibility. The American public has been taxed without representation and is the victim of a lack of fiscal integrity. Without being representative of all women, the IWY has received money from all taxpayers to promote so-called feminist goals which are offensive to many women and not a few men who are by no means "antiwomen." Money prohibited for use in lobbying purposes has been used for those very purposes. In addition, funds were received and expended without the proper legal authorization.

Mr. President, let us examine the issue of social justice. Can it be termed social justice when a group of feminists exclude their fellow women, who happen to have differing viewpoints, and ram through resolutions which do not represent the majority of women?

Consider now the Commission's political tactics. The Commission is attempting to play politics by means of a tactic—the boycott of the anti-ERA States—which could prove detrimental to many women and citizens of those States. Furthermore, the Commission's desire to set up a quota system for women in all areas of this country's life would result only in reverse discrimination and demonstrate that history has been foolishly ignored; that is, the failure of the quota system in desegregation efforts. Such a system often disregards qualification, and in this specific case, would disregard the very real needs of the male supporter of a family.

B. Section 3(B)(4) "The Conference shall assess the participation of women in efforts aimed at the development of friendly relations and cooperation among nations and to the strengthening of world peace."

Mr. President, let us examine these conferences in light of the above goal. Unfortunately, the Commission's idea of peace is a peace that must follow the birth of a new society and new international economic order created in part by women functioning as a "powerful revolutionary social force"—the World Plan of Action. From the evidence, Mr. President, must we not interpret the IWY's concept of "friendly relations" as applying only to like-minded peoples and nations and not to those who might oppose a new international economic order or the type of society advocated by the IWY?

C. Section 3(B)(5) "The Conference shall identify the barriers that prevent women from participating fully and equally in all aspects of national life, and develop recommendations for means by which such barriers can be removed."

Finally, Mr. President, I ask that we all turn a discerning eye upon the above goal and the resolutions passed at these conferences. I submit that the Commission has identified the following alleged barriers: Antiabortion laws, national defense, private enterprise, community morality standards with regard to homosexuality, the traditional roles of man and woman, and even a person's sex itself. In the media guidelines proposed by the Commission, there is a very real desire to assert that no distinction exists between man and woman. The Commission desires to eliminate references in the media to a person's sex, sexual preference, age, appearance, political affiliation, and religion. Having eliminated these so-called barriers, the Commission has stripped an individual down to the essence of his humanity—his soul. I fear, Mr. President, that the soul of a man or woman is not recognizable to the philosophy which permeates the International Women's Year movement.

I thank the Chair. If I have time remaining, I yield it back.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. HELMS. Mr. President, the distinguished minority leader, I believe, has 10 minutes remaining.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous agreement, there is now to be a period for the transaction of routine morning business, with statements therein limited to 10 minutes.

The Senator from Pennsylvania is recognized.

Mr. HEINZ. I thank the Chair.

THE JOHNSTOWN FLOOD

Mr. HEINZ. Mr. President, I want to take a few minutes to make a report to this body on the Johnstown flood. I announced yesterday, around noon, that I was going to Johnstown and that I would survey the situation. I feel it is my responsibility to report to this body the findings and actions that have been taken by myself, the Governor of our State, and other very concerned and interested parties.

I arrived in Johnstown at close to 2:30 yesterday. I immediately met with the State and local officials—Governor Shapp of our State; the chairman of the County Commission of Cambria County, Mr. Ted Metzger; the mayor of Johnstown, Mr. Herb Phuhl; and a number of other legislators—State senators, and people from the surrounding seven counties that were also affected.

They were affected, as I think has been made clear by newspaper reports, by a storm of extraordinary virulence, torrential rains extending over an 8- or 9-hour period of at least an inch an hour. The result was tremendously powerful flash flooding.

Not only did some of the major waterways, such as the Conemaugh River at downtown Johnstown, overflow its banks and thereby flood Johnstown with, reportedly, up to 9 or 10 feet of water, rivaling the tragic experiences of the 1936 and 1889 floods, but rivulets and streams that have never flooded before erupted with such force and hit in such unexpected places that the effects were most unusual and extremely devastating. Highways were ripped up as if they had been carpet bombed. Automobiles, because of the speed with which the water hit, were stacked up two and three and four on top of each other. Telephone poles were knocked around like toothpicks. Large trucks were taken up and wrapped around buildings. It was a scene of immense devastation.

It is not confined totally to the town of Johnstown, which has a population of some 71,000 people. Many other communities, including the community of Clymer, in Indiana County, which I visited, have experienced extensive property damage. It seems that the loss of life is confined primarily to the Johnstown area, where a dam, the Laurel Valley Dam, apparently broke and inundated a township. I fear that the death toll, which is most recently reported at close to 30 or 35 people, may go far higher as they start digging out. This, obviously, means a great human tragedy. It is one that I suppose we would not have known how to prevent, in part, had we had advance warning.

The fact, though, is that homes have been damaged. There has been a tremendous amount of agricultural damage. There will be massive unemployment extending over many months. For example, Bethlehem Steel, a major steel company and employer employing some 11,000 to 12,000 people up there, is out of action. It will be out of action for quite some time.

I know of dozens of coal mines that have been flooded. These are deep mines. They must be pumped out, then they must be totally checked out by safety inspectors. I imagine a lot of retimbering will have to occur.

The most optimistic forecast is that those mines will not be back in production for 6 months. So we are looking at massive, long-term unemployment in this seven-county area.

Beside this picture of incredible devastation, what did I find to be the most serious and pressing problems?

The first problem, Mr. President, is security. Security against looting so that there is no temptation for people to break the law.

With prompt action by the National Guard and by a very tough attitude taken by the mayor of Johnstown, I think this is going to be under control, but additional National Guard troops may be necessary.

An especially severe problem is that of communications. The telephone system to Johnstown is virtually inoperative. In order to make a phone call from the airport, where one would have

thought the communications would be adequate, I had to get into a helicopter, fly to a golf course, walk up to the television station, WJAC, and only there were two or three lines still operating so I could call Washington.

On the occasion when I did call Washington, I made arrangements so that, when I returned last night, I could go directly to the White House and report my findings to the President and his deputies and the head of the Federal Disaster Assistance Administration, Tom Dunn.

I reported to them, in fact, that not only was there this severe communications problem, not only is there this severe problem with debris and damage so that roads are virtually impassable, but I reported as well that there is a subsequent flooding hazard, because many of the storm sewers are clogged and are potentially going to back up if there is another storm in the area. I regret that I have heard a report that another storm may be approaching the area.

There is also going to be a considerable housing problem. It is very difficult at this point to determine how many people are going to be forced out of their homes, but it will be in the thousands, without doubt, and that will pose a major logistical problem, because trailers will have to be moved and it will take time to do that.

Second, site preparation for temporary housing, with which we experienced considerable problems during Hurricane Agnes in 1972, particularly in the Wilkes-Barre area, has made it very difficult for us to alleviate the housing problem in the prompt way that is really called for.

I made this report to the people at the White House. I think they were very impressed to know that in addition to myself, Governor Shapp of our State and Congressman JOHN MURTHA had toured that area extensively, and that we had made arrangements to insure the regional FDAA people would be on the scene. In fact, Governor Shapp and Mr. Hahn of FDAA are at this moment, touring the seven-county area so that, as required by our 1974 Flood Control Act, there will be an on-site assessment made by FDAA, thus speeding the right kind of aid to the hard-hit areas.

The presentation was eased enormously, I must add, by a film that I was able to acquire from the local TV station, WJAC. It is a 12-minute videotape they had put together, starting around midnight, Tuesday night, stretching into late Wednesday morning, giving first-hand documentary footage of the way the flood actually hit and how it directly affected people, homes, businesses, and the communities.

There is no doubt in my mind that we are faced with a minimum of $1 billion worth of property damage. It may run much higher. It was for that reason I was enormously gratified that the Federal disaster officials and the White House staff indicated there was absolutely no doubt in their minds, having seen the film and having listened to the presentation of myself and my staff, including Susan Howland, and Cliff Shannon, who is also at this moment accompanying FDAA and State disaster teams for the formal assessment. And there is no doubt in my mind, that the President of the United States will declare this seven-county area a major disaster area before noon today. The people of Columbia, Westmoreland, Somerset, Indiana, Clearfield, Jefferson, and Bedford Counties need this help.

This is, Mr. President, absolutely necessary. We need to move the Corps of Engineers in right away to start removing the debris so that the streets are passable. We need those streets passable so we can bring in emergency generators to one of the hospitals that had its power supply knocked out.

There was another, Mercy Hospital, where two floors had to be evacuated.

We need to be able to get extra equipment into those hospitals. We need to move the Small Business Administration in, the Farmers Home Administration in. We need, obviously, to get the U.S. Department of Transportation to work with the State and local people to start repairing roads.

I saw one road, Route 219, built to interstate highway specifications—it is part of the Appalachian highway system—that had been undercut by a stream one could easily step across in normal times. Yet, half of that highway was eaten away, collapsed into a ditch. It was completed only 3 years ago.

This is just some measure of the disaster and why prompt Federal action is necessary.

I have just been handed a message, Mr. President, and I am delighted to announce that President Carter has just signed the disaster proclamation at this very moment.

I want to take this opportunity to commend President Carter and his staff and Mr. Dunne for their prompt action in making sure that the people of Pennsylvania are going to obtain the very prompt and necessary assistance that they are entitled to. It is, indeed, gratifying. I am personally delighted for the President's fast action and for the help this will mean for the people there.

The first step after a disaster declaration has been signed is for somebody to be in charge who will take charge.

The Federal coordinator that will be named, immediately, as I have been assured by Mr. Dunne of the FDAA, is the most important single person.

I do want to be sure, Mr. President, having seen some of the really grievous problems that occurred in 1972 during Agnes where we got square pegs in round holes for a while, that we do appoint somebody who has the know-how and the experience and the get-it-done mentality to make sure they do coordinate the vast number of Federal agencies, ranging from the corps to HUD so we really get this situation under control. I hope we will be able to deliver on the promise of this disaster declaration with force, compassion and urgency.

The ACTING PRESIDENT pro tempore. The time of the Senator from Pennsylvania has expired.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

APPROVAL OF BILL

A message from the President of the United States announced that on July 21, 1977, he approved and signed the following bill:

S. 1468. An act to amend the Federal Energy Administration for the 1978 fiscal year, duration of authorities under such Act, to authorize appropriations for the Federal Energy Administrataion for the 1978 fiscal year, and for other purposes.

MESSAGE FROM THE HOUSE

At 6:43 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that:

The House disagrees to the amendments of the Senate to the bill (H.R. 7933) making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. MAHON, Mr. SIKES, Mr. FLOOD, Mr. ADDABBO, Mr. MCFALL, Mr. FLYNT, Mr. GIAIMO, Mr. CHAPPELL, Mr. BURLISON of Missouri, Mr. EDWARDS of Alabama, Mr. ROBINSON, Mr. KEMP, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

The House insists upon its amendment to the bill (S. 1019) to authorize appropriations for fiscal year 1978 for certain maritime programs of the Department of Commerce, and for other purposes, disagreed to by the Senate; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. MURPHY of New York, Mr. BIAGGI, Mr. METCALFE, Mr. ZEFERETTI, Ms. MIKULSKI, Mr. RUPPE, and Mr. MCCLOSKEY were appointed managers of the conference on the part of the House.

The House agrees to the report of the committee of conference on the disagreeing votes of the Houses on the amendment of the Senate to the bill (H.R. 6714) to amend the Foreign Assistance Act of 1961 to authorize development assistance programs for fiscal year 1978, to amend the Agricultural Trade Development and Assistance Act of 1954 to make certain changes in the authorities of that Act, and for other purposes.

The House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6884) to amend the Foreign Assistance Act of 1961 to authorize international security assistance programs for fiscal year 1978, to amend the Arms Export Control Act to make certain changes in the authorities of that Act, and for other purposes.

ENROLLED BILLS SIGNED

The SPEAKER has signed the following enrolled bills:

S. 1474. An act to authorize certain construction at military installations, and for other purposes.

H.R. 4975. An act to amend the Public Health Service Act to extend through the fiscal year ending September 30, 1978, the assistance programs for health services research; health statistics; comprehensive public health services; hypertension programs; migrant health; community health centers; medical libraries; cancer control programs; the National Cancer Institute; heart, blood vessel, lung, and blood disease prevention and control programs; the National Heart, Lung, and Blood Institute; National Research Service Awards; population research and voluntary family planning programs; sudden infant death syndrome; hemophilia; national health planning and development; and health resources development; to amend the Community Mental Health Centers Act to extend it through the fiscal year ending September 30, 1978; to extend the assistance programs for home health services; and for other purposes.

H.R. 4746. An act to extend certain authorities of the Secretary of the Interior with respect to water resources research and saline water conversion programs, and for other purposes.

H.R. 7557. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1978, and for other purposes.

The enrolled bills were subsequently signed by the Deputy President pro tempore.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following communications which were referred as indicated:

EC–1703. A letter from the Chairman of the Indian Claims Commission transmitting, pursuant to law, Docket No. 364, Ottawa-Chippewa Tribe of Michigan, Plaintiff, v. the United States of America, Defendant (with accompanying papers); to the Committee on Appropriations.

EC–1704. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, a report on transfers of amounts appropriated to the Department of Defense totalling $57,532,000; to the Committee on Appropriations.

EC–1705. A letter from the Acting Secretary of the Interstate Commerce Commission transmitting, pursuant to law, notice that the Commission is unable to render a final decision in Docket No. 36491, Wheat, Oklahoma and Kansas to Texas Gulf Ports, within the initially-specified seven month period; to the Committee on Commerce, Science, and Transportation.

EC–1706. A letter from the Vice President for Government Affairs of the National Railroad Passenger Corporation (AMTRAK) transmitting, pursuant to law, a report on itemized revenues and expenses for the month of March, 1977 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1707. A letter from the Vice President for Government Affairs of the National Railroad Passenger Corporation (AMTRAK) transmitting, pursuant to law, a report on the average number of passengers and on-time performance for each train for the month of April, 1977 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1708. A letter from the administrator of the Federal Energy Administration transmitting, pursuant to law, a report on the economic impact of energy actions (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–1709. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a report on sales of refined petroleum products for the month of March, 1977 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–1710. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Anti-recession Assistance is Helping But Distribution Formula Needs Reassessment" (GGD–77–76) (with an accompanying report); to the Committee on Environment and Public Works.

EC–1711. A letter from the Secretary of Commerce transmitting a draft of proposed legislation to amend the Act of June 18, 1934, regarding the submission by the Foreign-Trade Zones Board of annual reports to Congress (with accompanying papers); to the Committee on Finance.

EC–1712. A letter from the Secretary of Health, Education, and Welfare transmitting, pursuant to law, a supplemental report on the Child Support Enforcement program through September 30, 1976 (with an accompanying report); to the Committee on Finance.

EC–1713. A letter from the Deputy Director of the Office of Management and Budget, Executive Office of the President transmitting, pursuant to law, a follow-up report on the recommendations of the National Advisory Council on Vocational Education (with an accompanying report); to the Committee on Governmental Affairs.

EC–1714. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Examination of Financial Statements of the Pennsylvania Avenue Development Corporation for Fiscal Year ended June 30, 1975, and the 15-Month period ended September 30, 1976" (FOD–77–4(a)) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1715. A letter from the Director of the Community Services Administration transmitting a draft of proposed legislation to extend for three additional years the authorization of Titles I, II, III–B, VI, VII and IX contained in the Economic Opportunity Act of 1964, as amended, and for other purposes (with accompanying papers); to the Committee on Human Resources.

EC–1716. A letter from the Attorney General of the United States transmitting a draft of proposed legislation to remove the limitation on payments for Consultant services in the Community Relations Service (with accompanying papers); to the Committee on the Judiciary.

EC–1717. A letter from the Attorney General of the United States transmitting a draft of proposed legislation to establish fees for services performed by United States Marshals (with accompanying papers); to the Committee on the Judiciary.

EC–1718. A letter from the Commissioner of the Immigration and Naturalization Service, Department of Justice transmitting, pursuant to law, copies of orders entered in 903 cases in which the authority contained in Section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of such aliens (with accompanying papers); to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOLE, from the Committee on Agriculture, Nutrition, and Forestry:

With amendments:

H.R. 2521. An act to provide for the mandatory inspection of domesticated rabbits slaughtered for human food, and for other purposes (Rept. No. 95–355).

By Mr. STONE, from the Committee on Agriculture, Nutrition, and Forestry:

Without amendment:

S. 91. A bill to amend section 8e of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes (Rept. No. 95–356).

By Mr. ROBERT C. BYRD (for Mr. EASTLAND), from the Committee on the Judiciary:

Without amendment:

S. 1765. A bill for the relief of the Federal Life and Casualty Company of Battle Creek, Michigan (Rept. No. 95–357).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PROXMIRE, from the Committee on Banking, Housing and Urban Affairs:

Barry P. Bosworth, of Maryland, to be Director of the Council on Wage and Price Stability.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. ROBERT C. BYRD, from the Committee on the Judiciary:

Hubert T. Taylor, of West Virginia, to be U.S. marshal for the northern district of West Virginia.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. NELSON:

S. 1902. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to strengthen the financing of the social security system, to reduce the effect of wage and price fluctuation on the system's benefit structure, and to eliminate from that system gender-based distinctions; to the Committee on Finance.

By Mr. JACKSON (for himself, Mr. ANDERSON, Mr. KENNEDY, Mr. METZENBAUM, Mr. HART, and Mr. SCHWEIKER):

S. 1903. A bill to amend chapter 55 of title 10, United States Code, to authorize the use of health maintenance organizations in providing health care under such chapter, and for other purposes; to the Committee on Armed Services.

By Mr. BARTLETT:

S. 1904. A bill to amend the Customs Administrative Act of 1938 to prohibit the Secretary of the Treasury from extending the privilege of admission free of duty without entry of their baggage and effects to high officials of the United States Government; to the Committee on Finance.

By Mr. DOLE (for himself, Mr. JAVITS, and Mr. STAFFORD):

S. 1905. A bill to authorize Federal assistance to private, profitmaking agencies and

organizations under title II of the Rehabilitation Act of 1973; to the Committee on Human Resources.

By Mr. CRANSTON:

S. 1906. A bill to establish the Channel Islands and Santa Monica Mountains National Park and Seashore in the State of California, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. WILLIAMS:

S. 1907. A bill to amend the Social Security Act to provide medicare benefits for individuals who require total parenteral nutrition (TPN) as a result of intestinal surgery; to the Committee on Finance.

By Mr. WALLOP (for himself and Mr. HANSEN):

S. 1908. A bill to provide for the transfer and conveyance of the silver service of the United States Ship *Wyoming* to the Wyoming State Museum, and for other purposes; to the Committee on Armed Services.

By Mr. ROTH:

S.J. Res. 76. A joint resolution proposing an amendment to the Constitution of the United States with respect to the reconfirmation of Federal judges after a term of ten years; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

(Statements in connection with the above introduced bills and joint resolutions are printed at the conclusion of Senate proceedings today.)

ADDITIONAL COSPONSORS

S. 256

At the request of Mr. PEARSON, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 256, the Natural Gas Act Amendments of 1977.

S. 708

At the request of Mr. CLARK, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 708, to amend title XVIII of the Social Security Act.

S. 818

At the request of Mr. WILLIAMS, the Senator from New Jersey (Mr. CASE) was added as a cosponsor of S. 818, to end the use of steel-jaw leg-hold traps.

S. 991

At the request of Mr. RIBICOFF, the Senator from Montana (Mr. METCALF) and the Senator from Minnesota (Mr. ANDERSON) were added as cosponsors of S. 991, to establish a separate Department of Education.

S. 1014

At the request of Mr. DOMENICI, the Senator from Pennsylvania (Mr. SCHWEIKER) was added as a cosponsor of S. 1014, to amend the Internal Revenue Code.

S. 1264

At the request of Mr. CHILES, the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of S. 1264, the Federal Acquisition Act of 1977.

S. 1393

At the request of Mr. BAYH, the Senator from Alaska (Mr. GRAVEL), the Senator from Minnesota (Mr. HUMPHREY), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 1393, to authorize actions by the Attorney General to redress deprivations of constitutional and other federally protected rights of institutionalized persons.

S. 1526

At the request of Mr. BARTLETT, the Senator from Hawaii (Mr. MATSUNAGA) and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 1526, to establish an Associate Administrator for Women's Business Enterprise.

S. 1675

At the request of Mr. HATHAWAY, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1675, the Social Security Amendments of 1977.

S. 1769

At the request of Mr. CHURCH, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 1769, to amend title II of the Social Security Act.

S. 1829

At the request of Mr. JOHNSTON, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 1829, to create the Jean Lafitte National Historical Park.

S. 1854

At the request of Mr. TALMADGE, the Senator from Iowa (Mr. CULVER) was added as a cosponsor of S. 1854, to provide emergency assistance to producers suffering losses due to disastrous drought conditions in 1977.

S. 1866

At the request of Mr. INOUYE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 1866, to amend section 222 of the Communications Act of 1934, as amended.

S. 1872

At the request of Mr. CHURCH, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1872, to provide price support for sugar.

S. 1899

At the request of Mr. JAVITS, the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of S. 1899, the veterans tuition equalizer bill.

SENATE RESOLUTION 219

At the request of Mr. ROTH, the Senator from Maine (Mr. HATHAWAY), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Vermont (Mr. LEAHY), and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of Senate Resolution 219, to establish in the Senate a senior citizen internship program.

SENATE CONCURRENT RESOLUTION 38

At the request of Mr. DOLE, the Senator from Wyoming (Mr. WALLOP) and the Senator from Oklahoma (Mr. BARTLETT) were added as cosponsors of Senate Concurrent Resolution 38, disapproving Presidential action regarding the sugar industry.

AMENDMENT NO. 499

Mr. STEVENS. Mr. President, I ask unanimous consent that my colleague from Kansas (Mr. DOLE) be added as a cosponsor to my amendment No. 499 to H.R. 7933, making appropriations for the Department of Defense for the fiscal year ending September 30, 1978. This amendment, which restores full funding to our military commissaries, passed the Senate on July 19, 1977.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 520

Mr. METZENBAUM. Mr. President, the distinguished Senator from Indiana, Senator BAYH, was a cosponsor, and active supporter of amendment No. 520 to H.R. 7933, the Defense appropriations bill. The amendment, which Senator CHAFEE and I introduced, requires a complete accounting of Defense Department funds which flow to subcontractors.

I listed Senator BAYH as a cosponsor in my spoken remarks on July 19, but his name was mistakenly not included in the RECORD. I ask unanimous consent that the permanent RECORD show that Senator BAYH was an original cosponsor of amendment 520, which was adopted by voice vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICES OF HEARINGS

LOBBYING REFORM ACT

Mr. RIBICOFF. Mr. President, I am pleased to announce that on August 2, 1977, the Senate Governmental Affairs Committee will hold a hearing on S. 1785, the Lobbying Reform Act of 1977. The witnesses for that hearing will be: Senator KENNEDY, Senator CLARK, and Senator STAFFORD; Congressman DON EDWARDS; Patricia Wald, Department of Justice; Robert Keller, General Accounting Office.

The hearing will begin at 10 a.m. in room 3302 Dirksen Senate Office Building. Additional hearings on lobbying reform will be held in the near future.

TRUST AGREEMENT OF BERTRAM LANCE

Mr. RIBICOFF. Mr. President, I wish to announce that the Committee on Governmental Affairs will meet on Friday, July 22, 1977, at 10 a.m., in room 3302, to consider the request for a modification of the trust agreement of Bertram Lance.

ADDITIONAL STATEMENTS

(Additional statements are printed at the conclusion of Senate proceedings today.)

CONCLUSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, is there further morning business?

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

BLACK LUNG BENEFITS REVENUE ACT OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the consideration of S. 1538, which will be stated by title.

The legislative clerk read as follows:

A bill (S. 1538) to amend title IV of the Federal Coal Mine and Safety Act to improve the black lung benefits program estab-

lished thereunder, to impose an excise tax on the sale or use of coal, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Finance with amendments.

The ACTING PRESIDENT pro tempore. Time for debate on this bill is limited to 2 hours, to be equally divided between and controlled by the Senator from West Virginia (Mr. RANDOLPH) and the Senator from New York (Mr. JAVITS), with 1 hour on any amendment in the first degree—except an amendment by Mr. CHAFEE, on which there shall be 1 hour, and an amendment by Mr. JAVITS, on which there shall be 2 hours, with 30 minutes on any amendment in the second degree, with 20 minutes on any debatable motion, appeal, or point of order, and with the vote on final passage to occur before the Senate completes its business for today.

Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, but first I ask unanimous consent that the time not be charged against anybody.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I have discussed with the distinguished minority leader a proposed unanimous-consent request which I think is absolutely necessary in the light of conversations that have been had with the distinguished manager of the black lung bill, Mr. RANDOLPH; with the distinguished ranking minority member of the committee, Mr. JAVITS; with the distinguished chairman of the committee, Mr. WILLIAMS, and with other Members, in order that we may avoid what otherwise could become a constitutional question. We do not want any constitutional question to endanger the black lung bill. We do not want the Senate to have to do its work twice.

By way of explanation as to why we have the black lung bill up today, may I say that I have urged Members of the other body to get the black lung bill over here as soon as they possibly could; but for reasons that I am sure are good, they have been unable to do that to date.

In yesterday's Washington Post, I noticed a story which caused me to feel that the black lung bill was in trouble in the House. Consequently, I felt constrained to move forward with the bill today, particularly in view of the fact that we do not have anything else we can do today. We do not have available to us on the calendar any other work we can do which is not subject to a 3-day rule or subject to a budget waiver or some other restriction.

Discussing the matter with the distinguished minority leader, we felt under the circumstances we had to go forward with this bill today. Having laid it down and gotten a request to complete it today, then I was reminded by Senator RANDOLPH of the constitutional question about which he wrote some days ago in a letter to Mr. PERKINS on the other side of the Hill, and he was kind enough to send me a copy of that legislation.

The minority leader is fully in accord with me that because of these reasons a unanimous-consent agreement is going to be necessary to avoid the constitutional question and in order to avoid the Senate's having to do its work twice.

So the request is as follows:

I ask unanimous consent that the agreement on S. 1538, the black lung bill be modified so that instead of final passage of the bill before the Senate completes its business today, after third reading of the bill it be returned to the Calendar and the majority leader shall be powered to have the Senate resume its consideration at any time—when I say any time, of course, I am going to consult with the minority leader and the manager of the bill and the ranking member, the latter two of whom will have to manage the bill—without further debate or motions thereon in order.

Mr. President, I further ask unanimous consent that when the Senate receives a black lung bill from the House, it be placed on the Calendar, the majority leader be empowered to have the Senate consider it at any time—with the same consultations—and that no amendment or motion relative thereo be in order other than a motion to strike all after the enacting clause and insert in lieu thereof the text of S. 1538 as amended by the Senate, with no debate in order with respect to the House bill or the substitute therefor.

Mr. BAKER. Mr. President, reserving the right to object—and I will not object—the distinguished majority leader and I discussed this matter, and I have, in turn, discussed it with representatives of the distinguished senior Senator from New York, who is the ranking member of the committee and has a deep interest in this subject.

I think the agreement is satisfactory, and I am prepared in a moment to agree to its being entered.

I think, Mr. President, it is important to proceed with this matter. Notwithstanding this difficulty. We have to try to accommodate this disagreement, because the black lung bill is a matter of such consequence and importance to the people of my area, my State, my region of the country, that I think it is important to proceed as promptly as possible.

So I express my appreciation to the distinguished majority leader and the chairman of the committee, to Senator RANDOLPH and to Senator JAVITS, for putting us in a position to act with promptness on the Senate side even though we have to make extraordinary and unusual arrangements to provide for it.

This agreement has been cleared with the distinguished Senator from New York, and I do not object to it.

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

Mr. RANDOLPH. Reserving the right to object—and I shall not object—I think the procedure as initiated by the majority leader, and in agreement with the minority leader, both Members of the Senate who not only in their leadership capacities but also as Senators who are intensely interested in the subject matter and know the reasons why as quickly as possible we should come to grips once again with the amendment to the law which originally passed in 1969, is, I think, a fair and also satisfactory manner in which we can proceed at this time and be ready for later action.

We are conscious of and, of course, the request made by the able majority leader, Mr. ROBERT C. BYRD, indicates we are attempting to work with the House of Representatives in this matter. We recognize the work that has been done there as well as the work, of course, which has been done here.

This has not been a so-called side issue within the Committee on Human Resources. This has been a very main concern of many of us in the committee.

So I commend the leader of our majority party and the leader of the minority party in this effort. There is no majority and minority, really. We are partners in doing something which I believe is very important. While I am commending the role of the majority leader in this effort, I vividly recall his participation in the development of the black lung benefits program in 1969. Senator BYRD and I together authored the Senate provisions which ultimately became title IV of the Federal Coal Mine Health and Safety Act. I appreciated his efforts then, just as I appreciate them now.

I want to state at this time, and I want to be very clearly understood, that one of the difficulties I think we must find a way to overcome—and it is not for us to do it—to hopefully, through the proper modus operandi within the United Mine Workers Union, to have the disastrous strikes that are wildcat in nature and not approved by the union itself, be minimized so that the production of coal so necessary to our energy supply reserve, and that situation be hopefully remedied as quickly as possible.

The American people have a right to expect that that be done. I think that the majority of coal miners want to be on the job rather than away from their work.

I have no further comment and I thank the majority leader.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and the modification of the unanimous-consent agreement propounded by the Senator from West Virginia is agreed to, and rule XII is waived.

Mr. ROBERT C. BYRD. Well, rule XII does not have to be waived, because we are not passing a bill.

The ACTING PRESIDENT pro tempore. The Parliamentarian informs me that when an agreement upon which rule XII had to be waived is modified it has to be again waived.

Mr. ROBERT C. BYRD. The Chair is correct.

Mr. RANDOLPH. Mr. President, because of the unanimous-consent request

which has been granted by the action of the majority leader in concert with the agreement of the minority leader, I ask unanimous consent to have printed in the RECORD a copy of a letter that I addressed to the Honorable CARL PERKINS, the chairman of the Committee on Education and Labor of the House of Representatives, dated July 13. A copy of that letter was sent to the able majority leader, Senator ROBERT C. BYRD. I ask unanimous consent also that a copy of a letter from Representative PERKINS to our majority leader under date of July 20 be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
July 13, 1977.

Hon. CARL D. PERKINS,
Chairman, Committee on Education and Labor, House of Representatives, U.S. Senate, Washington, D.C.

DEAR CARL: Pursuant to your telephone call of yesterday requesting my thoughts on how the House and Senate might proceed in the development of black lung reform legislation, following are my views on this matter.

The Senate Human Resources Committee favorably reported S.1538 on May 16, 1977. It is quite similar to the bill reported last year. Yesterday, July 12 the Senate Finance Committee filed its report on the bill. In general, Finance adds a separate title to the bill to contain the tax provisions (1 percent ad valorem), the trust fund, the so-called Hansen amendment which permits coal companies to set up, with protections, tax-free black lung benefit trusts, and a not-directly germane Nelson provision relating to NIOSH.

The Senate Finance Committee takes very seriously (and broadly) the provision of Article I, Section 7 of the Constitution which requires revenue raising measures to originate in the House. The only ways to meet the Constitution problem, in the absence of House action on H.R. 4544, are: (1) pass S. 1538 and tack it on to a House-passed tariff bill, or (2) pass S. 1533 and sit on it until the House acts.

The first course is risky because Ways and Means would in all likelihood express serious concerns; a germaneness issue could be raised; and that Committee could demand hearings on the legislation, which would result in delays that would eliminate any hope of congressional action this year.

The second alternative is perhaps just as risky, for those who oppose the legislation could attack the bill on constitutional grounds, asserting that Senate passage is Senate action within the meaning of Article I, Section 7. In addition, we could be faced with the specter of having the Senate consider black lung legislation twice: once as described above, and again when the House bill comes over.

As a result of these knotty problems it is apparent to me that the House must act first and act quickly if we are to get the bill to the President this year. Only a little over three (3) weeks remain before the August recess, and September is going to be filled with appropriations and energy measures.

Carl, these are my candid observations in this matter. It seems to me that you must proceed quickly. I have talked with Bob Byrd about this, and am providing him a copy of this letter, not only because of his responsibility for moving legislation in the Senate, but also because of his intense interest in this subject.

With hope for success in our mutual efforts, I am,
Truly,

JENNINGS RANDOLPH.

WASHINGTON, D.C.,
July 20, 1977.

Hon. ROBERT C. BYRD,
Majority Leader, U.S. Senate, Washington, D.C.

DEAR BOB: With further reference to our conversation regarding the Black Lung Benefits Reform Act, I have obtained assurances from the House leadership which will enable us to move in the House next week on H.R. 4544.

In line with our understanding, it would be appreciated if you would continue to hold the Senate bill until the House has acted.

With warm regards,
Sincerely,

CARL D. PERKINS,
Chairman.

ORDER FOR NO VOTES BEFORE 12:30 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I have cleared this with the distinguished manager of the bill. I ask unanimous consent that, if any rollcall votes are ordered that might otherwise occur before 12:30 p.m. today, they not occur before 12:30 p.m. so as to prevent interruption of committees and conference committees. They are very busy.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on the Chafee amendment at this time.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. CHAFEE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The ACTING PRESIDENT pro tempore. Who yields time? The Senator from West Virginia.

Mr. RANDOLPH. I yield myself such time as I may desire. I ask unanimous consent that during the consideration of S. 1538, the following staff be granted the privilege of the floor: Robert Humphreys, Michael Goldberg, and Louise Ringwalt.

I also ask unanimous consent in addition to those names that Mark McConaghy, Lawrence Brown, and Richard Ruge be accorded the same privileges.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, I make a point of order of no quorum.

The ACTING PRESIDENT pro tempore. On your time?

Mr. RANDOLPH. On our time, yes.

The ACTING PRESIDENT pro tempore. The clerk will call the roll on the time of the Senator from West Virginia.

The second assistant legislative clerk proceeded to call the roll.

Mr. RANDOLPH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SASSER). Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, it is my privilege to bring before the Senate a long-awaited measure, S. 1538, the Black Lung Benefits Reform Act of 1977.

With other members of the Committee on Human Resources of the Senate I have attempted since March 1976, to bring a black lung reform bill into this forum for debate and hopeful passage.

Last year repeated delays resulted in the postponement of H.R. 10760 until, perhaps I can use the word literally, the 11th hour; the 94th Congress adjourned without considering this needed reform legislation.

This legislation has the strong support of the majority leader, my able colleague from West Virginia (Mr. ROBERT C. BYRD), and, hopefully, Senators on both sides of the aisle.

Earlier in connection with the unanimous-consent request, I indicated that I did not think in terms of majority-minority in this matter but, hopefully, a partnership which might permit us, frankly challenge us, to enact helpful well-reasoned legislation.

We have moved in the 95th Congress with relatively prompt dispatch in this matter. We know that the House of Representatives is expected to act soon on its bill, H.R. 4544. And I am certain Congress will be able to present a black lung reform bill to the President prior to the adjournment of the first session of the 95th Congress.

I speak very earnestly to my colleagues when I say that they, as well as I, are aware that our Committee on Human Resources reported favorably S. 1538 as an original bill on May 16, 1977, and that action was taken by unanimous-consent agreement to refer the measure to the Committee on Finance of the Senate for review of tax and trust fund provisions. That committee reported S. 1538 with amendments to the text of the bill on July 12, 1977.

I am gratified that in the Chamber is the articulate and able Senator from New York, and I use those words not as pleasantries, but in a way that expresses my appreciation always to him. We are not always in agreement on matters, but his knowledge and perception bring to our committee and to this subject matter the very best of thought. So, Senator JAVITS is a very active person in connection with what we have done in the committee and what hopefully we can determine in the Senate today.

When the Finance Committee made its revision, it brings to our attention that S. 1538 now consists of two titles, title I, the Black Lung Benefits Reform Act of 1977, which includes except for the Black Lung Disability Fund, all the substantive provisions that were reported by our Committee on Human Resources.

Then, there is title II, the Black Lung Benefits Revenue Act of 1977, which contains the trust fund provisions, a 1-percent ad valorem tax on coal, the authorization of coal operator trusts for future liability for black lung benefit payments under Federal or State programs, and a provision that relates to access by the National Institute for Occupational Safety and Health to mailing addresses of persons exposed to occupational health hazards.

In addition, it is important to note that the Committee on Finance modified one provision of the original bill. That provision is section 424(f), which authorizes the Secretary of Labor to enter into agreements with coal operators to provide what amounts to last resort insurance.

I believe the modifications, to which I shall address myself later, are acceptable to the members of our Committee on Human Resources.

Mr. President, title IV of the Federal Coal Mine Health and Safety Act of 1969, I think, has been both a blessing and perhaps a curse—a blessing because hundreds of thousands of deserving beneficiaries have received and continue to receive compensation income through this worthwhile Federal program. It is also perhaps a curse, because thousands of claimants who have been denied benefits, and thousands of others who have waited for years for their claims to be decided, are not yet brought into the benefits under the original act and the later amendments.

The program has really been harsh to many who have made their claims, submitted the claims and, through administrative or what I call legal quirks—I am not saying maneuvering—they have been determined to be ineligible for benefits.

These and other reasons are compelling, in my thinking, for the enactment of this program of reform legislation. Widows who know to a certainty—there is no dispute about it—that their husbands were totally disabled by black lung, but are barred from receiving benefits, because they have no medical evidence to substantiate their claim, are one group. A second group: Miners who are told they are disabled, and whose chest X-rays are interpreted as positive for pneumoconiosis, but who are denied benefits because the rereaders of the X-rays hired by the Labor Department disagree with the original X-ray interpretation.

Third are those widows whose claims are clearly valid, who would receive benefits except for the passage of time since the miner husband's death.

Then there is a fourth group, that of miners who are ill, but are faced with the dilemma of whether to continue working or whether to stop their labor and file a black lung claim, perhaps taking a chance on the probability of approval of such claims sometime out there in the future.

Finally, there are all the black lung claimants who must wait an average of 630 days for their claims to be processed, I remind my colleagues, only to have such claims, in 97 percent of the cases approved by the Labor Department, controverted by the responsible coal company.

Mr. President, these are some of the reasons that have brought our committee to the point of bringing this measure before the Senate. We have been in the process, always hopefully, of reasoned improvement of this legislative history, through the enactment in 1969 and 1972—passage of that act made necessary, because there is the pulmonary and respiratory disease situation that has been added, of course, in the consideration of approval of the claim, to the X-ray finding itself.

This was a step forward, because the social security system had not taken into account the pulmonary and respiratory ailments, which are very marked in connection with those who labor in the coal mines of this country.

A black lung benefit program has certainly—and I underscore this—worked well and favorably for many; but for many other persons it has been something which causes sleepless nights. Using the language in a metaphorical sense, it has been a quagmire, in some instances, because of the frustrations and the disappointments that have occurred.

S. 1538 will not solve all the problems nor fulfill the wishes of every claimant for black lung benefits. It is, however, expected to, and I think will, necessarily result in dramatic improvement in the program. It is urgently needed, and it can give a certain degree of economic security to thousands of disabled miners, widows, and children, who are now, we believe, denied the benefits of this program.

For the information of my colleagues who are not conversant with the terrible occupational disease which is referred to commonly as black lung—the correct medical term is pneumoconiosis—and for those of my colleagues who are familiar with the destructiveness, the toll which follows, I think it is important that we, to a degree, understand that we have not been able to move as quickly with the modifications in the law, with the changes in interpretation which cause us, hopefully, to act; and for that reason I think it is important that there be in the RECORD a description which I shall briefly give of title IV of the Federal Coal Mine Health and Safety Act of 1969, as amended—popularly known, as I have earlier mentioned, as the Black Lung Benefits Act.

Title IV provides benefits for miners totally disabled by pneumoconiosis, and for their eligible survivors, including the widows, the children, the dependent parents, and siblings.

A miner with pneumoconiosis who worked 10 or more years in the mines is presumed to have contracted the pneumoconiosis in that coal mine employment.

A miner with complicated pneumoconiosis is irrebuttably presumed to be totally disabled. A diseased miner who worked 10 or more years in the mines and died from what I have mentioned, a respiratory disease, is presumed to have died due to pneumoconiosis. A miner with 15 or more years in an underground coal mine or in a surface mine with comparable dust conditions, whose chest X-ray is negative for complicated pneumoconiosis, and who has or had a totally disabling respiratory or pulmonary impairment, which I also mentioned earlier, is presumed to be totally disabled due to pneumoconiosis.

Title IV consists of two separate benefit programs, part B and part C. Part B is administered by the Secretary of Health, Education, and Welfare, a Federal program under which successful claimants who filed on or before June 30, 1973, are entitled to the payment for benefits by the Federal Government for life or for as long as they retain their eligibility or continue it.

Part C is administered by a State workers' compensation agency meeting minimum standards, or by the Secretary of Labor where such standards are not met.

No States as yet met the minimum requirements. The responsible coal operators, and there are many such responsible coal operators, pay the benefits as in traditional workers' compensation programs. Under the law, the coal industry is liable for claims filed after June 30, 1973, for payment on or after January 1, 1974.

The Department of Labor is responsible for paying benefits when the responsible operator cannot be determined, which is the case currently in approximately 75 percent of the approved claims.

The law as amended in 1972, which mentioned previously, terminates employer liability for claims after December 30, 1981.

The 1972 amendments resulted from the inadequacies and the inequities of the law and its administration, as I have earlier indicated. I have reemphasized these points at this juncture. A greater percentage of claims was allowed under part B, as a consequence of the 1972 amendments, and certain injustices were rectified. Yet, as I earlier said, many problems continue to plague the fair administration of the program.

More importantly, these problems translate into this frustration, this delay, this perpetual hardship in many cases, for thousands of disabled coal miners and the widows of those who died producing this vital energy resource for America, who are looking, and properly so, to a just conclusion of the earlier law and the amendments, including the bill pending before us, for affirmative action.

Mr. President, at this point I am going to outline the form and meaning of the provisions contained in the pending bill. For the most part, I will confine my remarks to title I. Because they are so closely interrelated, I will also touch on the provisions of title II, anticipating that the very able chairman of the Committee on Finance (Mr. LONG) subsequently will treat this subject matter at greater length.

Section 102 of the bill amends these definitions: "pneumoconiosis," "miner," and "total disability."

Under current law, pneumoconiosis is defined as "a chronic dust disease of the lung arising out of coal mine employment."

Our bill adds to this definition to include the related complications of the disease, and respiratory and plumonary impairment arising from coal mine employment.

Mr. President, these additions that I have been mentioning substantially mirror the administrative practices, particularly that of the Social Security Administration. I think it is important to incorporate in the law the concept that

pneumoconiosis, as it exists among coal miners, is not an easily identifiable condition, but may be a joining of conditions, which, together, result in the total disability of the miner. A chest X-ray may not conclusively demonstrate the existence of moderate or severe coal workers' pneumoconiosis, but the miner may well be totally disabled by work-related respiratory or pulmonary impairments. I have stressed that which we brought into being in the amendments of 1972.

The term "miner" is redefined to include workers who process and transport coal, self-employed miners, coal mine construction workers are also included, but only to the extent that they worked in conditions substantially similar to conditions in underground mines. Railroad, trucking, bargeline, and coke oven workers are not included in the definition.

"Total disability" is listed as a definition, which I think is fair, but the term is substantive as well as descriptive. S. 1538 propounds several important changes in the law which will affect eligibility for benefits. First, it authorizes the Secretary of Labor to establish medical criteria for determining total disability in coal mines under part C. Currently the Social Security Administration imposes on the Department of Labor its own standards, which are considerably more restrictive than the standards it uses for part B claimants. Second, the bill provides that a miner's employment in a mine at the time of death may not be used as conclusive evidence that the miner was not totally disabled. In the past, miners, frankly, have literally worked themselves to death. Because such miners were working when they died, their widows have not been able to show they were totally disabled. In like manner, the bill also provides that a miner whose work circumstances have changed to indicate reduced ability to perform his usual coal mine work may not be conclusively presumed to be totally disabled.

Section 103 of the bill eliminates in the part B benefit program the offset, or reduction, of black lung benefits in cases in which the beneficiary is receiving State workers' compensation for injuries other than pneumoconiosis. Part C of title IV now has this limitation on the offsetting of benefits; this section conforms part B to part C. If a State award is made for black lung, then the Federal black lung payment should be reduced. The bill does not disturb that principle.

Section 104 prohibits the payment of benefits to working miners, except those conclusively presumed to be totally disabled under section 411(c)(3) of the act, but the provision allows miners to file claims while still working, to have their claims determined, and to receive benefits if their coal mine work terminates within a year after a final determination of eligibility for benefits.

The next section, section 105, contains three important provisions. First, the appropriate Secretary—HEW for part B, and Labor for part C—is required to accept the interpretation of an X-ray submitted by the claimant if certain conditions are met. The interpreting physician must be a board certified or board eligible radiologist· the person administering the X-ray must be a radiologist or qualified radiologic technologist or technician; and the X-ray must be of a quality sufficient to demonstrate the presence of pneumoconiosis. We are taking away the question mark and trying to be very explicit. Further, the Secretary need not accept the interpretation if he has reason to believe the claim is fraudulent. Finally, the Secretary of Labor may by regulation establish standards for the administration of chest X-rays.

Notwithstanding these what I consider to be formidable safeguards, there was substantial sentiment expressed by members of the Human Resources Committee and the Finance Committee that this provision eliminates quality control and ties the hands of the Secretary to the extent that a "bad" interpretation could not be overturned. As a result, presumably, undeserving claims might be allowed. In my opinion—and I believe I have studied this issue more carefully than perhaps any other member of this body—this position is founded on a misunderstanding of the value of the X-ray as a diagnostic tool, on its proper weight as evidence in a black lung determination, and on the relative importance of the X-ray re-reads. I intend to discuss this issue in considerable depth later on, and I intend to show that the provision in the bill relating to X-ray interpretation is sound, appropriate, and necessary.

How much time, now, Mr. President, has been consumed?

The PRESIDING OFFICER (Mr. GLENN). Twenty minutes remain to the Senator.

Mr. RANDOLPH. A second provision of section 105 eases the difficulty encountered by widows in attempting to substantiate claims where medical evidence of the miner's condition is scanty or nonexistent. A survivor's claim is to be approved in cases of no medical evidence or if such evidence is inclusive, when other evidence in the record, including affidavits, taken as a whole establishes that the miner was totally disabled due to pneumoconiosis when he died, or that his death was due to pneumoconiosis.

The provision restates and strengthens the existing law, which has heretofore been largely ignored. Section 411(c)(4) states that—

> In the case of a living miner, a wife's affidavit may not be used by itself to establish the presumption.

For purposes of this 15-year rebuttal presumption therefore it was, and remains the intent of Congress that a widow's affidavit may be used by itself to establish that presumption. The provision in the bill affirms that affidavits are sufficient to establish a claim for benefits in many cases.

The committee further intends that, henceforth, claims examiners must go behind the cause of death listed on a death certificate. Prior to enactment of the 1969 act there was little reason for the coalfield doctor or coroner to diagnose a miner's illness, or certify the cause of death, as anything other than the immediate cause of death—"heart attack" or "heart failure" are most commonly listed, but such terms do not tell much about the underlying causes of the miner's expiration, the cause of the complications of the miner's employment which have led to pneumoconiosis.

Finally, section 105 of S. 1538 requires that each miner claimant be given an opportunity to undergo a complete pulmonary evaluation. In the past, physical examinations often have not included arterial blood gas testing, either because such tests are too expensive, or the facilities for the tests are not readily available. Yet, in many cases the inability of the lungs to transfer oxygen to the blood stream is the major cause of disability.

Each section of the bill is important, but I will not detail more of the matters that will be placed, perhaps by me, as a part of the RECORD.

In the interest of time I will discuss only two others before moving to title II of S. 1538.

Section 107, entitled "Miscellaneous," is a catchall section which includes a number of vital provisions. One of these would provide an entitlement to benefits to the eligible survivor of a miner who was employed for 25 years or more in a coal mine prior to June 30, 1971, if such miner died prior to the date of enactment of the 1977 bill. This entitlement is not automatic; it is a presumption that can be rebutted by establishing that the miner was not partially or totally disabled when he died. Further, such survivors are to provide, on request of the Secretary, any available evidence concerning the miner's physical condition at the time of death.

Current law requires that a claim by a miner be filed within 3 years after the discovery of total disability due to pneumoconiosis, or the date of the miner's death. With respect to a claim filed on the basis of section 411(c)(4)—the 15-year rebuttable presumption—such claim, in the case of a living miner, must be filed within 3 years of last exposed employment in a mine; in the case of a survivor's claim, that must be filed within 15 years from the date of last exposed employment. This provision has resulted in unnecessary and unintended hardship for many claimants, particularly widows of long standing. In all too many cases, the only bar to the approval of a claim has been the passing of time. This artificial and heartless barrier must be removed.

Another provision of section 107 eliminates the termination of payment of part C claims which under existing law is to occur on December 30, 1981. This has the effect of making the program permanent.

The section also makes the amendments of the bill to part B applicable to part C, and eliminates the June 30, 1971, last-date-of-employment cutoff applicable to part C claims filed on the basis of section 411(c)(4).

Other provisions in this section are discussed in the report of the Committee on Human Resources.

Finally, Mr. President, section 110 provides for the expedited processing of

claims previously denied under part B or part C. The denied claimant is to be contacted by the Secretary of Labor, is to be provided a simple postcard type form on which the claimant is to indicate whether he or she wishes to have the claim reviewed, and an affirmative indication will constitute the filing of a new claim. Additional evidence to support a claim may be taken where necessary. Benefits previously denied claimants whose claims are approved following review are to be awarded retroactively. For part B denied claimants, benefits are to be paid as of January 1, 1974. For section 415 and part C claimants, benefits are to be paid as of January 1, 1974, or the date the original claim was filed, whichever is later.

Mr. President, as we think of title II of the bill, that title, as Senator JAVITS knows, is a matter for consideration of the Committee on Finance.

At the outset, I want to express my appreciation to the chairman of that committee (Mr. LONG). We have talked about this matter many times. Also, to the chairman of the Subcommittee on Taxation and Debt Management (Mr. HARRY F. BYRD, JR.), who is knowledgeable on the problem. And to other members of the committee who have been working to expedite the consideration of this important matter.

The Committee on Finance has, with the assistance of the Joint Committee on Taxation, and with its usual high level of professionalism, made a substantial contribution to the development of S. 1538, and there has been a substantial contribution from that section of the Senate to the development of S. 1538.

Although the committee has placed the Black Lung Disability Fund in title II of the bill, there have been no substantial modifications of the fund provisions as compared to the bill originally reported by the Committee on Human Resources.

The tax now contained in the bill is a 1 percent ad valorem tax on all coal other than lignite. This approach simplifies the tax mechanism and, as I understand it, raises essentially the same amount of revenue as the taxes proposed in the original bill. I support this change.

The Finance Committee also modified the "last resort insurance" provision adopted by the Human Resources Committee to provide a number of guidelines for the operation of a fund for the purpose by the Secretary of Labor. I have no objection to this change.

Section 204 of the bill incorporates the substance of the so-called Hansen amendment—the Senator from Wyoming—which amends section 501(c) of the Internal Revenue Code to exempt from taxation trusts established for liability for the payment of black lung benefits. On this matter, I defer to members of the Finance Committee and the Treasury Department for their feeling.

An amendment offered by the Senator from Wisconsin (Mr. NELSON) was incorporated as section 205 of this bill. This provision authorizes the Internal Revenue Service to disclose to the National Institute for Occupational Safety and Health the mailing addresses of persons exposed or who have been exposed to occupational hazards. I mentioned that earlier. Although this provision reaches persons in addition to those in coal mine employment, it is a necessary provision. I support it.

Mr. President, there is one action taken by the Committee on Finance to which I state a strong objection. The tax on coal is limited in duration to 5 years—from October 1, 1977, to September 30, 1982. This limitation, in my conviction, would be manifested in one of two results: either the payment of benefits to disabled miners and survivors would terminate after September 1982 or the Federal Government would again pick up the tab for such benefits. I think either result would be untenable.

In my view—I express this very strongly—it is inappropriate. In a measure, I think it is unkind to provide benefits on which beneficiaries come to rely for support and then subsequently to take them away. It is also wrong, I think, to saddle the Federal Government with it—to saddle the general taxpaying public with this responsibility.

That is one of the principal reasons for the development of this legislation, because it is widely acknowledged that there is a need to shift the burden of black lung disability payments to where it properly belongs at this time, and that is on the coal operators and the coal consumers. As we consider S. 1538, I shall propose an amendment to strike the time limitation on the tax.

Mr. President, the black lung benefits program has had the support of Congress and the President of the United States since 1969. I have said that we came here again in 1972 and amended the law to make it more equitable and just. There are further serious problems which were unanticipated at that time. when the earlier amendments were developed.

This legislation. with that originating in the House of Representatives. has been under consideration for some time, as I indicated earlier. It is legislation reflecting some of the earlier problems in the program, and we have studied them since 1973. We have had the benefit of oversight of the black lung program during the past 5 years. In the course of the last Congress—the 94th and the current one, the 95th—I think we have perfected, in a well-reasoned way, the measure now pending before the Senate. Its general approach is that all parties can and should accept a measure that will aid thousands of people who need help. Some of them need the help desperately—the old and disabled miners, their widows, children of those who have given their lives to produce America's most substantial and vital energy resource.

I trust that the Members of the Senate will consider S. 1538 as a measure deserving of their consideration and of their support.

Mr. President, how much time have I used of the 1 hour?

The PRESIDING OFFICER. The Senator has used 55 minutes and has 5 minutes remaining.

Mr. RANDOLPH. I reserve the remainder of my time.

(The following proceedings occurred during Mr. RANDOLPH's opening statement and are printed at this point by unanimous consent:)

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. RANDOLPH. Yes; I am very gratified to have this interruption by the able Senator from Alabama.

Mr. SPARKMAN. Relief for the black lung disease came into existence and sometime after that we added the red lung disease. Is that still carried? That is for iron ore mines.

Mr. RANDOLPH. This does not touch any problem except the coal mining industry. It does not go into the other matters.

Mr. SPARKMAN. Has any consideration been given to that? It was added.

Mr. RANDOLPH. No, it was not. The bill provides for a study of all these related problems.

Mr. SPARKMAN. I am not talking about just in recent years.

Mr. RANDOLPH. I remember, of course, the problem.of silicosis. That was back in the early 1930's. In the House we had a very extensive program. Hopefully, it did some good in meeting that problem.

Mr. SPARKMAN. I feel quite certain that red lung was added.

Mr. RANDOLPH. To the Coal Mine Health and Safety Act?

Mr. SPARKMAN. It was made a part of the same act. At least, that is my information.

Mr. RANDOLPH. I believe my colleague perhaps is not wrong, but I can only say I have no knowledge of it being included in the 1969 or 1972 act.

Mr. SPARKMAN. No. It was much earlier than that. Would the Senator have his staff check into the iron ore situation? It was called red lung. Black lung came first and then I know we did something about the red lung. I wish the Senator would check into the problem of red lung that the miners of iron ore became subjected to. I would appreciate it if he would have some checking done on that.

Mr. RANDOLPH. I am reminded that the Senator introduced a bill of some type on this subject. I am not familiar with it, but I will check it out. The staff will go into the situation.

Mr. SPARKMAN. I did introduce a bill and I thought it was added. This was some time ago, some years ago. If the chairman would have his staff check into that, I would like to know just what the present situation is.

Mr. RANDOLPH. I have been handed a copy of the Senator's bill, S. 1041. That was introduced this year.

Mr. SPARKMAN. Was it introduced as a bill or as an amendment?

Mr. RANDOLPH. As a bill. It would be, of course, to amend the black lung benefits provision of this law of 1969, which I have mentioned. Did the Senator have an earlier bill, other than the one introduced in the 95th Congress?

Mr. SPARKMAN. I believe so. I would have to do some checking back myself. It does not matter about that. I do hope consideration will be given to this. I would be very glad if it might be added as an amendment to the present bill.

Mr. RANDOLPH. I am recalling now that in view of the legislation introduced by the Senator, for himself and Senator ALLEN, that we did include in the legislation the study of these other types of diseases which might come from a different type of mining, and concerning, of course, silicosis in the iron mines.

Mr. SPARKMAN. I believe the miners just call it red lung.

Mr. RANDOLPH. Just as we call pneumoconiosis black lung.

Mr. SPARKMAN. Yes.

I thank the Senator.

Mr. RANDOLPH. I thank the Senator for his comment. I am hopeful that we can do as he has indicated, perhaps give more prompt attention to this matter. I shall also talk with the Members of the House.

I am reminded also, that it is contemplated by the chairman of our Committee on Human Resources that workers' compensation standards legislation will include such a disease as red lung.

Mr. SPARKMAN. I certainly appreciate that.

Mr. RANDOLPH. I appreciate the opportunity to discuss this matter with the distinguished Senator from Alabama. I commend the Senator for his concern.

Mr. SPARKMAN. I thank the Senator very much.

(This concludes proceedings which occurred earlier.)

Mr. ROBERT C. BYRD. Mr. President, today we have the opportunity to readdress ourselves to a task begun back in 1969 and assure just compensation to our old and sick miners who have been afflicted by the dread black lung disease. Since our first efforts to address this subject over 7 years ago, we have learned much about both the diagnosis and prognosis of this disease. We have discovered that in too many cases those who should have received benefits all too often did not receive them or received them only after long and costly efforts. Despite our attempt to make the working conditions of miners safer, we still have thousands of miners who contract black lung as a result of their occupation. This legislation attempts to offer some degree of recompense for the harm they have suffered in order that the rest of us may benefit from this energy source.

During our discussion of the Mine Safety Act last month I indicated that we must assure adequate protection for our most precious resource, that is, the miner. That same responsibility rests with us today. We must recognize that one of the costs which we must bear in order to enjoy our energy-oriented lifestyle is the social cost we owe to those who make such a lifestyle possible.

Mr. President, no one has been more in the forefront in the fight for black-lung benefits than my able colleague, Senator RANDOLPH. As a matter of fact, no one has been in the forefront as much as he, in my opinion. Once again he has shown his extraordinary leadership in this area.

The bill is not without controversy. It is obvious that it will be thoroughly debated and perhaps amended. This, of course, is the proper way to resolve whatever differences we may have. But as we begin the debate, let us keep in mind our goal, that is, to provide just compensation—and it must be just—to those miners who have sacrificed for all of us and for the Nation.

Mr. JAVITS. I yield myself 10 minutes.

Mr. President, the Senator from West Virginia has been a strong and effective advocate of this legislation. He has outlined the details of the legislation and the arguments for it. I should like to deal, then, with the reservations which I have about this bill and with where they fit into the public policy of the country.

For one, Mr. President, let us understand that black lung is not the only difficult industrial disease. We have asbestosis and many other diseases which result from different types of employment. They include textile workers, asbestos workers, iron workers, painters, and many others.

Our workers' compensation laws and our occupational health and safety laws either are not sufficiently adequate to cover these diseases or have not yet caught up with the sophistication which modern medicine has with respect to detecting these diseases.

Occupational diseases are inadequately unrecompensed, in substance. Black lung is the one exception, which, due to the vigor of the advocacy of those who are interested, especially from coal-mining areas, has resulted in this being selected out as a special industrial disease for this unique Federal compensatory treatment.

I do not object to that. I only point it out because it is critically important, as you can only carry this type of discrimination so far.

The second problem is the price tag, which is extremely high. For this one industrial disease, the U.S. Government already has spent $5 billion, and the program has been in effect since 1970.

Notwithstanding the tax features in this bill—which I strongly favor, but it is the first time we have done it—the prediction is for a shortfall, the difference between what the tax on coal will raise and what is required to finance these various benefits.

To show the size of the obligation which is involved here, I point out that there are now pending in the way of claims under this bill something in the area of 600,000 claims. Those facts are found at page 3 of the committee report. There are 562,000 claimants under part B and 110,000 claimants under part C. That totals 672,000 claimants. How many coal miners are there—working coal miners? 180,000.

So what we have done is literally to have tried to deal, at a big cost to the United States—roughly $1 billion a year—with one occupational disease accumulating the experience of all of those going back for one or two generations.

Now, this is very rarely realized when we discuss black lung. Senator RANDOLPH, with his customary eloquence, has pointed out the need and the difficulty of these workers. But there are needs and difficulties of millions of workers, not just the coal mine workers. The coal mine workers have been selected out for unique treatment and a unique amount of payment by the Federal Government.

An effort is being made in this bill to relieve the Federal Government of that burden by passing it on to the consumer because what is added to the cost of coal is going to be paid by the consumer.

In that regard, Mr. President, I would like to make this clear: I mentioned a minute ago two programs, part B and part C. Part B is paid for exclusively by the Federal Government and covers black lung claimants who have sought payment of their claims on or before June 30, 1973. Part C is black lung claimants who sought payment of their claims after June 30, 1973.

As to part B the Federal Government pays the whole tab out of general revenues. As to part C, it has the power to recover if it can discover the responsible coal mine operator for whom the particular miner worked. Right now the U.S. Government has paid over 97 percent of the claims because those against whom it is claiming over have contested the claims. So, for practical purposes the Government has paid the whole bill.

There are no workers' compensation laws which are sufficient to warrant approval of the Department of Labor, which would displace the Federal program, and the effort by the Federal Government to collect from those operators who would be liable to the miner have been largely unsuccessful. In the meantime, these claims are paid by the Federal Government. The industry is contesting 97 percent of the claims which were filed after June 30, 1973. Up to now, the entire program has been costing nearly $1 billion a year.

The 1-percent ad valorem tax which is contained in this bill, Mr. President, is insufficient to pay future costs. The reason it is insufficient is found at page 7 of the report of the Committee on Finance which dealt with the matter of taxation under this bill, within its jurisdiction. And, it will be noted that the tax, to wit, the 1 percent, which would raise the funds needed to pay the bill for black lung claimants only if two aspects of the black lung bill before us are eliminated. These are: first, the prohibition against reinterpreting X-rays; and, second, the presumption of eligibility after 25 years' work.

The prohibition against reinterpreting X-rays is a particularly egregious part of this bill, which I violently opposed in the committee, and which I sought to strike and was defeated by a divided vote of 6–5. That involves the right of the Federal Government to have the X-ray of the miners' lungs reexamined by a Federal Government expert in order to validate this aspect of a miner's claim. This bill prohibits—I emphasize that, prohibits—that reexamination, an unheard of stultification of justice at a high cost to the taxpayers of the United States.

My colleague and member of the minority of the Committee on Human Resources, Senator CHAFEE, of Rhode Island, will move the same amendment I moved in committee in that regard very shortly, and I hope very much the Senate will sustain that.

Now, if the Senate sustains the amendment it will represent, over the 5-year

period for which the tax is levied, a cut in the bill's cost of roughly $250 million.

I know of no one who is going to move with respect to the 25-year presumption. That is described also, if Members wish to identify it, at page 2 of the report of the Committee on Human Resources, which reads as follows:

A survivor is entitled to benefits if the miner died on or before the date of enactment of the bill, and worked 25 years in mine employment prior to June 30, 1971, unless it is established that the miner was not partially or totally disabled due to pneumoconiosis.

In short, Mr. President, I made that deal. The bill was very much tougher on presumptions before I worked that deal out with Senator RANDOLPH and, hence, I do not wish to call into question my own agreement, and I hope no other Member will.

So the assumption of the Committee on Finance that that item would be excluded is not going to happen, and that is a pretty big cost. That involves $176 million over the 5-year period. So we know that unless the Chafee amendment carries—and I have joined in that amendment with Senator CHAFEE as a cosponsor—there will be a minimum shortfall of $176 million in the tax, and it may come to more than that.

I point out to my colleagues that there is nothing in the Senate bill that calls for an appropriation out of general revenues to make up for that shortfall. It simply is silent on the subject. I can only hope that the House bill looks after it, and it is now known we do not intend to take final action on this matter until the House has passed its bill. So I call to the House's attention, if they go for the 1-percent ad valorem tax, that there has to be a provision which will provide for financing as to any shortfall. Otherwise this will be a bridge too short, by 1 yard or 100 yards, we do not know, depending on what disposition is made of these assumptions of the Committee on Finance, and what disposition is made of the Chafee amendment to which I have just referred.

Mr. President, otherwise, aside from the matters which I have discussed, the bill liberalizes the program pretty much along the lines which we have passed on two previous occasions, and I have no doubt will pass again. But I believe that what this bill highlights very markedly and sensationally is the problem we have in dealing with this kind of an industrial disease in one industry while leaving all other industries uncovered, relatively speaking, because the workers' compensation laws and occupational health and safety law just do not adequately cover occupational diseases.

I appreciate the work which was done by the Committee on Finance. I see Senator LONG is in the Chamber. I wish to reiterate what I have just argued, Senator LONG, so that you may hear it: There were two assumptions upon which your committee based the tax, one of which may be realized by an amendment which Senator CHAFEE and I are proposing, to wit, reexamination of X-rays—that is $250 million over the 5 years. But the other one, the 25-year presumption that a miner had black lung because he worked in the mines for 25 years, I do not think is going to be realized because I worked out that arrangement myself with Senator RANDOLPH in order to deal with a much worse automatic entitlement provision.

So I will not challenge it, and I hope no other Member does because when one works something out, as you and I well know, you had better leave it alone.

Mr. LONG. Mr. President, if the Senator will yield at that point, I applaud the Senator as one who, when he makes a commitment, keeps it. He is that kind of a man, and we all admire him for it.

But I am sure he realizes that not everybody made that commitment.

Mr. JAVITS. That is correct.

Mr. LONG. A lot of other Senators did not make the commitment.

From my point of view I find it very difficult to conclude that a man had black lung just because he worked around a mine for 25 years, when you can find all kinds of evidence to the contrary. He might not have it at all. In other words, there are some people who worked in mines or worked near mines, in situations where they did not have this exposure to the same type of air pollution that causes black lung.

If they do not have it, for the life of me I do not see why we ought to presume somebody had black lung unless we have some medical evidence that he had it.

Mr. JAVITS. In mitigation, may I point out the reasons why I worked this out, and I think it is a fair solution. As finally drafted we only apply this provision to the survivors of such miners after their death, so that the plea of my colleague from West Virginia respecting widows and orphans is a justified one.

Mr. LONG. Mr. President, if the Senator will yield at that point, after his death why not do an autopsy and then you know whether he had the black lung? You do not need to leave it to doubt then. Do an autopsy and find out.

Mr. JAVITS. The other aspect of the provision contained here is that it is a presumption that may be rebutted by the Secretary of Labor with adequate evidence. That may be difficult to obtain, and as the Senator knows autopsies require the consent of the family of the person who is going to be autopsied.

Mr. LONG. The pain is no longer there when a person is a corpse. By my beliefs, the spirit has departed. The person does not feel any pain when the person gets to be a corpse. From my point of view they can do all the autopsies they want on me after my spirit has departed. The family has the body. They have the body right there. So they have the evidence to prove that the man had the black lung or did not have the black lung. All they have to do is just produce the evidence which can be the basis of an autopsy and if the autopsy said a person had the black lung we should pay it.

It seems to me it is exactly the same principle as we were discussing with regard to the X-ray. Someone will go to a family doctor, who represents all these people, is fond of the clients and very much on their side, taking an X-ray. Then someone representing the union will say: "If the family doctor says he looked at that X-ray and he said a person had black lung, that is all there is to it. No one else can look at it."

It is awfully easy to win a debate if the other side is not going to be able to see the evidence or even argue about the evidence. If we put that principle throughout this Government, I think it would give a totally impossible situation. I am glad the Senator sees that. But is not the principle the same? The family has the evidence. There is the corpse. If he has the black lung, the autopsy would show it. How can you contend that when you have the evidence to prove the person had the black lung they should presume it without taking a look at the evidence?

Mr. JAVITS. There are two problems with that. One is that in the arrangement that I worked out with Senator RANDOLPH this applies only to those who had 25 years or more in the coal mines prior to June 30, 1971. So a good many of those are beyond autopsies.

The second point is that, of course, there are many people in our country who for religious reasons or sentimental reasons will not allow a member of their family to be subject to an autopsy.

I did, however, work out with Senator RANDOLPH the following: The presumption may be rebutted because the bill says that eligible survivors shall, upon request by the Secretary, furnish such evidence as is available with respect to the health of the miner at the time of his death.

Again, I repeat to the Senator, it was a much tougher provision before I got it worked out. But I raise it only because it is highlighted in the Finance Committee report as having a substantial price tag over 5 years.

I yield myself 5 additional minutes.

May I say to the Senator that I hope the Senator will prayerfully consider whether or not he should or should not amend that section. I hope he does not for the reasons I have stated, but I think in our debate we have brought out the pros and cons of why I worked it out with Senator RANDOLPH as I did.

Mr. President, I believe I have explained to the Senate that, as is my duty as the ranking member of the minority and I have done it throughout the black lung legislation, it is my job to see that the Senate is fully informed and that what should be contested is contested.

There will be, as far as I know, two amendments. First is the amendment in which I joined with Senator CHAFEE on the rereading of the X-rays, and I hope very much the Senate approves that. Just common due process and justice holds that the Federal Government should have a right to reread these X-rays.

Second, the other amendment that I will have will be to eliminate the fact that this program would, for the first time, operate without any termination point.

The tax has a termination point, which Senator RANDOLPH may move to strike, to wit, September 30, 1982. On the

other hand, if the termination point is removed by the motion of Senator RANDOLPH, then I think it should still follow that we should review this program because it has a shortfall in terms of the amount the tax it raises as against the projected benefit costs. We certainly should review it at the end of 5 years. That amendment will come along in due course. In the meantime, I have outlined to the Senate the issues of cost, and again I do not begrudge anything to the coal miners. God knows, it is a tough enough occupation and a dangerous enough occupation. I only bemoan the fact that we have not caught up with treating others who suffer just as much the way we are treating the coal miners.

Mr. RANDOLPH. Mr. President, will my able colleague yield?

Mr. JAVITS. I yield.

Mr. RANDOLPH. I make this observation. He speaks of other workers who have problems of impairment of their health because of their employment, and that is true. Yet I would remind the Senate, and the Senator from New York, of course, was a part of our programing, in 1969, even though we were thinking in terms of a national bill for occupational health and safety, we realized that it was a matter of priority to bring the Coal Mine Health and Safety Act into being, and so this was done in 1969. Then in 1970, we passed the national Occupational Safety and Health Act with application to other types of employment, not that we did not need to do, as the Senator has indicated, in other occupations or work programs but there was the priority considered very carefully at that time and in 1969, as I have indicated, the coal mining problem was addressed and then 1 year later with the passage of the Occupational Safety and Health Act we gave our attention as a Senate and a Congress to the problems of other industry and employment therein.

Mr. JAVITS. Mr. President, may I reply by saying that I did not agree or subscribe to the theory of a preference for the coal miner. But I put it on the basis of not begrudging justice if it can only be highly partial to those whom it benefits while we must await the full measure of justice to those who are not so benefited. That is the way I felt about this bill.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. Mr. President, will the manager of the bill yield me 2 minutes?

Mr. RANDOLPH. I yield to the able Senator from Kentucky (Mr. HUDDLESTON), the 2 minutes he has requested.

Mr. HUDDLESTON. I thank the Senator.

I shall respond to the allegation made by the distinguished Senator from Louisiana relative to the rereading of the X-rays.

The bill provides, if I understand it correctly, that if the question of fraud enters into the picture, the Government does, of course, have the opportunity to correct that. It requires also that if the quality of the X-ray itself is not sufficient then the Government can go behind that picture.

The suggestion seems to be that we are not able to trust a physician if he is a local physician, even though he may be just as qualified as a Government physician. As a matter of fact, the bill requires that he be qualified; that he be either certified by the board as a competent radiologist or eligible for certification.

Why should we assume that we can trust a Government radiologist, no better qualified, just because he happens to be on the Government payroll? This has been one of the very serious problems with the black lung program—one that has caused great delay in approving applications, and one that has denied benefits to many people who are entitled to them.

I think we ought to bear in mind that we are not asking that carte blanche authority be given to the local physician. He has to be certified. He has to have an X-ray that is of sufficient quality to justify the reading that he makes; and if there is any evidence of fraud at all, of course, proper measures can be taken.

Mr. RANDOLPH. Mr. President, I appreciate the comments of the Senator from Kentucky, because it is important that what he says be understood by all Members of the Senate. I stressed that in my formal statement on the provisions of the bill. The Senator's stressing of the aspects of fraud and competence is very important to the consideration of this bill.

The PRESIDING OFFICER. Who yields time?

UP AMENDMENT NO. 693

Mr. CHAFEE. Mr. President, I have 1 hour, I believe, on my amendment; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. CHAFEE. I would like to take 15 minutes of that time, Mr. President.

Before starting, I ask unanimous consent that Don Zimmerman and John Rother of Senator JAVITS' staff, and Lee Verstandig and Nancy Barrow of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Amendments are not in order until the committee amendments have been disposed of.

Mr. CHAFEE. Mr. President, I ask unanimous consent that it be in order to consider my amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

The second assistant legislative clerk proceeded to read the amendment.

Mr. CHAFEE. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 5, line 13, strike out through line 11 on page 6.

On page 6, line 12, strike "(b)" and substitute "Sec. 105.".

Mr. CHAFEE. Mr. President, I think it would be well if we started at around zero to examine this unique provision in the bill that comes before us today.

We are dealing with the matter of black lung disease. Under the law as it presently exists, a physician in the community where the miner resides makes an examination of the X-ray and sends it in to Washington, D.C. with his comments, saying that black lung disease exists.

It then comes to the Government, with its readers—and these are called B-readers; they are experienced, trained lung X-ray readers, they are not generalists, they are people who have gone through a special course at Johns Hopkins University to read lung X-rays.

I might say reading X-rays is a particular science, and it is particular for whatever section of the body a man is reading X-rays for. A man who is an expert at reading X-rays for the head, skull, or the limbs is not necessarily an expert at reading X-rays for the chest.

Under present circumstances, the X-ray comes in and the Government B-reader examines it. He can make a determination whether he concurs with the finding made in the local community, or whether he does not.

I might point out that the Government reader does not always find that there is no black lung disease there. As a matter of fact, according to the latest study, made in 1975, some 18 percent of the cases were upgraded. In other words, they found the existence of a more serious case of black lung than was previously thought to exist, or, for instance, they may have found black lung where none was previously found. So the Government, in these 18 percent of the cases, found more.

Furthermore, Mr. President, in some 40 percent of the cases, the Government expert readers detected unforeseen, unrecognized diseases, which accrued to the benefit of the miner in giving him warning, perhaps, of some other disability. They detected, for example, lung cancer, tuberculosis, and emphysema.

What is proposed in this bill, I think we will all agree is an extraordinary provision. What is proposed here? That now the local reader of the X-ray—and it is true he must be a qualified—let us get the exact language—he must be a qualified radiographic technologist or technician. He is a local boy, a local man; he sends in his X-rays, Mr. President, and says there is black lung disease, and there is no way that the Federal Government can have another reading.

Why, this is an open door to the Treasury. It is amazing that they do not just send it in and say, "Send us the check." The Government has no chance to read it and say, "Yes, there is" or "No, there is not."

The distinguished Senator from Kentucky has observed that this would not apply in cases of fraud. But fraud means that when you are sending in an X-ray for miner X, it is really an X-ray of miner Y. It does not really go into the definition of whether or not there is black lung disease there.

The local doctor—and I must say I admire the distinguished Senator from Kentucky when he says that we are overly-suspicious to assume that a physician could, perhaps, not be right; but many physicians are not always right. I suggest that lawyers are not always right, and doctors are not always right, and maybe even Senators are not always right—although I seriously doubt that.

[Laughter.]

I yield to the distinguished floor manager of the bill.

Mr. RANDOLPH. And that is why——

Mr. CHAFEE. On his time.

Mr. RANDOLPH. Yes. That is why I say, with all respect, that I want this amendment defeated, because I think the Senator from Rhode Island is wrong.

Mr. CHAFEE. Well, that may be. That is what makes the world go around.

Mr. President, I really, in a way, have to admire people with a lot of brass. I mean, they find an opening and they drive a truck through it. Begrudgingly enough, you have to hand it to them. To come in with a provision like this is really something. The Government has no defenses whatsoever.

Sitting up here in the gallery we have taxpayers of the United States, and we are saying to them, "You are not entitled to be represented in this instance." The only person who has a say is the examiner of the X-ray down in the local community. The man from Wheeling, W. Va., sends in the X-ray and says: "Black lung is here," and, by golly, they can send along a self-addressed envelope with the message: "Please send us our check." It is amazing that they have not put in a provision that they can request a blank check and say: "Let us fill in the amount."

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. CHAFEE. Yes.

Mr. LONG. In a different sort of situation, I had a dear friend who went to a well-known, well-thought-of doctor, a man who was president of the medical society in the State capital, Baton Rouge, a very dear friend of his and a respected member of the medical fraternity, both before and afterward.

This friend of mine went to see this very good doctor, good man, highly thought of in every respect, and the doctor diagnosed his complaint as being diverticulitis.

Later on he went down to the Ochsner Foundation in New Orleans, and those people said, "This looks like cancer to us."

Then they asked would the doctor in Baton Rouge send them the X-rays that he had taken. He insisted that his diagnosis was right, that the man had diverticulitis.

They said, after examining the X-rays, "In our opinion the man has cancer, and better get the growth out of his intestine or he is going to die in short order." They performed an operation, and found the man had cancer, just as they had suspected.

Under this provision, those more qualified experts in the field would not even have the right to say, "That is a good picture" or "That is a clear picture."

Well, why not let them tell the rest of it: Yes, that is a clear picture and what the picture says is that the man does not have black lung, he has cancer, which is an entirely different disease. Rather than treat him for black lung, he ought to remove the lung for cancer.

To me, that makes no sense at all, to say that somebody could take a look at an X-ray and say, "Yes, it is a clear X-ray," and not proceed to say what the X-ray says, that the man has cancer, not black lung at all.

Mr. CHAFEE. Mr. President, I would like to discuss briefly with the floor manager of the bill how we are going to proceed. As I understand, there will be no votes before 12:30. That does not necessarily mean that there will be no vote, but no votes before 12:30.

The PRESIDING OFFICER. No rollcall votes.

Mr. RANDOLPH. Except on the Senator's amendment.

Mr. CHAFEE. No, no rollcall votes. The yeas and nays have been ordered on my amendment.

Mr. RANDOLPH. I am sorry. I might have been moving around at the time of the request of Senator BYRD.

What is the situation as to the first rollcall vote?

The PRESIDING OFFICER. The order is that there be no record rollcall votes before 12:30.

Mr. CHAFEE. So, the way I envision it is that, any time after 12:30, I could call up and ask for a vote on my amendment. I guess there are no other amendments on the desk, are there?

The PRESIDING OFFICER. There are other printed amendments that have not been called up yet, and there are committee amendments to be disposed of, also.

Mr. CHAFEE. Perhaps I should just proceed on the remainder of my time. How much time do I have? I said 15 minutes.

The PRESIDING OFFICER. The Senator has used 9 minutes. He has 6 minutes remaining.

Mr. CHAFEE. Mr. President, there is a problem that was mentioned by the distinguished Senator from Kentucky, in his brief remarks, and the distinguished Senator from West Virginia. That is the problem of delay. We have a real problem here and I think we all acknowledge it.

Under the current system, the X-ray comes in and there is a long delay between the reading of it and the payments. First, let me briefly ask, is it all on the Government's side? Not at all. The way it works now, Mr. President, is that the X-ray comes in from the field. Accompanying it is a statement by the local physician. The Government B-reader then reads it.

Let us assume that the B-reader finds no black lung disease. Does that end the situation; the big bad Government has had its say and the miner is denied his compensation? Not at all.

It then goes to an administrative law judge. He is a third party. He then can call in more expert witnesses, ask for further X-rays. The claimant can present expert testimony. Then a decision is made.

Now, let us say, Mr. President, that the administrative law judge decides in favor of the Government. Does the miner lose? No, sir, he does not lose. He has a chance of an appeal to the so-called Benefits Review Board.

The complaint is this, Mr. President, that all of this takes a long time and, in some instances, has taken over 600 days. That is nearly 2 years. That is wrong. I agree that is wrong. The manager of the bill agrees that that is wrong. I suppose the Senator from Kentucky undoubtedly agrees that that is wrong.

But what is the solution? Is the solution to throw open the gates to the Treasury and say, "Come in and help yourself; no delay, no waiting; six chairs"? Not at all. The solution is to improve the administrative process. If we in the U.S. Senate, the Congress of the United States, cannot improve that process, then we ought to throw up our hands in despair.

There are different ways we can improve the process. For example, we can have the reader, this B-reader, down in the local communities. Another example is to have more B-readers.

The present man in the Labor Department, Donald Elisburg, Assistant Secretary of Employment Standards, has testified that he is going to improve this process. I think we ought to watch over his shoulder and see that it is speeded up. If it is not, that is our prerogative, to get on his back and get him going.

The solution, Mr. President, is not to say that there is a delay therefore, let us deprive the Government of any defenses it might have.

Mr. President, I point out another interesting provision of this act. Oddly enough, it deprives the Government of its defenses, but it does not deprive the owner of the mine of his defenses. In those instances where there is a known mineowner who employed the claimant, and the claimant comes in for his claim, in that case, there can be a rereading, a second reading, under this act, to protect the owner of the mine. To me, it is incongruous and I just do not understand it, that we are depriving the Government of a defense that we are not depriving the owner of the mine of. I suppose that, under the U.S. Constitution, we could not deprive the owner of the mine of that defense, but we are going much farther in protecting the owners of the mine than we are the U.S. Government and the taxpayers of the United States.

Mr. President, I supported this overall bill, but this amendment or this provision in the bill just went too far. I think, as the able Senator from New York previously pointed out, we are doing for this group of citizens of the United States, mainly mineworkers—and, by the way, the classification of a mineworker is very, very broad. It does not go quite so far as to include anyone who has ever seen a mine, but it goes pretty far: working around a mine.

So we are treating this group in a special way.

Mr. RANDOLPH. Will the Senator yield at that point?

Mr. CHAFEE. Yes.

Mr. RANDOLPH. It is not just going around the mine, but we specifically say where the dust conditions would be of the same category. We make it very plain.

Mr. CHAFEE. Yes. So we are treating this special group of citizens of the United States in a very special way. The taxpayers of the United States are treating these miners, this group—never mind textile workers, never mind people who work around other dangerous substances like asbestos—they are treating this special group in a very special way. We support it; but let us not throw open the doors of the Treasury and say, "Come on in and help yourselves," on the basis of one local doctor's reading.

Mr. HUDDLESTON. Will the Senator yield on that point?

Mr. CHAFEE. Yes.

Mr. HUDDLESTON. The Senator is concerned about using taxpayers' money to this large extent on the basis of one competent, qualified physician's judgment. It is not unlike what we are doing now with hundreds of millions of dollars of the taxpayers' money in the medicaid and medicare programs throughout the country.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. CHAFEE. I yield myself 5 more.

Mr. HUDDLESTON. The Federal Government does not review all those decisions made by physicians to determine whether or not payment is justified. Why impose that penalty on the black lung sufferers?

Mr. CHAFEE. May I say in response, there are all kinds of review of medicare and medicaid programs. There are utilization review committees; there are all kinds of reviews. As we all know, however, one of the great problems with these programs is the scandals that have developed because there is inadequate review. It seems to me that the Senator is citing not only a situation that is not quite as described, because there are checks, but, furthermore, the very programs that are in trouble because there are not adequate checks.

Finally, Mr. President, I point this out: This provision in this act is not supported by the administration. The administration came in and contested, spoke against this. I read the language of Mr. Elisburg:

> We feel it is appropriate for the Government to provide for medical experts to read X-rays and X ventilatory tracings, even if other medical personnel have already interpreted them. The Government role in assuring validity and consistency in interpretation is basic to the integrity and equity of the program and must be continued.

Mr. President, let me just say finally, I have supported this bill. I have great admiration for the sponsor of the bill because, personally, I serve on two committees under his distinguished leadership.

It always amazes me, when somebody has something that is pretty good, why they overreach. To me, this is one bridge too far. It just stretches the credulity and, I believe, the good judgment of the Senate, if we go this far.

That is why I have supported the amendment that has been proposed.

The PRESIDING OFFICER (Mr. HUDDLESTON). Who yields time?

Mr. RANDOLPH. Mr. President, has the amendment been offered?

The PRESIDING OFFICER. Yes, the amendment is pending.

Mr. RANDOLPH. Then the time is controlled on the amendment?

The PRESIDING OFFICER. That is correct.

Mr. RANDOLPH. And that is 30 minutes to the proponents of the amendment?

The PRESIDING OFFICER (Mr. NELSON). The Senator from West Virginia has 30 minutes on the amendment.

Mr. RANDOLPH. Mr. President, I yield such time as I may desire.

I wish to call attention to a letter that has been sent by Senator CHAFEE to all Members of the Senate. I presume they have the letter and I have in recent minutes been able to look at its language.

I know that he, of course, feels very strongly on this matter. With good humor, however, I am sorry he is shocked because I do not want any shock waves running through our colleagues in connection with this debate.

Senator CHAFEE has described the amendment he proposes, but, with due respect to my colleague, whom I admire and esteem, I must indicate that the Senator from Rhode Island, I believe, is not completely informed of the effect of section 105(a) as contained in the bill.

First, the letter asserts that the Department of Labor will be denied the opportunity to reread X-rays.

Now, this is not the case. The Department is not precluded from rereading X-rays, but the Secretary is precluded from interposing an additional opinion as to the existence or stage of advancement of pneumoconiosis under certain conditions.

That is quite a difference from what has been stated.

The letter also indicates, and I quote:

> Once an X-ray is filed and disability is claimed, benefits are paid.

Mr. President, for the sake of so many disabled miners, I only wish that statement were true. I state unequivocally that it is not true, as I have tried earlier to point out in my opening statement, and this is the very heart of section 105(a).

The X-ray is an imperfect tool. It cannot be used, save in cases of complicated pneumoconiosis, to be the sole determinant of eligibility.

I quote from a document submitted to the Department of Labor by a respected pulmonary specialist, Dr. Donald Rasmussen.

As I make this quotation, I would like the Senator to listen, and I know he will carefully, to Dr. Rasmussen's words.

> Chest films of good quality should be obtained on all applicants primarily to exclude imperfections, malignant or other diseases, or conditions of the lungs or thorax. There is little or no reason for the elaborate system of multiple readers.

I underscore what he said by repeating that there is little or no reason for the elaborate ssytem of multiple rereaders, since the presence or absence of pneumoconiosis per se is pertinent only in cases who have worked less than 15 years in the coal industry.

Then he says something that I think is very valid:

> Even in these cases there is no relationship between the X-ray findings and the presence or absence of impaired function.

I agree that the executive branch must be able to reread X-rays for the purpose of discovering disease. That is a proper function in an illness. But that is not the issue here, as I see it, in the amendment.

The issue, I think, is whether rereaders hired by the Government should be allowed to second-guess the coalfield radiologist who is much more knowledgeable about the individual miner—and I stress that very much as we discuss the subject of the matter of rereaders.

In connection with the Senator's amendment, I think the rereading of X-rays by the so-called B or expert readers hired on a consulting basis by the Department of Labor and by the Social Security Administration has been bitterly opposed by miner claimants and their union.

We have been assured that the B-reader is better qualified to determine the presence of pneumoconiosis and its stage of advancement than the coalfield doctor, whether or not he is a radiologist. Yet the B-reader can interpret only what is presented to him. He has but one X-ray to review for the most part—a two-dimensional and imperfect representation of the condition of the miner.

American College of Radiology representatives acknowledge that the X-ray is a useful test, but that it is only a fragment of the whole body of evidence that should be considered. Dr. Russell Morgan of Johns Hopkins University, which administers the B-reader testing program, agrees that, to be properly read, X-rays should be of good quality, and further that there should be both an AP, or anterior-posterior, film and a lateral, or side-view film.

In the light of the admitted imperfection of the X-ray as a determinant of impairment due to pneumoconiosis, greater reliance should be placed on the assessments of those who are familiar with the conditions of disabled coal miners and who deal with their health problems on a regular basis—the coal field doctors.

To limit the re-reading of X-rays, as this committee did in last year's reported bill and as it is recommended in the pending bill, is not an adverse reflection on the capabilities of B readers, nor does it cast aspersions on the X-ray as a useful tool in medical diagnosis.

It is, however, intended to support the proposition that the X-ray is not a definition tool, and that the initial reader is more competent to judge impairment and disability in the whole man than is the reviewing reader.

One recent study found that, on comparing British and American readers—all of the American readers in this study were those regulatory used by the Social Security Administration in their determination of eligibility for claims—Amer-

ican readers agreed with British readers as seldom as 45 percent of the time and among each other as seldom as 48 percent of the time. After noting the disturbing results of this study, the researcher quipped, "Clearly, coal workers pneumoconiosis, like beauty, is in the eye of the beholder."

It is important, in order to avoid misconceptions about the value of the X-ray, to be aware of the fact that a chest X-ray does not relate to lung disability. It can. but sometimes does not, identify coal workers' pneumoconiosis. It does not identify other disabling lung diseases associated with underground coal mining. In 1972, these limitations on the value of the X-ray were recognized, and the policy with respect to their use was modified. Nevertheless, both Social Security and the Department of Labor have continued to place undue reliance on the X-ray in the determination of black lung claims. The Committee on Human Resources has been told that fully 60 percent of the X-rays initially interpreted as positive for pneumoconiosis have been re-read by department contract radiologists as negative.

As a matter of policy, Mr. President, we should not sanction a "battle of the experts" in this area. Black lung victims and their widows have been the only casualties of this battle in the past. As we strongly urged in 1972, the disabled miner and the widow must be given the benefit of any doubt surrounding their disability. X-ray interpretation in this field is not an exact science. Medical knowledge to determine to what extent coal mining relates to disability in a specific miner is woefully inadequate. Again, it is the miner who suffers as a result of this defiiciency.

Mr. President, I think all Senators understand that I am very earnest in my opposition to this amendment. I recognize, of course, that there are those who feel otherwise, and certainly Senator CHAFEE and Senator JAVITS, who cosponsor the amendment, feel otherwise. I think it would be wrong for the Senate to accept the amendment. Its acceptance would be severely detrimental to the disabled miners and widows. It would sanction the existing practice, which even those who are engaged in it acknowledge is not determinative and is far from perfect.

Mr. President, how much time do I have remaining on the amendment?

The PRESIDING OFFICER. The Senator from West Virginia has 16 minutes remaining.

Mr. RANDOLPH. I thank the Chair.

The PRESIDING OFFICER. Who yields time?

If no time is yielded, it will be charged equally to both sides.

Mr. CHAFEE. How much time do I have remaining?

The PRESIDING OFFICER. The Senator from Rhode Island has 12 minutes.

Mr. ROBERT C. BYRD. Mr. President, I thank the Chair for his indulgence. I suggest the absence of a quorum with the time being charged to both sides on the bill.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered and the clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR VOTE ON CHAFEE AMENDMENT AT 2 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote on the amendment by Mr. CHAFEE occur at 2 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 694

Mr. ALLEN. Mr. Presdent, I send to the desk an amendment introduced on behalf of myself and my distinguished senior colleague, Mr. SPARKMAN, and I ask that it be stated.

The PRESIDING OFFICER. Does the Senator seek unanimous consent?

Mr. ALLEN. Yes, I ask unanimous consent.

The PRESIDING OFFICER. There is an amendment pending.

Mr. ALLEN. I ask unanimous consent that this amendment might be considered at this time.

Mr. JAVITS. What is the unanimous-consent request?

The PRESIDING OFFICER. The Senator from Alabama asked unanimous consent that the amendment he sent to the desk be considered at this time. Is there objection? The Chair hears none, and it is so ordered.

Mr. JAVITS. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Is the pending amendment temporarily set aside?

The PRESIDING OFFICER. It is temporarily set aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN), for himself and Mr. SPARKMAN, proposes unprinted amendment No. 694.

Mr. ALLEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add new section to bill as follows:

That section 401 of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting the subsection designation "(a)" after "401." and by adding at the end thereof the following new subsection:

"(b) Congress finds and declares that there are a significant number of iron miners living today who are totally disabled due to pneumoconiosis or silicosis arising out of employment in one or more of the Nation's iron mines; that there are a number of survivors of such miners whose deaths were due to these diseases; and that few States provide benefits for death or disability due to these diseases to such miners or their surviving dependents. It is, therefore, the purpose of this title to provide benefits, in cooperation with the States, to iron miners who are totally disabled due to pneumoconiosis or silicosis and to the surviving dependents of miners whose death was due to such diseases; and to assure that in the future adequate benefits are provided to iron miners and their dependents in the event of their death or total disability due to pneumoconiosis or silicosis.".

SEC. 2. (a) Section 402(b) of the Federal Coal Mine Health and Safety Act of 1969 is amended to read as follows:

"(b) The term 'pneumoconiosis or silicosis' means a chronic dust disease of the lung arising out of employment in a coal or iron mine.".

(b) Section 402(d) of such Act is amended by striking "underground coal" and substituting "coal or iron".

SEC. 3. Parts B and C of title V of the Federal Coal Mine Health and Safety Act of 1969 are amended by inserting "or silicosis" after "to pneumoconiosis" each time it appears and by inserting "and silicosis" after "for pneumoconiosis" each time it appears.

SEC. 4. (a) Section 411(c)(2) of the Federal Coal Mine Health and Safety Act of 1969 is amended by striking out "underground coal" and inserting in lieu thereof "coal or iron".

(b) Section 422(a) of such Act is amended by striking "and underground coal" and inserting in lieu thereof "a coal or iron".

(c) Section 422(1)(1) of such Act is amended by striking out "coal".

Mr. ALLEN. Mr. President, this amendment offered by Mr. SPARKMAN and myself has the very same provisions as S. 1041, which we introduced on March 18, 1977. What it does is to make the same provisions for iron ore miners who develop silicosis that are made for coal miners who develop pneumoconiosis.

We have given a great deal of attention to the plight of coal miners, but practically no attention to iron ore miners who suffer a disease just as debilitating.

Senator SPARKMAN and I have had this bill and other bills introduced here in the Senate and, thus far, there has been no hearing on our bills.

The purpose of this amendment is to call attention to this situation which seems to work a hardship on the iron ore miners, and the purpose of the amendment is to put the iron ore miners on the same basis as the coal miners. Senator SPARKMAN and I have supported all of the black lung legislation, and we support the bill under consideration, but we just feel that with so many iron ore miners suffering from silicosis, which is just as injurious and just as deadly as the pneumoconiosis, we feel that it is unfair to neglect any longer the plight of the iron ore miners.

We have literally thousands of employees in the iron ore mines in Alabama who have been or may yet become afflicted with silicosis. We would like for some similar provision to be made for the iron ore miners that is being made for the coal miners. We would hope that they would be treated on the very same basis. We hope that the chairman of the committee, the manager of the bill, and the ranking minority member of the committee, are willing to accept this amendment.

I yield to my distinguished colleague, Mr. SPARKMAN.

Mr. SPARKMAN. I thank my colleague.

Mr. President, I might say I had an exchange with the chairman who is handling this bill earlier with reference to that, and I told him that we do have this

trouble there and it is called red lung to distinguish it from black lung.

Mr. ALLEN. Yes.

Mr. SPARKMAN. But they undergo exactly the same conditions, and I have had assurance from the chairman that it will be studied. In fact he tells me there are several different categories that are going to be studied and this is included among them.

Mr. ALLEN. I am sure my distinguished colleague would agree with the legal axiom that "Justice delayed is justice denied." So we are hopeful that some action can be taken on this in the very near future.

Mr. SPARKMAN. Of course, I wish to see it, also. I had a colloquy with the chairman a short time ago, and he did assure me that it was undergoing study, was included in several categories, and a study is provided for in the bill.

Mr. RANDOLPH. Mr. President, will the able Senator from Alabama yield at this point?

Mr. ALLEN. Yes, I am delighted to yield to the distinguished chairman.

Mr. RANDOLPH. The concern of the two Senators from Alabama on this subject, as indicated in their introduction of the bill, which had been presented during the 95th Congress and on previous occasions in one form or another, is certainly proof positive of their desire that the occupational disease study of red lung or other diseases that are associated with types of mining be matters of consideration in the Human Resources Committee and that we attempt to cope with these problems as expeditiously as possible.

We felt at this time as we were amending the original Coal Mine Health and Safety Act of 1969, which was amended in 1972, in this legislation, amending those earlier acts of 1969 and 1972, we do just the job here in connection with the coal mining problem. We think this will conclude the problems which have been very complex in connection with the payment of claimants. But we have felt the necessity and in fact we have recognized the arguments that are being made here, and in the legislation on page 25 of the pending bill we have a section entitled "Occupational Disease Study." I ask unanimous consent at this point that language be printed in the RECORD.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

OCCUPATIONAL DISEASE STUDY

SEC. 112. (a) The Secretary of Labor, in cooperation with the Director of the National Institute for Occupational Safety and Health, shall conduct a study of all occupationally related pulmonary and respiratory diseases, including the extent and severity of such diseases in the United States. Such study shall further include analyses of (1) any etiologic, symptomatologic, and pathologic factors which are similar to such factors in coal workers' pneumoconiosis and its sequelae; (2) the adequacy of current workers' compensation programs in compensating persons with such diseases; and (3) the status and adequacy of Federal health and safety laws and regulations relating to the industries with which such diseases are associated.

(b) The study required by subsection (a) of this section shall be completed and a report thereon submitted to the President and the appropriate committees of the Congress within eighteen months after the date of enactment of this Act.

Mr. RANDOLPH. We are saying that we will cooperate through the Secretary of Labor with the Director of the National Institute for Occupational Health and Safety, and that there shall be a study of all occupationally related pulmonary and respiratory diseases, including the extent and the severity of those diseases.

I will not state what that study would do, but it would be very thorough and very detailed.

We will look into the adequacy of current workers' compensation programs in connection with those persons with such diseases.

And we will look into the status of the laws that are now upon the books relating to the industries and the diseases which come from working within those businesses or industries.

We ask that the report be submitted to the President and to the appropriate committees, and we have allowed 18 months for the completion of that work and report to the President and to Congress.

I hope that, in this instance, fully recognizing the intent which is proper of the Senator from Alabama, the amendment not be a matter of vote because, in the purpose we are with the Senator, but having recognized it and knowing that we are coming to it, I trust that we can be given the opportunity to take care of it at a later time.

I remember standing in the well of the Chamber in 1965 when we brought up the Appalachian Regional Commission program, which now, of course, embraces 12 parts of States and the State of West Virginia as a whole. At that time there were Members very properly saying, "What about the other sections of the country that have these common problems?" I recognized them, and I pledged in the well of the Chamber that we would produce legislation for those other areas of the country.

I want to say that we kept that pledge, and now there are seven areas of the country and the Appalachian Commission, eight in all, where these programs have been rebuilding, where there is the thrust of common problems to areas of this country. This has been a matter that was not unduly delayed, but we had been studying the subject for 2 years. We were ready to act on the Appalachian problem, and then it took further study to get ready so that we could act properly on these other areas of the country. We did it, and it is somewhat a similar situation, as I see it, in connection with the request being made, and I leave it to the good judgment, of course, of my colleagues as to pressing the amendment. Or, with the assurance from the manager of this bill, we will be having this study and it will only take 18 months and the report will come then as to what we believe should be done.

Mr. ALLEN. I thank the distinguished Senator.

He is certainly well recognized for his fairness and his compassion. I call his attention to the situation that Senator SPARKMAN and I find ourselves in with our constituency that possibly we would have a coal miner in Birmingham living next door to an iron ore miner, both suffering from similar diseases caused under the same circumstances but in different mines.

The coal miner having black lung receives compensation, which is fair and which we approve of, but his neighbor, because he works in an iron ore mine, receives no compensation. We are pleased that the chairman has a study underway, and we are hopeful that that will show the necessity of enacting legislation in other fields as well as the field of black lung.

We would like to ask the distinguished chairman if it would be his purpose and his thought to wait until the study has been completed before we have a hearing before the committee. Would the Senator give us an indication if possibly we might have a hearing prior to the completion of this 18-month study.

Mr. RANDOLPH. The Senator is very persuasive, of course. Why does he not just trust the Senator who is now speaking to move these matters, with which he is very understandably concerned, as quickly as possible?

Mr. ALLEN. We certainly have full confidence in the distinguished Senator from West Virginia. We will accede to his request. Certainly we will be delighted——

Mr RANDOLPH. I think it is possible we could have what the Senator is requesting, but we would rather not be committed.

Mr. ALLEN. I would like to have an expression also from the distinguished Senator from New York on that point.

Mr. JAVITS. Certainly, Mr. President, I concur with the distinguished Senator from West Virginia as to the timetable question. I know of the great esteem with which we all hold him; I think his confidence is well trusted by the Senator from Alabama.

For those Senators who were not in the Chamber, they will recall or see in the RECORD that I called attention to that very problem. There is a problem of red lung for ironworkers, a problem of brown lung for textile workers, and a problem of white lung for talc miners.

The NIASH, the research agency of the National Institute of Safety and Health, is conversant with these matters. We have had some hearings already, and I am confident that within a reasonable time, a proximate time, we can afford a hearing to the ironworkers.

Senators may be interested to know that I am working very hard with Senator WILLIAMS, with the cooperation of Senator RANDOLPH, on workmen's compensation. We had the finding of a commission about 3 years ago that one deficiency in workmen's compensation was the failure to take account of these lingering diseases, which often take years to develop, but when they do develop are lethal in their character.

I shall persevere in that effort. There will be a bill introduced in September, I hope, by Senator WILLIAMS and myself, joined with others, to extend the workmen's compensation coverage to include those diseases, including the red lung which I have mentioned here. I hope we will have an opportunity to have the Senators from Alabama give us the facts and details on those things before then, whether in the hearings or outside them. But I can assure both Senators I am passionately devoted to their cause, and I am confident we will get abreast of them. I believe they feel as I do, that the coal miners' situation having been so bad, we do not begrudge them their relief, but we wish to bring the others up to the same kind of justice; and I pledge to both Senators to make every effort, with hearings, bills, and everything it takes to accomplish it.

Mr. ALLEN. Mr. President, I thank the distinguished managers of the bill. I believe the offering of this amendment has been highly productive, in that it has focused attention on the plight of other miners and other industrial workers who do contract these diseases in the performance of their duties.

The assurances that we have been given by the chairman of the committee and the ranking minority member are most reassuring, and we are hopeful that we can make progress in this area at an early date.

With these splendid assurances, for which are grateful, we ask that we be allowed to withdraw the amendment.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. ALLEN. I yield.

Mr. SPARKMAN. We appreciate the assurances given to us both by the Senator from West Virginia, with whom I had an exchange several months ago, and by the Senator from New York (Mr. JAVITS).

I might say that if the subcommittee to which he refers, or the full committee, has a hearing at some time in the near future, we would like an opportunity to appear as spectators.

Mr. ALLEN. Again I thank the distinguished Senator from West Virginia.

Mr. RANDOLPH. I am very conscious of the concern of the Senators from Alabama. It is a concern which is shared by the members of our committee, as indicated by Senator JAVITS, and earlier by me, in reference to remarks we made in colloquy with Senator SPARKMAN and now with Senator ALLEN.

The PRESIDING OFFICER (Mr. STONE). Does the Senator from Alabama withdraw his amendment?

Mr. ALLEN. I do withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

UP AMENDMENT NO. 695

Mr. RANDOLPH. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the consideration of the amendment submitted at this time?

Mr. JAVITS. And temporarily displacing the Chafee amendment?

The PRESIDING OFFICER. Temporarily displacing the committee amendment and the amendment by the Senator from Rhode Island (Mr. CHAFEE). Is there objection? Without objection, it is so ordered. The Clerk will state the amendment.

The second assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. RANDOLPH) proposes an unprinted amendment numbered 695:

On page 33, beginning on line 18, strike out "and before October 1, 1982.".

Mr. RANDOLPH. Mr. President, the report of the Committee on Finance states that the tax on coal imposed pursuant to section 202 of the bill is to terminate on September 30, 1982, and by implication, the trust fund.

The report, however, does not disclose why the tax is to be imposed for this limited 5-year period. I can appreciate that Finance Committee members might feel that a tax should not be imposed on a permanent basis if the level of benefits, over time, will be steadily reduced; for the following reasons, I judge it imperative to establish the tax with no termination date.

As in part B of the black lung benefits program, and as with other disability compensation programs, benefit payments are made for the duration of the disability. If the tax is terminated, then the program is also terminated. It follows that benefits, too, will be terminated. It is not fair or appropriate to provide benefits for 5 years and suddenly cut them off.

Proponents of a "sunset" tax provision may suggest that State workers' compensation programs will pick up the benefits after the Federal program is terminated. This is, I respectfully suggest, wishful thinking. It is not realistic to expect States to assume millions of dollars of liability voluntarily.

The alternative, I submit, is equally unacceptable. If the tax terminates, the benefits will have to be paid out of general revenues. If this is what is contemplated, it is merely a continuation of the existing system, only the situation is worse. With the reform provisions of S. 1538, and with the assumption by the trust fund of considerable liability which under existing law attaches to individual coal operators, the amount of general revenues required will be far greater than is currently the case.

One of the major reasons for the development of S. 1538 was to transfer the burden of paying black lung benefits from the Federal Government to the coal industry, where, we believe that burden belongs. If the tax is terminated after 5 years, this sound policy will be entirely nullified.

Mr. President, I oppose the termination of the tax on coal, and I ask that my amendment be approved.

Mr. JAVITS. Mr. President, first, to regularize the procedure, and I hope that my colleague from West Virginia will agree, I ask unanimous consent that the committee amendments, those made by the Committee on Finance, may be considered en bloc and treated as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, the reason that the Committee on Finance limits the operation of the tax is twofold. First, they want to take another look at this program if they are going to continue a tax that is going to produce, over 5 years, what they estimate as almost a billion dollars—$930 million.

Second, this tax that is to be levied will not pay for all of the part C claims. It falls short, and they say it falls short, unless two assumptions are made: one, that there will be a strikeout of the provision in the bill relating to the reinterpretation of X-rays; and, two, that there be an elimination from the bill of the presumption of eligibility after 25 years of work.

Between them, these provisions account for about $426 million of anticipated expenditure over the next 5 years, so the amount of the shortfall is going to be evident when there is final action on this bill. Hence, the Committee on Finance wants to take another look at it.

Mr. President, I shall move, as soon as this amendment is laid aside temporarily, to put a terminal date in the bill in respect of the financing of new claims roughly contemporaneous with the date the Finance Committee has set to terminate the collection of the tax.

I believe that it is high time that there be an end to this drain on the Federal Treasury for the benefit of one particular set of victims. We have just heard from the Senators from Alabama of another set, and there are many more sets than that, equally deserving. So, Mr. President, the action of the Senate on this amendment, which Senator RANDOLPH, with his customary fairness, has interposed before mine so that the Senate could act on that first, becomes critically important. I hope very much that the Senate will reject that amendment and leave the terminal date for the tax in the bill.

ORDER FOR NO ROLLCALL VOTES BEFORE 2 P.M. TODAY

The PRESIDING OFFICER. There is an amendment pending.

Mr. JAVITS. Mr. President, I ask unanimous consent that the amendment of Senator RANDOLPH may be temporarily laid aside.

Mr. RANDOLPH. I shall not object, but I wish to make this request, and it may already have been done: that no rollcall votes occur before 2 p.m.

The PRESIDING OFFICER. There has not been a unanimous-consent request or order barring votes before 2 p.m. There has been a consent agreement to vote on the amendment by the Senator from Rhode Island (Mr. CHAFEE) at 2 o'clock.

Mr. RANDOLPH. I make that unanimous-consent request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from New York that

the amendment of the Senator from West Virginia be laid aside?

Without objection, it is so ordered.

AMENDMENT NO. 530

Mr. JAVITS. I call up amendment No. 530.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. JAVITS) proposes amendment No. 530.

On page 20, lines 5 through 9, strike section 7(g) and redesignate the succeeding subsections accordingly, and, at the end of title I, add a new section as follows:

"PROGRAM TERMINATION

"SEC. 116. No new claims for benefits under this part shall be accepted after December 31, 1982.".

Mr. JAVITS. Mr. President, this bill has no terminal date. The Act which it amends had a terminal date of 1981 for any new claims to be filed. I do not want to inhibit the recognition of claims filed up to December 31, 1982, but I do not want new claims to occur thereafter with no tax to cover them. Obviously, that is what is going to happen unless Senator RANDOLPH'S amendment is carried. Even if it is carried, I would still insist on my amendment, for the same reason that the Senate fixed a 1981 date in the bill as it stands today.

This is a very expensive program. We already see, even under the Finance Committee tax, that there is going to be a shortfall to meet the terms of the bill which we have to finance. All our arguments about economy go out the window unless we have a time when we can review this bill in order to stem the flow of Federal funds into it.

Mr. President, we have distributed to every Member a letter outlining the case, which I really think is irrefutable, for ending this program so that Congress may review it by January 1, 1983. If the amendment of Senator RANDOLPH to the Finance Committee's part of this bill fails to carry and the trust fund, based upon the tax rate, only operates until the end of 1982, it seems to me irrefutable that there has to be a terminal date for the substantive part of the bill itself. If, on the other hand, the Randolph amendment should carry, we still have to have a terminal date, because the tax falls short of paying the amount which will be required to be paid due to the provisions relating to the rereading of X-rays and to the 25-year presumption for deceased miners whose employment terminates before 1971. Therefore, we should have an opportunity to review the shortfall and determine whether or not we wish to continue or modify the program.

For all of those reasons, Mr. President, I believe that this amendment is an appropriate one and should be carried.

Mr. President, I ask unanimous consent that the letter addressed to my colleagues, describing in detail the situation that demands a terminal date on the substantive aspect of the bill may be printed in the RECORD as part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., July 21, 1977.

DEAR COLLEAGUE: When the bill to amend the Black Lung Benefits Program (S. 1538) is considered by the Senate today, I will propose an amendment to delete the provision which, for the first time, would make this program a permanent Federal responsibility. Instead, my amendment will authorize the Department of Labor to continue to accept new benefit claims for five more years through December 31, 1982. The amendment will retain the Congressional intent expressed in the original 1969 Act, and reaffirmed in the 1972 amendments, that this temporary Federal benefits program should last only until State workers' compensation systems provide coverage of coal miners who are disabled by black lung disease.

Under current law, all benefits under the Department of Labor program will cease, and no new claims will be accepted, after 1981. Under the amendment, all beneficiaries who qualified prior to that date will continue to receive benefits, and only new claims after January 1, 1983 would have to look to the applicable State workers' compensation agency. This will allow the States time to improve their workers' compensation programs and also will require Congressional review of the Black Lung program within five years.

Under the bill, the Congress will have to review the financing mechanism of the Black Lung Benefits Program within five years in any event. This is because, as reported by the Finance Committee, upon referral from the Human Resources Committee, the one percent ad valorem tax on the sale of coal to be used to pay most future benefit costs out of a new trust fund will be levied only through September 30, 1982, and no provision is made to resume general revenue financing thereafter.

In fact, as stated on page 7 of the Finance Committee report, the tax "revenue is likely to be insufficient, by almost $300 million, to meet the expected obligations of the trust fund for the next 5 years." Accordingly, my amendment terminating new claims after 1982 coincides with the exhaustion of the trust fund's financing under the terms of this bill itself.

It is also important to know why the States have not already assumed complete responsibility for black lung compensation claims and how other provisions in this bill deal with this previously unresolved issue. Under current law, the Secretary of Labor as to Black Lung is authorized to certify State workers' compensation programs that meet certain criteria. The Federal program is not applicable with respect to claims filed by residents of certified States. But, to date no States have seriously attempted to get Federal certification.

The major impediment to certification, which this bill overcomes, has been the understandable unwillingness of the States to assume retroactive liability for the thousands of claims of coal miners who contracted black lung disease before the State laws were amended to provide black lung coverage as a compensable disability. Two features of this bill resolve this problem. First, a trust fund is created to finance past and current claims. Second, as I proposed to the Human Resources Committee, the bill (in Sec. 102 (c)(2)) explicitly relieves any State applying for approval from retroactive liability by providing that no benefits would be required where the miner's last coal mine employment terminated prior to the Secretary of Labor's certification of the State law.

Equitable and adequate compensation of victims of occupational disease requires continued improvement of State workers compensation systems, not the perpetuation for decades to come of stop gap Federal compensation programs like Black Lung. Making the Black Lung program permanent will inevitably invite increased demands for comparable Federal compensation programs for other categories of employees disabled by occupational diseases—textile workers, asbestos workers, iron workers and many others—who can legitimately complain that the Federal Government has discriminated against them by singling out only one group of workers for special treatment. That is the purpose of the amendment I have proposed, to which I urge you to lend your support.

With best wishes,

Sincerely,

JACOB K. JAVITS.

Mr. JAVITS. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum and that it not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JAVITS, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I have consulted Senator RANDOLPH'S staff, and and it is based upon that consultation that I make the following unanimous-consent request:

I ask unanimous consent that, in lieu of any time remaining on the Chafee amendment, there may be 10 minutes before the vote on the Chafee amendment, to commence at 2 o'clock, for further debate on the Chafee amendment, the time to be equally divided—5 minutes to the proponent of the amendment, 5 minutes to the opponents—the vote to occur upon the completion of that debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I ask unanimous consent that with respect to the Randolph amendment pending at the desk, there also be a comparable 10-minute debate—5 minutes to the proponent, 5 minutes to the opponents—the debate to commence immediately after the vote on the Chafee amendment has been completed, and that second debate to be followed by a vote after its completion.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I ask unanimous consent for the same arrangement exactly on my own amendment, which follows the Randolph amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I again ask unanimous consent that I may call for a quorum without the time being charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 2:00 P.M.

Mr. JAVITS. Mr. President, I move that the Senate stand in recess until 2:00 p.m.

The motion was agreed to, and at 1:31 p.m., the Senate recessed until 2:00 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. MUSKIE).

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. LEAHY. Mr. President, I ask unanimous consent that Martin Franks, of my staff, be accorded the privilege of the floor during debate and votes for the rest of this afternoon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Are there 10 minutes for debate now on the amendment of the Senator from Rhode Island, which is pending?

The PRESIDING OFFICER. The Senator is correct.

Mr. JAVITS. Five minutes to a side?

The PRESIDING OFFICER. The Senator is correct.

Mr. JAVITS. Mr. President, I suggest that the Senator utilize his time.
